Award certificates have now been printed and shipped to Dan Henderson for the Pacific DXer, Emissora Nacional DXer, VoA, and ORTF awards. Above drawing by NASWA member Diane Levesque appears on the Pacific award.

CHARLIE'S NEW YEAR'S RESOLUTIONS

Here we are, having stepped or fallen as the case may be, into a bright New Year! And while 1975 is still in its youth, I thought I'd brighten it up for you by sharing my New Year's resolutions. It'll be a kind of preview for you of what I'll be accomplishing over the next twelve months. And, as I offered some years back, you are welcome to check me in December in case you really doubt that ol' Charlie will keep every one of them!

1. Make a renewed effort to hear Radio Hong Kong.
2. Learn how to spell "Podjono."
3. Join the Radio Olinda DX Club.
4. Start keeping a log.
5. Write an article about Radio Nederland for my club bulletin. It's about time some of these lesser-known stations were covered by the DX press!
6. Raise the dues for membership in the International WorldWide Continental DX Association. The way stamps are going up I'll have to cut down on my reception reporting if something isn't done!
7. Arrange for a visit to the Radio Mogadishu monitoring station.
8. Get all the new HCJB QSL cards.
9. Upgrade my shack. About time I got a pair of headphones and added a wire recorder.
10. Learn to recognize Mid-Waghi and brush up on my Police Motu.
11. Send a spicy letter to Radio Zanzibar.
12. Buy a cerebral filter from my DX-150.
13. Start a private newsletter specializing in Pacific Ocean stations operating on 80 meters.
14. Accept that offer of a lecture tour on the design and use of logging sheets and bandspread calibration charts.
15. Do some research into the history and development of Ethiopian interval signals.
16. Put my Research and Development team to work on building a gadget which will show an electronic digital readout of sunrise/sunset times at any point in the world for anytime of the year. Should also readout world postal information, daylight time conversion factors and contain a three channel MWV monitor. All in handy attache-case size for under \$700.
17. Start a "YL of the Month" fold-out feature in the IWWCDXA Bulletin.
18. Check out a rumor of an underground unit operating among the vice presidents of the State News Radio Club. The group is believed to favor adding a new section on VLF reception using car radio converters. Front piece is suppose to be green and the entire bulletin would be re-aligned so that all the colors fall in the proper spectrum sequence.
19. Replace the dial lamp in my DX-150.
20. Dust my shack and set a mousetrap.
21. File all those 1970 Havana schedules away.
22. Take a cruise through the Indian Ocean so I can log goodies like the Seychelles, Maldives, Mauritius and Galapagos.
23. Get my antenna unsnarled from the weeping willow tree in the backyard.
24. Attend a hamfest and sell my collection of QSL card samples.
25. Chop down the weeping willow tree.

And that should be enough to challenge even my ability to get things done! Yours are certainly simpler and fewer in number, so if I can keep mine you have no excuse for not keeping yours. Calibrate your bandspread, verify KGEI and keep tuning in Loudenboomer in 1975!

Ouch!

or

How to be the S W C Editor without trying!
(or: Sorry, Charlie!)

Let's all give a mighty round of applause to Ed Shaw for his top-notch work as Editor of SWC these past many months. I, for one, have enjoyed very much the quality of articles, technical notes and comments that have appeared in this column under Ed's able direction. Before long, each of you will find out how much he will be missed! Seriously, though, this section is only as good as you make it. Anything that has to do with the hobby can, and will, be used on these pages.

Politics, religion and sex have often been regarded as "forbidden" topics. The reasons for this are varied and much too controversial to be listed here. I would like to modify some of those "rules" and say that if the subjects have anything to do with short wave, send it in...and if it is printable, I'll print it.

There have been many occasions when several of you have spent weeks researching material for articles that were very well written and interesting. Why can't more of us do the same thing? Even if some of us can't, I am sure that there is something you would like to write about, even if it is just a small paragraph. A page of SWC can be reserved for a "DX Forum" if there are enough people interested. DCN'T let that last sentence scare you. By "enough" we mean more than two. If two DXers get together, there will undoubtedly be that many points of view on the same subject. Another idea is that each of us receives information about stations as they send us their QSL's, schedules, or whatever. Over a period of time we should have enough of the material in that particular station's folder to write up a summary about that station's activities. Everybody likes to see their name in print - even the guys on The 10 Most Wanted List!

Print, write, type, draw - I do not care how you get information, etc., to S W C, but get it here! You may know something that would help another DXer in furthering his career in this fantastic hobby of ours. Pictures and illustrations are most welcomed. If you write a blurb about a station, send in their mast-head as an illustration. Any material will be returned upon request if an SASE is enclosed.

As many of you know, I have as little experience in the hobby as anyone. After only first heard of short wave listening a little less than three years ago, my experience is limited to what I know - and that is not much. So, if I can put forth some effort based on my limited knowledge, just imagine what you guys who know more than I can do! SWC is not the only column that needs your support. "Log Report", "Listener's Notebook", "QSL Report", and the "Clandestine Bulletin" editors would also appreciate hearing from you. As a member of many clubs around the world, I will have to admit that MASMA is the best SW Club in existence. The reason for that is YOUR support. DO IT TODAY!

MORAL: A CLUB CANNOT EXIST WITHOUT THE POWER BEHIND IT: Y O U ! !

QUE ES LA FEDERACIÓN?

by

Ernst G. Löhe

I'll bet you don't know. Even if you have listened to HCSK on 4960 kHz. One morning last year I tuned into a station that I had never heard before. Even the language was unknown and the music was unusual. Finally a Spanish announcement was made: "Radio Federación". A new and exciting catch indeed! Then, the normal routine: making notes, writing a report, hoping for luck. Some weeks later the mail man dropped sort of a newspaper in the letter box. It was something called "CHICHAM". Chicham...what!? It's Indian, I found out, and means message. And: it really is!

There are some 17 thousand Ecuadorians who are called "Shuar" (Indios living between the Rio Paztaza and Rio Santiago in the so-called "Oriente" of the country.) In the early '60's some people volunteered to bring a simple message to these Indians in order to establish self confidence, and to tell them about their history. Indios "...to live like human beings with elementary rights, free to decide their proper way, and to take care of their very own soil. Indios who should look ahead as contributors to society rather than accepting whatever civilization may offer." It means they must learn about their culture, heritage and descent. More than ten years have proved the success of this task. Today, they are a proud people again!

And this is "La Federación", too!

HCSK - Radio Federación with 5 kw broadcasting from Sucúa 16 hours daily in Spanish and the Indian language of Shuar, including 5 hours for its 80 Escuelas Radiofónicas in its rural areas. Programs are directed to 'alumnos' in the first and second grade. In addition, 90 students are attending Secondary and 37 are about to gain their Bachelor degree in order to join the Technical Institute or the University. Radio teaching is also focused on agrarian reform, health education, and the control of tuberculosis. In 1961 the first course was held for 23 students who began a movement among the Shuar which is effective even to this present day. Sucúa became the cultural center and today conventions, festivals and many other events provide the opportunity for people to meet people.

HCSK also entertains. Music, songs and legends of the Shuar are meant to propagate the Indian culture. A culture which dates back to the dawn of history. "La cultura Shuar" is confronting many cultures, one of which is encroaching civilization. Without any doubts, Indian culture has to offer many aspects and values of life to us. That's why they want to speak by means of HCSK and "Chicham". They call on all people, on public opinion, students, workers and campesinos alike. To raise their voice not only to defend their own rights but also to proclaim a sense of righteousness which applies to all mankind.

So, next time around when you hear an unknown radio signal...listen! It might be a "chicham", a message....

RADIO NACIONAL EN DOS IDIOMAS

by

George Schnabel

Today the mailman brought a small, heavy manila envelope; it had to be signed for! No stamps nor any markings on it to indicate whether it had traveled by air or surface mail. In the body of the address, and also in the enclosed verie letter, I'm addressed as "Ciudano"...somewhat reminiscent of the French Revolution!

Along with the verie letter came a neat little booklet entitled "RADIO NACIONAL DE VENEZUELA BOLETIN" written in carefully honed, scholarly Spanish.

"During the 3rd Sea Conference was an important advancement of

CONDUCTORS AND NONCONDUCTORS

The physical structure of the atoms in a material determines whether or not it will conduct electric currents. In a ring around the nucleus of each atom there is a number of electrons. The fewer the number in this outer shell, the more easily other electrons can break away from each atom to become free electrons which are able to carry a current flow when a voltage is applied to the material. Thus, electric energy may be transferred from one point to another by free electron movement.

RADIO NACIONAL DE ESPAÑA
EL DIRECTOR DE LA RED

Spain began her first adventure in radio broadcasting at the 1921 World's Fair in Valencia. The first broadcasting station, Radio Iberia, began operations in 1923, in Madrid, and today's senior station, Radio Barcelona, was set up in 1924.

From the very beginning, the State assumed control of the new means of communications: the Constitutional Monarchy (decree of 27 February 1923), the Republic (Law of 26 June 1934) and the Nationalist Regime since 1936, have followed the same principle.

There was little progress in radio broadcasting up to 1939. The State could not fully provide for the development of the new public service, and private enterprises could only afford small installations. The historical E.A.J. local stations served the public as well as they could.

On 19 January 1937 the official Press and Propaganda Agency undertook radio broadcasting as a national service through its first station, Radio Nacional de España, in Salamanca.

The creation of a national broadcasting service took place in 1924 under the name of "Red Espanola de Radiodifusion" (R.E.D.E.R.A.), and the first Dirección General de Radiodifusión was founded in the Ministry of National Education in 1945.

In 1952, the 1934 broadcasting law was amended and new radio and television regulations were established. The newly erected Ministry of Information and Tourism took charge of national broadcasting as a public service. The Dirección General de Radiodifusión became Dirección General de Radiodifusión y Televisión in 1958.

