EDUCATIONAL PROGRAMS.

COSTA RICA WELCOMES YOU.

A population of 2 million lives in a country the size of West Virginia, 20,000 square miles. Costa Rica is the southernmost country in Central America, situated between Panama and Nicaragua. Costa Rica was discovered by Columbus in 1502 during his fourth and final voyage. Believing that the area was rich in gold, he named it Costa Rica (Rich Coast). Limited population and the small demand for Costa Rican Agricultural products created an economy based mostly on the barter system.

But a more important wealth was developing here. Equal distribution of land and work were the basis of the democratic traditions that continue today.

In the 20th century, more schools, hospitals and roads, plus the official abolition of the army in 1948 settled the base for a country which was become more and more devoted to respect for law and human dignity. Costa Rica is often referred to as a model of democracy and peace.
