

FRIENDS

NO COLLECT CALLS ON THESE ADS, PLEASE.

FOR SALE: Drake SPR-4, \$225.00/ Drake SSR1, \$175.00. Drake TR4-C with power supply, \$340.00. ICOM R-70, \$470.00. Hammarlund HQ-180A in excellent condition, \$200.00. Terry Weinhold, R.D. 2, P.O. Box 189-A, East Earl, PA 17519.

FOR SALE: MFJ 1020 active antenna with AC adapter. Excellent condition. Both for \$60.00. Peter J. Giacobelli, 305 Ocean Avenue, Malverne, NY 11565. Phone (516) 887-9881.

NOTICE: The Tidewater Area DXers would like to hear from all local people interested in get-togethers, DX-athons, etc. Please call one of the following phone numbers for your particular area: Hampton area, call Ray Gilley at 838-6494; Norfolk area, call Charles R. Foxx, Jr. at 623-0362; Virginia Beach area, call David Jones at 420-9015. All are welcome.

FOR SALE: (I need R4-C crystals 8.0-8.5, 10.0-10.5, 22.0-22.5, and 22.5-23.0. Will trade for some items listed below or pay \$15.00.) MFJ Standard (calibrator), \$20.00. Yaesu QTR 24 hour clock, \$20.00. FRT-7700 Antenna tuner (works with Yaesu, Kenwood, and other Japanese receivers with pushbutton terminals), \$35.00. Radio Shack Time Cube (5, 10, 15 MHz WWV), \$15.00. Radio Shack TRF AM radio, \$15.00. WRTV Handbooks for 1975, 1976, and 1977, make offer. Kenwood R-600 digital receiver, \$275.00 money order or cashier's check or will consider trade for modified FRG-7 or SSR-1. Bart Beal, P.O. Box 1246, Walla Walla, WA 99362. Phone (509) 529-0073.

FOR SALE: New 1984 edition of WRTH, \$10.00 postpaid. Cashier's check or money order. Ed Dye. P.O. Box 581, Russellville, AR 72801.

FOR SALE: MFJ 8 band Auto Radio Shortwave Converter in excellent condition. One year old. Price \$47.00 including shipping in continental U.S. WANTED: 1967 WRTV Handbook. The one with the steel blue cover. Will pay \$5.00. Shawn A. Sabo, 1555 Mill Run Court, Lawrenceville, GA 30245. Phone (404) 963-0547.

FOR SALE: ICOM IC R70, modified, in mint condition with manual and original carton. Price \$525.00 includes shipping and insurance. Mark Konen, P.O. Box 11628, Milwaukee, WI 53211. Phone (414) 962-8968 from 0000 to 0430 or any other time to leave message on machine.

FOR SALE: Drake SPR-4 in mint condition, \$275.00, negotiable. MBA RTTY Reader Model R.O. Excellent condition, \$125.00. McKay Dymek DA1000, excellent condition, \$50.00. Lafayette P.F. 300 UHF/VHF Hi-Lo receiver. Tuneable to all frequencies plus accepts crystals. Base unit in metal cabinet. Mint condition, \$60.00 Will consider trades for the SPR-4 and PF-300 only. Herb Shatz, 99-15 66 Avenue, 3A, Rego Park, NY 11374. Phone (212) 275-9215 from 2300 to 0100 GMT or (212) 953-7744 from 9am to 5pm EST weekdays and leave message.

FOR SALE: Galaxy R530, SC-530 speaker with manuals, \$190.00 shipped UPS. FRENEX, complete 1983, \$5.00. Confidential Frequency List (4th edition); How to Listen to the World '71, '72, \$3.50 each. How to Improve Shortwave Reception, \$3.00. N.R.C. Domestic MW Log 70-71; N.R.C. Latin American MW Log 71, \$2.50 each. Shipping included. Cashiers check or money order, please. Al Drehmann, 11714 SW 129 Court, Miami, FL 33186. Phone (305) 385-3879.

FOR SALE: Allied SX-190, modified. Covers 3.0 to 5.5 MHz continuously, as well as major international bands. Needs some work (USB/LSB doesn't work too well). Direct frequency readout to .5 kHz. Good DXing machine. Price \$75.00 postpaid by UPS. Pitt McNeil. 2137 Spruce Street, Apt. #3, Philadelphia, PA 19103.

Well, what do you know... it's a girl! Jillian Kathleen Herkimer came into the world at 3:30 AM on the 4th of July. Mom and daughter are doing fine and we want to extend our thanks to all of you who paced the floor along with us.

One bright spot on the Radio Australia program line-up is "Talkback" and, better yet, helping out with that production from time to time is Geoff Cosier, Australian DXer extraordinaire. On a recent program Geoff tackled the subject of clandestine broadcasting and Kampuchea and he kindly provided a transcription of that program for us:

Radio In And For Kampuchea

by Geoff Cosier

(The following is copyrighted and cannot be reprinted without the consent of Geoff Cosier or Radio Australia)

Broadcasting in and to Kampuchea is as much stricken with complexity and confusion as in any country in the world. This is due to the war, and consequent changes in government there in recent times. To make any sense of the 4 stations I'm going to focus on, a run-down of political activity in the country is quite necessary. Not to mention the fact that this country bordered by Thailand, Laos and Vietnam, is known by 3 names: Khmer Republic, Cambodia and Kampuchea. In fact, the official name of the country is Democratic Kampuchea, but was known as Cambodia under the rule of Prince Norodom Sihanouk. The name Khmer Republic comes from the ancient Khmer Empire, of which the current country was the center. Since the 1800's, Cambodia was a French protectorate, and part of the Union of Indo-China until 1953, when it eventually achieved full independence. Sihanouk, a king under the French, abdicated to fill a more active political role as premier, then the country's first chief of state. In March 1970 whilst out of the country, he was overthrown in a pro-western coup led by Lt. General Lon Nol. Lon Nol's government was in turn overthrown in 1975 by the communist Chinese backed Khmer Rouge, led by the infamous Pol Pot who later attempted mass genocide in the country, killing millions. In 1976 a new constitution went into effect and the state took its new name, Democratic Kampuchea, with Pol Pot as leader. But in 1978, Vietnamese forces crossed into Kampuchea, and by 1979 the capital of Phnom Penh had fallen. Pol Pot's government was replaced by the Hanoi-backed People's Revolutionary Council of Cambodia, led by Heng Samrin.

But whilst this government may be the official one within Kampuchea, there is also a most interesting self-claimed coalition government in exile! This is a group of the 3 anti-Vietnamese factions fighting there

RADIO IN AND FOR KAMPUCHEA (cont'd)

at present: the communist Khmer Rouge; the non-communist Khmer People's National Liberation Front (KPNLF - also called Khmer Serika) led by Son Sann; and Prince Sihanouk's National Union Front for an Independent, Neutral, Peaceful and Cooperative Cambodia (FUNCINPEC).

The official radio of Kampuchea is the state-run Voice of the People of Kampuchea which operates from Phnom Penh. On shortwave and medium wave, it operates a home service in Kampuchean, and is easiest heard on 6090 kHz to sign-off at 1400 UTC (1430 on Sundays). VOPK also operates a foreign service in English, French, Thai, Lao and Vietnamese from 0000-0115 and again 1200-1315 UTC on two frequencies: 9695 and 11938 kHz. Note that in recent months, the 9695 kHz channel has been observed occasionally taking the home service instead of the foreign service. Whilst this station operates with seemingly modest power, the 11938 kHz channel is sometimes quite good, due to the split frequency.

There are 3 clandestine broadcasters directing to Kampuchea. The easiest of these to hear is the Khmer Rouge station "Voice of Democratic Kampuchea" which broadcasts via means of Radio Beijing facilities. The current schedule for them is:

2330-0030 on 8345, 9530 and 11685 kHz
0400-0600 on 11725 and 15400 kHz
0900-1000 on 11870 and 15115 kHz
1300-1400 on 11675 and 15300 kHz

Of course, all transmissions are in Kampuchean.

There is a station run by the Khmer Rouge's army calling itself the "Voice of the National Army of Democratic Kampuchea" which is also heard on shortwave only, on out-of-band 5200 kHz. This station transmits from 1000-1300 UTC in Kampuchean, 1330-1400 sign-off in Vietnamese, and again from 2230-2300 in Vietnamese, and 2300-0000 UTC in Kampuchean. There is very little known about this station apart from the fact that "National Army" of Democratic Kampuchea means nothing but the Pol Pot Army, rather than the Vietnamese occupational forces as would be guessed! The Khmer Rouge army was "Revolutionary Army" when they held power in Phnom Penh, but their title changed after being ousted from power.

The third clandestine station also has very little known about it, and at this time hasn't been heard outside South-East Asia. This is the "Voice of the Khmers" which is operated jointly by the previously-mentioned KPNLF and FUNCINPEC. Each faction has airtime on their 5 kW transmitter hidden somewhere near the Thai-Kampuchean border. It is unclear if this is the same transmitter that was being used by these two groups a while ago on 800 kHz medium wave. If it is in fact on shortwave, 5 kW of power should get them out worldwide.

So, the official Voice of the People of Democratic Kampuchea, the two Khmer Rouge stations, and the Voice of the Khmers all make quite an interesting potpourri of radio politics in S.E. Asia. Maybe not too many DXers can actually tune-in and understand what is being said, but I think you'll agree it is most rewarding to follow political situations like this. After all, these groups find radio a prime vehicle for their messages.

PEOPLE'S REPUBLIC OF KAMPUCHEA
Peace - Independence - Happiness.

Radio Annie: Nazi Retreat Gave Allies a Propaganda Prize

By Thomas O'Toole

Washington Post Service

WASHINGTON — Late in 1944, when the Germans suddenly evacuated Luxembourg, they left intact a prize for the Allies: the powerful transmitter of Radio Luxembourg, soon to become known as Radio Annie.

In 121 consecutive nights of broadcasting, according to CIA documents released last week, Annie "detected and confused the enemy, set Germans against Germans" and "breached the fortress Germany from within."

Project Annie, the plan for Radio Annie, was devised by the CIA as one of the most brilliant successes of the Office of Strategic Service, which was the U.S. intelligence-gathering agency during the war. Annie was estimated to have half the German Wehrmacht as part of its nightly audience as the Allies advanced toward the Moselle and Rhine rivers. After the Germans fled Luxembourg, the OSS established a second frequency while keeping Radio Luxembourg on the air. Under the plan, Radio Luxembourg would go off the air as usual at midnight, and Annie would come on at 2 A.M. At the different frequencies, Annie would last for 10 to 15 A.M.

Before Radio Luxembourg resumed broadcasting at 7 A.M., Annie went on the air in December, 1944, as the Allies moved toward the Moselle and Rhine rivers. For almost two months, Radio Annie broadcast with apparent objectivity, military and civilian news of the war in the sectors of the Rhine region.

"There were Germans who thought it came from bunkers behind German lines because at times it was technically imperfect, and there were Germans who thought Annie was an underground station and who were eagerly awaiting its political climax," the CIA history recounts. "A few smart ones suspected Annie might be the enemy, but the accurate and sympathetic character of its news presentation 'threw off even the smart ones."

From questioning of German prisoners, the OSS estimated that more than half the Wehrmacht was a part of Annie's audience.

The men of the Wehrmacht enjoyed 121: a captured German officer was quoted as saying, in a reference to Annie's frequency, "because it was not sophisticated like the overt Nazi radio propaganda and had nothing of the boring dignity of Radio Luxembourg. It was plain, simple language that intelligently obtained from same sitting and elaborating, plus everything was accurate."

But as the Allies broke through the German defenses at the Moselle River and crossed the Rhine, the CIA history says, "Annie promptly went into action."

"She put armored columns ahead of themselves, told of lost battles that had not taken place, imaginary surrenders and evacuations and of the inefficiency and treason of Nazi Party bosses. And all this served as a preaching angle but always with the undertone of deep, deep worry over the future of her beloved Rheinland."

Annie, the CIA says, "created a hypothetical movement of resistance, joined forces with it and called for the destruction of the Nazi Party" and "its immediate peace."

At one point, Annie reported that the Nazi spokesman and Luftwaffe field marshal, Hermann Goering, had evacuated his farm and given tons of excess produce and animals to local farmers.

Right after that broadcast, the CIA account says, many civilians, apparently infuriated that Goering had so much while they had so little, began looting German trucks carrying food in front-line areas.

"Annie saved panics in Nuremberg and Ludwigs-hafen by reporting talks to the press there — as when there were none," the CIA history says. "Right as the battle

so crowded with refugees that the Germans were unable to move supplies to their lines."

The documents released last week also described another important U.S. wartime venture in psychological warfare, code-named "Skorpion West."

This plan was devised after the OSS intercepted a Nazi leaflet aimed at raising troop morale. The OSS turned its message around and dropped millions of the bogus leaflets by plane over German lines.

The German leaflets raised the morale of the Nazi army and its leaders' popularity. At the top and bottom was the message: "If you want to know the truth, comrades, ask the Skorpion."

Once the Allies moved inland from the beaches of Normandy in 1944, the Germans were forced to distribute Skorpion from the air. Copies of Skorpion flew into the hands of the Allies, who reproduced the leaflets but changed their slant.

Shortly after D-Day, the Allies dropped three messages. The first questioned Nazi masculinity. The second questioned German military leadership, and the third warned that an Allied offensive would come before winter, and that "we must expect large stretches of combat will be required."