Spain's adventure into television began in 1952, after an experimental stage from 1948 to 1951. Televisión Española (T.V.E.) was formally inaugurated in 1956 and at the same time the creation of the first national television network was planned. (Ed. note: I saw TVE last year from a Gibraltar monitoring post. Be assured that there are the same amounts of advertising as here in the USA - although with a bit more imagination - and the programming is mainly that of an entertainment nature, i.e., variety shows and musicals. I only recall seeing one drama in 7 days.)).

Spain is a member of the European Broadcasting Union (E.B.U.) and the International Telecommunications Union (I.T.U.).

From 1960 on, the Dirección General de Radiodifusión y Televisión comprises two major departments: Subdirección General de Radiodifusión and Subdirección General de Televisión.

The Subdirección General de Radiodifusión rules over the national broadcasting network, which includes the stations exclusively operated by the State, i.e., Radio Nacional de España network and Radio Peninsular network and also other stations not operated by the State, but subject to official regulations. The latter are divided into private stations and institutional stations, according to whether they are operated by a private enterprise or by an Institution such as the Movimiento Nacional or the Catholic Church.

Radio Nacional de España can be heard daily in English at 0200 GMT and again at 0445 GMT on 6065 kHz and 11925 kHz.

Malta Preparing Independence

VALETTA (AP) — Malta will soon sever all formal ties with Britain and reorganize itself as a republic, according to Prime Minister Don Mintoff.

Malta, a member of the British Commonwealth, gained partial independence in 1964. But the constitution left responsibility for defense and foreign affairs to the British.

Mintoff said his government will present plans for a new constitution by the first of next year which would make the island fully independent.

"RADIO CORDAC"

compiled and edited by

Keith Martin & Frank Orcutt

Radio Cordac is an interdenominational, Protestant Missionary Radio ministry with broadcasting facilities located at Bujumbura, capitol city of the Republic of Burundi, and short wave transmitters located at Nyakarogo - 25 miles to the north-east.

Radio Cordac began broadcasting on Christmas Eve, 1963, on a 250-watt medium-wave transmitter. There are now four transmitters: one medium-wave, two short wave, and one F.M. The short wave transmitters are 2.5 kw each. The programs are religious, educational and informative and are broadcast in French, Kirundi, Kiswahili, and also English. Many programs are produced in studios from other parts of Africa, Europe, America, New Zealand and Australia. The mail response is increasing each year and reports have been received from all over the world.

Radio Cordac plans soon to install an omni-directional antenna which will cover up to a radius of 300 miles. Future plans call for six Log Periodic Antennas and will be driven with transmitters ranging up to 10,000 watts.

The staff of Radio Cordac is made up of missionaries and Africans. The Africans, who far outnumber the missionaries, are from Burundi, Rwanda, and Zaïre.

Cordac also sponsors a four-year Electronics Institute. This school teaches the arts and sciences of radio broadcasting.

Radio Cordac is a very rare station in North America, but as of late several N.A. DX-ers have been fortunate to log this station. A suggested time to try is at 0327 GMT sign-on on the frequency of 4900 kHz. Reception is very tough, though, due to the fact that Radio Juventud has a strong hold on 4900 kHz.

Radio Cordac is interested in receiving reception reports and correct reports are verified by a full data QSL card. Return postage is appreciated as the station is on a very tight budget. Write to:

Boite Postale 1140
Bujumbura
Republic of Burundi

by Carroll R. Patterson

The Bashkirs, a Turco-Tatar people, were conquered by the Russians in 1556; however, they obviously mean to retain their identity, language and culture as they have rebelled several times. The Bashkirs are the dominant nationality of the republic's 3,304,476 people. There are many Russians resident there, however. The Bashkir Republic has an area of 54,233 sq. miles and is located in eastern Russian Republic in Europe, in the southern Urals. The terrain is plateau and mountain and is watered by the Ural, Belaya and Ufa rivers. The republic's extensive forests and valuable mineral deposits are its most important natural resources. The main occupations of the Bashkirs are the growing of grain crops and horse-raising. There are smelting and metallurgical plants in the capital city of Ufa. Ufa, the Bashkir capitol, a city of 630,000, is largely a Russian city and is located at the junction of the Ufa and Belaya rivers. It was founded in 1574. In modern times, the Bashkir Republic's capitol has achieved some prominence as it is located within the Ural Industrial area, a most important area of the Russian Republic containing many heavy industries.

The only shortwave broadcasting within the republic is at Ufa which operates on a frequency of 4485 kHz with an unknown output power.

Travel Log

GOING ON A TRIP ???

TAKE YOUR RECEIVER ALONG ! ! ! ! !

In every DX-er's life, he reads of exotic stations that people all over the world have been fortunate enough to receive, and he dreams that one day he may be able to hear those stations. If the listener lives on the East Coast of the USA, he longs to hear the low powered Asian stations that are commonly reported by West Coast DX-ers. If he lives on the West Coast, he envisions tuning in low powered stations in Angola, West Africa, Turks Islands, and Latin America. While his receiver in some cases may be a limitation, the laws of physics (particularly those of the ionosphere and the sunrise/daylight effects on the F layers) generally prevent predictable reception of those DX catches. However, with the advent of solid state receivers which are small, lightweight, and require low voltage and low power for operation, the DXer is given a golden opportunity to enjoy the fruits of other geographical locations.

If you as a DX-er are planning a trip, be it vacation or business, TAKE THAT RECEIVER ALONG!! It has been my good fortune in the past 18 months to be in a position to take my receiver along to many parts of the country, and have been able to enjoy listening to some fairly rare DX stations. It is very difficult for a West Coast DX-er to imagine the surge of emotion that sweeps over the DX-er from the East Coast when he hears CLEARLY the Indonesian announcer say "Inilah Radio Republik Indonesia, sorong, Samarinda, Bandung, Corontalo, or Jambi". An East Coast DX-er must have an exceptional day just to listen to any one or two of the above stations. To be able to hear Radio Khusus Pemerintah Daerah Kaputatan Sumbawa with nice Indonesian music regularly must be just as thrilling for an East Coast DX-er as that felt by the West Coast DX-er who visits the East Coast and hears WS18 from Turks Island, or picks up Radio Ecclesia in Angola for the first time. While the level of expertise of the DX-er is often measured by his achievements in "longest range, lowest powered station heard", he himself receives a great deal of satisfaction in hearing stations others have reported often, but have been unavailable to him. This also allows him to provide the DX-ing community with extra information that should contribute to his own improvement and the improvement of the hobby in general.

You may say--OK, I have an SPR-4, SX-190, Barlow-Wadley, or another receiver that can operate off batteries or a 12-volt supply. Just how do I go about DX-ing in an area which (1) has no electricity, (2) is essentially "foreign" to me, and (3) has no facilities for antennas? First of all, if you are on vacation (or business), generally an automobile is available (be it your own or a rental car). These days, very, very few cars are not equipped with a cigarette lighter. Detroit has built this luxury into all late model cars and it is the DX-ers salvation for power! If you have a car and a map, you can generally find a state or national park, or any electrically quiet location that is not encroaching upon private property, and DX from there. It has been my experience after 5 trips to the states of Washington and California, and looking around my state of Maryland, that there are many locations that can be used. You say,

"OK, I now have a place picked out and my receiver is in the car. What about antennas?" This is a very good question. I learned through experience that the best method is to never leave an antenna anywhere! Always put up your antenna just prior to your listening period, and take it down when you are finished. This will prevent any disappointment that may be incurred when you come out to listen and your antenna has been removed. Also, in following this procedure, you are not always "cluttering" up the local area, which is looked upon with great displeasure by park rangers, policemen, and other public officials. Always use antennas with insulated wire to prevent any electrical shock problems. Besides, this type wire is easier to handle anyway.

You may ask, "Just how do I erect a temporary antenna?" I simply attach one end of the antenna to a 6-inch section of 2" x 4" lumber and toss the piece of wood over a branch about 15-25 feet high. Generally, this is easily done and is also easy to remove. I selected a spot for DX-ing at a Scenic Overlook in the state of Washington. The antenna was tossed over a tree limb 15-25 feet high. With the 2 x 4 section, the 80 foot long antenna wire could be pulled taut without being pulled out of the tree. The other end of the antenna was wrapped around a sign post erected at the overlook warning of the abrupt drop-off. The wire was then brought into the auto window, connected to my antenna tuner, (which is recommended for matching purposes), and then to the receiver. You may ask, "What about power for the receiver? Doesn't the automobile ignition keyhave to be in the "on" position for the +12 volts to be available at the cigar lighter?" The answer is "no" for almost all late model cars. Also, your solid state receiver does not use much power. I have listened for 8 continuous hours in a Plymouth Duster with no effect on the car's battery. You may also enquire about lighting for DX-ing in the dark. For SX-190 owners, a flashlight is a necessity. It is also useful for other receivers and is useful to read the clock for accurate time. It should be noted that I do not recommend that the overhead light in the automobile be left on. This is TOO much drain on the battery for long periods of listening. For time accurate within 1 minute, I use a simple \$4 WESTCLOX Travel Alarm Clock, set to WWV at the beginning of the listening period. I have this to be very beneficial and cost effective.

You may ask, "What if a policeman stops by and asks what's going on?" Well, policemen in general are only interested in protecting public property and interests. I have had at least 2 occasions when policemen or park rangers have seen me DX-ing early in the morning (in the dark) and have inquired as to what I was doing and was I OK? If you will explain honestly what you are doing and even let the officer hear what you are listening to, you will find them to be perfectly courteous and satisfied that you are "OK". I let a park ranger in the state of Washington hear Port Moresby, Papua, on 4890 KHz one day, and he was so impressed he wanted to hear more. I actually lost some valuable DXing time due to him--Oh well, all in the name of public relations for DX-ing!!

