The Ultimate RTTY/FAX Decoder

Universal M-7000

Never before has such monitoring sophistication been available to the private listener. The M-7000 retains all of the earlier M-6000 series features including more modes, more speeds, more shifts, more sophisticated features to let you listen to the exciting world of radioteletype and FAX on shortwave and satellite! This is the only device you can buy to intercept ARQ-Moore (Time Division Multiplex), ARQ-B and ARQ-E3 used by diplomatic, military and aeronautical concerns worldwide. The M-7000 has calibrated variable Baudot speeds with calibrated variable shifts. The M-7000 has three user programmable sel-cals. You punch in one, two or three words (or codes) which will automatically activate your printer when they are received. Think of the potential for this feature! The M-7000 can be completely remote controlled by a terminal or computer permitting full automation. The M-7000 itself is very automated, utilizing a microprocessor to control shift tune and selection. Press a key and the M-7000 tunes the mark, finds the space, and displays the approximate shift. Tuning couldn't be simpler! The M-7000 offers a user selectable initialization format and ten multi-function memories to store your most frequently used operating parameters. Other features include: on-screen tuning indication, printer & video squelch, High-Low Tone select, 1050 and 1800 Baud ASCII, 85 and 1200 Hz shifts, six ASCII shifts, parity select on ASCII, automatic gain control (three settings). Instructive LEDs for: Mark, Space, Power, Buffer, Morse Lock, Autostart, IPI, Squelch, Idle, Sel-Cal, Data, Tuning Error and Data Error (helpful in determining correct speed, protocol and sync.). Other refinements you have come to expect from Info-Tech include: automatic threshold control, unshift-on-space, built-in diagnostics, Bit Inversion (Baudot), speed readout, status line (reverse video), scope output. Both serial and parallel printer outputs are provided! Serial output is provided in eight baud rates and the 8th bit is selectable. When you are ready for the ultimate in RTTY, you are ready for the Info-Tech M-7000. Nothing else even comes close! Physical: 16.4"W x 3.5"H x 12.75"D. Black metal cabinet. 9 Lbs. (12 Lbs. ship). 115 or 230 VAC, 50 or 60 Hz. Manufactured in the U.S.A. by Digital Electronic Systems. It requires a composite video monitor (and compatible printer for FAX - See page 40). Supplied with complete owner's manual (with schematic). A second "Getting Started" manual is also supplied for new RTTY listeners.

- Standard Baudot Shifts - 170/425/850
- Extended Baudot Shifts - 85/1200
- ASCII Shifts - 85/170/425/850/1200
- ARQ Split Screen
- ARQ Surveillance - Multi-channel.
- Speed Readout: Indicates the incoming RTTY transmission rate (+/- 2 baud).
- Auto Baud: Automatic Baud rate selection
- Auto Shift: Automatic Shift Selection
- Auto Tune: Automatic Baud, Shift, Sense
- Aural Beep At: 1-Keypress 2-SelCal 3-Bel char.
- Dual Metering & Status Line Tuning
- Direct Entry of Baud and Shift
- Sel-Cals: 3 User programmable sel-cals for automatic printer start-stop upon receipt of keywords
- Scope Output
- Autostart Output
- Screen Print and Screen Saver
- Help Screen
- Filtering Control: Wide-Narrow-Normal
- Limiter
- Diversity Reception
- MSI Multiple Scroll Inhibit: Eliminates blank space on screen and/or printer.
- ATC Automatic Threshold Control for improved copy during fading
- AGC Automatic Gain Control determined by unit or selectable +/- 15%.
- UOS Unshift On Space auto shift to letters case after blank received.
- Self Test: Built-in diagnostics
- Squelch selectable for screen and/or printer.
- Input Gain Control
- Status Line with on-screen tuning bar.
- Four Alphabets: ITA, MIL2, TELETYPE, Cyrillic
- Remote Terminal Operation
- Video Scroll up-down - 4 standard TTY pages.
- OPI Over Print Inhibit feature.

RECEPTION MODES

- Morse Code with auto speed ranging. 5 to 120 W.P.M.
- RTTY Baudot - Standard Speeds: 45, 50, 57, 74 and 100 baud. 60, 66, 75, 100 and 132 W.P.M.
- RTTY Baudot - Non-Standard Speeds: 37 to 251 baud.
- RTTY Baudot - Bit Inverted. Manual or automatic sequencing.
- RTTY ASCII - Low Speed Standard: 75 and 110 baud.
- RTTY ASCII - High Speed Standard: 150, 300, 600 and 1200 baud.
- RTTY ASCII - High Speed Non-Standard: 1050 and 1800 baud.
- Sitor A - (ARQTOR, Armor A)
- Sitor B - (FECTOR, Armor B) Collective and Selective
- VFT (FDM) - (8, 12, 16, 24 channel)
- ARQ (Moore Time Division Multiplex) Two Channel 86, 96, 100 baud.
- ARQ (Moore Time Division Multiplex) Four Channel 172, 192, 200 baud.
- ARQ-E 48, 64, 72, 86, 96, 144 and 192 baud.
- ARQ-E3 48, 64, 72, 86, 96, 100, 192, 200 baud.
- Packet Radio 300 and 1200 baud (AX-25 Protocol)
- Facsimile (FAX) - AM & FM 60, 90, 120 & 240 LPM. Line or Gray (To Parallel Printer Port only)
- Russian Third Shift Cyrillic Actual Cyrillic Characters Displayed (To Video Port only)
- Literal Mode This feature uses special symbols to represent normally non-printing characters. (To Video Port only)
- Databit Mode This feature converts the incoming datastream into zeros and ones.

Universal offers a comprehensive shortwave catalog covering all types of shortwave monitoring equipment including receivers, antennas, RTTY and FAX equipment plus books and accessories. Send \$1 (refundable).

DX'ers Forum

Dedicated to Furthering
the Art, Science and
Enjoyment of DX'ing

Conducted by Rowland Archer, 5524 Hawthorne Park, Raleigh, NC 27613 January, 1989

A circuitously routed message informed me that our intrepid Asian explorers are busy shoveling sand from their path in the Taklimakan Desert, and with any luck we will have another installment of *DX'ing the Great Silk Road* in next month's Forum!

Thanks to Jerry Berg, Bob Hill, and 'Kap' Kapinos for a great evening of DX talk and dining. If you haven't gotten together with other DX'ers in your area, why not give it a try? It's nice to talk to people whose eyes don't glaze over when you tell them about that great Peruvian opening or the new Indonesian you heard yesterday! Universal Shortwave publishes a low-cost DX'ers Directory which should help you find some hobbyists in your area.

We lead off this month with an excellent article by Kevin Atkins, explaining the art of tuning in ECSSB mode. Kevin is due thanks for the article and congratulations on his recent selection as an editor for *Fine Tuning*. Kevin's article is a lucid and pragmatic explanation of an invaluable DX'ing technique that every DX'er should have in their toolkit. ECSSB takes a little getting used to, but I find it so superior to DX'ing in AM mode that it's virtually all I use.

Better DX'ing with ECSSB

A Guide to Exalted Carrier Single Sideband Tuning

by Kevin Atkins

An unfortunate consequence of language is the ability it gives us to put intimidating names on simple things. Exalted carrier single sideband reception (ECSSB) is such a thing. But while it is simple, its benefits can be enormous; sometimes it is the only way to log a tough catch. What it is and what it does are readily grasped; then, with practice, it can be a most valuable DX technique.

WHAT IT IS

An AM signal consists of three parts—a carrier and two sidebands, termed "upper" and "lower" with respect to their position relative to the carrier (fig. 1). All of the signal's coded audio information, or modulation, is carried in the two sidebands. The AM detector in your receiver requires the presence of all three to demodulate the signal, or convert it back into audio which you can understand. The SSB

detector needs only one sideband, and you may select either upper or lower. Using the SSB detector to demodulate a single chosen sideband of an AM signal is called *exalted carrier single sideband reception*.

Figure 2

WHAT IT DOES

Superior Selectivity. Shortwave signals in general, and tropical band DX signals in particular, are jammed together tighter than lovers on Valentine's Day. Often they are so close that two or three can be heard simultaneously in AM mode (Fig. 2).

The shaded area in figure 2 represents the interference two adjacent signals cause each other in the form of audio splatter and the always annoying, sometimes deafening heterodyne whistle. Detected

Figure 3

in AM mode, the overlap between the upper sideband of 4874.6 and the lower sideband of 4875 renders both signals useless.