Here are a few words of explanation to readers:

1. By following the instructions built into the program, the user can obtain the following information: station name, country, latitude and longitude of the station, and bearing and distance to the station from his or her location.
2. The program will run on the VIC-20 with at least 8K memory expansion. It will probably run on a C-64 also, if you exclude line 15.
3. The usual Commodore programming conventions apply. If you're not sure how to produce some of the reverse symbols shown in the listing, enter this line for practice (The characters shown in brackets should be pressed along with the "CTRL" (control) key. The character shown in parentheses should be pressed along with the "SHIFT" key.):

```
10 PRINT "[1][3][7][9][0](<CLR>HOME")
```

The character graphic letter Q (用) is produced by pressing the "cursor down" key after the quotation mark (").

4. The data statements include four pieces of information for each country: station name, country or city, latitude (in degrees and "10ths", vice minutes) longitude (in degrees and "10ths"). Latitudes below the equator are represented as negative numbers. Longitudes west of Greenwich are expressed as negatives, also. Therefore, Falkland Islands, for instance, is represented by coordinates -51.7, -57.8. I have entered station names as "R.Beijing" with no space after the "R.", but the user may add this space, if desired.

5. Be especially careful with punctuation marks, particularly within the data statements. A misplaced "-" or an extra comma will play havoc with the results of the program.

6. You may shorten the latitudes and longitudes, to save typing (and memory), by leaving off the fraction (for instance: latitude 1.5, leave off the .5). This will round off the location to the nearest degree and will slightly affect the resulting bearing, but not much.

7. No need to type in lines 1 through 13, unless you want to.

I'll be happy to provide a copy of the program on tape if anyone would rather not type it. Just send me a tape and one dollar (to cover return postage) and I'll get it back to you as soon as I can. Hope you enjoy the program. I'll be happy to answer any questions about it, too, if you care to write.

READY.

P.S. Due to Personal Prejudice, I have not included any listings for Soviet stations. People can add them, if they like, between lines 3035 and 3050, or anywhere else in the data area.

The few computer-related articles that have appeared here in SWC have certainly created their share of interest; at least judging by the mail received. And that's good, because we have a number of other articles on hand that will be featured in the coming months. Bill Cole, who has done more than his share to keep me informed on a subject I know nothing about, has created a program to produce reception reports. ANARC's Bill Krause sends along a piece on the application of computers for the visually impaired. So, keep watching this column....(JH)

WINB-Red Lion, Pennsylvania

by Marlin Field, 128 Oak Street, Hillsdale, MI 49242

WINB began transmitting on the shortwave bands in October of 1962 as a privately owned, commercial shortwave station. At its beginning, WINB was owned by the late Reverend John M. Norris, and is presently owned and operated by World International Broadcasters, Inc.

From its beginning to the present, WINB has been used mainly by religious broadcasters who purchase time to broadcast programs as a missionary outreach.

WINB is located 1-1/2 miles east of Red Lion, Pennsylvania where the transmitter has an output power of 50 Kw using a single triode tube in the first amplifier. The antennas, consisting of two three-wire curtain rhombics, are terminated by four-wire stainless steel, resistive dissipation lines and are fed by open-wire transmission lines.

The antenna for North Africa and Southern Europe has a bearing of 062° and the antenna for South American coverage has a bearing of 160°.

The station now operates on three frequencies: 15145 kHz, 15185 kHz and 17730 kHz. Language used is almost exclusively English. One may, however, hear one program in Spanish, one in Portuguese, one in Latin, and two in Russian. (From information furnished by WINB)

Editor: Andy Robins, 223 North Shore Drive, Apt. 211-S, South Haven, Michigan 49090

Our question last time about how well equipment manufacturers are meeting the needs of shortwave listeners and DXers drew this response from Ed Insinger of Summit, New Jersey:

"Since joining the hobby in 1968, I have been a part of phenomenal changes in receiver design and technology. I have seen tube sets give way to hybrid circuits, which gave way in turn to transistorized receivers and their mini-components. To say that receiver design has gone through a revolution in the past fifteen years is accurate. In turn, the quantity and quality of receivers has increased dramatically to the point where the SWL/DXer really has to do some research before buying a receiver. No such condition existed back in 1968!

"At the same time as all this 'hi-tech' gear filtered through the U.S. marketplace, I have noticed that an alarming 'gap' has developed between receiver manufacturer and end product user -- in this case, the SWL/DXer. Through all my experiences with equipment, the only manufacturer to successfully bridge the gap is Drake. In the years that I've owned an SW-4A and an R-7, both of which required factory servicing, I never felt threatened by the ability of their technical staff to solve my receiver problems. Their service was prompt, courteous, and top quality. They were genuinely concerned and understanding of my receiver problems and corrected them accordingly.

"Since the Japanese receivers/portables have taken over the marketplace, the person who invests in one does so with a sense of uncertainty, should the need for servicing arise. The inherent complexity of these units requires a very knowledgeable service staff. These people must be in touch with the needs of the SWL/DXer returning a receiver for a specific and important reason, very much apart from an ordinary audio enthusiast or amateur radio operator.

"My experiences in this area of Japanese receiver performance have not been very favorable. Perhaps some fellow members can provide first-hand experiences to confirm or contradict this belief."

On another subject -- help for the beginning listener -- comes this from Joe Freeborn of Lamoure, North Dakota:

"I got into the hobby around the first of the year when I bought an old DX-160 from a friend. The bug bit me pretty good and not long ago I purchased an FRG-7. I guess my major complaint about FRENEX and other shortwave publications is the lack of information and articles designed for the novice SWL. It doesn't seem to me that enough attention is devoted to the newcomer. I recently read in CQ magazine that the popularity of amateur radio is in steep decline, mostly because of rather tough licensing requirements. I would hate to see shortwave listening die out as well.

"For someone curious about the hobby, especially someone without an electronics background, reading through the 'Technical Topics' section of the July FRENEX would definitely make them wonder. I quote from page nine: 'The R-70 utilizes a passive packaged DBM in the first mixer where the first mixer in the R-71A is a balanced FET type.' I don't feel the non-electronically oriented reader would have a clue as to what that means. I realize the review was meant to be technical, but perhaps FRENEX could start a section for the novice SWL. Say, articles about what a mixer is, good listening practices, where to get technical advice, letters from seasoned DXers on how and why they listen to SW, and reviews

of good 'beginner's' receivers that fall more into the newcomer's price range. Perhaps a good title for this would be 'The Novice Nook,' or something along those lines. I'm sure other newcomers would welcome a section just for them with answers to questions they thought too obvious to ask, or just didn't know whom to ask. Maybe even 'old timers' could pick up something useful.

"Although I still consider myself a novice SWL, I would be more than happy to help in anyway possible to get something going along these lines. It may be that the membership isn't interested in something like this, but I thought 'Contact' might be the way to find out."

Joe has a good idea. FRENEX used to have a beginner's column edited by that "old timer," in the best sense of the term, Ed Shaw. It helped many a newcomer to the hobby. Ed helped a wild-eyed young DXer nearly a decade ago with a receiver problem by sending, at no charge, the part required and a lot of good advice. That advice is one reason that upstart is editing this column today. Are NASWA members interested in such a column again? Let "Contact" know.

And finally, this from new NASWA member Frederick Kleiner of Franklin Square, New York:

"Although I just recently became active as a DXer, I have been aware of the hobby for the past thirteen years. During this time I watched my brother Arthur, an active NASWA member and DXer, log hundreds of stations and amass an equal number of QSLs. I was fascinated by the idea of getting information from nations all over the world, and receiving material and literature that is informative as well as politically and historically significant.

"The radio I decided to start with is the GE 'World Monitor II'. This choice was based on a review in the World Radio-TV Handbook. I would like to know how other NASWA members who own this radio feel about it."

If anyone wishes to write Frederick about the GE receiver, his address is: 690 Byron Avenue, Franklin Square, NY 11010.

Sincere thanks to all who took the time to write. John Merkimer was right: the erratic appearance of "Contact" has not helped generate interest in the column. On the other hand, it really is a "Catch-22" because without contributions there is no column.

Our suggested topic for next time: how can FRENEX, and NASWA in general, better serve its members and the listening community in general. If you were editor of the bulletin, what changes would you make? Are we doing enough to publicize the hobby, or are we just preaching to the already-converted?

Seventy Years of Broadcasting in Belgium

by Richard E. Wood

March 28, 1984, was a day that went without fanfare in Belgium. But some Belgians conscious of their 20th-century history paused and took stock since that day marked the 70th anniversary of broadcasting in their ethnically divided, officially trilingual country.

Though its existence as an independent country dates back only to 1830, a fairly recent date by West European standards, Belgium has been a pioneer in many fields of modernization and technology. Many scholars of the history of science and technology say that Belgium was second only to Great Britain in launching the Industrial Revolution.

There is no philosophical or terminological agreement on what constitutes a "broadcasting station", or a "broadcasting corporation" of the European type. So, it is difficult to answer the question as to whether the broadcast originating at Laeken Palace, Brussels, on March 28, 1914, was or was not the first transmission by a radio broad-

BELGIUM (cont'd)

casting station in Europe, or the beginning of the phenomenon of national, state-chartered broadcasting corporations typified by Britain's BBC. But March 28, 1914, was the strikingly early date of a broadcast concert from the park-ringed royal residence of Laeken. It began with some Morse Code signals, and then the spoken words of announcer Joseph Longé: "Un, deux, trois, quatre... dix. Allo, allo. Poste radiotéléphonique et radiotéléphonique, près de Bruxelles. Messieurs les amateurs de télégraphie sans fil, nous allons vous faire entendre un concert dédié à Sa Majesté la Reine Elisabeth..." The first selection was the aria from "Tosca" sung by a vocalist whose name is unintelligible in the primitive recording which survives.

The success of this first broadcast was such that it was decided to transmit a concert each Saturday evening, still from the royal palace. The broadcasts could be heard over a 65-km. radius in the flat Brabant countryside. But 1914 was a fateful year. "Gallant little Belgium" was the first victim of the German war machine, and as the forces of Kaiser Wilhelm reached the gates of Brussels, King Leopold ordered that the transmitter be blown up. Belgium was raped and ravaged, trench warfare raged in the fields of Flanders, and its postwar recovery, with generous American aid, was slow. Finally, on November 24, 1923, Brussels came back on the air, under the name of Radio-Belgique, an initiative of the private Société belge de radioélectricité (SBR), the first Belgian company to manufacture radio sets. The first station was nothing fancy, just a single story house on Rue Stassart near the Porte de Namur. The first broadcast consisted only of live music. 1924 saw a daily fifteen-minute "radio-journal" or newscast, and the station went commercial, selling time to political and religious organizations. Radio-Belgique was a French-only station. Its leading personality was Theo Fleischmann, known as "the father of broadcast journalism in Belgium." In the mid-1930s, he did live reports from such events as the funerals of King Albert and of the tragic young Queen Astrid, whose death in an automobile accident plunged not only Belgium, but much of Europe, into an agony of mourning and social despair comparable only to the reaction thirty years later to the assassination of John F. Kennedy.

As is obvious from the language choice of the first Belgian broadcasters, Belgium was at that time dominated by its French speakers, even though Flemings have always been a numerical majority in the ethnically troubled country. In 1928, a group of Flemish listeners tried to unite into a Vlaamse Radio Vereniging (Flemish Radio Association), but the project failed. Like their Dutch-speaking cousins to the north, the Flemings were divided along religious and party lines. Thus, the Catholics had their Katholieke Vlaamse Radio Omroep (KVRO), the Socialists had their own Socialistische Radio Omroep voor Vlaanderen (pronounced Sarov in a perhaps-not-coincidentally Russian-sounding acronym), the Liberals their Liberale Radio Omroep (Libradio) and the Flemish Nationalists their Vlaamse Nationale Radio Vereniging (Flemish National Radio Association). All these were private bodies dependent on contributions and advertising. The Flemings were divided and provincial--the VRV was headquartered in Antwerp; whereas the French-speakers were united and firmly based in Brussels.

CENTRALIZED BROADCASTING

The Belgian government viewed with concern the rise of broadcasting and the ups and downs of private, sectional broadcasting organizations. When Radio-Belgique ran into financial difficulties in 1930, the Brussels administration acted. By a large majority, parliament voted to establish the INR (Institut national belge de radiodiffusion), also known as NIR after its Dutch-language initials. It was charged with the production of radio broadcasts, including newscasts, which must be totally impartial --perhaps an impossible task in an ethnically, linguistically and politically divided country. The country's newspapers did not look kindly on this new competition, funded by public revenues.

How was impartiality to be achieved? There were to be two sections, French and Flemish, but only one administrative council. The latter was

BELGIUM (cont'd)

to be made up of three Catholics, three Liberals and three Socialists, and these nine posts also had to be divided as follows; three Flemings, three Walloons and the three Bruxellois. This is a perfect illustration of the political balancing acts at which Belgium is a past master. Especially at that time, Flemings tended to be Catholics and Walloons tended to be Socialists. It was not always easy to find someone who fit the necessary ethnic and political requirements and also had the time and talents to serve on the Council.