You may also ask "What if I'm going to a foreign country?" Well, while my experience in this area is limited to Canada, I encourage you to check with customs officials in that country and always, ALWAYS DECLARE YOUR RECEIVER and keep the receipt!! It would be very sad to have to part with or pay duty on that receiver at the border on your return trip because you did not declare it initially. The Canadians, in particular, are a very friendly people, much more than typical Americans, and they have been very courteous about DX-ing in their country. (I would like to challenge any DXer who has taken his receiver to other foreign countries to share his experiences via FRENEX. It surely would air others who could learn from your experiences. How about it, John Campbell?)

In conclusion, you can sample the DX-ing fruits of other geographical locations by taking that receiver along. You will have some great DX-ing experiences, and will further your knowledge of the DX-ing hobby. Remember the following guidelines: - 1. Use that cigar lighter in the automobile as a power source. 2. Find a noise-free location--that is generally easily done. 3. Be innovative and a very accessible antenna location is generally available. 4. Follow the Golden Rule: treat the area that you listen in as if it were your own property. 5. Be honest with inquisitive people and you should expect no problems. Just follow these guidelines and the luscious strains of The Songs of the Coconut Islands (Love Ambon), or ID's such as "This is Radio Turks Islands" will be available to you simply for the effort.

Good DX-ing, Travellers !!!

Hungarian Airmail

Hungary was one of the first countries to issue special stamps for airmail. Stamps were overprinted for this purpose as early as 1918, and several airmail issues were printed shortly afterward.

**NOW,
YOU KNOW:**

Many residents of Gomera, an island in the Canary Islands, have a whistling language, allowing their conversation to carry from hilltop to hilltop.

HELP SAVE

Deutsche Welle

ENGLISH DEPARTMENT

forwarded by

Charles J. Orekar

I have been a member of NASWA for the past eight years, and am also a member of the WORLD WIDE DX CLUB of Germany. In the last bulletin of the WNDXC (October issue) there was an interesting article which is being quoted here for your information.

"To all DXers and friends today I would like to relate a sad story which may take place in the near future, if we as SWL's and DXers don't help. Sometime ago the WNDXC received a letter from our good friend Larry Wayne at Deutsche Welle and I would like you all now to read this letter with a little thought and concern to help Deutsche Welle preserve its English service to North America and throughout the world:

"Dear Jackie,

When writing to you last, I couldn't know of the developments that were to take place at Radio Deutsche Welle at the present time, so here is the latest for all your readers. I certainly hope enough response can be generated to preserve a very important service.

I'm referring to our North American English program, of course, which is threatened with the extinction should Mr Walter Steigner "push the button". Steigner is the Intendant, or managing director, of Radio Deutsche Welle in Cologne, and has voiced the intention of dissolving the North American Department. It would be a deciding blow to listeners in the USA and Canada (and elsewhere too), and would leave West Germany without an English voice to North America. This would, in effect, make East Germany the sole Voice of Germany to English speaking people in North America. A very lamentable development, should it occur.

I think you will agree that West Germany must be represented in English to an English speaking majority, and cannot hope to improve its image in the USA and Canada via German language broadcasts alone. Yet this is the current plan being entertained by Mr Walter Steigner and the West German Radio Advisory Board: German language broadcasts to North America 12 hours daily.

English language broadcast to North America = 0 - - it's not a nice prospect, is it? Let's hear it loud and clear from all DXers, Jackie. We have a very fine, dedicated team here, and we'd like to keep up the good work.

Sincerely yours,
Larry Wayne"

Jackie Masek, WNDXC president, concludes by saying, "We can help save Deutsche Welle's English Department. It's not too late. Write to Mr Steigner and tell him how you feel. Write as many letters as you can, otherwise we may not have the enjoyment of listening to Deutsche Welle in English."

(ed. note: This is an excellent opportunity to get your opinion read by a major broadcaster, and possibly have them acted on. A few moments of your time to write a few paragraphs would not hurt. tks!)

China Guide

It's estimated that about 3,000 Americans will be visiting the People's Republic of China within the next year. If you're going to be one of them, you're advised to spend \$5.95 plus 25 cents postage on a 224-page book called "The American's Tourist Manual for the People's Republic of China."

It's put out by International Intertrade Index, Box 636, Federal Square, Newark, N.J. 07101 and includes about everything you should know about getting along in that land that was for so long a mysterious no-no.

It even reproduces a typical 40-page menu. As a matter of fact, it's a book worth browsing in, even if you have no early plans for a trip to China.

Three Systems

VILA, New Hebrides - These South Pacific islands have the world's only condominium government with three sets of laws and governments - British, French and joint. The condominium, set up in 1906, features separate French and British police forces and two jails.

Insects Kill Trees

OTTAWA - Insects kill about 250,000 acres of mature forests in Canada annually

U.S. and Algeria

The State Department says the United States and Algeria have decided to immediately restore full diplomatic relations. Algeria severed those relations immediately after the 1967 Middle East war. That leaves only Iraq and South Yemen as Arab states with which the United States does not have diplomatic relations.

CLANDESTINE BULLETIN

Larry Magne, 15 Central Avenue, Philadelphia PA 19111 USA, Tel. 215-379-2574

VOICE OF THE MALAYAN REVOLUTION NOW IN ENGLISH

No sooner did last month's article on the Chinese-based "Voice of the Malayan Revolution" go to press than the BBC Monitoring Service flashed that, on November 14, 1974, the station inaugurated a daily half-hour broadcast in English from 1500-1530 on 11830 & 15790 kHz. This ought to be audible in several parts of North America and elsewhere.

There have been some other changes, as well, and these will be given next month after they are received from Caversham Park.

NORTH KOREAN CLANDESTINE REVISES SCHEDULE

From December 1, 1974, the North-Korean based "Voice of the Revolutionary Party for Reunification" has revised its schedule, which is now:

English: 0530-0600 on 1135v, 4557v kHz

Korean: 2000-2300 on 1135v, 4557v kHz

0300-0530 on 1135v, 4557v kHz

1000-1410 on 1135v, 4120v, 4557v kHz

1410-1600 on 1135v, 4557v kHz

*1030-1100 Sunday on 645, 655, 685, 735, 800, 3320, 6400 kHz

*via KCBS, Pyongyang, schedule not verified since December 1

The station's Korean ID is "Tougil Hyongmyongdang Moksori Pangsong imnida", and the IS consists of 9 major echoing chime notes. Sign off is with an anthem, then the "Internationale". No, the station does not verify, either via KCBS or its Haeju site. (Isao Ugusa, Japan, and the BBC Monitoring Service)

CIA BLACK CLANDESTINES ALIVE AND WELL

From mid-September, 1973, until late May, 1974, three Indochinese black clandestine stations were active and obviously using the same facilities, judging from the timing of the broadcasts and their appearance/disappearance, which suggests, as they were beamed to separate countries, they were American -- rather than indigenous -- operations. Around October and November of this year two of them reappeared. So, before they drop out again, here is the story, in brief.

Especially since the phasing out of overt U.S. operations in Vietnam, the CIA has further concentrated its clandestine activities in its Vientiane fortress-like hideout. Included in the personnel are some whose background in black propaganda makes their talents well suited to the implementation of effective black radio stations, and, in fact, one such station operated from Pakse, Laos, early in the summer of 1970, faking Prince Sihanouk's "Voice of the United Front of Kampuchea".

In September, 1973, three obviously black propaganda stations appeared: the "Voice of the People of United Indochina" on 6803 kHz, "Radio Destiny of the Motherland" on 6990v kHz, and "Radio Liberation of the Southern Part" on 6320v kHz. These vanished simultaneously the following May. The first two were Cambodian-language operations, while the last faked the Vietcong's "Liberation Radio" and was entirely in Vietnamese.

The stations that reappeared also revised their hours of operation, which follow. Radio Destiny of the Motherland, the Beloved Voice of Peace ("Withayu Vissna Meathopoume Samleng Cheat Sralan may Santaphial"). Beamed to soldiers of the pro-communist Khmer Rouge guerrillas, its programs consist of Khmer-language news on the hour, followed by Western and Khmer popular music. Although transmitter power is not known, the station is weak. Editor Bob Hill notes it regularly in California, however.

0700a-1600 on 6990v kHz

The ID is, "Thini, Vithayu Vissna Meatho-phoume Samleng Cheat Sralan nay Santephiap". Although the frequency varies above and below 6990 kHz, it has been reported lately in the 6991-6992 vicinity. The exact time of sign on has not been established, but it is already into regular programming by fade in at 0800 in Japan. Radio Liberation of the Southern Part ("Dai Phat Thanh Giai-Phong Nam Bo"). Imitating the Vietcong's "Liberation Radio", this station announces itself as "Radio Liberation of the Southern Part, the Voice of the Provisional Revolutionary Government of the Republic of South Viet-Nam". Except for two words ("Southern Part"), the ID is identical to that of the real station, and the sign on music and interval signal are virtually identical. Transmitter strength is modest, which makes it difficult to sort out from Peking's powerful Foreign Service, also more or less on the same channel. The black station broadcasts entirely in Vietnamese; the new schedule, given below, is only partial, as it hasn't yet been fully established, but the former schedule included transmissions in the 0400-0800 time period.

0900-0945, 1200-1245, 1400-1445 on 6320v kHz
The ID is, "Day la dai Phat Thanh Giai-Phong Nam Bo, tieng noi Cua Chinh Phu Cach Mang Lam Thoi Cong Hoa Mien Nam Viet-Nam". The interval signal consists of light Vietnamese orchestral music, then the sign on is with the "Liberation of the South" anthem ("Giai-Phong Nam Bo"). Of course, neither this nor any other black clandestine station verifies. Nothing is played at sign-off.
(Isao Ugusa, Kricha Wasanasong and Victor Goonetilleke, of Japan, Thailand & Sri Lanka)

MIDDLE EAST REPORT

by
Offer Barth, Israel

Haifa's Offer Barth offers some monitored observations for the CB readership, viz.: Radio of the Patriots. This anti-Shah station, believed to be located in Iraq, is now noted jammed from 1030v-1130v & 1515v-1615v on 7230 kHz. Prior evaluation suggests the jammers are part of the "Voice of Iran" complex.