Note that the upper side of 4875 and the lower side of 4874.6 are unaffected. With ECSSB, you can take advantage of this fact and separate these signals. Tune the lower sideband of 4874.6 and log RRI Sorong, then up to 4875 for the Voice of Jinling (Fig. 3).

The choice is not always this clear-cut. Often your catch-of-the-day will be jammed between two signals so that neither sideband is interference-free. You must then evaluate the signal in both USB and LSB to determine the best choice. One sideband, for example, might suffer from audio splatter, while the other might have a loud heterodyne. If you can't escape the splatter, perhaps you can notch out the het.

Many signals that would have gone unnoticed under the noise in AM can be snatched out of the mud in ECSSB

With some receiver designs (notably the unmodified Icom R70), SSB is the only choice for accessing a tight bandwidth. But even receivers with filtering independent of mode will exhibit improved ultimate selectivity with ECSSB as opposed to AM. While it is possible to use bandwidths in the 2kHz range in AM, the resulting audio is muffled and muddy; the loss of intelligibility is quite a price to pay for removing the interference. But a 2kHz filter is more than wide enough to provide good audio in ECSSB (remember you're only detecting half of the modulated signal), while you still enjoy the benefits of a tight filter.

Improved Signal-to-Noise Ratio. One of the first things you'll notice about ECSSB detection is an apparent drop in signal strength compared to AM. Your S-meter and your ear are measuring the total amount of signal received. Most of that signal is the unmodulated carrier; the remainder is the sum of the two sidebands. When you remove the carrier and one sideband, you remove a great deal of what your S-meter was measuring. But don't panic; listen again! While there may be less signal, the *signal-to-noise ratio* is greatly improved in ECSSB. As the

name implies, this term indicates the signal strength relative to the strength of the background noise. If you give up a portion of the signal but also improve the signal-to-noise ratio, the amount of *useable* signal is increased. Many signals that would have gone unnoticed under the noise in AM can be snatched out of the mud in ECSSB. You can turn up the volume to fool your ears, and close your eyes so you don't have to look at the S-meter.

Generally Enhanced Intelligibility. Aside from improved selectivity and signal-to-noise ratio, other factors enhance the intelligibility of ECSSB-tuned signals to varying degrees:

- Certain types of fading are lessened. The improvement can be dramatic on some signals.
- Manmade noise is attenuated to some degree. Even power line noise is reduced, though by no means eliminated.
- There is generally less propagational distortion, making speech more readable.

Reading Heterodynes. Yes, hets can be your friends. The het produced when the SSB detector's carrier approaches a transmitted carrier can be used as bandscanning tool. The presence of a het indicates that *something* is there. Since most of the transmitted signal is carrier, you can detect it even when you can't detect the modulation. You might not get any audio today, but tomorrow or next week you might find threshold-level audio and log a heretofore unheard station.

RECEIVER CONSIDERATIONS

A thorough understanding of how your receiver works in SSB will be invaluable as you practice ECSSB. A review of your manual and any reviews you can find is in order.

Practically all tabletop communications receivers now being manufactured are equipped with product detectors which will allow ECSSB. Many older receivers and most portables are not; they use a BFO in conjunction with the AM detector instead. Of those with product detectors, some are more suited to ECSSB than others. The most important factors in this regard are *stability* (the ability to stay on the tuned frequency without drifting) and *tuning rate*. Stability is usually not a problem with modern transistorized receivers; tube-type receivers require considerable "warmup" before they become stable. Tuning rate (the rate at which the frequency is changed relative to the movement of the tuning dial) varies widely. Tube type and earlier solid-state receivers used analog tuning; that is, the frequency was continuously variable. The trend now is toward digital tuning, accomplished in fixed steps.

ECSSB requires very precise tuning. Since an analog receiver does not tune in steps, you can tune the precise frequency you desire; however, if the tuning is too critical (that is, if the tuning dial is

geared such that very small movements cause comparatively large shifts in frequency), it may be difficult to tune in ECSSB. Such was the case with the Yaesu FRG7700—the main dial was very critical, and the only way to fine-tune was to store the desired frequency in the optional memory unit, which was equipped with vernier tuning.

Digitally tuned receivers often have variable tuning rates, thus allowing fine-tuning of an ECSSB signal or rapid movement from one end of a band to another. For ECSSB, a tuning rate of 10Hz is optimum; anything larger will not allow you to tune a signal for maximum intelligibility. The Icom R70 offers steps of 1kHz, 100 Hz, and 10Hz, as well as an analog RIT, or receiver incremental tuning. Many receivers have a large minimum step on the main tuning dial, but incorporate an RIT circuit that works in analog fashion or in 10Hz digital steps. A frequency shift done with the RIT may or may not be displayed on the readout.

HOW TO DO IT

Go to the top end of your favorite band, put your receiver in LSB, and tune slowly down the band. If your receiver is digital, use 100Hz or 50Hz steps. As you tune across stations, you will hear a heterodyne caused by the carrier of the stations beating against the carrier imposed on them by your receiver's product detector. The closer you get to each station, the lower the frequency (and thus the audio pitch) of the het. If your receiver is analog, the tone will be continuously variable. If it's digital, you will hear the pitch change in definite steps, producing the sound commonly called "bagpiping." Notice the weak carriers on which you can detect little or no audio. These represent all the DX you wouldn't even notice if you were in AM mode. You might even notice a second, weaker heterodyne only a few hertz off of a stronger signal. In AM, you would probably hear only the stronger signal; thanks to reading the

DXING VIETNAM

by Gerry Bishop

[A little while ago, Mitch Sams reported in Fine Tuning that there were indeed still shortwave stations transmitting from the NASWA country of "South Vietnam." This was exciting news for many DX'ers who still need to hear and verify that radio country. Gerry Bishop checks in here with some further information about the Vietnamese shortwave scene. Thanks for supporting the Forum, Gerry! It was nice talking with you on the phone too OM, and I look forward to seeing more of your writing in future FRENDS's. -Ed.]

DXing the stations of Vietnam is often rewarded with a new station in the logbook. But for the NASWA country counter, there seems to be a problem of "which Vietnam?" Only one exists now, but from the mid 1950s until 1975 two nations shared the east coast of the Indochinese peninsula. This list will clear up some of the confusion about where the current broadcasters are located in that country today.

The source for this information is *Broadcasting Stations of Vietnam* published in 1985 by DX Front Line of Japan. This excellent tome not only looks at the current state of Vietnamese broadcasting, but is also a comprehensive history of radio in that nation.

Stations of Vietnam

North Vietnam	South Vietnam
Lai Chau Broadcasting	Binh Tri Thien (Hue)
Son La	Nghia Binh
Hoang Lien Son	Gia Lai-Kon Tum
Ha Tuyen	Lam Dong
Cao Bang	
Bac Thai	
Hanoi	

Other provinces have sporadic shortwave broadcast activity; these are generally the most reliable.

QSLs are difficult, perhaps impossible for some stations. I've tried English and French, IRCs, stamps, cash, and gifts. I encourage those who have been successful in verifying the Vietnamese regionals to share their secrets.

* * *

[Lately I've seen a few regional veries that were obtained by writing to the Voice of Vietnam in Hanoi, similar to verifying the Chinese regionals via Radio Beijing or the Indian regionals via AIR in Delhi. For many this is "just not the same" as a verie straight from the regional, but most feel it's better than no verie at all! -Ed.]

Azad Kashmir Radio: A History

by Sarath Weerakoon

[Several months back, in a DX'ers Forum article on identifying transmitter sites, we looked at Azad Kashmir Radio as a case study. Sarath Weerakoon, a well-known DX'er who resides in Sri Lanka, saw the original article and kindly took the time to write the following history of Azad Kashmir Radio for FRENDDX. Thanks Sarath! - Ed.]

My friend Victor Goonetilleke and myself have been very curious about the exact locations of Azad Kashmir Radio transmitters. Both of us and a Pakistani DX'er - Taher Aftab - have done extensive investigations into it.

Trarkhel is the former provisional capitol of Azad (meaning "Free") Kashmir. Geographically, it is situated very close to Islamabad, just across the border into Azad Kashmir.