The INR-NIR had a total of 68 employees in its initial stages, not counting the players and conductors of its in-house orchestras. Its first program was broadcast on February 1, 1931, from 5 to 10 p.m. The different sectional associations were not abolished--the Institute had to relinquish twelve of its 35 weekly hours on the air to them. The associations continued to appeal for private contributions. Just before World War II, the INR moved into its new buildings on Eugène Playeur Square in Ixelles, South Brussels, remaining there till the mid-1960s.

As war broke out, local transmitters in Belgium had their licenses canceled, and the INR itself ceased transmission. In 1942, the government in exile in London announced the creation of the Office de radiodiffusion nationale belge (ONRB, or BNRO in Dutch), broadcasting to Belgium via the BBC. At the same time, a station which was destined to become world-famous went on the air from Leopoldville, capital of the Belgian Congo, transmitting on shortwaves back to the occupied mother country and to Belgian exiles, and using the call letters OTG. They continued on the air until the eve of the independence of the Congo, so that Belgium was in the unique position of being represented worldwide in broadcasting by a station in its major colony, rather than in the mother country. Shortwave transmissions directly from Belgium began only when the loss of the Congo, now Zaire, was on the horizon.

By contrast with, for example, the Voice of America, but similarly to the major missions of the shortwave stations in Canada, Switzerland, Norway and several other Western countries, the principal task of Belgian shortwave broadcasting is to serve Belgian citizens abroad. These fall into a number of groups; sailors, development personnel working chiefly in Africa, especially in the former Belgian possessions of Zaire, Burundi and Rwanda, missionaries and religious personnel (overwhelmingly Roman Catholic) and to a lesser extent Belgian emigrants and settlers in such countries as the U.S., Canada and Australia. There are also Belgian businessmen overseas, representing such Belgian-based firms as Agfa-Gevaert. Paradoxically, since Brussels is frequently called "the capital of Europe", and more European political organizations are headquartered there than in any other European city, the emphasis is on broadcasting to the non-European, overseas world. This is, of course, a historic phenomenon resulting from the early OTG years. However, coverage of at least the peripheral European countries is increasing, first, with Spain and Portugal, where many Belgians go on vacation or settle for retirement, but more recently, with the carrying of broadcasts in English on 1503 kHz medium wave, intended mainly for the British Isles, in parallel with shortwave.

After World War II, the INR-NIR returned, but the private, commercial broadcasting associations did not have their licenses renewed. Broadcasting became a state monopoly, and the people lost their favorite commercial programs. Some variety was provided by the establishment of a second network in the two main national languages, but theirs was a regional task: to develop the culture of the different provinces. The task of RTB-2 and BRT-2 is changing nowadays, however, when these state-run networks are faced with enormous competition from a plethora of Free Radios which have sprung up since the late 1970s. RTB-2 and BRT-2 are being forced to appeal to younger audiences; they are turning into pop music channels. The post WWII years saw enormous growth in the INR-NIR, including schools broadcasting, and local broadcasts for the third official language group, German speakers who live in the eastern cantons of the province of Liège. The German speakers, being part of the Walloon province of Liège, are the responsibility of the French network, which is

now the RTBF, not the Flemish BRT (although German and Dutch are, of course, linguistically much closer than German and French). Incidentally, you can hear the daily German newscast from the RTBF relayed on shortwave at 1130-1145 UTC on 17675 kHz. With fifteen minutes daily in German on shortwave, RTBF must be the smallest German-speaking station currently on shortwaves.

In 1960, as Flemings and Francophones moved further apart, the old INR-NIR was split into Radio-Télévision Belge (RTB, which in 1972 became RTBF, emphasizing its Frenchness) and the Belgische Radio en Televisie (BRT), two separate broadcasting boards each with their own autonomous administrative council and management. The Belgian government no longer retained any powers to interference in the internal affairs of the two broadcasters. There is no official censorship. Officially, the BRT and RTBF journalists are nonpartisan and strive to be objective. But there have been many complaints of partisanship, and in response to this, the two stations have gone right back to the system of the 1930s--once again, they provide air slots to political parties, trade unions, employers' groups and other bodies, to use as they see fit.

In the mid-1970s, "Free Radios" galore took to the air. Anyone with money to build a transmitter started broadcasting, and in a tiny country, further divided by two language borders, chaos reigned. The government stepped in and regulated the free radios, requiring, not precisely a license, but a formal application before taking the air, and it also regulates their power and coverage area. Also, the free radios are not permitted to carry advertising--this is about the only difference from the early days of broadcasting in Belgium. All in all, we can say that there is nothing new under the Belgian sun; in seventy years, broadcasting in Belgium has come full circle.

Voice of the Andes booms out missionaries' message

By Alan Riding
New York Times

Quito, Ecuador

On the afternoon of Christmas Day 1931, an old organ played, a trombone provided accompaniment and a group of American Protestant missionaries standing in a converted barn 9,300 feet above sea level belted out the hymn "Great Is Thy Faithfulness."

A microphone and a 250-watt transmitter brought to Quito from Chicago carried their message to the owners of the six radio receivers to be found in Ecuador at the time. The Voice of the Andes was at last on the air.

Today, millions of shortwave listeners playing with their radio dial have been stopped by an unusually powerful signal -- often stronger than either Voice of America or Moscow radio. In half a century, the Voice of the Andes has grown into the largest missionary radio station in the world. It broadcasts in 14 languages for a total of 1,300 hours each week, and its 500-kilowatt transmitter is the largest in Latin America and twice as powerful as anything used by the Voice of America.

"We're always looking for new ways of spreading the Word," said Richard Broach, field director in Ecuador for the World Radio Missionary

Fellowship, which is based in Miami.

One secret of its success is that while reaching out as far as Japan and Scandinavia, the fellowship has never neglected Ecuador. It operates a hospital in Quito and a jungle clinic in the eastern town of Shell, and some of the energy produced by its two hydroelectric dams is donated to local authorities.

Still more remarkable, HCJB radio -- its call sign stands for "Heralding Christ Jesus's Blessings" in English and a similar message in Spanish -- has avoided political clashes with the succession of governments that have ruled Ecuador since the 1930s.

"We don't preach against Catholicism, against the government, against the country," Broach said. "Our is a positive message. We try to be of service to the government and people of Ecuador. During times of crisis, we only broadcast the bulletins of the government of the day."

Numerous U.S.-financed Protestant fundamentalist sects are setting up operations in Latin America, all competing fiercely for converts. HCJB, by contrast, is a multidemominational operation built around a broad statement of faith. "The fundamentalists are more to the extreme," Broach said. "We're more in the middle."

BROADCASTING FROM THE HIGH SEAS: THE HISTORY OF OFFSHORE RADIO IN EUROPE 1958-76

A REVIEW — Michael Bolitho, Toronto, Ontario

Author: Paul Harris

Publisher: Paul Harris Publishing, Edinburgh

Source: George Philip Services Limited,
Arndale Road, Wick, Littlehampton
West Sussex, BN17 7EN United Kingdom

Price: eight pounds fifty pence (sterling)

This book first came to my attention about six years ago. Unfortunately, it has taken me six years to obtain a copy. The publisher's agent in North America reports that it is out of print, but I had no trouble obtaining a copy directly from England.

As the title implies, Broadcasting From the High Seas deals with the history of offshore radio. It concentrates mainly on the three year period beginning at Easter 1964 when the first of the pirates, Radio Caroline, appeared off the coast of England to broadcast pop music and light entertainment to audiences fed up with BBC programming. Radio Caroline was soon followed by a number of other stations, operating not only from ships but also abandoned war works in the Thames Estuary and other locations off the coast of England. The stations were not only welcomed by listeners but also by advertisers desiring an outlet in which they could promote their goods.

The book traces various inter-station rivalries, which, for Radio City, ended with the murder of its owner. Such hi-jinks were not to be allowed to continue. The British Government in 1967 enacted the Marine Broadcasting Offences Act which had the effect of putting all the broadcasters, with the exception of Radio Caroline, off the air.

Brief mention is made of other stations which operated: the stations off the coast of Scandanavia in 1958, which appeared to be the first floating radio stations in Europe. The book also makes passing reference to the Voice of Peace (still on the air off the coast of Israel, and reported heard in North America on short wave) and New Zealand's Radio Hauraki.

Quite in-depth coverage is given to a second set of stations: those which operated off the coast of Holland from 1960 until they were put off the air in 1974. The information here is no less fascinating than that given in the section on the British stations. And, like their British counterparts, Dutch inter-station rivalry sometimes got a little strong. The bombing of the Radio Nordsee International ship, the Mebo II, by rival Radio Veronica, for example. The author also provides background material on the jamming of Radio Nordsee International by the British government during the General Election of 1970.

For the individual interested in offshore radio, or indeed unofficial radio broadcasting in general, this work would be a good addition to the library. It is quite easy to read, and I found it fascinating reading. It is also well-illustrated, including a photograph or two of raiding parties descending on rivals. The price is not unreasonable, either.

Broadcasting from the High Seas is not without fault. First of all, it is not a complete history of European offshore broadcasting as the title might imply. It does not, for example, give more than passing reference to the Swedish offshore stations which predated Radio Caroline by six years. Secondly, the book is now eight years old, and out-of-date. These shortcomings are fairly minor to somebody interested in an area which very little has been written and published, and what has been published is now out of print. For example, I am aware of a work entitled Radio on A Shoestring, which is about New Zealand's Radio Hauraki. It, unfortunately, seems to be out of print.

Considering this past year has seen the return of Radio Caroline to the air after a sinking some four years ago, a more recent chronicle would be appreciated. Some will recall the broadcasts on 6206 KHz which were presumed to come from the Mebo II about six years ago. The pirates may not have the high profile they once had, but they are certainly still around. Further more, if rumours are true, it looks as if there will be another radio ship off the shores of England later this year.

Sam Alcorn strikes again! This time it's Travel-Holiday magazine that gets a dose of Sam's journalistic talents, and take note of that nice plug for NASWA! You can write Sam at 64 Midland Blvd., Maplewood, NJ 07040.

Shortwave Radios

Here and There

by Sam Alcorn

As a young boy, I reached out beyond the confines of my drab New Jersey town to exotic Africa, Asia, Europe and South America with the help of a shortwave radio. From a little corner of my room, I could descend on any part of the earth.

I've since been to a few of those far-off places, and I still tinker with a shortwave radio, mainly to fill the long gaps between trips. For a travel junkie like me, a shortwave radio helps the time between trips go a little faster.

For the uninitiated, there's more on the radio dial than just AM and FM. A whole world is at your disposal by way of shortwave. Any armchair traveler can twist a dial and land in London. The British Broadcasting Corporation (BBC) will let you hear Big Ben tolling on the hour, world and local news, concerts, interviews and maybe a sneak preview of what's on the London stage.

Depending on your mood, you might drop in on Quito, high in the Andes Mountains, or you might visit tiny Belize in the steamy jungles of Central America.

Then you might shoot back across the Atlantic Ocean to West Germany or Czechoslovakia. Maybe you'll see what's doing in Egypt or Israel before sitting back in the comfort of your home for an evening of Russian folk music from Moscow.

My armchair travels have taken me to some out-of-the-way places: Uganda for Soul Train in Kampala; Iran during the early days of the hostage crisis; little-known Albania, the maverick communist nation few travelers ever see, and Grenada long before the Caribbean island nation became front-page news.

Outside the United States, the shortwave radio is part of daily life. The BBC, for example, boasts a worldwide audience of 100 million. But in this country, radio hobbyists make up the bulk of the shortwave listening public. That's a shame, because shortwave radio has so much to offer, especially for the home-bound traveler.

Many stations, like Swiss Radio International and Spanish Foreign Radio, offer first-rate travel programs highlighting the history and beauty of their respective countries. That trip you are planning to Israel, for example, might be sometime off, but Kol Israel will give you a front-row seat tour now of the Jerusalem City Museum and the archaeological digs in the city's old quarter.

Language is no barrier. Dozens of broadcasts are in English, and some stations even offer language lessons, including German, Spanish and Chinese.

Most important is that shortwave radio picks up where tour books and brochures leave off. Shortwave can transport you across time zones, oceans, mountains and continents with a turn of a knob. It presents an up-to-date sound snapshot of a

region's politics, culture and music. Listening to the call to Mecca, the high-stepping patriotic music of Cuba or the revolutionary slogans from Nicaragua gives you a unique and rare glimpse of a country.

Some travelers take their shortwave receivers on vacation. Thanks to the Voice of America and American Armed Forces Radio, you are never more than a twist of the dial away from the news back home.

New technology is making cheaper and easier-to-use radios available. One travel radio is no bigger than a pack of cigarettes, and many manufacturers are using digital frequency readout to take the guesswork out of tuning in a station.

Learning when and where to tune is simple enough. A general rule of thumb is to tune stations in the 40, 51 and 25 meter bands in the early and late evening hours. Stations in the 19, 16 and 15 meter bands are best heard during daylight hours. There's plenty to hear around the clock. The trick is to tune slowly, because the same stretch of the AM radio band that yields five stations might bring in 25 broadcasters on the shortwave band.

Of course, it helps to have a guide. The bible of shortwave listening is the *World Radio-TV Handbook*, published and updated annually. It can be ordered at most bookstores or directly from Gilfer Associates, Box 259, Park Ridge, NJ 07656.

Joining a club may also help. There are dozens in North America, one being the North American Short Wave Association. A \$16 membership fee brings you a monthly magazine chock full of listening tips and updates on what's being heard around the dial. For more information, write #5 Wildflower Road, Levittown, PA 19057.