Voice of the Middle East People. No longer heard on 7200 kHz.

Voice of the Arabian Peninsula People. ("Saut ash-Sha'b al-Jazirah al-Arabiyyah").

Operating via facilities provided by Radio Baghdad, this anti-Saudian Arabian government clandestine is now noted on the new fq of 8885 kHz (ex-11950v). The full schedule is 0400-0457 & 1200-1257 in Arabic on 7195v, 8885v, 9525v, 9570v kHz.

Steadfast. This Libyan operation is no longer heard and is presumed gone for good.

Voice of Palestine ("Saut al-Filistine"). The Samaa relay of this PLO operation is now noted on the new channel of 7275 kHz (100 kw) //former 5805 (25 kw) and 1202 kHz from 1600-1630. The Cairo relay is now once again 1730-1830 on 872, 9755 kHz.

(Thanks also to Victor Goonetilleke and Isao Ugusa for confirming some of the items).

NEW DETAILS EXPOSED ON RADIO PATHET LAO LOCATION

As you may have seen in CB and elsewhere, Japanese journalists have been visiting the once-forbidden Sam Neua Pathet Lao headquarters in "liberated" Laos. Among other things, they were shown the facilities of "Radio Pathet Lao", which Western intelligence has insisted is located near Hanoi. Also, Bob Bundy's 1972 monitoring further indicated at least part of the complex was located there. The question, therefore, was who is lying, and in that regard an observation by Japan's Hiroyuki Nagase is of help.

He noted that the station house consists of two rooms -- a studio and a fabrication room, beside which stands a 5-meter high antenna for use on the 10 meter band, far above the bands used by Radio Pathet Lao. He noted that it would be impossible to place 4x10 kw transmitters (the value assigned to each transmitter by the Director, Mr. Sisana Sisane) in that small station house. He therefore concluded that what they were shown as the "Radio Pathet Lao" site was merely a studio and small point-to-point transmitter to relay material to the actual site elsewhere. And, of course, that site is Hanoi.

The schedule as given in the December CB still holds, and Victor Goonetilleke confirms that 6215v is ex-7310. That channel is not only the strongest (say, 50 kw), but is the first channel your editor has consistently noted in Philadelphia, even during the afternoon (viz., 2230) long-path opening.

Heretofore, nobody was aware of a 10 meter PTP channel for Radio Pathet Lao, but sooner or later these broadcasts may be traced in Asia or elsewhere, as skip on that band sometimes allows for unusually long-distance reception, as any CB aficionado will attest!

(Thanks to Isao Ugusa for his help in securing this information, plus Lars Ryden, the BEC Monitoring Service, Bob Bundy, and Victor Goonetilleke.)

BOLIVIAN STATION TAKEN OFF THE AIR

by
Tony Jones, Paraguay

As CB reported in the December, 1974, issue of FRENDX, Bolivian rebels had seized radio broadcasting stations in Santa Cruz. This information came from U.S. news sources which, in turn, obtained them from Radio Panamericana of La Paz, the capital city.

Tony Jones writes, in this regard, "Reports from Argentina indicate that the Bolivian station, Radio Panamericana (580 & 6035 kHz) has been closed by the authorities, following the recent abortive coup in that country. Seems to be correct, as only the Brazilian is noted on 6035 kHz at present."

Incidentally, although it is not clandestine information, Tony notes that Argentina can be added to the roster of countries engaging in jamming, namely of the leftist Uruguayan station, Radio Colonia on 550 kHz.

WHAT CAN I HEAR?

(Part 3 of a series)

In the last two issues of "Clandestine Bulletin", you have gotten an idea of how and when it's possible to log some of the major sub rosa broadcasters in Europe and Asia. Now, with the DX season here and apparently giving unusually good African DX, CB will give a summary of what's happenin' in Central & Southern Africa.

The unique characteristic of African clandestine broadcasting is that it is not really very clandestine. Put another way, the broadcasts usually represent outlawed guerilla groups and neither the group nor their broadcasts are considered acceptable by the authorities in the target zone. However, the broadcasts are not over hidden transmitting facilities, but simply are given as programs over the legitimate radio facilities of nearby "friendly" broadcasters.

With Portugal's speedy decolonialization, some of these broadcasts have been terminated, and those remaining are no longer considered forbidden. Portuguese army jamming has ceased, and some of the formerly-outlawed groups are now allowed to utilize Portuguese radio facilities in Angola, Mozambique and elsewhere.

So, to not confuse things, we'll dub these "revolutionary" broadcasts. When can these be heard?

Along the East Coast and Midwest, the afternoon usually is when the opening begins, and it lasts during the DX season until the wee hours of the morning. Here, in Philadelphia, for example, central West Africa is fading in on the 60 meter band around 1900 and fading out around 0900 GMT. Propagationally, Africa appears to shine when the North Atlantic path is somewhat disturbed; this can be determined by the WWV propagation forecast at the 14th minute after each hour (a forecast of 5 or 4 and a K index of 3 or more and tending to rise or remain steady are clues the African path to NA may be good in the coming hours).

What follows is a brief but fairly complete listing of African revolutionary radio activity. Those beamed to Portuguese colonies are likely to be altered or terminated in the next few months, but with luck they will survive the DX season and possibly allow you to snare a last-minute QSL.

Best bets for the eastern half of the US and lower Canada will be underlined; other zones will tend to find it rougher going, but some of those listed should be audible anyway...true DX, if you will!

Angola

Fighting Angola ("Angola Combatente"). Station of the Moscow-oriented "Popular Liberation Movement of Angola" (MPLA) broadcasting in French, Portuguese, English, Umbundu, Luvale, Lunda, Mbunda, Tchokwe, and Kwanhama. A BBC MS report indicated from October 23, 1974, the program was also being carried by the Voice of Zaire (no schedule was given, nor have we been able to establish it). Radio Zambia recently quit carrying the program at 1830, at which time, more or less, "Emissora Oficial de Angola" commenced carrying a similar program at 1830.

1800v-1830v on 1475, 3232, 4765, 6115, 9610v, 9715, 15190 kHz (frequency usage varies)

Sign on is with an orchestral march. Sign off is by a choral anthem without instrumental accompaniment. Verification: by letter from Le Membre Responsable, O Departamento de Informaçao e Propaganda (Frente Norte), Movimento Popular de Libertaçao de Angola, B.P. 2353, Brazzaville, People's Republic of the Congo (report in French or Portuguese and enclose 3 IRC's). If that fails, try the MPLA at Luanda, Angola, or at Box 20793, Dar es Salaam, Tanzania.

Voice of Free Angola ("A Voz de Angola Livre"). Program of the National Front for the Liberation of Angola (FNLA) operating in Portuguese, French and Angolan vernaculars via Radio Lubumbashi and the Voice of Zaire. The program can also be heard via Emissora Oficial de Angola at 2000.

1800-1830 Monday-Saturday & 2200-2230 daily on 11865v, 15245v kHz, plus other announced channels.

Sign on with anthems and drums, off with a martial anthem. Verification: try the FNLA's headquarters in Luanda, Angola, or have your report forwarded via the Zaire stations.

Comoro Islands

Molinaco Program. The operation of the Movement for the Liberation of the Comoro Islands, which opposes French rule (due to end in a few years). This does not appear to be heard often in the Americas, but it fares better in Europe.

1815-1830 1025, 4785, 15435 kHz via Radio Tanzania, which can forward reports.

Mozambique

Mozambique Hour. Program of the Mozambique Liberation Front (Frelimo), broadcasting in Portuguese, Nyanja, Makonde, Ronga, Shanganana, Shinyungwe, and Ndawu.

*0430-0445 Sun-Fri 6105 kHz

**1615-1715 Mon-Sat, plus 1700-1800 Sun 4951v (4965 alt.), 9580 kHz

*1830-1930 Daily 4785, 15435 kHz

*via Radio Tanzania **via Radio Zambia

Verification: try Sr. Jorge Rebelo, Secretary for Information, Frentes de Libertação de Moçambique (Frelimo), P.O. Box 15274, 201 Nkrumah Street, Dar es Salaam, Tanzania, enclosing 3 IRC's or Tanzanian mint stamps for return air mail postage.

Rhodesia (Zimbabwe)

Zimbabwe Hour - ZANU. Voice of the Zimbabwe African National Union heard in English, Shona and Ndebele.

**0600-0700 Sun 7220, 17895 kHz (fqs have reportedly changed, but are not yet known)

**1715-1800 & 1815-1830 Tu/Th/Sa/Su on 4951v (4965 alt.), 9580 kHz (plus possibly on additional new fqs)

*1945-2000 M/W/F on 4785, 15435 kHz

*via Radio Tanzania **via Radio Zambia Verification: ZANU, Lusaka, Zambia.

Zimbabwe Hour - ZAPU. Voice of the Zimbabwe African People's Union heard in English, Shona and Ndebele.

**1715-1800 & 1815-1830 M/W/F 4951v (4965 alt.), 9580 kHz (plus possibly other fqs)

*1945-2000 Tu/Th/Sa 4785, 15435 kHz

*via Radio Tanzania **via Radio Zambia

Verification: Try ZAPU, Box 1657, Lusaka, Zambia.

Zimbabwe Hour - Joint. Combined ZANU-ZAPU program aired once weekly.

1945-2000 Sunday via Radio Tanzania on 4785, 15435 kHz.

São Tomé & Príncipe

Voice of the People of São Tomé and Príncipe ("A Voz do Povo de São Tomé e Príncipe"). Operating since roughly mid-September, 1974, according to the BBC MS, this program uses the facilities of La Voix de la Renovation, Libreville, Gabon, and is prepared by the São Tomé and Príncipe Liberation Movement, which is due to assume power on July 12, 1975.

The schedule is not entirely clear, but may be:

2000-???? Mon/Wed/Fri 1544, 3300, 4777 kHz

Verification: Try O Departamento de Informação, Movimento de Libertação de São Tomé e Príncipe, Libreville, Gabon.