Azad Kashmir Radio (AKR) first came on the air in 1948, as a clandestine station operating from the back of an army truck, in those dreadful days. Of course, the situation is quite different now, as Pakistan considers Azad Kashmir an integral part of Pakistan. Gradually, the mobile propaganda unit became a full-fledged station by using the facilities of Pakistan Broadcasting Corporation (PBC). At present, AKR - Trarkhel is using PBC's transmitter No. API-8 (10 KW) broadcasting on the frequencies of 4980, 7265, and 4790 kHz. So, there are no transmitters or studios at Trarkhel but AKR continues to give this fictitious location in their identification, for obvious reasons (just imagine, if the ID is Azad Kashmir Radio Islamabad!)

Now to the transmitter locations. Islamabad was founded in 1961 and became the capitol in 1967. The Federal district of Islamabad includes the capitol Islamabad and the adjoining area that is to undergo urban development. This Federal district is a small area. Geographically this area falls within the Rawalpindi district (which comes under the Punjab province). Although the district of Islamabad is geographically within the Rawalpindi district, it is a separate administrative region directly under the Federal government, and not under the Punjab government. Perhaps a rough analogy would be Washington, DC (174 km²), situated between Maryland and Virginia.

Rawalpindi was the Pakistani capitol from 1959 until 1967. It is situated about 11 km southwest of Islamabad.

Except for the FM transmitters, all the other transmitters of Radio Pakistan - Islamabad are located on a site close to National Highway No. 1, which falls within Rawalpindi district but outside the Federal district of Islamabad. The FM transmitters are at Muree - also outside the Federal district but within the Rawalpindi district.

The transmitters used for the external service are also located several km from Islamabad but well within greater Rawalpindi.

Therefore, if anybody is trying to log a transmitter site at Islamabad, please forget it. Islamabad simply has no transmitters. All except, two 10 kw transmitters at Rawalpindi are linked to studios of Islamabad and thus announced as 'Radio Pakistan - Islamabad.'

I guess there is no controversy over the seldom heard AKR - Muzafarabad on 3660v kHz and 792 kHz. Muzafarabad is the capitol of Azad Kashmir with a population of nearly 65,000. My pen-friend in the Azad Kashmir capitol confirms the existence of a radio station. He can see the studios, antennas and tall masts on top of a hill.

AKR Muzafarabad is heard quite regularly on MW freq of 792 kHz, but SW channel of 3660v kHz has been erratic. I last noted it in Sri Lanka around mid-March this year. If anyone wants to log Azad Kashmir, then he should log either 3660 kHz or 792 kHz.

Azad Kashmir is part of the territory acquired by Pakistan in the 1948 war with India. Pakistan does not consider Azad Kashmir as a province of Pakistan because of the disputed nature of the state of Jammu and Kashmir. Pakistan claims that the status of Jammu and Kashmir should be determined by a United Nations sponsored plebiscite. India maintains that the state of Jammu and Kashmir is an integral part of the Indian Union and refuses to acknowledge the need for international mediation.

hets, you know that there's a second transmitter on the frequency.

Now choose a strong, interference-free station playing music with announcements between songs, preferably in a language you understand. Using your slowest tuning rate, approach the signal and listen carefully to the changes in pitch as you tune. As you near the carrier frequency, the pitch of the heterodyne will get lower, eventually dropping below the range of the human ear. The point at which this occurs will vary depending on the sensitivity of the biological audio equipment you were issued, the strength of the signal, and the level of interference; for me it's usually 40-60Hz from the carrier. When the het disappears, you're close—but not quite there. Precise tuning requires that the carrier of the SSB detector be imposed, or *exalted* (betcha wondered where that word came in), directly over the carrier of the station. If you have an ear for music, you'll note that the instruments and vocals still sound out of tune. If you think *all* instruments sound out-of-tune, don't despair—switch rapidly back and forth between LSB and AM, concentrating on one particular instrument or voice, either singing or speaking, and note the difference in pitch and timbre. The object is to continue tuning down until the instruments and voices harmonize, or until the pitch in LSB matches that in AM.

When the het disappears -- you're close

Practice both techniques; it's easy to tell when familiar US pop music sounds right, but it's a different story with a sitar or a gamelan orchestra. In such cases your best bet may be matching the pitch of the announcer's voice. The mode-switching technique is also useful when tuning signals so weak that you can't sense any continuity in the melody of the music being played. It's also helpful in such cases to know the lower frequency limit of your audio spectrum (as discovered in the last paragraph); if you know that under average conditions you can't hear a tone below 60Hz, you can rough-tune a weak signal by counting 60Hz after the het becomes inaudible. Of course, you can only do this if your receiver lets you determine the frequency to the nearest 10Hz. The NRD525 and Kenwood's R5000 do this; the Icoms have analog tick marks on the tuning dial ring that are fairly accurate (though they equal 20Hz, not 10Hz as the manual claims).

It may be helpful to switch off your receiver's AGC circuit while tuning, since the circuit's attack can disrupt the continuity of the audio. Another useful technique is to "roll off" the bass notes; rumbling bass can make precise tuning difficult. This can be done with the receiver's tone controls, with any external audio filtering devices you have (such as a graphic equalizer or an audio filter), or, if you have passband tuning, by shifting the passband away from the side you're tuning (i.e. toward the upper side of a lower sideband signal). Once satisfied with the

tuning, you can readjust for maximum voice intelligibility.

When you're comfortable finding the "sweet spot" of a strong signal, you're ready for the final test. Find a weak tropical band signal skulking on a split channel between a couple of powerhouses. Try both LSB and USB; remember that hets are easier to defeat than audio splatter, and that music splatter is much worse than speech splatter. After assessing your options, choose either LSB or USB, carefully tune the signal, then tweak whatever notches and/or passband tuning arrangements you have at your disposal for maximum intelligibility. If your receiver has a dial lock, by all means use it. Otherwise you risk losing your catch when children, pets, or your own fumbling fingers bump the tuning dial. Finally, satisfied that it can't get any better, switch back to AM and hear the difference! Many weak, QRMed stations are simply unreadable in AM; some can't be detected at all.

IN CONCLUSION

The extent to which you use ECSSB is, of course, a matter of personal preference. It has obvious advantages over AM; it is also more difficult, though like most things it gets easier with practice. I use it at least 90% of the time, but there are lots of people with much fatter logbooks than mine who never use it. In addition to my R70, I am fortunate to own a Collins R-390A. This is quite possibly the finest AM receiver ever made, and during the 10% of my DXing time when I'm not using the R70 in ECSSB, I'm digging out AM signals with the Collins' incredibly sharp 2kHz mechanical filter. Even though audio is tiresome at such bandwidths in AM, there are times when it's the best way to go. If, for example, a weak station is equally and badly QRMed on both sides, a tight AM filter in conjunction with your own cerebral filter may have an edge over ECSSB.

Remember, then, that all techniques are worth knowing about, and many are worth using. In the final analysis, it's not the techniques themselves, but the knowledge and ability to choose the best technique for the situation that will bring in the most DX.

(My thanks to Rowland Archer and John Tow, who graciously served as "editorial review board" for this article.)

#

That's a wrap for this month folks -- I hope you enjoyed it. The DX Season is in full swing, so keep those receivers warm and remember to report what you hear to FRENDX!