You can even get a souvenir of your "travels." Sending a letter, noting the day, time, frequency and a few program details, will bring you a QSL, a postcard-like verification that you heard a specific station. Some stations give their addresses over the air, or you can check the *World Radio-TV Handbook*. Return postage, by way of an International Reply Coupon, is suggested.

My favorite QSL is from the Voice of Turkey. Among the technical jargon is a Turkish proverb: The Turkish humorist Narettin Hoca was asked what they do with the moon when it gets old. He said they cut it up into little pieces and make stars.

On a clear night, when I look at the moon, I can't help but think of Turkey. I may not have been there in person, but I've been there by radio. ○

When not traveling the airwaves of the world, shortwave enthusiast Sam Alcorn is a reporter for Dow Jones.

Editor: James G. Herkimer, 3255 South Drive, Caledonia, NY 14423

User Notes: Icom IC-R70

Some members have expressed difficulty in understanding the operation of the IC-R70's FBT (VBT) and notch controls, while others seek to improve upon their DXing techniques using this receiver. This month we feature operation of the R70 as described by some well-known users:

Steve Reinstein - my R70 is still unmodified, although I do plan to upgrade the stock ceramic SSB filter with the FL 44 filter. I prefer ECSS operation for serious DXing, but I try to use USB primarily, even though it requires use of the function button in sequence with the SSB button on frequencies under 10 MHz. The audio in LSB, on my R70, seems less clear and inferior to the audio when in USB. Perhaps this is the fault of the cheap ceramic filter?

My own normal routine is to begin tuning slowly in USB, at the low range of whatever band I'm monitoring. I slowly tune upward in the 100 Hz position, with the FBT (VBT) set at 1 o'clock and the notch off. When I come to an unfamiliar carrier, I change to the 10 Hz position and make certain I've got the correct frequency zero-beat. Slight FBT adjustment may be necessary, depending upon interference. If there is too much interference in USB, I switch to LSB, retune the main tuning dial to accommodate the frequency offset, and change the FBT to 11 o'clock. I find the notch filter can be of great help at certain times, especially with unwanted heterodyne whistles. I don't advise DXing with the notch on all the time, you may actually be notching out a signal that you're trying to hear! Notch settings vary greatly, depending upon the particular conditions. When using the notch, I would advise turning the knob very slowly, so as not to go past the proper setting.

Chuck Bolland - all the modifications on my R70 were done by me. I have the AM narrow modification using the dial lock as my switch, rather than the FM switch as used by EEB. Instead of the FL 44 crystal filter, I have the MF 455 mechanical filter, which I modified. I have compared my radio with one that had the FL 44 and found hardly any difference in quality. The price for the MF 455 is \$ 25 plus postage from Icom. I have two other modifications which came from the International Radio Inc. newsletters for Icom, 364 Kilpatric Ave., Port St. Lucie, FL 33452. I find this newsletter very informative and suggest that all ICOM owners subscribe. I think it is \$9 per year.

I prefer to use the AM narrow when scanning the bands. I find that if I turn back the RF gain to about 2 o'clock and switch the AGC to off, I'll not get much overload between stations. (Have you noticed the increased signal strength in AM compared to SSB? I think this is due to the 455 filters) When I find a station, I'll use the FBT and the ideal setting seems to be at 1 o'clock. However, I also find that I can tune off the frequency with the main tuning dial and back tune with the FBT, often times pulling in an otherwise unreadable station.

I use the notch for "hets" and TTY signals and only in SSB. When I'm tuning in SSB or ECSS, I use a set procedure. If I am tuning up the band (4755-4999), I use USB. If I am tuning down the band (4999-4755), I use LSB. I find this easier to tune into the center of a signal without going backwards, after I find the carrier.

Terry L. Krueger - I've been very pleased with my R70 since obtaining it 1½ years ago. I really have never developed any particular technique in using the FBT (VBT) and notch tuning. I'm the type that just "twiddles-till-it-sounds-right-hi!" On 60 meters I do most of what I'd consider "thresh-hold" Latin American DX in the ECSSB mode. Having operated several others' R70's I've concluded that there are variations with in each receiver, thus it's really hard to designate exact tuning increments or steps. My R70 is unmodified. I'm told that the FL 44 filter is really quite an improvement, but I just never could fork out the seemingly high charge for its' installation, not part with the receiver for a couple of weeks for that matter!

I just never could fork out the seemingly high charge for its' installation, nor part with the receiver for a couple of weeks for that matter! I did add an external speaker, a President 711SX (designed for CB use) that plugs directly into the external jack for greatly improved audio. I recently had the opportunity to test the new R71A - and my feelings were mixed. The 32 channels and scan were nice, but the elimination of the 10 Hz tuning rate and RIT make SSB tuning a bit slower, and the lack of notching in AM is sorely missed. I also didn't like the two-position narrow/wide filter - neither did audio justice compounded by the speaker being top-mounted. I'm convinced that ICOM left some of these features off so as to create a market for yet another upgraded version. One strange problem experienced with my R70 (and at least two others I know) was a brief apparent AGC short, causing the audio to drop out. I wrote to ICOM, but the techs said they hadn't experienced this problem. To date, it's only happened once on my set though.

Jim Herkimer - my R70 is equipped with the FL 44 SSB filter and has been modified to allow use of the narrower SSB filter for AM reception. I prefer ECSS, more specifically LSB, for most of my DXing. My normal routine is to tune the desired station's frequency One kHz higher, to produce a beat note, and then I adjust the PBT and notch for best clarity. This usually corresponds to the notch control set at one o'clock, and the PBT at 11 o'clock. Then I retune the main tuning dial to the correct frequency, zero-beating with the dial in the 10 Hz position, fine-tuning when necessary with the RIT control. Finalizing the PBT and notch usually requires very slight re-adjustment from these settings.

If this does not prove satisfactory, then I switch to AM, and set the main tuning dial one kHz higher, with the PBT and notch both set at 1 o'clock, or 1 kHz lower with the PBT and notch both set at 11 o'clock. These are the settings that work best for me.

Bob Wilkner - My R70 has the FL 44 filter installed with a provision for use of this filter in AM. I use ECSS for locating the carriers of weak signals and then use ECSS, usually in the USB mode or Am narrow for the log. I only use the notch filter to remove hets or other interference. I also tune the PBT and the AF gain at the same time attempting to strike a proper balance. I have found the USB, at least on the four sets that I have operated, to be superior to the LSB. The notch filter together with the PBT in ECSS can take out most hets and interference. In AM narrow I like to experiment with the AGC turned off.

I have found an antenna tuner, in this case a YAESU FRT-7700, to be useful when using a longwire antenna.

Jim left me some room and it's a good opportunity to mention the nice catalog received from the folks at Universal Shortwave Radio, 1280 Aida Dr., Reynoldsburg, Ohio 43068. Fred Osterman has put together a product line with, well, "something for everybody", regardless of experience or taste. \$1 (or 3 IRCs) will bring you the 70 page catalog and, yes, it's refundable with your first purchase.

Don't forget to grab a copy of Gerry Dexter's "CLANDESTINE CONFIDENTIAL" book, from Universal, and further your knowledge of Kampuchean clandestine broadcasting. (JH)

Well, it is nice to be back but I'm not sure about all this typing....

The season is just about here (no not football, man, DX!) and with it your chance to explain to your neighbors why you get up in the middle of the night to listen to a weak station which you couldn't understand anyway. Just remember....we're OK, it's the world that's wrong.

Thanks again, everyone, for the congrats. I like it too! 73s, *Herk*

COLOMBIA 5955, Caracol sports net from as early as 0800 some days w/live xmsn from Tour de France cycle race (Tony Jones, Paraguay, 13/7) LV de Yopal on 5950 w/ID 1416; listed 5050, change or addl outlet? (Rikard Johansson, m/m & Andy Sennitt, WRTH, RNMN 19/7) Or typo more likely (gh) 15/1 at 0359-0515 I

got a reception which confused me somewhat. On 6155 a stn IDing several times as "RFN 84, la radio de Colombia". After having checked every possibility I got the following solution which still confuses me: Radio FN Caracol in Pereira, Colombia, 950 x 6 = 5700 + 455 = 6155. What do you think about this rather rare catch? (anon. item forwarded by Bill Oliver). While I would be the first to encourage routine checks for possible harmonicization, it doesn't make sense in this case and other explanations are far more likely. A radiated 6th harmonic would be heard on 5700, not 455 kHz higher due to the receiver IF. If an image were involved, it would be removed at twice 455 kHz, but a harmonic is extremely unlikely to be strong enough to produce a receiver image (or to be heard within crowded 49m beyond the local area). No details about your receiver have reached me, but I think you were most likely listening instead to 6160 stn, Emisora Nueva Granada, which has not been known to vary; if you are positive it was 6155, then further checking is needed. Nueva Granada frequently mentions the network of which it is a key stn, Radio Cadena Nacional (RCN, pronounced erre se ene, while "F" does not rhyme with "C", being pronounced efe). (gh) more, LMI

/+LMI

COSTA RICA Cadena Columbia, San José on 4839.5 ex-4825 29/6 & 30/6 0005-0515* including anmt in IT 0500! (P Cacciamatta & Dario Monferini, Italy, Play-DX) Very strong here, more like 4839.6; marginally further from 4832 Reloj (gh)

CUBA RHC to 0600* on 9550, not ancd 11930; // strong 11760, weak 15300 16/7 in EG; 0520 had end of "Eyewitness Africa" referring to "Union of South Africa" from UNESCO publication; then "From the Land of Music" and later, stamp pgm (gh) Cuba's Tele-Rebelde TV svc reported 14/6 that two modern TV centres would soon open in Miraflores and La Península de Ramón in the municipalities of Moa and Antilla in Holguín province, and'd improve reception of sigs there. The Natl Dir of R Comms 'd reported that by end of 1985 the country'd acquire 43 items of modern radio xmiting eqp from Czechoslovakia; 36 smaller items would be built in Cuba's own telecomms central lab to improve TV signals in the country's remoter areas (WBI 5/7) Sure wonder what 'items'

CYPRUS Reports in GK-Cypriot nxpapers 16/6 said local employees of the French radio stn Somera (the xmtr carrying R Monte Carlo AR svc on 1233 kHz) had decided to go on a one-week strike from 19/6; duration might extend indefinitely. Employees' trade union'd decided on this because of management's refusal to revise 1982 collective agreement. Reports in 19/6 nxpapers indicated strike'd been postponed. Union'd accepted mediation provided agreement w/employees could be reached in next few days (WBI 21/6)

ECUADOR R Zaracay, 3395, now opens slightly earlier on Sundays for religious pgm in Quechua (Tony Jones, Paraguay, 13/7) Such as? more? LMI

EGYPT Nile Valley Radio now noted 0400-0600 on 7150 & 9770 via R Cairo facilities; includex nx 0430, all pgms in AR. Seems to replace former "Sudan Corner" segment (Richard Wood, Sa'udi Arabia, DSWCI SW News via RA JP DX Time 1/7)

EQUATORIAL GUINEA R Africa, 7998, sent letter and map in 21 days; had sent 1 IRC; v/s Gene Grassie; addr: Box 146 Dexter NM 88230 USA. Sked: Mon-Fri 2100-2115 in EG (H Gustavsson, Sweden, via Play-DX, Italy) A pgm rather than a stn, I think (gh) R Nacional switching daily between 4926 and 5005; ES on 7998 not hrd here! (Richard Gimbey, Bophuthatswana, RSA, RNMN 12/7)

FAKLAND ISLANDS On 2380, BFBS now hrd regularly 0230 until lost to QRN at 0600. Suspect that FIBS pgming to 0230, when female ancr says "Now it's goodbye from me...": also audible under Brazilian between 1000 & 1100 w/presumed FIBS pgms. Braz dominates channel between 0700 (carrier, to *0720) and 0300 (Jones)

FRANCE 1/7, RFI obs in Romanian on 15190 15155 11770 1530-1600; 30/6 & 1/7 RFI obs in Russian 1945-2015 on 15315 15190 11995 9605 7135. 1/7 0800, RFI ancd "as from tomorrow morning, RFI'll bc a new morn nx bull in SP & FR to whole of IAm, incl Caribbean. For FR listeners from 1030 w/new intl nx to 1045. This bc made possible by commissioning, as from tomorrow, of a 3rd xmtr and third group of aeralys by the TDF relay in Guyana". 2/7 & 3/7, FR xmsn obs *1030 on 15435, propagation characteristics indicate Fr Guyana (WBI 5/7) See also GUILIANA FRENCH --I must point out that the spelling "Guyana" applies only to the former British Guiana--the new spelling had something to do with assertion of independence.