South Africa

PAC Program. Program of the Pan African Congress (PAC), transmitted via the facilities of Radio Tanzania in the languages listed, plus Afrikaans.

1930-1945 English Sun & Tues, Nguni Thurs, Sotho Sat 4785, 15435 kHz

Verification: Try the Pan-African Congress, Dar es Salaam, Tanzania, enclosing 3 IRC's or mint Tanzanian stamps.

Radio Freedom, a/k/a South African Hour. This is the program of the African National Congress (ANC), which is reportedly pro-Chinese, transmitted in English, Afrikaans, Tswana, Zulu, Sotho and Xhosa.

**1830-1930 Daily 4951v (4965 alt.), 9580 kHz

*2000-2015 Su/M/W/F 4785, 15435 kHz

*via Radio Tanzania **via Radio Zambia, Afrikaans Sun & Mon

Verification: Try the African National Congress, 49 Rathbone Street, London W1A 4NL.

South West Africa(Namibia)

Namibia Hour. Program of the South West African People's Union (SWAPO), transmitted in English, Subia, Ovambo, Herero, and Nama.

*0515-0530 Sunday 6105 kHz

**1100-1115 & 1130-1215 Sunday 11880, 17895 kHz (fqs likely changed, but new ones

*1930-1945 M/W/F, 2000-2015 Tu/Th/Sa 4785, 15435 kHz unknown)

**1930-2030 Mon-Sat 4951v (4965 alt.), 9580 kHz

*via Radio Tanzania **via Radio Zambia

Verification: Try SWAPO, P.O. Box 2603, Dar es Salaam, Tanzania.

Voice of Namibia. Due to commence operation via Zambia in early 1975, this United Nations station is headed by Nobel Prize winner Sean Macbribe and is being built with Irish and Chinese assistance. No schedule information is currently available.

Zanzibar & Pemba Islands (Tanzania)

Free Voice of Zanzibar and Pemba ("Saut Huru ya Unguja na Pemba"). An irregularly-reported station apparently broadcasting separatist messages to Zanzibar and Pemba. Its channels tend to cause interference with those of Radio Tanzania.

Schedule: not really known, variously reported in 1974 as 0815-0830 Sat & 1030v-1045v irregularly on 7164v, 9551v, 9745v kHz, and earlier as 1718-1734 & 1915-1928 on 4795v kHz, all in Swahili.

Credits: BBC Monitoring Service, World Radio Bulletin, Don Jensen, John Campbell, and various radio station personnel.

END. We'll be back next month with more exclusive clandestine radio news. A few non-clandestine items noted here in Philadelphia the last few days -- too late to include in Log Report -- are an unidentified "Emissora Regional..." very likely in Angola from *0600-2400* on 5338.2 using a MW channel, also; plus (12/21) R. Clarin, Dom. Rep., on 11699.8 strong 1800-2330 //4849, also LV de la Libertad, Dom. Rep., 2230 again on 6218.

QSL REPORT

EDITOR: BOB ZABOT P.O. BOX 62659 VIRGINIA BEACH, VIRGINIA 23462
DEADLINE: the 10th of each month

January 1975 Report Happy New Year to all.

SPECIAL INTEREST VERIFICATIONS.

ANTARCTICA: AFAN McMurdo, 6012. Letter in reply to original reception report in July received a two page form letter giving information about station and details of report were correct. Personal letter from William Carter says that he had received 15 letters and messages as of 7 Sept. requesting confirmation of reception from as many places around the globe. He also said that my letter stood out above all the others and thanked me for the tape which I made, he played it over the airfor all to hear. He is 90% sure that they will continue to bc during the summer (local) and into next winter on 6012. Bill Carter was scheduled to leave 10 Oct for his home town in Ohio.. Station slogan is "AFAN RADIO THE COLDEST AND SOUTHERNMOST RADIO STATION IN THE WORLD" Both veri letters rec'd in 4 1/2 months for EE report/letter and tape sent w/out rp via US Naval Support Force/Christchurch Airport, New Zealand. Very pleased. (Hanner-Aust) Ditto letter received from public affairs officer, J. T. Adams. Letter had nice "Operation Deep Freeze" cache on envelope and pages. Received 1st class mail in 3 weeks for report sent from Arizona while in transit to Cal. (Shaw-US) same ditto ltr by Adams in 3 weeks (Dexter-US)
AUSTRIA: Army Training TX. 6255. Date/Freq card in 1 month for EE letter request #schedule. NO REPORT SENT (Reeves-US)
CANADA: CBC RCI 11825, card w/full data in 13 d by air no rp signed by McFarland. THIS was the "1st" RC WDXHAC/HAP Special card issued. (Paschke-US)

VERIES FOR THE MONTH:

AFGHANISTAN: R. Afghanistan, Kabul 15195 card in 5 weeks w/freq, date, and time. Also two stamps for air used (Echart)
ANGOLA: R. Comercial de Angola, 4794, card in 20d for 2 IRCs. PP rpt and 2nd rpt. V/S collects stamps and will trade (Reeves)
RC do Huambo, multi-colored native drummer card w/date only in 30 days air for PP rpt and 1 IRC (Mayer)
A Vos Do Zaire, 4885, card & ltr for Nov 73 rept by air for mint stamps using NASWA PP form. my 7th Anglan. (Henderson)
R. Clube Do Mexico, 5192, full data "Adult" card w/freq as 5192. In 21 d by air for mint stamps ANASWA PP form. Angolan #8 (Henderson) 5191, v/s Jose dos Santos Vicente, ltr & cd in 5 weeks for mint stamps (Robinson)
ARGENTINA: RAE, 9690, card in 60 d air, no rp (Talbot) 9690, us card in 20 d air for 1 IRC (?) 11710, full data card in 86 d (Powers) 11710 all data card in 60 d for 1 IRC (McCarthy) 11710 same in 107 d air 2IRCs (Brunner) 11710 same in 39 d for 2 IRCs (Reno)
ASCENSI N ISLAND: BBC, 6175, BBC card w/notation of Ascension in 20 d air no rp (Talbot)
VOA, 17830, 15195 2 cds air in 4 weeks & personal letter from George Jacobs (Padula) 17830, cd with FD but wrong date (Hanner)
AUSTRIA: ORF 6155, Voralberg card in 34 d for ORF report form and no rp (Brooker) 6155, card in 37 d for 1 IRC. Also literature & info 4 d later (Talbot) 9770, church scene card in 32 d for 2 IRC (Reno) same w/full data card and thank you for the report in 1 m (Russell) 6155, 9770, & 17775. 3 cards giving full details. 2 were Austrian scenes, the other with "ORF" in red on white background. Recd 27 to 30 d (Hanner)
AUSTRALIA: ABC Brisbane 4920 card in 107 d (Powers) 4920 card w/all wrong details 110 d (Powers)
ABC Sydney 6090 card in 15 d no rp (Powers)
R. Australia, 5995, kangaroo card in 1 m for 1 IRC (Trzaskus) 5995, parliament house card in 88d for EE rept no rp (Mayer) 7295 radio telescope card in 89 d for EE rept no rp (Mayer) 9580, kangaroo card in 13 weeks (Trzaskus) 9580, tropical fish & coral barrier reef card in 35 d for 1 IRC (Trzaskus) 9580 Kangaroo card, sked, & listeners club certificate in 27 d (Levin) 9580, two cards in 120 d no rp (McCarthy) 11710, Canberra Parliament House card in 76d no rp (Brooker) 11765 card in 18d for 3 IRC (MacLeod) 11765 card in 105d no rp (McCarthy) 152h0 tropical fish and reef card in 84 d no rp (Mayer) 17795 Kangaroo card in 2m for EE rept (?) 17795 Sydney Aust. Opera House card in 3m (Trzaskus)
BANGLADESH: Dacca 9550 card and sked airmail in 3w. Home svce 4890 card airmail in 4 w (Padula)
BELGIUM: ORU 6055 card w/sked in lw (Overcamp) 9655 card in 70d (Brunner) 11855 2 letters recd the same day with QSL, sked, & pennant in 34 d No rp (Powers)

THE VOICE OF AMERICA

I seem to have left out Dan Henderson in Maryland. Dan had a good month with many good views. I personally would like to say a happy new year to all the members. I hope that everyone has a good year. Many thanks for the encouraging letters from several of my regulars. I appreciate the notes etc in your reports because it gives me an idea of what the members want. Thanks go to Scott Reeves for the suggestions on using some abbreviations throughout the column.

Now let me ad a couple of sad notes for you. I had to dispose of several reports because I just could not read someones writing and after I cut the reports in strips some did not have any name after them. Please follow the format that is layed out in this column when you are reporting. Also I now want triple spacing between items, or cut your report into small individual strips before you mail them.

Please report to all editors in the club. You are the club. 73's Bob

Bob

LISTENER'S

First, let me extend thanks to those of you who sent me Christmas cards.

Dan Jamison
310 Roanoke Street, Apt. 21
Richmond, VA 23225

Deadline: 15th

We will again forgo this month's SPOTLIGHT, but in its place we will have a station feature submitted by Dan Henderson on the Gauhati station of the All India Radio network. Dan obtained the info. from his personal friend at the station.