Easy Listening

Editor: Alex Batman, 4636 Alvin Dark, Apt. 2, Baton Rouge, LA 70820

SUNDAY

- 1425-1450 Sunday Magazine (Radio RSA). A generic collection of interviews and light topics often connected with the South African entertainment scene and including a number of South African pop songs (black and white music). (21.590/21.535)
- 1830-1900 Music and Musicians (Radio Moscow). Interviews with and excerpts from the performances of Soviet classical musicians, conductors and composers. During April the program ran a fine series of programs devoted to Russian choral music in honor of the 1000th anniversary of Christianity in Russia. (11.840)

MONDAY

- 1315-1330 Voices of Finland (Radio Finland International). Radio Finland's music program. Features all kinds of Finnish music: folk, pop, and classical, each program concentrating on a particular performer of genre. (15.400/11.945. Repeated at 1415)
- 1255-1300a Press Review (Radio France International). Excerpts from the main headlines and editorials of the main French newspapers: La Figaro & La Quotidienne de Paris (Conservative), L'Humanite (Communist), etc. Evening repeats of the program at 0255 include the evening newspapers, La Croix (Catholic) and Le Monde (Center) (21.645/17.720/15.365. Repeated at 0255 on 9.800). Daily

TUESDAY

- 1300-1310 Land of France (Radio France International). A general rubric for any feature loosely related to France. Past programs have included an interview with the winner of the Paris Marathon, a feature on drinking water in France, a group dedicated to saving the few remaining French bears (SOS Bears), and other programs of French interest. (21.645/17.720/15.365. Repeated at 0300 on 9.800)
- 2030-2040 Arab Women in Focus (Radio Damascus). A feature devoted to prominent Arab women in writing, painting, the arts in general or in politics. Like many Radio Damascus programs, however, this one contains little text in comparison to the frequent and lengthy musical interludes. (15.095/12.085)

WEDNESDAY

- 1130-1200 Soundabout (Radio Australia). Several years this was a two hour program, now reduced to a half hour and featuring the latest releases from the rock music scene, usually hard rockers to say the least, with some bits of rock music news. Wednesday's segment tends to feature the latest releases from Australian artists. (9.580/9.770.) Everyday but Friday when it is replaced by "International Top Hits"

- 0250-0325 Documentary Series (Radio Netherlands). Replacing the old Wednesday Report is a series of documentary features, either in single episode or a continued series. Two of the continued series have been "The Savage Breast" (not at all lewd but a feature on music) and "The Dutch Connection" (examining ties between Australia and the Netherlands in honor of the Australian bi-centennial). Single episodes have featured "What the Tourist Saw" (a tourist's eye view of the Netherlands), and an interview with the Dutch Prince and his efforts in favor of the environment and wildlife. (6.020/6.265/9.590/9.895)

THURSDAY

- 1140-1200 Culture in China (Radio Beijing). Radio Beijing's feature on, obviously enough, culture in China. Past programs have featured regional operas, a reading of a short story, an interview with a composer, etc. (9.665. Repeated at 1240 on the same frequency, and at 0040 on 9.770/9.665/11.715 and 0340 on 9.770/11.715/11.860)
- 2030-2040 Listeners' Club (Radio Damascus). Reads letters from listeners around the world with their comments on Radio Damascus programming, reception conditions, etc. Poor in comparison with most mailbag programs. (15.095/12.085).

FRIDAY

- 1140-1200 In the Third World (Radio Beijing). A feature on news and developments in developing countries around the world. The first part of the program is devoted to news features from third world countries, the second part a more in-depth look at one of these topics (such as agricultural reform in Ghana), and the final part of the program plays music from third world countries. (9.665. Repeated at 1240 on the same frequency, at 0040 on 9.770/9.665/11.715 and at 0340 on 9.770/11.715/11.860).
- 1300-1310 Book Magazine (Radio France International). This program alternates with "Cinema Magazine" on Fridays and each airing features an interview with an author, either French or international on this latest release. (21.645/17.720/15.365. Repeated at 0300 on 9.800) every other week.

SATURDAY

- 0225-0300 Cultural Survey (Radio Bucharest). Each program begins with an editorial examining the relation between culture and a socialist society, follows with a reading of a Romanian poem in translation, includes a portrait of a Romanian writer, musician or artist, and includes "Cultural Artistic Kaleidoscope" which features topical cultural events in Romanian. The program ends (for the last five to ten minutes or so) with excerpts from the concert of the week. (6.155/9.510/9.570/11.830/11940).
- 1830-1900 The Jazz Show (Radio Moscow). Actually one of Radio Moscow's best programs. Each week features interviews with and excerpts of Soviet jazz musicians-- pianists, jazz violinist, even jazz tuba players-- and several lengthy excerpts of their music. Nothing fancy about the show, but a lot of good jazz. (11.840).

FROM WAX TO WIRES

Ever since Thomas Edison recorded the first sounds on wax cylinders, engineers have been working toward ways to improve audio quality, not only in recordings but also in transmitted media.

Unfortunately, all the measures taken at the transmitter to imbue signals with "high fidelity" are worthless unless special attention is also paid to the receiver. Unless your receiver is capable of reproducing at least some of the quality of the original signal, it's a lot like trying to receive a color TV signal on a black and white set - the potential is present in the signal but the receiver just isn't capable. Sure, the audio quality is important to the broadcast listener, but is it of concern to the utility listener, for example? You bet! "Fidelity" means faithful, and in audio fidelity means the ability to faithfully reproduce audio signals. If you are listening to faint SSB signals, or even AM, for that matter, the last thing you need is distortion in the audio. And on the more aesthetic side, the better a signal sounds, the more likely a person is to continue listening to it. Shortwave broadcasters know this, and go to great lengths to maintain good fidelity (well, most of them, anyway). The problem, as stated earlier, is that most shortwave radio manufacturers seem to have concluded that we were all born with "tin ears." The fact is that even in expensive receivers the audio quality is often dismal. This is such a waste, because the potential for quality is already there - both in the transmitted signals and receiver technology. Why don't the manufacturer's pay closer attention to the audio section? Because they don't think you will pay the price. Like the I.F. filters discussed in November, quality audio sections cost money.

IS THERE ANYWHERE TO TURN?

Fortunately, the answer is yes. There are several things you can do improve your receiver's audio quality without major surgery to its insides. Start at the universal weak point of receivers - the speaker. In the early days of radio the speaker was almost always separate from the receiver - and almost as large! In more recent times, the push has been toward smaller, more compact receivers. Outboard accessories, particularly in portables, are frowned upon. The result is that external speakers are never furnished as standard features. Instead, even such expensive receivers as the R-71 come with pitiful little speakers mounted to their tops, bottoms, or sides.

Fortunately, most receivers also contain an earphone jack. This enables you to bypass the "8 ohm buzzer" inside the receiver, substituting a better speaker instead. James Feeley, of Norcross, Georgia recently discovered this, taking the technique one step

further. He connected the audio output to his stereo, allowing him to use the bass and treble controls to adjust the audio coming from his stereo's good quality loudspeakers. It works so well he is making some converts from family members previously put-off by the shrill audio of his receiver's internal speaker. If you don't want to tie-up your stereo as James did you still have alternatives. You can buy a large "mid-range" (frequency response, not price) speaker and mount it in a box. Although this will usually give dramatic improvement, you can do more, still. Following the general schematic below will allow you to vary the frequency response of the speaker by attenuating some frequencies while allowing others to pass. This is the principle of the treble and bass controls on a stereo. All speakers reproduce some frequencies better than others. The trick to good audio is to boost the frequencies the speaker is less responsive to, while holding back on the frequencies it handles the easiest. If you would rather buy than build, Grove Enterprises of Brasstown, Pennsylvania, has recently released an excellent unit that combines a quality speaker with tone controls in an acoustically designed box. The cost is under \$100. If you do choose to build, the circuit shown can be put on a perboard and placed inside the speaker enclosure, with the controls on the side. Component values are not critical, so any well-stocked junk box (or my favorite, Radio Shack) can supply you.

UPSCALE OPTIONS

As helpful as tone controls are, they allow for only limited change of the audio quality. For more elaborate tailoring of the signal, an active audio filter is necessary.

Although the active audio filter is more important for reception of SSB and CW signals, it can be helpful in AM reception as well. The typical filter consists of one or more amplifier sections, low end and high end limit controls, and notch/peak controls. By carefully adjusting the low and high end limit controls, undesired frequencies above or below what you want to hear can be made to fall outside the audio passband - they disappear. But what about audio frequencies right in the middle of your "target" signal? You use the notch control. It places a big hole (the size of which is usually variable) anywhere you wish inside your audio signal. By carefully moving the notch around, and varying its width, you can rid yourself of beat notes and sometimes even voice or music from interfering sources. At the same time, the peak control can be used to emphasize a particular portion of your signal, allowing very sharp audio passbands to be "synthesized." The peak control, of course, is most useful when receiving CW signals.

Active audio filters can be built from designs found in such sources as the ARRL Handbook, Ham Radio, CQ, and 73 Magazines. Again, if you prefer to buy, there are many fine units available at

reasonable cost. Try the MFJ, Datong, or Heathkit catalogues. And remember: unless you plan to listen exclusively with earphones you will need an external speaker to use with an active audio filter.

Last but not least is the subject of earphones. Using the right set of earphones is as important as using the right speaker. Most stereo headphones are designed for maximum bandwidth - that is, they are designed to reproduce the lowest and highest frequencies possible, as well as those inbetween. This is not desirable when listening to shortwave radio.