GABON Surprised to hear R Japan relay 16/7 0524 on 15315 in EG, not Tokyo & not in sked Euro langs; pgm about Tokyo subways; 0532 anmt in EG, FR, GM, abt "technical problems in the Gabonese domestic circuit" so replacing with pre-shipped R Japan pgm tapes of "Japan Cyclopædia", undated, then followed with another; so EG listeners benefit from all the SNAFU's (gh)

17/6, RDP bc recording of first xmsn made by a stn called "TSF". RDP said TSF xmsn'd lasted 4 hrs. Included well-known voices of radio pros, plus pols, artists, writers. Spoke out in favor of emergence of new radio stns. TSF actually played msg from the Presidency of the Republic "defending the possibility of new sounds issuing from our radio sets". RDP quoted TSF that its bcs weren't a challenge to govt, but an appeal that it should show understanding towards mvmt which'd led to dozens of small xmtrs springing up across country. TSF said it was no longer possible to prevent principles like freedom of expression and freedom to set up journalistic enterprises from being applied to radio bc. RDP reported 15/6 that the Port P&Telecomms Authority--CTT--had set an 8-day deadline for owners of unauth r stns to dismantle. CTT said it'd be prepared to go as far as law allowed if deadline unmet. This warning given, RDP said, at same time as press anncs that workers' coop radio stn TSF 'd make a bc 17/6. (WBI 21/6) 22/6, RDP carried report from studios of "the local pirate radio stn" in Albrantes called Rádio Antena Livre. Next day, RDP said Secy of State for Comms 'd ancd that "from next week", tough measures'd be taken against all pirate r stns. These steps aimed at paving way for proper establishment of "what've come to be known as free radio stns" (WBI 28/6)

Opelikan Plans 1st Shortwave Stereo Station

By Carmel Thomaston
Correspondent

OPELIKA, Ala. — An Opelika man plans to begin operating the world's first stereo shortwave radio station here in January and he hopes to reach 2 billion people around the globe.

H. Dickson Norman, a former radio disc jockey, has been granted an FCC license for a station which he says will give the world a taste of what it's like "to live in the greatest state and greatest region of America."

The station will have the call letters NDXE (for In Dixie) and is the first of its kind licensed by the federal government. Only one other international shortwave station is in the United States. In New Orleans, La., but it does not broadcast in stereo.

Norman said Thursday the multi-million dollar project is backed by local, state and national investors and will be supported through advertising. Norman refused to give any details of his backers, but said they include New York bankers and national advertisers. The transmitting facilities will be outside of Opelika and the station and offices will be downtown.

The license for the station is currently in Norman's name but will be transferred to World Service Broadcasting, Inc., a corporation founded with Norman as a principal stockholder. Stock will be offered for public sale later, Norman said.

Under the license, the station can transmit up to 100 program-hours a day using several transmitters. Although he will broadcast in English only, he said he feels music is an international language. Norman said one transmitter will be used initially but the station will later expand.

Norman said the potential audience is 2 billion people in the U.S., Canada, Soviet Union, Mexico, South America and Japan.

Programs will run 30 minutes to one hour. Norman hopes to schedule everything from country music to food programs from Auburn University. College football games will be broadcast, along with talk shows and "just anything the people want," Norman said.

A high priority will be road races, he said, including Sebring, Daytona and Talladega 500s and the Miami Grand Prix. The station also is negotiating with Ted Turner in Atlanta to rebroadcast news from Cable News Network.

Norman said during construction, about 30 local people will be hired. When in operation, the station will need about 30 people "but there is the potential for several hundred people to be hired," Norman said.

Support for the station has been strong and members of Alabama's congressional delegation worked hard, Norman said, to see the license granted. Tuskegee Mayor Johnny Ford also sought support from President Ronald Reagan, said Norman.

"This thing can yield tremendous fruits for all the people of Alabama and this region," Norman said.

"Imagine people from all over the world tuning in to hear how great Alabama and Opelika is. It's a tremendous boost for tourism and industry in our area."

Norman is a former radio disc jockey for station WJHO in Opelika. He said the late J. Herbert Orr, founder of WJHO, gave him the idea for the new station and worked closely with him on the project until his death a few months ago.

Earlier reports on this station appeared several months ago on WORLD OF RADIO, MEDIA NETWORK, and in RIB. Note especially the call sign wanted: NDXE; N-calls are assigned to USA per ITU, but so far used only for non-bc stns (gh)

Assemblies of Yahweh stn WMLK, Bethel PA [NE of Lebanon] should be being fairly regularly sometime in July or beginning of Aug, on 15250 at 2200-2400 and 15110 at 1700-1900 (via Floyd Jacobs, Noble OK)

[Cf July LN-24] WRNO is back to full power on 7355 & other fqs thanks to replacement of a couple of tubes in the final which were well past their 10,000 hour rated lifetime. WORLD OF RADIO remains GMT Sat at 0430 on 6185, GMT Sun 0130

on 7355, but final repeat Sun 1300 has moved to 11965 which should carry further but be worse closer to NO; also it's co-channel VOA-Philippines in Chinese. Informal reception reports re whether a return to 9715 would be better are welcomed by gh from everywhere.

This change was part of a new WRNO sked effected 15/7: 1500 11965, 1700 15420, 2100 11855, 2300 9705, 0100 7355, 0300 6185. Sun only 0500 on 6185, 0700 9585, 0900 6185, 1100 9715, 1300-1500 11965.

However, since VOA Spanish planned to use 6190 an hr later than usual during the Olympics only, until 0400, WRNO stays on 7355 until 0400--i.e. Radio Earth; rather than earlier plan to use 6045. For S84 from 2/9 proposes to move to 11920 at 21-23. At 23-03 9705 off'ly sked but may use alts 9815 or 7355. Alts 03-05 are 7355, 6045; 17-22 15565[actually 15566]. Occasional use for FB games & WF events: 17-19 17775, 17-

18 11965, 21-22 15420, 23-24 11920 [i.e. mostly extensions of existing fqs to avoid fq change in the middle of a game/event] (via George Jacobs)

Callsign of the High Adventure stn at Rancho Simi CA will be KVOH, for V of Hope, their first choice, rather than previously thought KHBN, second choice; tnx to deregulation even tho there may already be a non-SW KVOH somewhere else; not expected on before D84 season (George Jacobs)

WYFR is soliciting contributions of \$10,000 to build antennas for "xmtrs #9 & 10"--also needs \$7,000 for new automation eqp at Okeechobee, and funds for completion of satl uplink at Oakland. Stn now has 8 SW xmtrs on air (David Alpert, NY) Noted around 0100 in EG on new 11775 // 11875 (gh)

It was business-as-usual on VOA pgm in EG during Jesse Jackson's rousing speech at the Democratic Natl Convention, i.e. it was not carried live, tho it could be hrd on AFRTS. We must expect the same lack of coverage of the Republican Natl Convention on VOA (gh) "Voice of America" is the title of the new album by 'Little Steven' Van Zandt (of Bruce Springsteen's E Street Band fame) (David Alpert, NY) Variations on Yankee Doodle? Must rely on Philippine relay 9760 for VOA in EG from 1100, but also can be hrd on Delano SSB feeder 9350 (gh) VOA feeder on 5745 at 0600 in EG on LSB, unID lang on USB, strong 30/5 (Alpert) And 18137.6 at 0220 in EG on LSB 17/6 w/"Sunday Morning" pgm (ibid.) VOA Greenville feeder 18137 USB // 17745 at 0330 9/6. Current sked for "Spl xm-sn" to Af at 0815-0845 Mon-Fri in FE/EG/Hausa on 1775 9575 9750 11710 11915 156-00 17780 21500; 9575 best here (Dale Park, HI) [see also UKOGBANI for feeders]

WIAW, the ARRL bc stn in Newington CT, has ham news daily exc legal holidays at 0130 & 0430 on SSB, fqs vary slightly, 1890, 3990, 7290, 14290, 21390, 28590 but on GMT Fri deals with ham DX nx instead; 7290 usually best here. Full sked appears every few months in QST, incl CW & RTTY on diff times/fqs; this should remain in effect thru the end of DST last Sun of Oct (gh)

VENEZUELA R Táchira, "La Popular", now all-nite and ancing 24h opn--don't be fooled by the NA at 1000 & 2200! on 4830 (Tony Jones, Paraguay, 13/7) Venez NA must go on every 6 hours regardless of s/on/off (gh) Measured on 4828.7 24/6 0908-0930 (Aei, Japan, Radio Nuevo Mundo)

R Juventud, Barquisimeto, reactivated 4900 in July, 2239-0346 (Zella, Caccia matta, Monferini, Mola, et. al., Play-DX, Italy)

VIETNAM VOV on 9840 1103-1128* 17/6. SIO 252 w/nx, commentary, Viet mx pgm hosted by W, ID as "This is the V of Vietnam" (Richard A D'Angelo, PA) Latest obs of regionals: Nghia Binh on 5088 ex-5080, w/slightly improved signal, *11-45; closedown at 1300 on M/W/F; strangely had no chance to check T/T/Sa, tho checked twice or thrice other days. Seems to be set at 1315* on Sun. Hoang Lien Son on 5603 & 6680. Bac Thai on 6828-6832, sked *1125-1330*. Cao Bang on 6524 hrd; Lang Son 6510 unhrd (Isao Ugusa, Japan, DX Front Line 30/6)

YUGOSLAVIA Tanjug reported 18/6 that over 600 letters'd been written to RY ES in first few months of year: 545 from Eu, 48 NAM, 33 As, 22 Af, 16 SAM, 7 ANZ. Many listeners asked for pgms to be extended from 30 to 60 mins, and some said too little mx, too much info. ES in EG sked: 1430-1500 Eu/ME/FE/S&SEAs 15240 9620. 1730-1800 Eu/ME/Af 9620 6100. 1900-1930 Eu/ME/Af 9620 7240 6100. 2115-2130 Eu/NAM 9620 7240 6100 1269. Other xmtns to Ams: 0000-0030 SP Eu/Af/LAM 11735 9620 7240; 2130-2145 FR Eu/NAM/Af 9620 7240 6100 1269. Thu 2200-2230 SC Eu/NAM--pgm for seamen prepared by various Croatian stns (edited version of a R Zagreb pgm). Other relays of domestic stns: 0600-1000 for Yugoslavs abroad on 11735 9620 7240 Sat & Sun, sequence liable to change: 06-07 Sat R Novi Sad in HG, Sun R Sarajevo in SC. 07-08 Sat R Titograd in SC, Sun R Pristina in AB. 08-09 Sat R Ljubljana in SV, Sun R Skopje in MD. 09-10 Sat R Beograd & Novi Sad in SC, Sun R Zagreb in SC. At 2000-2025 changeable relays/rebcs of DS nx on 9620 7240 6100: Sat R Skopje in MD, Sun R Beograd in SC, Fri [probably misprint for Mon] R Titograd in SC, Tue R Zagreb in SC, Wed R Sarajevo in SC, Thu R Pristina in AB & R Novi Sad in HG, Fri R Ljubljana in SV. [daily] 2145-2200 rebc of DS nx from R Koper in Italian on 9620 7240 6100. SW relay of R Beograd DS 1245-2205 on 9505 7200. (WBI 21/6)

28/6, Tanjug reported Committee for Press, R & TV of Fedl Conf of Socialist Alliance--SAWPY--'d adopted construxion of new bc centre as priority task in

overall pgm for development of R Yugoslavia from 1981 to 1990. Construxion of RY being centre was a priority task on which Yugo system of info for abroad depended. Intl conf on SW planning'd take place in Geneva in 1986, which'd allocate r fqs according to facilities already installed for being pgms. Bcing centre of RY was being built in Bijeljina, but because of lack of funds work'd come to halt. Meanwhile, RY'd imported eqp worth 12 megadollars, which was lying in unsuitable warehouses awaiting completion of construxion work (WBI 5/7)

ZAMBIA Often hrd on 11850 instead of 11880, Suns 0500-0730 (Ginbey, RNMN 12/7)

CLANDESTINE CRANNY

V of the Western Somali & Somali Abo Liberation Fronts (Somali: Halkani wa God-

ki: Jabhadaha Soomalida Galbeed iyo Soomali Abo), via R Mogadishu xmtr on 6095 in SM 1030-1100, Amharic 1730-1800; first obs in Dec 78 (WBI 28/6)

V of the Eritrean Popular Liberation Front, via R Mogadishu xmtr on 6095, 1630-1700 AR, 1730-1800 Amharic (WBI 28/6)

V of the Broad Masses of Eritrea (AR: Huna sawt al-Jamahir al-Iritriyah, literally V of the Eritrean Masses) supports Popular Front for Libn of Eritrea; hostile to govt of Ethiopia; claims to bc from liberated territory. First obs'd 11 Aug 1980. All fqs vary considerably \pm 30 kHz from: (ancd in MHz, observed in kHz): 14.34 14328, 9.95 9955, 7.45 7453, 6.25 6241, 4.41 ----, 3.76 3725. Sked 0400-0430 Tigrigna, 0430-0500 Tigre. 0500-0530 M/W/F/Sa Afar, other days Amharic. 0530-0600 AR (ancd as 0600-0630). 1430-1500 AR, 1500-1530 Tigrigna, 1530-1600 Tigre, 1600-1630 Afar & Amharic as above. 1800-1830 Tigrigna, 1830-1900 Tigre, 1900-1930 Afar & Amharic as above, 1930-2000 AR. (WBI 5/7)

V of the Tigre Revolution, supports the Tigray PLF and the Popular Front for Libn of Eritrea, hostile to govt of Ethiopia, claims to bc from liberated terr. First obs Jan 1981 via VOBME facilities--exactly same fq info as above, but sked: 1345-1415 & 1700-1730 both in Tigrigna & Amharic Tue/Thu/Sun (WBI 5/7)

