Lake Geneva WI 53147

USA

Dear Dexter :

Please excuse my delay not have written you a long time although I got your letters. From here after we'll have correspondence every time and thanks for your friendship to me.

First of all, I don't know how to than you for your kind news you received the signal of RADIO YUNGAY in your country. I don't think so. Actually, I have a very small TRASMITTER juste of 50 WATTS not KILOWATTS and maybe with your help I can get a bigger one never mind second hand made TRASMITTER.

I am teacher of English in a high school here and friends of mountain climbers who visit this area during June, July and August because the time is nice and it is not rainy season. I suffered as you know the avalanche-earthquake of May 31st, 1970 and the money the Peruvian teacher earns is very small or few.

But fortunately, last year (December) the Bristish Emba-ssy in Perú, visited me to Yungay and served as guide and interpreter and in recognition for this work, the Embassy helped me getting two professional tape records, One Console and tower and Antena for my RADIO YUNGAY. They could'nt more, because they did not have much money for that proyect. Many thanks to them.

You told me in your letter of March 20th, that you intend to come to Peru, but I tell you. "Welcome, may house in Yuneay will be small, but my heart is big". I live in a marvelous area called CALLEJON DE HUAYLAS wher you can see the highest nontains in Peru like Huascarán (6,768 Meters high and others and I will be pleased to show you for any time you want to stay.

My dear Dexter. Perhaps you can help me getting a TRASMI-TEER of Sher Wave of 1 or two or more kilowatts power and the easy terms the factories requires. Of course I need more components, but the prasmmitter is more available for me. The British Embassy spent more than 400 thousand dollars, but I am poor and don't know how ..

... to get a new one. Maybe you have technicians (your friends) who can assemble this kind of TRANSMITTER a.m. (amplitud modulada) or never mind TRANSMITTER of FM (Frecuencia modulada). If so, I will beg to the British Embassy to transport that equipment in the name of the Embassy so they can give it to me here in Perú.

Maybe we can take a chance on your trip to Perú. Inclusive, I can go to Lima to wait for you and help you. Besides that, I need 4 big earphones, a console (two) small tape recorders, cassetts in blank and walkie talks if possible. I know this equipments cost less than here.

Please accept me to be your family Mr. Dexter and tell your family you have your second country and city here. Maybe you can contact with some institutions, clubs, Universities, mountain clubs etc. to help me in this project. I know what I want will be a future for my children.

Now a days, the trasmission is arriving at about 20 kms. around but I would like to be listened in Lima and other towns for better advertisements for me.

Receive regards from my family and me especially. I will next letter 1 will send how was my city (YUNGAY) before 1,970 and others specially for you and family.

RAMBERTO GUZMAN TAPIA
DIRECTOR GERENTE
RAIDIO YUNGAY

Money for that project. Many thanks to them.

You told me in your letter of March 28th, that you intend

to come to Peru, but I tell you. "Welcome, my house in Yungay will

be small but my heart is big". I live in a marvelous area called

CALLERON DE HUAYLAS where you can see the highest peaks in Peru

like Huascaran (6,768 Meters high and others and I will be pleased

to show you for any time you want to stay.

My dear Dexter. Perhaps you can help me getting a TRANSMITTER of Short Wave of 1 or two or more Kilowatts power and the easy

terms the factories requires. Of course I need more components, but

the transmitter is more available for me. The British Embassy spent

more than 400 thousand dollars, but I am poor and don't know how
