ENG/AD/5.05.

16th May, 1962.

Sir,

Thank you for your letter of 20/4/62 and your reception report of 8th August, 1961. I have enclosed in my reply a verification card. You rightly guessed that your letter got lost in the post, because we are always anxious to get a reception report of our transmissions and never hesitate to give a Q.S.L. card to a detailed and accurate report of our transmissions.

I am enclosing further our most recent transmission schedule which I hope you will find useful, but note that the schedule is interim and subject to review but we do often supply amendments to the schedule to our regular listeners.

It will interest you to note that the transmission you actually picked is intended for Nigerian listeners. We have of recent started external services on the following frequencies 9.690 kcs on the 31 metres

7.275 kcs on the 41 metres.

We radiate in English 1700-1800 GMT and 1800-1900 GMT in French.

Hoping to hear from you since.

Yours faithfully,

A. CHI. EMEZI,
for Chief Engineer.

Gerry L. Dexter, Esq.,
715, 4th Avenue N.W.,
Waverly, Iowa,
U.S.A.

P/S: In future do not bother to send us stamps as we undertake to bear the cost of the postage to our listeners ourselves.
