Mr. Gerry L. Dexter,
Rt. 1, Maple Rd. Lake Geneva,
Wisconsin 53147 - U. S. A.

Dear Sir,

Thank you for your letter dated April 29th, 1972. We are pleased that you are able to listen to us on this new frequency 9695 KHZ. Your letter is the second one that comes from Wisconsin.

We transmit our Arabic Programmes on this frequency from 0900 up to 2000 G.M.T. We shall be glad if you could and have time to listen to us and provide us with your comments.

Our transmitter is 120 kw and the antenna is a local made folded dipole and within the coming two months we shall be using a fan shape dipole. This fan dipole antenna is a wide band antenna manufactured by Marconi Company, where one could use it for three different bands namely 6,7 and 9 MHZ.

We wish you the best luck and success in your Station.

Yours Sincerely

Farouk Jarrar