*** THE GAUHATI STATION OF AIR:**

Gauhati is the capital of the north-eastern province of India named Assam. It is located on the banks of the Brahmaputra river and has a population of 500,000. Gauhati is one of the important stations of All India Radio (AIR). It was established in 1948. The transmitting station of the Gauhati station is located nine miles west of the studio building. The station has four transmitters - two medium wave and two short wave - which are 50 and 10 kilowatts each, respectively. The Gauhati station, like the other stations of AIR, broadcasts programs both for educational purposes and for entertainment. It broadcasts mainly in the Assamese language which is one of the principal languages of India. Besides Assamese, it broadcasts in English, Hindi, Nepali, and other dialects of north-eastern India. There are no commercials in the transmissions because this is a government operation. Some of the programs are relayed from Delhi which is the main station of All India Radio. The schedule is:

0030-0145	on 3375	0200-0340	on 5970	0230-0345	on 6130	1100-1215	4775
1200-1700	3375	0630-0830	5970	0530-1000	6130		
0100-0215	3375	1030-1145	5970				
1230-1700	3375

Japan Greek 2200-2250 6075

ICELAND The Voice of Iceland has again been hrd on 12175 at 2030. Rob Nijhof via BDXC via Charlie Wootten, MD)

JAPAN Radio Japan has made a few slight changes in their sked to NA. Look for them at 2345-0045 on 11725,15270, and fm 0100-0300 on 15195,15235,17725, and 17825. (via Ken Earhart, PA)

KUWAIT Radio Kuwait now has an English broadcasting skedule^e fm 0800-110 on 15345 to East & SEA and 2000-2300 on 15415 and 9715 directed to Europe, East and SEA. (George Rabone, NY)

MALAWI NASWA new member John Bianchi, NY, reports the following sked fm the Malawi B/c'ing Corp: 0257-0520 on 3380 0600-1715 on 7130
0500-2100 5995 1750-2215 3380

MEXICO R. Tricolor is also identifying as "Radio Pieta" in their daily xmsn on 15110. Charlie Wootten has noted them fm 1500-2000+.

MONGOLIA The WRTH in a note to DSWCI says: "Ulan Bator b/c's in EE on weekdays at 1220-1250 on 17785 // 17820 and at 2200-2230 on 11810 // 11860 to SEA and the Far East. (via Charlie Wootten, MD)

NEW ZEALAND You might try using this different address from the one listed in WRTH when writing RNZ: H. Taylor-Smith (R.N.Z.), N.Z.B.C., Broadcasting House, Box 2396, Wellington, New Zealand. (Mike Peraaho, MN)

NORTH KOREA Radio Pyongyang b/c's between 1600-2200 on new 9975 (vice - 9777). The EE b/c is fm 1800-2000. (by permission, BBCMS)

RHODESIA REC has ann'd that due to a deterioration of SW propagation condx, it will use an additional xmtr operating in the 60 meter band, between 0520 and 0800 and the scheduled xmtr in the 49 m.b. will come on the air at 0625 instead of 0545. Freq's affected are 5012 and 6020. (by permission, BBCMS)

SOUTH AFRICA Radio RSA b/c's to North America fm 2226-2320 on 15115, 11900, 9695, 9525. (via David Jones, VA)

SWAZILAND According to Al Steward of TWR's DX Special, TWR-Swaziland has 1 xmtr on a permanent sked while the number 2 xmtr is on a temporary operating schedule. The 2nd xmtr, he states, will be on a permanent sked soon. Here is the sked as he read it.

XMTR 1: Permanent 0330-0700 on 6070 (0845 on Sunday)

1615-1645 6070continued

XMR 1: continued 1655-2000 on 3365

XMR 2: Experimental 4970, 6165, 7230 and an extension of 6070 sked. times of operation are not known. I would think that the operating times would closely resemble the sked of xmr 1. (EF)

The IS of TWR-S is a rapid drum beat. Programming seems to be mostly in EE.
(via Eric Falkenhan, MD)

SWAZILAND Swazi Music Radio uses 100 KW on 3223 fm 1700-2200 and on 6155 fm 0400 (Sun: 0600)-1600. Some days the 100 KW is observed on 6155 throughout, otherwise switching to 10 KW fm 1600-1800.

(Richard Ginbey, South Africa via Charlie Wootten, MD)

TAHITI Radio Tahiti bc's in English fm 1900-1907 on 15170 everyday. The name of the program is the "South Pacific Bulletin". It consists of world news and local weather. (Greg Ravenhorst, MN)

TOGO RDF Togo in Lome, operating on 5047 b/c's a news bulletin in ENGLISH daily fm 1930-1940. (SCDX #1302 via Charlie Wootten, MD)

UNITED STATES OF AMERICA Radio station KGEI, Redwood City, CA, b/c's in English fm 0630-0700 on 6000; 0700-0900 on 5980; and 1400-1500 on 5980.
(via Ken Earhart, PA)

USSR An announcement given in the "Pacific Ocean Radio Station" xmsn fm Vladivostok states that English language lessons are to be introduced in programs for Soviet fisherman and seamen to enable further study on the language during voyages abroad. These broadcasts will be given every Wednesday fm 0930-1000 in the Vladivostok First Program and repeated during the 1900-2000 xmsn of the Pacific Ocean Radio Station. Vessels near the coasts of Canada and Japan and in the Bering Sea are advised that the P.O.R.S. can be hrd on 5015, 7160, 7300, and 12010, while those in the South China Sea, near the coasts of Australia, New Zealand, Indonesia, and the Antarctic can hear the b/s on 6175, 7280, 7315, and 9735.

(SCDX #1302 quoting fm BBCMS via Charlie Wootten, MD)

YEMEN Radio Sanaa is observed on new 6050 // to usual 5805 at 2030 in Arabic.
(Richard Ginbey, SA via Charlie Wootten, MD)

ZAMBIA Lusaka has been named one of the four African sites for a United Nations sponsored "Freedom Radio" to b/c around the clock into South-West Africa in the various languages spoken in that territory. The General Service of ZBS has dropped 11850 and 17895, previously 0800-1415.
(Richard Ginbey, South Africa via Charlie Wootten, MD)

ETC ... JAMMING From the Fickle Finger of Fate-Scoreboard comes this tally of recent jamming events:

- ... In September, Bulgaria agreed to stop jamming the VOA (New York Times).
- ... Chile noted with heavier jamming of Radio Havana's IA svc's, but apparently no more jamming of other countries, e.g. Radio Moscow's Chilean Svc. Guess that they decided to jam one effectively rather than several ineffectively.
- ... Soviet Union's jamming of the Israel Broadcasting Authority has been stepped up, is now not only stronger, but now sometimes also includes jamming of the Hebrew HS relays on SW- 12045, 11645, 9495, etc.

(CB editor Larry Magne, PA)

While speaking of jamming, the BBCMS notes that RC de Mocambique has reported that the private commercial broadcasting station, Emissora do - Aero Clube de Beira has opened negotiations with the Portuguese Armed - Forces of Mozambique to purchase the powerful transmitters used by the Portuguese Army to interfere with the broadcasts presented by Prelimo through the facilities of Radio Tazania.

And so concludes another LISTENER'S NOTEBOOK. A hearty word of thanks is extended to all of our contributors for their valuable and interesting contributions to LN. We are looking forward to receive some material from YOU! Schedules, observations, tid-bits, and general information are always welcome. If you desire the return of your sked, please enclose a SASE and it will be returned to you promptly. Please, all times GMT and use only one side of the paper. See ya next month!

73 and Happy Listening,

Dan

ENGLISH LANGUAGE TRANSMISSIONS TO NORTH AMERICA

This tabulation is based on data from actual monitoring, from official schedules, and from data provided by the BEC Monitoring Service. We have made it as accurate as possible, though we acknowledge that it may contain some errors. Any corrections, changes, or additions may be sent to Dan Ferguson, at NASWA headquarters. The address is NASWA, Box 8452, South Charleston, WV 25303 USA.

Data in this list is for the winter broadcasting quarter, November, 1974, thru February, 1975.

 DX CONGRESS RTV Belge is helping organize a DX Congress in Brussels, March 21-24, 1975. For full details, write:

WAGONS-LITS//COOK
 Special Traffic & Congress Dept.
 Place de Brouckere, 17
 1000 BRUXELLES
 Belgium

Write soon if you are interested in attending, as registration must be completed by February 10, 1975.

 SPEEDX notes that they still have copies of the World Utility DX Handbook available. Price is US\$7.95 shipped surface mail world wide. Write SPEEDX, P.O. BOX E, ELSINORE, CA 92330

BOLIVIAN SURVEY The survey done by Tony Jones is still available from NASWA, Box 8452, S.Charleston, WV 25303 USA, for \$1.50 US. Following are some additions to the survey. We will have to do a lot of abbreviating to get it all in....

- 4495 R.Cumbre, 2 nites during Oct, seems to be extremely irregular
- *4576 R. Mamoré, Guayaramerín, daily since 10/25, annc 4600 k/es, call CP-147.
- 4700 R.San Miguel, s/off times now regular, 0300 weekdays, 0200 Sundays(Eon am)
- *4785 CP-152, R.Hallivián(San Borja, Beni), first noted on SW 10/19. Asks for rpts so seems SW tx only recently put into operation. S/on unkown, s/off is 0200 daily. Normal ID as "Radioemisoras Hallivián", but anncs R. Cultura Hallivián at s/off. IDs vary. Limited commercial sponsorship, only two regular spots, for "Alumac" and a local transport company.
- 4845 R. Fides, correction to s/off annt, should read: "Amables oyentes, aquí se concluye nuestra emisión..."
- 4853 R.Contenarío, noted irreg from 10/21 (1st time in 5 months) weekdays from 100, Su from 1100. Spots include 'La Federación de cañeros campesinos y productores agrícolas del departamento de Santa Cruz', restorán 'Las Palmeras', instituto 'I.S.A.', 'Banco de Santa Cruz de la Sierra', 'lotería nacional' and 'Banco Agrícola de Bolivia'.
- 5995 R.Loyola, Sunday s/on 1200, 1st 1/2 hr transmission is in Quechua.
- 6373-75 R.Sumaorco(Potosí), weekday s/on time of 1000 is now fairly regular, tho not on till abt 1130 Sunday. Often programs in Aymará a few minutes after s/on, tho these sometimes interspersed w/annts in Spanish.

THE ABOVE ought to give those who didn't get the complete survey earlier just what they have been missing. We still have plenty of copies, and you can get one for US \$1.50. Order now!

(The above data is dated Nov 1, 1974, and was accidentally omitted from the December FRENDX.. We again thank Tony Jones for these reports from South America.)