V of Libyan People hrd on new 11695 in AR 2300-0105*, QRM de RFI to 0029; also on stronger // 11979 25/6; on 11979 only 26/6 at 1800-1905*, 1930-2134*, 2315-0122*; on 11695 only, 10/7 at 2320-0329*, night of Libyan embassy bombing in Beirut, as if expecting this event; no further late-nite bcs, but 11/7 hrd on 11685 at 2100-2215a. More likely from Egypt, not Sudan, 11695 & 11688 were jammed at all times by atleast 3 jammers: 2 howl-type w/3 & 4 howls per sec, and one fast-flutter jmr w/7 howls per sec, same as used against BBC AR svc, which suggests that some of these jammers are in Libya, not Iraq (Cf July IN-19 & 28) (Ernie Behr, Ont) This stn, hostile to current Libyan regime, recently obs 1755-2200 on 15040; also ancs xmsn starting at 0330 and says "we xmit between 11000 and 12000 kHz and between 15000 and 15040 kHz" (WBI 12/7) unID Arab on 15040, 0105 9/7, M talk til 0117, then Arab mx. More talk at 0120 and s/off 0128, good sig. 12/7 on 15040 loud jamming stn at 0100; don't understand because the Arab signs off each day at 0025-0030. Loud who-o-o, who-o-o, just like emergency vehicle. At 0110 sig is on and off intermittently. A few words hrd in AR, then jamming starts again. Guess he's on longer than usual tonight. 0400, Arab is loud but jammer is barely audible (Chuck Oliver, Spring TX) Other reporters believe 15040 is R Jamahiriyah, or Tehran...Note under CHINA that Beijing in Russian uses 15040 1600-1755, doubtless jammed(gh)

R Iranian Toilers (Persian: Radio-ye Zahmatkeshan-e Iran) intercepted 7/7 in progress at 1630 on 6230. Ended xmsn at 1700. As well as carrying statement on behalf of the Tudeh Party of Iran (the Iranian Communist Party), stn ancd postal addr of P O Box 49034, 10028 Stockholm 49, Sweden. Ed note: This addr is same as used to be given for R Iran Courier (Persian: Radio-ye Peyk-e Iran) which ceased opns in 1976 and which also bc Tudeh statements. The pro-Soviet Iran Courier was first hrd in Dec 1957 attacking Shah, Iran govt and western interests in Iran. Pgms in Persian (later adding Azeri & Kurdish) entitled "Iran Courier" were xmt'd from 1957 as part of the ES of the GDR; gave mailing addr in E Germany but towards end of 1962, EG addr dropped from stn name and anmt "Radio Iran Courier" adopted. Stn then believed operating from Bulgaria was last hrd 30/11/76 and it was reported that stn's staff'd moved to Libya. As well as the Stockholm addr ancd latterly for correspondence, RIC gave two Paris phone numbers for contacting the Tudeh party's HQ (WBI 12/7) Recall used to be around 11.4-11.5 MHz; hope they resume that too (gh)

R Iran, hostile to present Iran govt, in a 4/7 bc said: "After the Islamic Rep regime instructed the r & tv dept to bc parasitic waves against radio stns like the BBC, it also created a spl unit for bcng parasitic waves and disrupting R Iran. This unit, manned by a group of experts in the regime, with an ample budget derived from govt secret funds, is charged w/duty [of] preventing the voice of R Iran, which is the voice that demands the rights of our people, from reaching the people. Reports rxd said at a spl committee formed at the congress of Friday Imams held for this very purpose in Tehran, the reactionary clerix asked regime to take steps ASAP to silence this particular radio xmtr. The Friday Imam of ('Araj), during Friday prayers, in which he addressed Hez-bollahis, said that whoever listens to R Iran and other nationalist radios is an apostate and should be treated as an infidel, under the Shari'a law. R Iran requests all natlist workers at the r & tv dept of the Is Rep of Iran to write to us at one of the addrs for R Iran in Eu about any info on this spl unit and its operators. We also advise our listeners that if they should encounter these parasitic xmns, to tune a little this way or that, because the xmtrs of R Iran always change fqs when there are parasitic waves"(WBI 12/7)

R Salvation of Iran (Persian: Radyo Nejat-e Iran), pro-monarchist and hostile to Khomeyni and the Iranian govt, first monitored 23/6/83, but may have been on air since at least 21/3/83, now sked in Persian 1630-1830, repeated at 0330-0530 both on 15555 & 9027 (WBI 12/7)

R Venceremos vy strong on 6556.4 at 0230-0330* 7/7, w/usual propaganda; also 8/7 at 0231-0431*; sounds like new hi-power xmtr, most likely in Managua, perhaps the one used mornings by LV de Nicaragua on 6098.6 (Ernie Behr, Kenora Ont, 13/7) RV, hostile to El Salv govt, ancd 1/7: at 0010, "During this bc, RV'll come into contact w/our sister stn R Farabundo Martí, to report first overall figures on the number of weapons, casualties, prisoners of war and other details of the victory of Cerrón Grande and other clashes taking place in the zone." At 0025: "Attn: we're now going to switch to Chalatenango. We're going to contact our sister stn RFM to bring you the first overall reports on number of weapons recovered, POWs taken, casualties caused in mily opn at Cerrón Grande, where we annihilated an entire hunters battalion and dealt a devastating political-military blow on Duarte's puppet dictatorship. Attn, RFM: We are ready to hear the report. Go ahead, Chalatenango". A relay then began w/anmt: "Salvadoran people, here is a report from RFM for our sister stn RV". Relay ended w/anmt: "Salv people, this has been a spl report from RFM for our sister stn RV"(WBI 12/7)

R Farabundo Martí, hostile to El Salv govt, obs 15/6 on 7000 in SP at 1230-1300, 1830-1900; 16/6 0100-0145; again noted same times and fq 19-20/6 (WBI 28/6)

R Miskut, hostile to Nic govt, obs on 26/6 & 27/6 on 6965 at 2100-2215; opens & closes w/Nic NA (WBI 5/7)

Spy Numbers Is nothing sacred? KGEI QRMed 18/7 0807 by 5-digit Spanish numbers woman on 9616 (gh)

NORTH AMERICAN PIRATES Radio Sinewave Pirate stns are always interesting. My 10/6 reception of R Sinewave, 7430 at 0331-0337* and subsequent reception report to Box 192, Joillette [sic, should be Joliet] IL 60434 has resulted in a returned report stamped by PO "Not deliverable as addressed--unable to forward" and hand written "not box 192". Either this DX reporter copied/hrd wrong POB/zip or stn gave phoney box number. Remember R Clandestine's Box 100 NYC addr a few yrs back? Anyone else hear the Premier bc and can confirm or correct addr? (Richard A D'Angelo, Wyomissing PA)

KIWI Radio Rec'd a reply to my reception report in just 17 days from Hastings NZ. See encl copy of QSL & Letter from Graham J Barclay of stn. Perhaps we'll be hearing more of this NZ pirate w/two stns relaying in USA (D'Angelo, PA) Tnx for your letter & report for the 10/6 bc via the V of Laryingitas [sic] located in the state of Oklaholma[sic]; QSL enclosed. Our current opns? Not much, but we've been on 5825 & 5875 until 2/6 when we closed down until we get a couple of xtals for 4lmb, when we'll resume pgming. Power output ranges from 30 watts to 1700 AM; also been trying SW stereo w/some success. Currently relayed by two NAM stns, The V of Laryingitas and R Paradise Intl, along w/stns

in Eu (Graham J Barclay, KIWI Radio, P O Box 1437, Hastings NZ, 19/6 via RDA)
WBST, 14/7 first hrd at 0346 on 7422, drifted to 7426 by 0425 tuneout (pirate or no pirate, WORLD OF RADIO always comes first!), ID "Hey, you guessed it, it's that time again when the beast rears its ugly head. That's right, this is it: WBST, Salem, Mass., and remember the phrase that says: WBST brings out the beast in me!" Gone at 0500 recheck (John Norfolk, Oklahoma City OK)

KORP: hrd 23/6 at 0213* on 7413, very poor w/lots of static. This is getting monotonous! KQRP has been the only pirate I've hrd in the past otcweek: 7 times since 30/4, 9 times since 31/3. The times they and their power output, 50 watts or less, reception here was very poor, whereas other xmns, with no power amnts, were very good to excellent, almost like a local. This seems to indicate they are using high power at times, thus negating their "QRP" status, Oh no, not again! 5/7 0214-0249* on 7415, "The Shadow" pgm, Reagan spoof. F-G but distorted audio, lots of static, some ute QRM (John Norfolk, Oklahoma City OK) First hrd 25/6 0343 to s/off time I forgot to write down, on and 6242; pgm this time mainly pop mx, w/few asides on free radio by Dr X; SIO 343/444. Next hrd 30/6, 0056-0146* on 7415a, mainly 50s pop mx this time; also a WC Fields radio pgm (hard to hear in static) and Dr X's customary jabs at FCC; SIO 433. Last hrd 1/7, 0535-0604* on 7440a; pgm was a radio version of 1984: I came in a few mins after it started, and it went to 0604, when there was an amnt, ID, then off; SIO 444/433 (Mike MacCollum, Indianapolis IN)

KLS--at last, a pirate that isn't KQRP, hrd 1/7 0405-apx0420 on 7441, vy strong het w/a second one popping up at 0416, variable in fq, made off-air copy impossible; listening to a recording afterwards I could just make out phrases like "KLS radio", "we will verify" and "three 20¢ stamps", with some weird noises & music. Thank goodness for tape recorders! (John Norfolk, OKG) Hrd on 7450, 24/6 0323-0329*, pirate stn w/acceptable sig strength but bothersome QRM & modulation. They played a few rock songs, gave the Battle Creek addr, gave an ID hard to hear in static, then went into "Every Which Way But Loose," as and; then off the air; SIO 333/323 (Mike MacCollum, Indianapolis)

"Jupiter" stn, hrd on 6275a, 30/6 0418-0422*. A few months ago, I read about a stn allegedly being from Philadelphia area on 6250 w/some rather odd ideas about bringing dead people back to life on the planet Jupiter. I don't recall whether the stn itself had a name or ID it went by, and I didn't really hear anything that sounded like an ID here, but I'm pretty sure this was the stn, as they talked about "bringing people back to life on the planet Jupiter" as they said they were inspired in part by Arnold Toynbee (another similarity to so-called Jupiter stn), and as they and an addr (Box 42678, Philadelphia) vy similar to the one which I found given for the so-called "Jupiter" stn (Box 42672, Philadelphia). As I recall, nobody had axually hrd this stn several months ago, but had just hrd about it tnx to publicity about the stn in the Philadelphia area. I've not been paying too much attn to many DX shows lately so don't know if anyone else has been hearing this recently, but I know I barely hrd it myself: sig was weak, lot of CW QRM, static, and a period or two of silence or deep fades (I couldn't tell which) during which it seemd like the stn was off the air entirely. I assume it went off at 0422, but was hard to tell; I didn't hear anything when I made a re-check of fq quite a while later. Anyway, audio also pretty poor, odd kind of echo effect like they were being out of a hole. SIO 222 at best (Mike MacCollum, Indianapolis IN)

WNTV, 7450, at 0230 22/7, very strong here in the East w/continuous rock mx, ID at 0242 by M ancr "You are listening to WNTV, that's rock." Still going strong at 0245 when I had to tune out (Bob Woods, Front Royal VA)

LAST-MINUTE INFO

ALASKA KNLS Anchor Point on new 11945, strong 1300-1459* in CH & mx, since 12/7; from 1500 on 11790, weak w/QRM (Ernie Behr, Kenora Ont)

UPCOMING DEADLINES: 10 August (Mid-August) 20 August (September) 10 September (Mid-Sept)

Reproduction permitted. Credit original reporter and NASWA UPDATE. Dates, times and days GMT and freqs kHz.

