DXERS AND DENIS

## AL NIBLACK

Most everyone who has a serious interest in SWBC DXing has heard of this gent sometime or other. Over the years he has always been a help and a credit to the hobby and any/all clubs of which he has been a member. Few men are respected or held in as high esteem as this gent. In NASWA for 5 years, today Al holds forth as our Flash Sheet Editor. He works for a freight company, is single; Shack equipment, as shown, includes a Hammarlund HQ-120 and a Hallicrafters SX-100. Antenna is a 30' longwire. SWBC QSLs total 75. His main interest in the hobby is logging and reporting stations of interest, new stations, new frequencies, and changes that come day-to-day on SWBC bands.

## ED SHAW

A NASWA member for four years, Ed has been active one way or another in the club from the day he joined. Presently serving with the USN, he is married and has two children. As shown in his den pix, he uses a Hallicrafters SX-130 (modified), and his antennae are a folded "V" dipole, and a 14AVQ. SWBC QSLs now number 140. Says Ed, "Besides the 'joys' of QSLs, I have found that corresponding with fellow members to be an extra hobby pleasure everyone should try." We might add, Ed will soon be officially named Corresponding Secretary for NASWA, a post of importance and one that only a fix like Ed can handle worthily for good of the club. We might mention also, were it not for his stepping forth voluntarily, there would be no editions of FRIENDX while our Executive Secretary is hospitalized. Without saying, Ed has both the head and heart of a sincere friend and member. Many thanx are due him!

## GEORGE SCHNABEL

Known for his "in detail" reports and articles in FRIENDX and other publications, George has been with NASWA for 3 years and presently holds position of Contest Editor. He is married, with one son. Present receiver is a Drake SWA (see pix), and antenna is a longwire. SWBC QSLs total 88. Main interest in the hobby is listening to timely events, DXing Latin America and Middle East as well as African stations.

## ROGER CAMIRE

Seldom heard from, Roger is busy doing Freq. Recommendation Committee work for ANARC. He heads the FRC. A produce department manager by vocation, he is married, has been with NASWA for three years. As obvious by his shack pix, he has an assortment of gear including a TMC-GHR-90 rx, plus others. To boot, he has 12 various antennas (how's that grab some of you apartment dwellers?) It isn't surprising to know that he is interested in antenna design and experimentation along with DXing for which he has thus far collected 107 SWBC QSLs.

## CESAR OBJIO

One of the best known of Latin American DXers is member Cesar from the Dominican Republic. Many were the times he has been of service to stations as well as to DXers and clubs. He speaks and writes excellent English. According to the pix, he uses an HE-30. We do not know his antenna at present. Cesar keeps busy trying to keep tabs on the rare/low power LA stations so that he can keep other DXers updated and informed. Many otherwise unknown facts and data have come via his efforts and willingness to share.

## MIKE MACKEN

We haven't heard from Mike for awhile, but did have his shack pix on hand, thus thought to include it. He has been with NASWA for a number of years- is now attending college and so far as we know, is still unmarried. His rx, an SX-100 has gained him 78 SWBC QSLs thus far. Until recently Mike edited a column for ASWLC's SWL, but according to word received, he resigned due to other activities/demands.

GET THOSE B & W FIX IN SOON!! SUPPORT FRIENDX