Long ago, the telephone company (remember when there was just one?) performed experiments, to see what frequencies were necessary for acceptable voice transmission over phone lines and radiotelephone transmitters (for trans-oceanic service). They found that the frequencies between 300 and 3000 Hz were all that was necessary for adequate voice transmission. Using these frequencies resulted in voice reproduction that didn't sound excessively distorted (though, of course, not totally natural, either) yet didn't use as much bandwidth as a non-limited signal. It was also found that limiting the audio to these frequencies helped reject interference occurring at higher and lower frequencies (such as 60 Hz power line noise).

The same technique of voice limiting used by the phone company can also be used by the SWL when headphones are used. Instead of using high-quality stereo headphones, which allow all frequencies to pass, try using cheap headphones instead. If your budget allows, consider the professional-quality headphones sold for amateur radio operators. They are actually designed to limit the audio to voice frequencies. They won't, of course, give you high fidelity when listening to music, but they are fantastic when listening to anything else. Such equipment manufacturers as Icom, Kenwood, Yaesu, and Shure sell a wide variety of communications headphones.

In the last few months I have presented columns covering your shortwave reception system from the antenna to the speaker. In this column I have included a simple but useful circuit for those who enjoy "rolling their own." If you would like to see more columns featuring construction articles, or any other topic in particular, please let me know. As always, please include a S.A.S.E. if you would like a personal reply. Until next month, happy listening!

73's

Tom Brown

NOTICE: John F. Wilson, Episcopal Church Home, RD #3, Box 233, Hammond Wing 105, Hockessin, DE 19707-9581 would like to have some contact with other DXers in the area by mail or phone (302) 996-9032. John is a handicapped DXer who resides in a nursing home about 30 miles south of Philadelphia and he would appreciate hearing from other DXers.

NOTICE: The Danish Shortwave Clubs International is sponsoring an International DX Contest "The Grand Tour With Cancer and Capricorn." The contest will be held in March, 1989 and is opened to DXers all over the world regardless of their club affiliation. Contest fee is five (5) IRC's and prizes will be awarded. Every participant will receive a contest diploma and a list of participants and scoring. If you wish to participate, write for a contest form to the following address: Jarsolav Boháč, ČSLA 2900/11, 400 11 Usti n. L., Czechoslovakia.

COMMITTEE TO PRESERVE RADIO VERIFICATIONS

JERRY BERG, Chairperson • 38 Eastern Ave. • Lexington, MA 02173 • (617) 861-8481

ALGIERS, ALGERIA, NORTH AFRICA

THE VOICE OF AMERICA IN NORTH AFRICA

We are pleased to confirm your report of reception
of our station on 31.22 m., 9610 kc.,
Nov. 16 1946, at 1900 hours, G.M.T.

PROGRAM	TIME (GMT)	FREQUENCY (KILOCYCLES)
THE VOICE OF AMERICA HONOLULU, T.H.		
This is a verification of your report of 9 November 1945, on 17,800 kilocycles.		
KRHO		English News is presented on the hour — GMT

Welcome to the first edition of The CPRV Page.

The Committee to Preserve Radio Verifications was set up in 1986 to provide a depository for QSLs belonging to hobbyists who have become inactive or passed away, and to stem the loss of this interesting material. These QSLs are kept at WCSN headquarters in Boston. Among the material donated to us are veries from some of the top DXers of the past. +++ The CPRV Page will be used to display some of the SWBC material we have received. We want to express our thanks to cooperating ANARC clubs for giving us space for this purpose. We are going to start off this month with some interesting QSLs from our own VOA--the USCGC "Courier," KRHO in Hawaii, and the VOA in . . . Algiers?! +++ If you know of any QSLs that are in need of a new home, please get in touch with the CPRV chairman (address at the top of the page), or a CPRV member. A business size SASE would be much appreciated. The committee members are . . . Kent Corson, 4015 Tanglefoot Terrace, Bettendorf, IA 52722, tel. 319/355-7293 . . . Gerry L. Dexter, R.R. 4 - Box 110, Lake Geneva, WI 53147, tel. 414/248-4845 . . . Tom Gavaras, 10401 Cedar Lake Rd. (215), Minnetonka, MN 55343, tel. 612/544-2433 . . . and John C. Herklmer, 3233 East Ave., Caledonia, NY 14423, tel. 716/538-2582. +++ More next time. Many thanks!

A Committee of the Association of North American Radio Clubs

Listeners Notebook

GLENN HAUSER, Box 1684, Enid, OK 73702

PROPER CREDIT Other publications and broadcasters may use material from LN, provided due credit be rendered to the original reporter and the NASWA Listeners Notebook. This courtesy does not extend to closed organizations which do not allow reciprocal access to their publication. BBC Monitoring items (designated WBI for World Broadcasting Information) are copyright and may not be reproduced without BBCM permission. The most important items have been broadcast immediately on SWL DIGEST or WORLD OF RADIO, not otherwise mentioned herein. All contributions to LN are gratefully received, but your editor cannot promise a personal reply because of severe time constraints. Material for LN should be marked as such each time, not just on the envelope, as input for other gh outlets also comes to Box 1684. Reports to gh should not be cut into little strips. It also helps if you use one side of paper only and do not mix LN items with other correspondence. All times, dates and days are day/month GMT = UTC, u.o.s. Please do not ask gh for advice on receivers or other equipment. Thanks (gh)

Output totals 303.45 hpw, of which leading lang is EG, 52.30, then FR 38.30, TK 32, SP 31.30 (WBI 16/12)

BURMA BBS reported 9/11: Info & bc dept u/Ministry of Info ancd that from 1/12 it will accept private commercial ads on BBS radio & TV (WBI 18/11) BBS 4742.8v, regular, almost locl strength w/beautiful mx indeed, BM anmts, 1439-1500 (Björn Fransson, Sweden, and Mikhail P Timofeyev, USSR, Nov DSWCI SW News)

CANADA RCI ancd 12/11: spl bc from 0000 22/11 to USA/Carib, 0030 to Eu/Af/ME. Ancd 13/11: Af/Eu/ME on 3975, 5975, 7230, 9530 via Daventry [actually, 3975 was Skelton, a new RCI 'site'---got a spare QSL blank if you hrd it?] EG portions at 0030, 0130, 0230, 0346, 0430, 0530 (WBI 18/11) BECM provides the data on my muse whether RCI output is strictly equal in EG & FR---it is not. Weekly output to all areas, incl CBC relays, is 185.50 hpw, of which 64.20 is in EG, 43.00 in FR. 3rd plce is RS, 21 hpw (WBI 25/11)

[Cf Dec LN-13] I would like to make clear that the last 3 lines of remark were a response to the non-person treatment gh receives from PWBR, in which SWLD itself is certainly not a party. In reality, I myself always listen to the entire SWLD bc each week, even the portions in which L--- M--- appears, and often even the gh portion to remind myself what he said--hi--and suggest that everyone else do likewise (gh)

CAPE VERDE AFP reported 31/10: Herve Bourges, former dir of RFI and TF-1 TV, says he just signed agmt w/CV to install there 3 hi-power xmtrs for bc toLAm/Af on SW. "Many stns are intrestd in these new facilities, but they will hve to compete. I have no preference for VOA or R Moscow." At 55 [years of age, a datum beloved of print journalists despite its irrelevance; why not tell us how much he weighs, while youre at it?] Bourges has founded his own firm to invest in audiovisual produxions (WBI 11/11)

CHINA 9845, R Beijing in Albanian until 2125*. Also hrd earlier, but reception too poor to be able to ID lang. Is this a new bc? (Tony Jones, Asunción, Paraguay, 16/12) Yes, I believe it's one of the relays via France (gh)

C H I N A (PEOPLE'S REPUBLIC)

China finished the DST on Sep. 10th.

(Ed.)

Radio Beijing has changed IS, opening announcement and closing music. R. Beijing shorten IS of "The East is Red" to 4 opening bars (formerly 8 bars). Adding Chinese ID between IS', as "Zhōngguó Guójì Guāngbō Diàntái" ("Chinese International B. S."), this is the formal name of R. Beijing). However Std. Ch, Cantonese, Amoy, Hakka and Chaozhou pgms are as before, "Beijīng Guāngbō Diàntái" (Beijing B. S.) Closing music is 30 sec. melody, the title may be "Good Jiangnan" in place of arranged music of the National Anthem. First noted on Oct 5.

