

British Far Eastern Broadcasting Service

SINGAPORE.

Thank you for your letter of...16th August, 1955.....in which you report reception of our transmitting station during the period. 1.359 G.M.T......

Technical reports, which give details of how our transmissions are received, are very much appreciated here and give valuable information for the improvement of our transmissions. A report of reception covering a period long enough to indicate that it is not merely freak reception or deterioration will always receive a personal reply.

Now that we are part of the British Broadcasting Corporation we regret, however, that we have to inform you that it is not the Corporation's practice to verify reception reports which require details of transmitted programme matter.