About seven years ago at this time, I answered Mac Leonhardt's ad for a replacement editor for what was then called DX Hotline. He wrote back, I got the job and over the following seven years, the name changed to UPDATE and 168 issues followed. At the end of seven years as UPDATE editor--yes, it has been that long--I am grateful to many, many people who have helped, encouraged or offered good advice over the years. To them my thanks. But to two groups of people I have special gratitude. To those who have paid out their hard-earned money to buy the mid-monthers, I thank you. You are the proof that UPDATE still fulfills a need within the club and the hobby. To those who have contributed over seven years, whether it be one item or one thousand, my gratitude is endless. I've said it before and I'll say it again: without your support, none of this would be. I am honored by your support. I'll do my best to make the next seven years of UD as much fun as the last. ---tba

CLANDESTINE LV de CID, R. Camilo Cienfuegos, 10041.3, in SP 0400 7-13 with a long political talk by M, then several IDs at 0416 followed by pop mx. Nice clear signal, powerful enough to penetrate my summer power line hash. (Bill Sparks, CA)

COSTA RICA Radio Columbia has been moving around. Formerly on 4825, it was heard several times between 3 and 9 July on 4840 and on 18 July it was on 5010. (Wendell Craighead, KS)---Same after about two weeks on 4840 moved up to new 5009.5 on 7-17 where it was noted 0445 with the usual political talks, this time a speech in a large hall with an echo. Full ID 0501. Powerhouse signal but low freq het from Garoua. Also noted on the same morning at 1100 but with heavy QRM. Noted again on 5009.5 on 7-18 till 0502*. (Sparks, CA)

INDONESIA RRI Ujung Pandang has returned to 4719 for its evening schedule audible after 0900. ++RRI Wamena, 5043.6, in IN 0950 6-27 with beautiful Indo songs. Local ID at 1000 with a nice clear signal, then into an off-air nx relay with a very poor pick-up. Copy became impossible. Wamena has been fairly regular at this time during the past two weeks. ++RRI Pekanbaru has drifted down to 5882 where it has been heard for the past two weeks. Noted here first on 6-28 at 1150 with local nx by W, anthem at 1153 and local ID. (All above from Sparks, CA)

PERU R. Ancash, 4990, has been heard regularly since 6-27 coming on air at about 0925. Seems to switch into a prgm already in progress on AM with mostly huaynos and folklorico mx. ID is usually heard at any time between 0930 and 0935. The signal is always wiped out by Barquisimeto carrier at 0945. ++R. Colonial, 6137.5, noted 7-14 at 1130 w/ huayno and folklorico mx and ID 1136. Weak but clear. (Both via Sparks, CA)

USSR R. Minsk, 11860, in presumed Byelorussian and Spanish!!! 1700-29 on 7-18. All Byel. except 1721-1727 when M in SP with a few words occasionally by M in Byel. Nothing heard on scheduled // freqs 11735 and 11820. (Craighead, KS)

VENEZUELA Presumed Observatorio Naval Cagigal, 5000, at 0403-0446 on 7-12, with tone on minute and pulse each second except 30, as on 6100. Time annnmt at 52 sec same as 6100, and sounds like same voice but without mention of "Observatorio Naval Cagigal, Caracas, Venezuela." Instead, time is preceded by six syllables which neither I nor a friend from Mexico could understand. At the same time 6100 was carrying its usual complete ID every minute. At 0510 recheck it had moved up to 5010. Not heard on 5000, 5010 or 6100 since. (Craighead, KS)

On to our regular report from Juan Carlos Codina in Peru:

- 3315.7 BOLIVIA Radio San Miguel de Riberalta, Riberalta, Beni, has turned up here so don't confuse them with R. Pastaza on 3316.2. R. San Miguel was heard as part of a movement upward in freq.
- 3705.3 PERU Radio Los Andes, Huamachuco. As usual, here in late afternoons but now exactly over frequency of Radio Lux, Colombia. (3705.5).
- 3915 PERU Radio Nuevo Cajamarca, San Martin. Now in the range between 3915 and 3912.7.
- 4181.5 PERU Radio Jaen, Jaen Cajamarca. Heard here around 0000 4-25 and On 4150.2 2250-0300 on 4-28. Totally distorted but with huge signal. Huge noise I might say. Also heard in mornings not so distorted.

- 4331 PERU R. Jaen, Jaen, Cajamarca. Here is another of the totally distorted Peruvians. Unstable to boot. First noted on 436Q, following day heard at Q130 with a totally distorted signal and no carrier detectable. Only marginally understandable listening despite the s9+20db level. Tropical mx non-stop. At 0145 one ID sounding as "Radio Farol" but not sure anyway. I think this stn uses home-brew equipment or perhaps modified medium wave xmtrs. A real mess, very difficult to ID this kind of stn. Sometimes they go away after only a couple of days. At 0211 clear ID: "Te acompaña Radio Jaen, la emisora mas musical del nororiente peruano." Nothing heard on its normal frequency of 5005.3, so I suppose a change in frequency, but the transmitter is not working properly. Listen for a big noise like a Soviet style jammer!
- 4458 BOLIVIA Radioemisora La Voz del Tropical, Villa Bunari, Cochabamba. Very well heard during the evening when they gave their complete Sunday schedule as follows: *1100-1300 various prgms; 1300, "El jardin infantil": 1400, mx till 1415* then *1900-2200 "Mensajes musicales." 2200-0000, "Musica variada." 0000-0030, "Resumen deportivo." 0030-0100, "Orbita musical." 0100-0130, "Musica para el recuerdo." Closing 0200. Do not know its daily schedule of prgms but is on air *1100-1415* and *1900-0200.* Closing time is actually around 0206.
- 4898.8 PERU Radio San Juan de Caraz., Caraz., Ancash. Heard here Saturday till 0230+ with a relay of a meeting in the town school with children performing, speaking at the mike, etc.
- 4916.3 PERU Radio Continente, Juanjui, Pcia. de Mariscal Caceres, Depto. de San Martin. This is the correct QTH of this stn, heard with full ID and lots of commercials for Juanjui stores.
- 5034.8 PERU Radio Imagen, Tarapoto, San Martin. Again heard evenings here, transmitter problems noted 0425-0500* closing w/ NA.
- 5050.4 PERU Radio Municipal, Cangallo, Pcia. de Victor, Fajardo, Ayacucho. Reactivated heard since last week with very good signals to 0400+.
- 5450.6 BOLIVIA Radio Machupo, San Ramon de la Ribera. Noted 2337 reading letters from listeners abroad, including from the USA but did not hear names mentioned.
- 5531.7 PERU Radio San Francisco, Bambamarca, Cajamarca, heard here. This stn previously identified tentatively as Radio Nanduti. Today heard a clear ID as Radio San Francisco, la nueva radio. Today with better modulation varying to around 5520. Lots of commercials for Bambamarca stores. Also noted in 2145-2220 period.
- 5657.3 PERU R. Bambamarca, Bambamarca, Cajamarca. Heard again here with lots of canned echo IDs at 1920. Good modulation though very faint signal. About half of Ilucan on 5617.5 and off 2030*.
- 5802.4 PERU R. Acunta, Chota, Cajamarca. Unlike weekdays heard on a Sunday to 0107. This extended schedule is Sundays only, other days being 0000*, so try for them accordingly. Till 0100 with prgm of "Pedidos musicales." Excellent signal and surely a new transmitter. Closing 0107 with mx from the picture "Lo bueno, lo malo y lo feo." (the Good, the Bad and ... tba)
- 7408.4 BOLIVIA Radio Carlos V Jiron Pascho, Provincia de Cornelio de Saavedra. First heard while searching for the stn reported on 7411. Mentioned of Santa Cruz and mentions of the Argentine Republic's border. Fair signal and must be a very little town as the stn asked the people of the town to come to city hall to listen to church bells. At 2348 a UTC-4 to and "Estamos con musica especial, en Domingas, a traves de Carlos V (Quinto), la emisora que integra a los pueblos. Annced that for nx they would join the Qollasuyo network in Potosi. Also named the town of Morocoyos but might be an area in another town. Also named the town of Jiron Pascho that seems to be the town or area where the radio is located. Another ID: "Carlos V, la potencia en radiodifusion de la provincia de Cornelio de Saavedra." (By the way, this is an Argentine patriot from the days of independence.) Also noted at 0200 with a local nxreel with pieces recorded during the town meeting in the town hall. Seems to be a town oriented stn. Varying to 7408.8. In the meeting, spoke about the communications (roads) between the town and the cities of Potosi and Sucre. Going strong to 0300*.

Again my sincere thanks to all of you for your friendship and support through seven years of UD. More good things to come. See you next time . . .

LOG REPORT

section A

2000 to 4899 kHz

Editor: Mike Nikolich, 2137 West Farwell Ave., Chicago, IL 60645

DX PARTY IN CHICAGO AREA AUGUST 4TH

I don't know if this announcement will make it to press on time, but if you're in the Chicago area on Saturday, August 4th, and would like to meet members of NASWA, CADX, Hot Tips, IRCA and the NRC, you'll want to attend Earl Higgins' Second Annual Riverside, Illinois DX Get-Together. The meeting/barbeque takes place around 2:00 p.m., at 286 Lawton, Riverside, Illinois, and you are required to bring your own food and booze. Earl will keep the grills hot and will supply pop, chips and the like. To get to Earl's take the Eisenhower West from downtown Chicago to Harlem. Go south on Harlem to Lawton Road and you'll find Earl's QTH. For more complete directions or to let Earl know you're coming, give him a call at (312) 447-6339. We hope to see you there.

ALBERTA DXERS NET GOOD RESULTS ON DXPEDITION

Don Moman of Edmonton, Alberta, recently took a carload of receivers to Seven Mile Flats, which is 300 km SW of Edmonton. Using but a Kenwood TS 430, Drake SPR-4 and an Icom R-70, along with a 400 foot SE longwire, 1300 foot SW beverage, 1000 SE beverage, and a 1000 foot SSW beverage, he "only" noted the following stations.

- 2340 PAFUA/NEW GUINEA, R. West New Britain; PD, nx and sports, ID after nx, mention of Kimbe, 1107, 5/18.
- 2376p PAFUA/NEW GUINEA, R. Chimbu, PD, weaker than 2340 w/DM nx, possible ID w/TC after nx at 1115, 5/18.
- 2380 FALKLAND ISLANDS, FIBS; EG, two OM's w/interview px, one was with the British forces. Interspersed w/pop tunes to 0428, s/off anmts, mentioned s/on at 6 o'clock. Carrier left on, noted past 0530, some audio noted 5/18 at 0925, but poor. FIBS was noted nearly every nite and morning for the 5 days of the DXpedition, signals ranging from very poor to quite readable. Best times were 0355 to 0430 s/off and again from about 1025 to 1130 fadeout. Never noted on 3958. I can't believe this station is so easy to hear this far north!
- 2428 PAFUA/NEW GUINEA, R. Manus; PD/EG, 5/18, list of upcoming events taking place, British pop tunes and dedications, ID at 1130 and into EG px, educational style w/a "story" line featuring a man writing a job application. The px gave tips on how to do this properly and instructed listeners to "follow along in their radio booklet."
- 2450 PAFUA/NEW GUINEA, R. Western Highlands; PD, "Country Roads" by John Denver, ID and TC, 1123, 5/18.
- 2480 UNID, EG, 5/20, 0442, //770 with the Seattle Mariners, 1240, checked, but no //hrd this time.
- 3205 PAFUA/NEW GUINEA, R. West Sepik; PD, 1157, 1cl songs and chorus, TC for 5 past 10 was 75 seconds fast! Into nx w/mentions of Vanaimo constantly.
- 3240 SWAZILAND, TWR; EG, 0305, OM tx in slow speed EG 5/20.
- 3329.8 PERU, Ondas del Huallaya; SP, singing and yipping at 0321, so should be listed here, 5/20.
- 3355 NEW CALEDONIA, Noumea; FR, drums and FR pops at 0649, but good enough in LSB to escape the slop, 5/19.
- 3945 VANUATU, RV; PD, 0644, poor w/DM nx, //7260 was better, but GRM'd at times, 5/19.
- 4696.7 BOLIVIA, R. Riberalta; SP, 0226, tent. ID, stronger than Santa Ana on 4803.6, 5/18.
- 4725 BURMA, BBS; presmed at 1430 by Stewart on 5/15 w/1cl mx and songs...

- 4800 LESOTHO, RL; EG, DM in EG w/nx and many mentions of Lesotho at 0449. 0458, seemed like a program review, TC at 0459, then lcl nx at 0500, also noted 5/22 at 0300 w/choral singing. A new country, No. 153 for me -- also new for John Fisher.
- 4803.6 BOLIVIA, R. Santa Ana; SP, mx through 0200, one selection after another, 0216, tent. ID, into kid's song and ID, 5/18.
- 4860 PERU, R. Chinchyocha; SP, mx and tx, 1033, 5/21.

Don notes the following geomagnetic indices during his DXpedition.

"Solar flux rising from 126 to 140 over the period. 'A' index at 26 rising to 36 with several periods of minor geomagnetic storms where the 'K' index was 6. Conditions were active to storm levels much of the time and several major flares took place, accompanied by sudden blackouts during which we noted a complete blackout of virtually all HF signals. A major enhancement took place May 21 at 2232 UTC with unusual reception of stations from Eastern Canada in the 6 MHz band. Northern Lights were observed nearly every evening."

Thanks for the interesting logs, Don. The DXpedition is a great way to get the old DX juices flowing, especially during the "dregs of summer," as my good friend Wilder Pickard would say. Now, for the rest of "LRA"...