(Nobuo Hina, Hirofumi Yamaoka, Kunihiro Nishida, Tetsuya Kondo) (East Asian DX News of Asian Broadcasting Institute, 15/11 via Tetsuya Kondo)

C H I N A (PEOPLE'S REPUBLIC)

Radio Beijing changed a schedule on Oct. 11 and Nov. 22. Several programs has shifted the broadcast time period.

And Radio Beijing has started exchange-relay broadcast with Radio France Internationale since Nov.

Recent EG program frqs : to Western part of North America; 0300-0355 15455 11715 9770 9690 9675, 0400-0455 11980 11695 9675, 1400-1455 15165 11600 7405, to Eastern part of NA; 0000-0055 11715 9770 9665, 1100-1155 9665, 1200-1255 17715 15110 9665, to Europe 2000-2055 and 2100-2155 9710 6860 4130(unofficial), to Western part of North Africa; 1900-1955 9440 6955, 2000-2055 11715 9785 9745 9440 6955, to South Pacific; 0830-0925 and 0930-1025 15445 11755 9700, 1200-1255 11600 7820, 1300-1355 11600. (Shigenori Aoki, Tetsuya Kondo)

R. Beijing Esperanto section replied answer response to a question concerning with its new opening and closing style. It said that these style had introduced since October 1. Also made clear the closing 30 sec. melody is named as "Molihua (Jasmine)". ["Good Jiangnan" in last issue is mistake. - Ed.] This is a famous folk song around Jiangsu Province. (Nobuo Hina, Akira Yamanaka, Tatsuo Gima, Hirofumi Yamaoka)

Yunnan PBS has reopened a transmitter of 3910kHz. Noted on Nov. 16. According to a schedule received from this stn, it broadcasts as follows.

General Service: Std. CH 2220-0100, 0225-0600, 0855-1540 on 7210, 4760, 2460, 990, 576kHz.

Educational Service: Std. CH 0045-0430, 0930-1030, 1415-1545 on 5960, 1242kHz.

Literary Service: Std. CH 1125-1530 on 6035, 3910, 1350kHz.

Nationalities Service: 2230-2315 Lahu, 2315-2400 Jingbo, 0000-0045 Lisu, 0430-0515 Dehong Dai, 0515-0600 Xishuangbanna Dai, 1030-1115 Dehong Dai, 1115-1200 Xishuangbanna Dai, 1200-1245 Lisu 1245-1330 Jingbo, 1330-1415 Lahu on 5960, 1242kHz.

Yunnan BS, independent organization of Yunnan PBS, is on the air as follows, using Yunnan PBS transmitters.

2230-0130 and 0900-1120 6035 3910, 1530-1550 6035 3910 1350

Programs in Vietnamese except "Program for compatriots out of Yunnan border" in Std. CH at 1100-1120 and 1530-1550. This stn relays Radio Beijing Vt pgm at 2300-0100 and 0930-1030. And testing FM stereo bc at 1230-1330 (extend to 1430 on Sat and Sun) on 94.4MHz. (Satoru Suga)

Xinjiang PBS has changed some frqs since October 31. May be in response to winter shortwave propagation. Following frqs are observed in the local night: Std. CH service; 6100 4500 3960kHz, Uighur service; 5800 4735 3990kHz, Kazakh service; 5440 4970 4330kHz, Mongolian service, including Kirghiz pgm; 5060 4980 4220kHz. (Satoru Suga) (East Asian DX News of Asian Broadcasting Institute, 17/12, compiled and translated by Tetsuya Kondo)

Xinhua reported 5/11: Beijing PBS began new local EG-lang svc today designed to serve more than 20,000 formers and Chinese residents who speak or are learning EG. Stn'll provide half-hour nx and spl pgms in EG from 1400 gmt Sat and repeat at 0330 Sun. Will mainly cover Beijing's co-op w/other countries and its trads and customs, such as "a week's important news", "Beijing's places of historic interest and scenic beauty", "Sino-forn joint ventures", "Formers in BJ" and "spl nx pgm" (WBI 11/11)

Jiangxi PBS, Nanchang reported 7/11: Ganzhou PBS formally went on air this morn. Relays CPBS, Jiangxi PBS, also seven nx and spl topical pgms, incl Ganzhou nx, on and off campus and market info, arts pgm, mx in stereo, mx requested by listeners (WBI 18/11)

R Beijing ancd 21/11: Tnx to relay agmt w/France, listners in Mex, CAM, N SAM can now tune in RB SP pgms at 02-03 on 13685; NAM CH & EG 15-17 UTC [sic-- 12 hours off!], 21-23 Mex time on 11695. That's Montsinery, F Guyana [sic]. RNMN gave remainder of RB via RFI, Allouis, France: 19-1930 RM 9845, 1930-20 CZ 6080, 20-2030 PL 6080, 2030-21 EG 9845, 21-2130 AB 9845, 2130-22 HG 7120 (WBI 2/12)

R Beijing ancd 21/11: From 25/11, RB first Persian-lang pgm will bc 30 mins earlier. 2nd unchanged. 3rd added. Thus: 15-1530 on 32 & 31 m; 18-1830 & 1830-19 on 43, 31, 30m. This'll incr RB weekly output in Persian from 7 to 10:30 (WBI 2/12)

COLOMBIA AFP reported 29/11: Liberal govt will begin being an offl 'Good nx' bulletin on state TV from 1/12; govt tired of private nx "only being bad nx". But Col nxpaper circles recalled that previous TV nx bc by previous govts hav failed 'in a flash'. Nxpaper comtry described new nx as "lemon...hopeless task" (WBI 9/12)

Monitoring research 5-9 Dec: CARACOL Bogota currently hrd in // on two SW fqs, 4755 and 9510; 4755 first obs 5/12, 9510 7/12; 24hpd on 850 and the SW appear to be in use for much of the time (WBI 16/12) Probably tipped by Ernie Behr item about 9510 harmonic on my RCI report 26-29/11; if so, BBCM would never have the courtesy to acknowledge (gh)

4895, LV del Rio Arauca: As the P&T could not get me the phone number to the stn, I called up RCN in Bogotá. It worked fine, and I could then dial +57 81 52368. This also worked: stn has rcvd considerable number of reception rpts in spite of having a new addr: Cra. 22 No. 18-21, said dir Gustavo Trespalacios. No QSLs yet arriving; excuse was usual "waiting for our pennants to arrive" but all reports will be answered, nobody need despair, he claimed. Dir was quite surprised to rcv my call, wondered how I obtained phone number. Clearly had been giving DXers a thought, as Trespalacios disclosed he plans an intl mbg pgm at 04-05. I suggested Sat/Sun as convenient days and that the stn ask every DXer to send a viewcard in order for them to repaper a wall with them. I've seen this in LAm before, and results are astonishing! Should be clear by now that stn xmits with 10 kW, not 3 (Henrik Klemetz, SWB via Nov DSWCI SW News)

COSTA RICA R for Peace Intl has new 5 kW xmtr on hand, planned to start testing it first week of Jan. Hopes to raise power again by yearend. Check 21560v aftns, 13663 eves, or maybe reactivated 7375. Hope new xmtr will also include audio improvement. They will use 2 fqs at once w/old & new xmtrs working (gh)

R Sandino, Managua reported on nxconf by Nic Interior Ministr Tomas Borge and CR Public Security Min Hernan Garron Salazar at Barlovento Hotel in San Juan del Sur, Nic on 24/11. Two other CR ministers prticipating admitted that two contra stns freely op in CR, R Liberación and R Impacto. Ministr Garron responding to reporter's questions: R Impacto is an enterprise subject to CR laws. We do not censor statements before they are made. Don't know who owns it. Stn does hve legal status. R Lib does not, is clandest. Trying to pinpoint location, which changes. Been going on for some time. Whenever we locate it, it moves.. In past it has been in Tres Rios, and elsewhen vy close to Nic embassy. In fct, once detected half a block from Nic embassy. Don't know if meant to mock someone, but is truth. When we detected it, it switched to another location in Aserri... (WBI 2/12)