MAIL-A-PROP

MAIL-A-PROP

MAIL-A-PROP is a weekly publication giving propagation forecasts prepared by WJASK, George Jacobs. These forecasts are designed for the amateur, but, of course, are of no less value to the SWEC DXer than to the amateur. The data in this 2 page weekly forecast is detailed, and extensive. It is the most useful propagation data available to SWEC DXers of which we are aware. Write for details to: MAIL-A-PROP, P.O. BOX 86, NORTHPORT, NY 11768. Send a SASE for details, and tell them NASWA sent you.

LOG REPORT

SECTION - A

EDITOR: ROBERT J. HILL, JR., 2923 FLORENCE ST., #304, BERKELEY, CA 94705

(Frequencies: 1605-6200 kHz)

DEADLINE: 15th of MONTH

Section A reporters, take a bow -- you really outdid yourselves this month! Lots of good loggings . . . a quantum-jump improvement in following the format we requested . . . an outstanding response to the two casual questions at the end of last month's column . . . but what are you going to do for an encore? More of the same, please!

Whew! And a very special tnx to my fellow NASWA'er and good friend Kevin Szot, who helped out with some of the column preparation. You'll be hearing a lot more from this fine young DX'er in the year ahead.

There never seems to be enough space at the end of this column to sit back, breathe a bit and say hello. So, President Dan, I hereby swipe an extra page to do just that.

This month's turnout of 62 reporters was outstanding -- but even more remarkable is the fact that almost one-quarter of them (15, to be exact) are WCNA! Superlatives to you, fellow West Coasters. (Your kindly Editor grew up in the "West Coast" town of Cohasset, Massachusetts, by the way.)

Please, fellas, no reports or letters beginning "Mr. Hill." That's my father. "Bob" will do just fine.

Among the high points of this month was a poem submitted by one Effiemay Loudenboomer of Olean, NY, who claims to be a cousin of You-Know-Who. While space does not permit a printing of same in its entirety, let us merely advise that this immoral -- sorry, immortal -- rhyme gleefully ribs your long-suffering Editor re his request that reports be sent in on paper measuring exactly $8\frac{1}{2}$ inches long. Well, we can take it as well as dish it out -- and let it be known that we enjoyed the poem immensely.

However, we have just converted to a new system of assembling items in frequency order. While the full details are classified Top Secret, it is permissible to hint that the operation involves shirt cardboard (the kind that laundries stuff into shirts) and spray adhesive. Since the cardboard measures exactly 8 inches across, that now becomes the ideal length of reports!

So if your items are less than 8 inches across, your saintly Editor winds up with adhesive all over his sleeve -- and if their width exceeds 8 inches, the surplus paper hangs over the edges, flaps in the breeze, gets all tangled up when I stack the cardboard, and elicits reproving glances from guests.

It's back to the Thesaurus for you, Effiemay.

Last month, we asked members to comment on a couple of procedural questions: (1) Should common items be dropped in favor of a "letters-to-the-Editor" column? (2) When a reporter submits incorrect info (wrong ID, inaccurate freq quote), should he be taken to task or should his errors be hidden forever?

Response was -- at least to me -- quite astonishing! A number of NASWA'ers took the time and effort to comment at considerable length. Gang, it's appreciated!

Before going into details about these responses, it should be added here that the questions were rather poorly phrased owing to lack of space. And the second question should have been amplified with pro and con points on the relative merits of each approach.

(1) By "common items," I meant items reported month after month (often by the same people), not "common" in the sense of easy. They aren't always the same thing. A DX'er should report what is DX for him, regardless of how yawn-provoking the station may be to a more veteran listener.

(2) Regarding errors of identification and frequency quotation. Some respondents took me to task for expecting headline accuracy from poorly calibrated receivers. Not at all, folks -- but if you can't be positive that your reading is within 2-3 kHz, then it is absolutely imperative that you stick the little letter "A" (approximate) after your freq quote. As far as I know, the only person ever to find the letter "A" embarrassing was Hester Prynne.

But why all the fuss over incorrect information? Well, for one thing, it's difficult to deal with. If corrected in such a way as to hide the reporter's mistakes, he "rides along," in effect, on the backs of those who submit correct data. If corrected in print, he is (or might consider himself) humiliated in front of his peers.

If an item quoted 7115 is actually 7120 but is printed 7115, whether corrected or not, the Log Report is just that much less useful as a reference. If an item says the station is Rhodesia and it's actually Sri Lanka, then once again the fact that the item begins RHODESIA, whether or not a correction appears therein, lessens the value of LR as a reference.

Okay? Now let's see what our respondents had to say:

On Question (1), 4 said, unequivocally, that a Letters column was desirable; 8 said "Yes, but ..." -- only if LR wasn't cut, or at least not cut very much; 4 said phooey on such a column. One made the excellent point that one LR section should not have a Letters column if the other two don't. Conclusion: if you really want a Letters column, tell DF. (One writer had the temerity to suggest that The Loudenboomer Report be dropped in favor of Letters. He knows who he is, and he will never be given another chance! CL's eyes are everywhere!)

Question (2) seemed to draw closer to a consensus. Ten writers said to correct the miscreant in print -- tactfully, of course. Two opined that incorrect items should be thrown out. Only 2 thought that the correction should be made in such a way as to hide the error and its perpetrator. Conclusion: to encourage accuracy, to preserve the value of LR, and to keep from giving undeserved high marks to low performances, mistakes will be corrected in print -- but tactfully, you ignorant nitwit!

Of course, all of the foregoing applies to LR-A only. Other section editors surely have their own opinions and preferences.

Remember the NASWA'er who reported Syria on a new freq of 4845 last month -- and it was actually Norfolk? The poor guy had taped the station and played it for a native AA-speaker, who told him it was Syria! Some days ya just can't win, period.

And now your patient, kindly, forgiving LR-A Editor wishes you the best of DX in '75 -- and don't screw up them reports!

73,

Bob

Bob Hill

- 9605 W. GERMANY DW; *1115 now runs JJ replacing *1120. EE to Austi & New Zealand now 0930-1030 (Willis-Austi)
- 9605 VATICAN Vatican Radio; 0100 EE, rel nx (Zilmer)
- 9605 SWEDEN R. Sweden; 1230 EE, nx to East Asia (Zilmer)
- 9610 AUSTRALIA VLW9 Perth; 1105-1117 EE, national nx, ID "This is 6WC", not sure of this MW call sign (Patterson); 1455-1500* EE, s/off anmts (Lineback)
- 9620nf SAUDI ARABIA BSKSA Riyadh; 0700 AA under Paris //9605 (Willis-Austi)
- 9620rf S. VIETNAM Saigon; 1008 now using this freq for VV HS //6165 (Willis-Austi)

- 9620 USA UN Radio; 0002 special freq rarely used, only when sessions run past 0000. Noted 11/21 (Hauser)
- 9630 SWEDEN R. Sweden; 0830-0900 cf 6065; another RR px beamed to EaEur and Egypt (Hauser); 1028-1040 GG, mx, OM in talks (Earhart)
- 9635 COLOMBIA R. Nac; 1115-1130 EE/LL then SS px (Brunner) What's LL ?-MRL
- 9635 USSR R. Moscow; 0650 EE to NoAmer, always good after VoA s/off (Willis)
- 9640 S. KOREA R. Korea; 0505-0515 EE, nx (Buxton)
- 9645 BRAZIL R. Bandeirantes; 0045 PP talk (Zilmer)
- 9645 COSTA RICA TIFC; 0400 EE rel px (Zilmer)
- 9650 KUWAIT R. Kuwait via Magwa; 0535 AA HS via long path (Willis-Austi)
- 9655 THAILAND R. Thailand; *0930 IS, s/on anmts in Thai and EE (Buxton)
- 9660 VENEZUELA R. Rumbos; 1600 SS, usual chimes, ads, ID's, other YV activity good late on 31 mb too (Magne)
- 9670 NETH ANTILLES TWR; *0445 EE ID into AA px for Mid East (Lovett)
- 9675 BRAZIL R. Diario da Manhã; 0015 PP sports (Zilmer)
- 9680 ECUADOR HCJB; 0928 Quecha px (Earhart)
- 9680 SPAIN R. Svoboda, Playa de Pais; 0409 piano parody on a R. Moscow theme during RR nx over jamming. A bit better than //9660 (Hauser)
- 9685 BRAZIL R. Gazeta; 0115 PP sports (Zilmer)
- 9685mf ALGERIA RTVA; *0600 here in AA //9705, 11715, 11965, 9610 (Willis-Austi)
- 9690 ARGENTINA RAE; 0145 SS, "Musica de la Republica Argentina" (Wooten) ; 0300-0334 EE, ID's, tangos, features (Patterson, Masterson, Tobin, Cole)
- 9690 PAKISTAN R. Pakistan; 1335-1355* Urdu, oriental strings, some vocal //17845 (Earhart)
- 9690 RUMANIA R. Bucharest; 1300 EE, nx (Zilmer)
- 9695 BRAZIL R. Rio Mar; 2325 PP, jingles, ads, talks (Zilmer)
- 9695 AUSTRALIA RA; 0800 EE ID into Indonesian px (Meehan)
- 9700 UKRAINIAN SSR R. Moscow via Lvov?; EE, nx, views, RR vocals, pop mx, very poor signal for RM (Patterson) /Masterson)
- 9700 BULGARIA R. Sofia; 0020-0055 EE, nx, talks, features(Earhart, A. Miller,
- 9704, 59 MEXICO R. Mexico; 0214 putting G-sharp het on VoA 9705 (Hauser)
- 9705 MEXICO R. Mexico; 0100-0115 SS, orch mx, used word "Television" in ID, not previously noted (Earhart)
- 9705 BRAZIL R. Maua; 0125 PP talks, excited sports event in background (Zilmer)
- 9705 INDIA AIR; 1223 EE ID, px sked (Zilmer)
- 9710 SOUTH AFRICA SABC; 1230 EE, nx, Afrikaans talks (M. Smith); 0350 pop mx ads (Tobin) Lang? - MRL
- 9715 CONGO Rôiff Congolaise; 2245 FF, talks, Afr mx(Chorus and drums) (Zilmer)
- 9720mf FINLAND R. Finland; 0300 EE, nx. Replaces 9550 (Zilmer); 0302-0358 only weak SP detected, probably R. Moscu. Being buried under Norway and Cuba on 9550, asked ANARC's FRC for a clearer 31mb channel 0300-0400. Recommended 9725, but usin 9720 instead. For reason 9725 was not adopted, see next item (Hauser)
- 9725 USA VoA; No doubt in a deliberate move toward 'normalization' of relations, by 12/1 VoA had dropped "Cita, Con Cuba"(also the morning version), and changed its evening SP program to 0100-0330 on all freqs (f ormerly only a few stayed past 0300 for Cuba), and renamed it "Buenas Noches, America". Cita Con Cuba had appeared in November sked (Hauser)
- 9730 BELGIUM RTB; 0040-0100 EE, jazz mx (Zilmer)
- 9735 W. GERMANY DW; 0756 GG, mx, nx, EE ID (Herbold)
- 9740 ARGENTINA R. Splendid; 0115 SS talks (Zilmer)
- 9745 IRAQ R. Baghdad; 2010-2015 EE Svc w/AA mx, ID, newsreel (Buxton); 1700 OM & YL alternating nx in AA. Possible "Baghdad" ID at 1701 (Hauser); 1930 EEID, px anmts, Mid East mx, EE nx 1935. Good Signal (Cress)
- 9745 MALTA DW; Although freq sked does not specify relay sites, this is clearly Malta for 0115 EE to NoAmer, as lost feed 11/21 and had to play fill mx instead (Hauser)
- 9745 INDIA AIR; 0110-0115* EE, freq and time anmts for GOS. Heard over DW IS same freq (Snyder)
- 9749, 56 PHILIPPINES VoA? 1500 EE, px on University of Ibadan 11/30, making a 440 Hz het w/9750: 1514 undermodulated anmt by W, mx px, 1530 cut off SEARV? (Hauser)
- 9750 CHILE R. Minería; 0932-1017 SS, nx, talks, ads (Zilmer, Earhart, Hauser)
- 9754, 1 EGYPT? 1450 AR type mx hetting 9755, freq wavering. Cairo? (Hauser)
- 9767, 2 MEXICO R. Universidad; 1903 tnx to tip from Behr via NASWA, found R. Univ here 11/27 ex 9600. 1647 classical mx, SS anmt, ID poor reception. 1903 produced 2.8 kHz het w/9770 (Hauser)