- 2025 ISRAEL, Galei Zahal (Israel Defense Forces Station); 0733, Hebrew, DM w/tx, patriotic mx (Nathanson 6/14)
- 2380 BRAZIL, R. Educ. da Limeira; 0910, PT, DM w/tx and mx, YL w/occasional tx, too, tent (Bobb 6/18)
- 2380 FALKLAND ISLANDS, FIBS; 1012, EG, threshold signal w/DM discourse, def. EG accent, pop mx (Bolland 6/11)
- 2490 BRAZIL, R. Educ. Rural; 0025, PT DM and YL w/tx; mx w/deep fades at 0031 nx (Bolland 6/10)
- 3200 LIBYA, Voice of the Arab Homeland; AR, relig. mx, some tx by OM, also hrd on 9890 (Daly 6/9); 0202, AR tent w/OM's slow tx, very serious in tone, several mentions of "Arabiyah..." (Jordan 7/3); 0304 (Bolland 6/20)
- 3220 ECUADOR, HCJB; 0859, Quechua, DM w/ID and inst mx px (Bobb 6/30)
- 3230 SOUTH AFRICA, RSA; 0318, EG, DM w/ID, TC, propaganda and lively mx (Bobb 7/2)
- 3245 BRAZIL, R. Clube; presumed at 0907 t/in w/ DM tx in PT, some mx (Bolland 6/9)
- 3250 SOUTH AFRICA, Radio Five; 0402, EG, DM DJ, ID, soft rock mx, interview w/female South Africa singer (D'Angelo 6/10)
- 3255 LIBERIA, ELBC; 2340, EG, EZL mx and jazz until 0000, then DM w/ID and closing anmts (D'Angelo 6/26)
- 3280 ECUADOR, La Voz del Napo; tent at *0959 w/lively tune and DM tx and greetings (Bobb 6/18)
- 3285t BELIZE, R. Belize; 0205, barely audible w/DM tx (D'Brien 6/23); 0352, EG, pop mx, ID (Blanchette, 6/3)
- 3295 NAMIBIA, R. Southwest Africa; 2331, GR/AK, continuous mx in various langs, even some Trini Lopez mx, //3270 (D'Angelo 6/26); 0110, missed ID, but hrd mixed bag of mx, finally hrd ID at 0300 (Dickson 6/25); 0252, EG, EZL mx (Daly 6/9)
- 3300 GUATEMALA, R. Cultural; 0322, EG, DM w/relg px, poor lvl tonite (Bolland 6/9)
- 3309 PERU, R. Bagua; 1004, SP, DM w/tx and lively mx (Bolland 6/15)
- 3330 PERU, Ondas del Huallaga; 1019, SP DM, Huaynos, TC also hrd, contact CHU QRM (Bolland 6/15)
- 3335 PAPUA/NEW GUINEA, R. East Sepik; 0905, YL w/PD tx, signal subject to deep fades (Bolland 6/19)
- 3339 ZANZIBAR, RTZ; 1927, Swahili, ID, reports, Is this a new xmtr? The signal is much stronger than before (Schulze 5/20)
- 3365 BRAZIL, R. Cultura; presumed at 0042 w/two DMs, occasional mx, voice net on this freq killed much of the sig (Bolland)
- 3380 GUATEMALA, R. Chortis; 0135, lively marimba mx, pretty good signal except for het (Dickson 6/25)

- 3381 **ECUADOR**, R. Iris; 0132, SP, folk mx by DM w/marimba back-ups, also some duts w/guitar, spot ID at 0148, echo ID & anmts at 0152 (Jordan 7/3); 0959, mx (D'Brien 6/23)
- 3385 **FRENCH GUIANA**, RFD-Guyane/Cayenne; 0055, FR, drums and YL singing, OM on the hour (D'Brien 6/20)
- 3395 **ECUADOR**, R. Zaracay; 1005, SP, inst. mx (D'Brien 6/23)
- 3930 **CAPE VERDE ISLANDS**, R. Voz de Sao Vicente; 2259-0001*, fairly good sig w/minimal ARO GRM. Mixed bag of EG and PT pops, 2331, chimes and TC, OM ID w/ment of freqs, PT nx followed by cmty, 2343, back to pops, 2359, ID again and NA by band, 4 chimes at 0001 and off (Reinstein and Potter, 6/23-24)
- 3995 **WEST GERMANY**, DW; 0105, GM, nx read by DM, ID and IS at 0115, poor due to ARO GRM (Dillon 6/30)
- 4458 **BOLIVIA**, La Voz del Tropico; 0059-0200*, SP, mostly LA mx, but "Get up and Boogie" disco played at one point. Several IDs w/TCs and ment. of Cochabamba, s/off anmts at 0200 by DM and then off (Valko 5/30)
- 4485 **USSR**, Petropavlovsk-Kamchatsky; 1008, RS, OM w/possible nx, 1010, mx (Bolland 6/13)
- 4607.5 **INDONESIA**, RRI/Serui; 1155, IN, vocals, theme and RRI nx on hour (Lineback 6/24); 1046, mx and tx by OM/YL (Bolland 6/9)
- 4656 **ECUADOR**, CRE; 0945, great sig at t/in w/NA, ID, "CRE Radio Difusora del Ecuador," into px "Noticias Avion" (Reinstein 6/29); 0952, DM w/TCs, ads for bands, mentions of Guayaquil and Quito (Bobb 6/20); 0420, OM, possibly soccer match (D'Brien 6/23)
- 4680 **ECUADOR**, R. Nal Espejo; sevreal IDs at 0155 (Dickson 7/3)
- 4755 **BRAZIL**, R. Dif. do Maranhao; 0040, PT, LA mx w/DM DJ, mentions of Brazil, TC, ads or anmts (Dillon 6/19); 0808, PT mx, comments (Bolland 6/27)
- 4755 **PERU**, R. Haunta; 1030, SP, DM w/YL vocals (Bolland 6/21)
- 4765 **CUBA**, Mayak Relay; 0108, RS, tx by OM and YL, classical mx at 0115 and opera (Dillon 6/19)
- 4770 **VENEZUELA**, R. Mundial Bolivar; 0145, SP, tx and mx w/ID at 0148 (Daly 6/9); 0110, LA mx w/DM DJ, ID by child, TC and love songs (Dillon 6/16); 0942, SP, DM w/tx and mx, chimes, mention of Mundial and Bolivar (Bobb 6/8); 0145, SP, LA pops, ads, IDs, etc (Dickson 6/19)
- 4785 **BRAZIL**, R. Ribamar; 0912, PT, DM and YL w/comments and ads punctuated w/mx (Bolland 6/13)
- 4790 **PERU**, R. Atlantida; 0950, SP, DM w/tx and mx, inst and vocal shouting reverb effects and female vocal ID (Bobb 7/2); 0200, SP, anmt by DM and drawn out ID (Dickson 6/25)
- 4792t **ECUADOR**, Sistema em Atalaya; 0343, excited OM w/possible sporting event (D'Brien 7/4); 0335, nice Andean mx (Schulze)
- 4795 **CAMEROON**, R. Douala; 2307, FR, ID, NA and s/off (Daly 6/30)
- 4795.2 **ECUADOR**, LV de los Caras; 0030, SP, DM tx, TCs w/mx and full ID at 0035 (Bolland 6/21)
- 4796.6 **BOLIVIA**, R. Nueva America; 1011, strong at tune-in w/Bolivian flutes, guitars, yipping, etc., Canned anmt about La Paz repeated several times, useless by 1026 (Reinstein 7/2); anmts in Indian lang, preceded and followed by Charango mx, YL in SP w/ID and TCs (Jones 7/9)
- 4803.6 **BOLIVIA**, R. Santa Ana; 0054* SP, DM tx, signal plagued w/RTTY GRM (Bolland 6/21)
- 4810 **GABON**, Africa No. 1; 2256, FR, pop mx, also noted on 11940, both w/strong sigs (Daly 6/30); 2247, reggae and afro tunes, ID (Dillon 6/30)
- 4810 **PERU**, R. Dif San Martin; 1025, DM w/tx and mx, shouting, flute solos, then ID (Bobb 6/29); 0331 (D'Brien 6/26); 1024, nice OA insts, ads for stores on "la Plaza de Armas." birthday greetings, 1030, DM ID, "en Radio San Martin 5 y 30 minutos, la hora Inca Kola," really strong and clear signals tonite (Reinstein 6/27)
- 4810.4 **SALAPAGOS**, LV de Galapagos; 0102, OM, carrier is very solid, but not much voice hrd (Bolland 6/21)**Seems like you should probably consider this log tentative then, DM. mln.
- 4815 **BRAZIL**, R. Nac. de Tabatinga; 1002, PT, caught the tail-end of the opening theme w/a full ID following. OM mentioned that this Brazilian wasn't joining the network (Bolland 6/13)

- 4815 COLOMBIA, R. Guatapurí; 0215, mx and ads, "whoopin' it up mx" several IDs (Dickson 6/9)
- 4820 ECUADOR, R. Paz y Bien; 0934, SP, DM w/ID and tx, some lcl mx (Bobb 6/28); 0930, SP DM, relg comments w/occasional fade (Bolland 6/21)
- 4820 HONDURAS, 0130, SP tx by DM, relg mx, several mentions of Salvador, CAM and Cuba (Dillon 6/16)
- 4825 COSTA_RICA, R. Columbia; 0200, SP tx and mx w/ID at 0202 (Daly 6/10)**See 4839.6. mln.
- 4830 VENEZUELA, R. Tachira; 0230, SP, EZL mx, anmt plus ID at 0235 (Dickson 6/11); 0359, closing anmts and s/off (Lineback 7/5); 0101, DM into full ID w/QTH in echo by 2nd DM, followed by romantic ballads (Jordan 7/3); blend of EZL and instrumental love songs, clear ID (D'Angelo, 6/10)+2
- 4832 COSTA_RICA, R. Reloj; 0045, SP, CAM nx by DM (Dickson 6/20); 0635, LAm, DM, ID and TCs (Dillon 7/4)
- 4835 SARAWAK, RM/Kuching; 1205, mentions of R. Malaysia, poor level (Lineback 6/16)
- 4839.6 COSTA_RICA, R. Columbia; 1020, booming in on this new freq. w/pk titled "Amanecer Campesino" and IDs, "...cadena de Emisoras Colombia." Getting a weaker R. Valera de 4840 (Reinstein 7/2)**Wonder why they'd change to this freq? 1041, DM w/ID and mx (Bobb 7/1); 0133, SP vocals and clear ID, many mentions of CR (Paszkiwicz 7/2)**I enjoyed meeting you at the CADX barbeque in July. Hope to see you again real soon! 0111, "Noticias Colombia" (Rigas 7/9)+3
- 4845 BRAZIL, R. Nacional/Manaus; 0106, ID by DM in PT, into pop mx in PT and EG (Enkenhus, 6/18); 0130, several IDs, mx, anmts, etc (Dickson 6/12); 0040, tx by DM, full ID w/echo, joined by 2nd DM later (Jordan 7/3); 0040 (Bolland 6/5)
- 4845 COLOMBIA, R. Bucaramanga; 0340, mentions of Colombia, some LA vocals (Lineback 7/5)
- 4845 INDONESIA, RRI/Ambon; 1150, IN, mx, tx, clear lcl ID before theme and RRI nx on hr. (Lineback 6/16)
- 4845 MAURITANIA, RM; 0700, FR, DM doing the news, ID at 0710 w/sitar mx, good lvl (Trotto 7/2)
- 4850 CAMBODIA, RC/Yaounde; 2330, FR, Wilson Pickett's "Midnight Hour," DM tx (O'Brien 6/17); 2318, FR, lcl pop mx until 0000, short NA and s/off (Daly 6/2); 0355, SP, U.S. rock and roll mx (Lineback 7/5)
- 4850 VENEZUELA, R. Capital; 1002, in w/ads & promos (Bolland 6/9)
- 4855 BRAZIL, R. Por um Mundo; 0010, PT, inst. mx (Schulze 6/11)
- 4860 PERU, R. Chinchaycocha; #1005, SP, NA, greetings to listeners, several IDs, weak in GRN (Jones 6/27)
- 4860 PIRATE, WBBH; 0005, EG, very good signal, hrd after hearing tip via DX Newline (301/231-3730) (O'Brien 6/25)
- 4865 COLOMBIA, LV del Cinaruco; 0345, SP, world nx (Lineback 7/5)
- 4875 BRAZIL, R. Nac. de Boa Vista; 0925, PT, this underneath Radio Super, signal begins to peak around 0930 (Bolland 6/15)

- 4895 BRAZIL, R. Cultura de Bahia; 0833, PT, DM w/tx, mx, DJ not letting tunes finish before interrupting to do voice overs, poor signal (Bolland 6/27)

That's all for this month. Not much from my QTH, DX-wise. Most of my time is devoted to preparing for my upcoming marriage in September. Because I'll be on my honeymoon about the time the Oct. column is due, Kevin Mikell of Park Ridge will edit that column. Additional details (and Kevin's address) next month. 73.

LOG REPORT

section B

4900 to 6199 kHz

Editor: Jerry Berg, 38 Eastern Avenue, Lexington, MA 02173

- 4904.5 CHAD Ndjamena, hrd at 0457 s/on on 7-4 with anthem, FR, ute QRM (Green).

A chance for a reminder on sending in your reports. Please include the state where you live, and also the date of your logging. Also, please do not send in loggings prior to the first day of the month preceeding the deadline, i.e. for the August 12 deadline, please send in only logs from July 1st on. A number of items have to be discarded each month because of their age. +++ Reports are welcomed from all members, whether newcomers or old hands. My special thanks to the regulars who faithfully report each month. Just get yourself in the "routine" of reporting at the same time. And don't give up on the low bands during the summer. Remember, as DXer John Moritz says, "DX is lurking everywhere." 73--

Looks like the U.S. Post Office is also suffering from the summer doldrums, as mail from the West Coast is taking as much as 8 days to arrive here, compared with the normal 4 or 5. As mentioned last month, I must adhere to the 12th of the month deadline as the material must be in the hands of the respective editors as soon as possible thereafter. Also I note that many folks use more postage than required on their submissions. The equivalent of 5 8 1/2 x 11 sheets in a #10 envelope can be sent for the one ounce rate, currently 20¢. Believe me, you won't get any better or faster service from the Post Office if you use unneeded postage.

BEST, *Yap*

HAP THANKS: Thanks go out to the following individuals for their recent donations: T. McLemore, T. Haskett, A. Cushen, F. Pagano, B. Plum, M. Hardester, A. Merrill, D. McCants, P. Choroszy, H.