CUBA RHC reported 22/11; Cuba will use all available means, excluding none, to respond to US plans to set up anti-Cuban TV Marti. So says Sergio Varata, sexion chief of Revly Orientation Dept. Says if US wants to it could negotiate bilateral exch of R/TV pgms w/Cuban govt. Wash chose to impose R Marti on Cuba, and now ancs imposition of TV. So Cuba reserves right to respond as appropriate to aggression. TV ch included in bill approved in July, initial budget 7.5 million a year (WBI 2/12) Vague, but since no means are excluded, I suppose they might assassinate former CIA director Bush, or something (gh)

CYPRUS Reports in Greek-Cyriot press on 14/11 and 15/11 indicated up to 4 cland radios 'd be on air coinciding w/demos to condemn anniv of proclamation of separate Turk Cyriot state: R Return (Epistrofli) on 103.5 FM; R Pentadaktulos, FM 104.0; R Liberation on FM 103.3 and 106.0; R Self-Determination (Avto-dhiatesi), no details (WBI 25/11)

CHILE R El Espectador, 15139.7, 2352-0025 25 & 27/9, ments of Mrs Allende, R Impacto (Frank A Baldwin, UK; Italo Tagliabue, Italy; Carlos Vives March, Spain, Nov DSWCI SWN) ?? Should be R Nacional; El Espectador maybe pgm name: and what about KGEI relay, in effect on those dates? (gh)

DENMARK Sveriges R reported 2/12: R Denmark will be forced to dismiss some 100 staff, reduce bc hours on R&TV following decision to raise licence fee by 2%. R Denmark had asked for increase of 6% in order to continue opn on present scale. Opposition in the Folketinget wanted to grant 4%, but govt parties' proposal of only 2% increase gained the majority (WBI 9/12)

(E Asian DX News of Asian Broadcasting Institute, 15/11 x ltd & via Tetsuya Kondo)

JORDAN R Jordan reported 12/11: On occasion of HM King Husayn's birthday today, he has inaugurated new xmsn stn of HKJ in Kharranah; will op on 3 wavebands; 3 SW xmters, 500 kW ea, 12 ant; SW beamed to most worldregions. MW 1000 kW on 1449 to cover Naf, Gulf at nite. Also 2 LW xmters, 600 kW ea; can op in // w/1200 kW on 207 kHz, cover HKJ, neighbouring Arab states [Israel too, I'll bet]. Xmsns currently obs on 11920 11810 9560 5960 801 612 (WBI 18/11)

Monitoring 19- 22 Nov: At 1730 19/11, EG svc on 9560 ancd test xmsn on 9560 to C&WEU, NAM, asking for reports to R Jordan, P O Box 909, Amman. EG svc now obs on 9560 05-2205 apx; fq ancd for W&CEU presumably a new 500 kW; xmsns from old 100 kW xmters were seldom hrd in UKOGBANI. R Jordan ancd 19/1 in Arabic: using new fqs 11810 207 1449 [the last two being metric convrsions of eachother] asking for reports to same addr, w/elements in reverse order.

Monitoring 20-22 Nov: Since 20/11, R Jordan main AR pgm ancd SW fqs & confirmed: 0330-15 11920 11810 9540, 15-2330 11810 9540 9530. Are //1485 1449 801 612 207. 11920 & 9530 ancd for W Arab Peninsula, Egypt, Sudan; 11810 Gulf, E Saudi; 7115 seems dropped. (WBI 25/11) But latr WBI shows 4 AR fqs at once:

R Jordan DS in AR: 0330-15 11940 11920 11810 9540, 15-2330 11940 11810 9540 9530. DS in EG 05-22 on 9560 855, FM 99 & 90.9 includes 5 min nx summary at 08, 10 M-F, 11 M-F, 14, 16, 19, 20, 21; longer 10-min nx 0530 Sat/Sun, 12, Sat/Sun at 17. 30-min Newsdesk 0530 M-F, 17 M-F. Jordan Weekly, nx reviews, ivs, Fri/Sat 1210-1230, Wed 15-1530 (WBI 16/12)

KAMPUCHEA Overseas Svc, R V of the People of Kampuchea, recently noted in a ltr that they seek reports, remarks, suggestions from Am friends. While sounds like reqs from a number of intl svcs, I think it shows a definite interest in obtaining listener feedback. RVPK is certainly more responsive than its predecessors, verifying reports, sending out scenic viewcards, issuing stn pennant. I've suggested to them that they might consider a bc to NAM during 1330-15 UTC period beamed 0 to 20 degrees (Bill Matthews, Columbus OH, 18/12)

VOPK ancd 1/12: To mark tenth anniv of 7 Jan natl day, VOPK from 3/12 will extend feature on comprehension of legal matters Sats from 1315; also carry daily nx roundup nightly at 1330. Compatriots and friends invited to listen (WBI 9/12)

KENYA Kenya Times reported 15/11: State-owned VOK to become a public corporation. Bill setting up Kenya Bcing Corp published, soon be tabled in parliament [tabled = put forth for consideration; not set aside]. But stn will continue to be known as VOK. Daily Nation reported 17/11: Revamped VOK will receive 2.3 gigashillings from Japan to improve svcs. Assistance to bcing makes up the bulk of 4.3 GSh Japan promised Kenya (WBI 25/11)

VOK reported 22/11: VOK on road to becoming parastatal org today when Minister for Info & Bcing Mr Waruru Kanja, moved the KBC bill in parl. Corp will overcome constraints, be able to raise own capital, equity. Said corp will not be hampered by govt bureaucracy, will make quick decisions for effective bcing. Nothing detrimental to well-being of nation will be bc, & corp will uphold Af moral traditions. Asst Min for Labour Mr Onyango Midika suggested govt should retain some control of VOK corp; shouldn't be left free like BBC to malign friendly countries. But VOK should be able to counter hostile propaganda by forn media against the country. VOK reported 24/11: VOK will move from present bldg opposite Nairobi Univ to spacious site in Ngong area. Kanja said establishment of extl svc would be considered after the corp became economically viable (WBI)

to go off earlier on Sundays, but needs further checking. Operates extended schedule to 0300+ for special events, e.g. local fiestas.

6571.5, Radio Tacna, even more irregular than 5816, and leaves the air at varying times, e.g. 0000, 0200. Signal strength always good, though. 9505v heard local mornings mixing with the Brazilian, and 9486 sometimes observed Sat. nights and Sundays.

6691.2, Radio Cutervo, first noted 11/11 but not identified until early December. Normally signs off around 0400, but sometimes heard as late as 0600.

6726.5, R. Satelite, now stable on this frequency. Currently operating a reduced schedule, and normally signs off about 0140.

6895.2, Unid, virtually impossible to catch either location or ID, due to extremely fast delivery of announcer. Many mentions of "ecuatoriano", but signs off with the Peruvian anthem.

9675, Radio del Pacifico, back here ex-9349.8; first noted Nov.10, but may have changed during October. Quechua no longer heard 1115 Saturdays. (Tony Jones, Paraguay, 16/12)

PHILIPPINES R Veritas Asia, in EG: 0130-02 15325 15275, 15-1530 15360 15220. Only COB usage is 9860 for Std Chinese 2130-2325. Total output 143.30 hpw, led by Std CH 29.45, Viet 19.15, and guess what's in 3rd place? Karen 10.30 (WBI).

PORTUGAL RDP Intl reported 12/11: xmtr refurbishment project underway since 1987. In 1988, SW xmtr, and refurbished São Marçal studio opt; we are already in the new studios. In 1988, new ant for Af will be installed, and at yearend or 1989 yearbegin, powerful 300 KW xmtr for Eu becomes opt, tripling power of our xmtrs of 100 kW. 1989 aim is to improve xmtns to Am continent. 1990, new xmtr for FE; 1991, new xmtr for Eu. Investments already made exceed 500 megascudos, and in 1991 a further sesquigigaescudo will be spent (WBI 18/11)

RDP Intl reported 16/11: FM Cavaco Silva offly inaugurated new studios. New means at disposal already enable extend duration of bcs; new xmtrs soon in opn, first being for Eu in Dec. RDP Intl 15/11 ran excerpts from studio inaug speeches. Dr Arlindo Carvalho, chmn of BOD of RDP: New xmtr, aerials will from end of first quarter next year, enable us to reach Af w/G reception. In prsonnel sector, RDP expects spend some 7 gigaescudos next few years on improving training facilities. FM Cavaco Silva emphasized that there should be no state monopoly on bcing, DS or ES.

