

Fine Tuning's Proceedings: DXcellence from cover to cover.

1988: The premier edition! Inside the covers you'll find a detailed look at the delta loop antenna; hands-on, hard-hitting reviews of the NRD-515 receiver, R390A and other receivers; articles on using computers in QSLing and propagation; fascinating features about Radio Southern Highlands and DXing New Guinea; a report from the ANARC Committee for the Preservation of QSLs; reviews of DXers' tape recorders, audio filters and other equipment. These and other articles, with charts and illustrations, comprise approximately 200 pages.

1989: Equivalent to nearly 300 typewritten pages in a photo-reduced format. Included are well-illustrated articles such as details on a remotely tuned loop antenna for the tropical bands; a critical look at the NRD-525 receiver and other receiver reviews; articles on four synchronous detection units; features on DXing the Arab world and Brazil; details on caring for your QSLs; two great sections of tips & techniques for the advanced DXer, and useful reference sources; a practical Beverage antenna guide; and more articles & reviews.

1990: Another large edition, with improved printing and photo reproduction. Articles include: further details on the remotely tuned loop antenna design; using major libraries as a DXer's tool; the unique T2FD antenna; FL-3 audio filter; an exhaustive and insightful study of tropical band propagation; a "must have" collection of modifications for the Sony ICF-2010/2001D; a close look at synchronous detection; review of the R-5000 receiver; DXing Central America; plus many more articles and reviews for the SWBC DXer.

1991: Nearly 200 pages, including: a follow-up to last year's article on tropical band propagation; "top band" expert VE7BS looks at the Beverage antenna; reviews of the Icom R-9000, Philips DC-777, McKay-Dymek DR-333, and Racal RA-17; features on the Bolivian SW broadcasting scene and MW DXing from the East Coast; unique accessories such as the NIR-10 digital noise reduction unit and the FC-11 audio filter; an interview with Hank Bennett; a compendium of modifications for the NRD-525; a study of long & bent path propagation; and more.

1992-93: this first biennial edition of *Proceedings* includes: a fascinating, illustrated history of SWBC stations, clubs & equipment of the 1930's, written by Jerry Berg; reviews of the Drake R8 and JRC NRD-535D; the Ecuadorian SWBC scene; vintage communications gear like the National HRO series and the Collins 51S-1; active antennas; I.F. filter modules from Kiwa Electronics; a study on RF grounds; reviews of the Lowe HF-225 and HF-150 receivers; clandestine broadcasting; and more.