- 9767.35 MEXICO R. Universidad; SS, Radiodiario nx, 1431 plugged another one at 11 PM, ID, folk mx (Hauser)
- 9770 SAUDI ARABIA BSKSA; 1928-1952 AA, mx, chants. Polar flutter (Snyder)
- 9775 UNID. LA, measuring 9773-9776v to 1255 Moscow 9775 carrier s/on, before that in the clear w/non-stop Andean flute mx, no anmts or ID's, poor carrier weak, not 4VEH, never noticed before (likely this channel is due to defective tx and station is usually buried elsewhere) (Magne)
- 9780 USSR R. Moscow; 0205 EE to USA, 0300 R. Kiev in Ukrainian. Probably Far East site, no sign of Tirana/Peking (Hauser)
- 9785 BELGIUM; Use abandoned by Belgium for now, no official explanation as to why, 9785 was good channel since vacated by IBA(now exclusively on 9815) (Magne)
- 9810 USSR Moskva Radio; 0302 beginning RR nx late (Hauser)
- 9815 ISRAEL IBA; 2000 EE nx (Zilmer)
- 9840 AZERBAIJANIAN SSR R. Baku; 1530-1600 AA nx, AA mx. Fair-poor (Mayer)
- 9915 ENGLAND BBC; 2200-2244* EE, next best thing to hearing broadcast from Falklands is one to them. Sunday only, reception only slightly better than FIBS here, however // T2040 not audible at all (Hauser)
- 9915 MALAYSIA BBC; 1435-1443 Hindi, nx by OM (Earhart)
- 9920 CHINA R. Peking; 1310 YL in CC related lang, mentioned Bukharin (Robins)
- 10530 KAZAKH SSR R. Alma Ata; 1700 RR, ID "Govorit Alma Ata" then radio journal px (Salmani)

By the time you read this, the Christmas-New Years DX sessions will be over. As I write this, the solar cycle is peaking and will have reached a maximum about 20 December. A minor geomagnetic storm began on the 18th, but the geomagnetic field should have quieted down after the cycle reached its peak. Minor recurring geomagnetic disturbances should have begun about Christmas day with possible enhanced openings to the south. The next solar activity peak will be about 15 January. The recurring geomagnetic disturbances should begin about 22 January. General geomagnetic quiet may occur 10-20 January.

New information has been added to the WWV propagation forecast broadcast at 14 minutes past the hour. In addition to the usual information on propagation conditions and forecasts, they now give K index values and also 2800 MHz solar flux measurements.

The K index is an international standard measure of solar corpuscular radiation based on the intensity of geomagnetic activity caused by electric currents produced in the ionosphere by such radiation. The K index is a 3 hour index designed to average readings of the magnetic field's activity over the 3 hour observation period. The range of values for K is from 0-9. I presume the measurements are taken at Fredericksburg MD. Normal geomagnetic activity varies with the time of day, being greatest during daylight hours at the observing station. Superimposed on these values are increased activity due to sunspots and solar flares. The K index reading will give a good indication of current geomagnetic conditions. However, the small range of values (0-9) is not great enough to give a meaningful 24 hour average. Hence the A index. The A index (given over WWV for the previous day at 18 past the hour) is a daily index of geomagnetic activity and has a range of 0-400. The daily A index value is derived from the average of 8 three hour values. Their relation to the K values is given below:

K	0	1	2	3	4	5	6	7	8	9
A	0	3	7	15	27	48	80	140	240	400.

The A values represent the center point of a range of values equivalent to each class of K. Since the range of A values corresponding to each K value increases with increasing K, a more meaningful daily average can be computed using the A index.

I suggest we all thank the Office of Telecommunications for this additional information broadcast over WWV.

We are in a period of low solar activity during the declining part of a sunspot cycle. The present cycle should reach a minimum during 1975. These periods are characterized by 27 day recurrent geomagnetic storms. The solar circumstances that lead to the onset and cessation of these storms are not well understood. In fact, while there is a general cause-effect relationship evident between solar storms and flares and geomagnetic storms on earth, many examples are known where major geomagnetic disturbances, such as the major storm on 5-7 October 1960, have no prior obvious solar cause and are not part of the 27 day cycle. Conversely, major solar flares or sunspots have moved across the solar disc with no apparent effect at the earth.

There are many problems relating to the prediction of ionospheric conditions affecting SW propagation that are not well understood. The phenomenon of radiowave propagation in the ionosphere is composed of many complex variables that make hard and fast correlations between cause and effect of SW DX reception impossible. The best we can do at the present is make some generalizations based on observations. To help the DXer and SWL better understand the factors affecting SW propagation, I plan to prepare a series of articles on SW propagation for FRENDX. The first of these, on the ionosphere, is in the hands of the SWC editor and I hope will be appearing soon. I will continue to make monthly observations and predictions on solar-terrestrial conditions affecting SW radio propagation.

We were a little short of reports this month, so I am able to make the above comments. Thanks to everyone who participated in Log Report this month.

Remember; keep DX alive in 75.

73 to all

Jerry A. Lineback

Neal A. Perdue, NASWA Editor
4937 S. Bilrae Circle
Millington, Tn. 38053

Dear Fellow DXer:

When members report rare reception which I am unable to receive at my QTH I often wonder "what is this guy using for an antenna"? I am sure that this question has entered the minds of many NASWA members, so I decided to do something about it. Your assistance is requested in filling out and returning the attached antenna/accessories survey. Results will be published soon in FRENEX and should prove interesting to all.

I have used my own setup as a sample and would appreciate your filling in the appropriate blanks as they apply to your installation. Receiver type(s) not required as credits for this information appear in the Log Report section each month.

(Mine)

Antenna(s)	Height	Direction	Layout	Ant. Tuner
1. 84 ft. singlewire	50 ft.	N to S	Semivert	U.W.T.
2.				
3.				
4.				
5.				

Preselector	Audio Filter	Additional Comments
Gilfer A-20	MFJ CWF2EX (400 hz C.F.)	None

(Yours)

Antenna(s)	Height	Direction	Layout	Ant. Tuner
1. _____				
2. _____				
3. _____				
4. _____				
5. _____				

Preselector	Audio Filter	Additional Comments
-------------	--------------	---------------------

Just a brief reminder here that the motto of NASWA is UNITY AND FRIENDSHIP, and that it is understood that when we made application for membership we all accepted this as the basis of our relationship toward each other. Input to FRENEX and response to projects such as this fall within our area of responsibility to the club and to each other. GIVE in some way to your club - - - Don't just be a TAKER!!!

Yours In Unity & Friendship,

Neal A. Perdue

Address Correction Requested

NASWA's FLASHSHEET is compiled twice monthly and mailed separate from FRENDX. FLASHSHEET EDITOR is AL NIBLACK, 420 SHELBY STREET, VINCENNES, IND. 47591. All reports for FLASHSHEET go directly to AL, not to HDQ.

NASWA dues are US\$10 in North America. Overseas the dues are the same, but airmail is available overseas for the following additional charge: Central America and the Caribbean \$4; South America and Europe \$5; Asia & Pacific \$6.

The FLASHSHEET is available to members for US\$4 per year in North America. It is airmailed overseas to members who desire it for US\$8.

Checks/money orders for dues and/or the FLASHSHEET should be made payable to NASWA and should be sent to NASWA, BOX 8452, SOUTH CHARLESTON, WV 25303 USA