RDP Commercial R reported 16/11: Free radios are protesting against regs for being forcing them to stop bcing as from 24/12. Tomorrow abt 200 pirate radios'll bc simultaneously nationally from TSF R Jornal in Lisbon. But a few of the 200 will not prticipate and object to being included in list of such (WBI 25/11)

DIRECCION GENERAL MONTAVIA No 10 - Montevideo
Uruguay, Octubre 22 de 1968.

Señor,
Sr. J. B. Bata,
Bristol, Connecticut
USA.

De su comunicación:

En primer lugar recibe un saludo de bienvenida por parte de RADIO PAN AMERICANA, por estar interesado en recibir una señal de radio y los medios que nos permitieron recibir una señal de su estación, es por eso que le enviaremos la lista de frecuencias y la hora de las emisiones que se han identificado con nosotros.

La única estación de radiodifusión latinoamericana que nos da el mismo nivel de satisfacción es una estación, y esta estación la hace su más grande y que sea una persona. Como si usted fuera y nos muestra que no que nosotros también tenemos una buena señal. Al momento de recibir nuestra señal nos alegramos mucho más, pero también un saludo por parte de nuestra estación de programación por parte de nuestra estación en su idioma y de los que nos son muy queridos, pero que nos son muy queridos, así que es su satisfacción, satisfacción y felicidad que sería muy linda si también nosotros recibimos esta señal con nosotros como su gran.

Los datos de recepción son positivos y nos es muy importante que usted nos envíe una copia de la fotografía que le hicimos en un lugar donde se vea el tiempo en la fotografía de la estación de radio, así como también la hora en que nos mandamos una fotografía para saber cómo está, y para una nueva oportunidad de la estación de radio y de la estación de la estación de la estación, no podemos hacer nada, una confirmación que le enviaremos luego de un tiempo muy pronto.

Si usted nos envía por el momento no debemos ser un gran problema de nada, para un tiempo muy pronto.

Atentamente
J. B. Bata

Kapileo, QSL Secretary. **Radio Encarnacion** 11945 Prof. Alejandro Lapierre. **FEPA** 17780 Mrs. Doreen Dugasse, QSL Secretary.

NOTES: Tom Laskowski writes that he has just finished college and now has more time for DXing and QSLing. He recently purchased a new ICF-2010 and is having a ball. **Kevin Atkins** writes that the high voltage QRN was so bad that he actually sold his home and moved. He complained to the power company and to the FCC to no avail. The day after Kevin moved he received a QSL. Omen??? **Guy Connor** sent in contributions to last months QSL Column. He is a new contributor. Keep reporting each month... Sam. **Paul Brouillette** states that he has been using an ICOM R71A for the past four years with good results. His only problem has been the lithium memory battery. Hope the DX has been good to you Paul. Received a very nice letter from **Harold Levison** who stated that he has recently received some very beautiful and picturesque photo albums from Poland and Czechoslovakia. Yes, they are a nice treat to receive. I have a beauty from Switzerland... Sam.

Flag of Freedom Organization of IRAN

Darfaur, 20, rue de Condoxet

Mr. Sam Barto
47 Prospect Place
Bristol, Ct. 06010
U.S.A.

Dear Mr. Barto,

Thank you very much for your interest in Radio Flag of Freedom of Iran.

We are currently broadcasting daily on: 15560 KHZ (19 m) and 9045 KHZ (31 m) in the morning (7.00 to 8.35 a.m. local Tehran time) Tehran time is $3\frac{1}{2}$ hrs. behind GMT, and 11613 KHZ (25 m) and 9045 KHZ (31 m) in the evening (local Tehran time 20 to 21.55 p.m.)

We would be most grateful to receive your comments on the quality of reception in your locality as well as on the contents of the program.

Enclosed please find a copy of of Guide for Action, the Strategy of a Popular Struggle as well as what is FFO leaflet which may serve to give you a better picture of the activities of our organization for the liberation of our country and what we are aiming at.

In anticipation of hearing from you soon.

Sincerely yours,

Am. J. J. J.
Dr. Manouchehr Ganji
Secretary-General

Señor
Kirk S. Allen
2237 Jane Street
Ponce city, OR 74601
Estados Unidos

Estimado señor: En efecto la Voz del Ariari es una radio estación perteneciente a caracol primera cadena radial. Agradecemos su llamado y de manera sincera su reporte de sintoma así como también su cordial referencia que hace de nuestra estación radial.

Nos interesa mucho las noticias de radio escuchas extranjeras nos valiosas para nosotros.

Transmisiones desde	Bogotá
Emisora	Caracol radio
Frecuencia	4,755 KHZ
Bandas	50 metros

La voz del Ariari se encuentra en efecto en el seta otro departamento de Colombia. Frecuencia 5,991.5 KHZ banda de 49 metros. Nuestro país está dividido por departamentos, municipios, intendencia, comarcas.

Por favor mis saludos a su esposa e hijos, espero les agrade la programación que escuchan de esta emisora. Bogotá es la capital de Colombia, centro político, cultural, comercial e industrial de nuestro país.

Aquí se encuentra el santuario de Monserrate un cerro donde se llega por Teleférico, funicular y además por tierra un sendero construido en escaleras para comodidad de la cantidad de gente que domingo a domingo sube a celebrar procesos al señor de Monserrate.

Al frente está el cerro Guadalupe allí hay una gran imagen de esta virgen.

Y existen otros sitios de interés turístico como el salto del tequendama, Zoológico santa cruz, Museo Quinta de Bolívar, Museo Nacional, Museo del Oro, de Cobre etc...

Sus datos e informaciones son correctos y nos complace altamente que radio caracol y la voz del ariari se escuchan en la región donde Ud. y su familia habitan.

Cordialmente,

CARACOL radio

15 July 1987

Dear Sir,

Reference is made to your letter dated 4 July 1987.

We are pleased to confirm that you indeed have succeeded in intercepting our time signal broadcast at the frequency of 13020.4 kHz at 1300 UTC on 4 July 1987.

Our time signal is composed of 6 dots only. So the series of telegraphy transmissions after these 6 dots is not broadcast by our station.

Enclosed please find a list of schedules, frequencies and contents of our Broadcasts for Aircraft/Shipping and Broadcasts of Time Signals.

We thank you for being so considerate but there is no need for your airt stamp. It is therefore returned with this letter. We also thank you for your beautiful photo of the school house.

Don Howard
P.O. Box 30060
Santa Barbara, CA 93130-0060

Dear Mr. Howard,

Based on the data which you mailed to us, it seems to indicate that you had, in fact, tuned into our radio broadcast "A Vos de Resistencia do Gale Negro". We have received numerous letters from radio enthusiasts who have tuned in at 4973 kilocycles, all of which have described similar programs.

Letters have been coming in from many different states within the United States and Canada. There have been letters from as far north as Massachusetts and Alberta, Canada; west as California and south as Florida.

In order to verify your particular reception of "A Vos de Resistencia do Gale Negro", please mail us a recorded tape from your listening post. Also, we do not have any verification cards at this office.

I will be happy to send you information on the situation in Angola. I would like to make you aware of our bi-monthly newsletter KWACHA NEWS. If you are interested, I would be glad to put you on the mailing list.

NOTES: John Huniwell reports that he is very pleased with his new purchase of the R5000. He has logged 100 new stations since August 31. Good going...Sam. John Huniwell and Rich D'Angelo both requested the Radio Venceremos New York City address that was in the QSL Column for November. This was submitted by Renfrew in New York State. Please send in the address. I'm sure there are others who will benefit from this...Sam.

NEW BRITAIN: Radio East New Britain 3385 f/d cd. in 19 ds. for 1 IRC. v/s A.L. Rumina, Station Manager. (Teruki).

NEW IRELAND: Radio New Ireland 3905 p/d ltr. in 19 ds. for ms. v/s O. Malatana, Station Manager. (Laskowski-IN). f/d ltr. in 32 ds. for 1 IRC. v/s Kathleen Sakias, Assistant Station Manager. (Teruki).

Dear Sir,

I have received your letter and understand your opinion. I have been very happy for your letter. Thank you for your letter.

And now I want to tell you some information about South East Sulawesi:
 South East Sulawesi is consist of four Province, namely :
 - Regency of Komfari, Regency of Muna, Regency of Buton, Regency of Salaha.
 The regency's have Capital:
 - Komfari is Capital Regency of Komfari, Muna is Capital Regency of Muna,
 Buton is Capital Regency of Buton and Salaha is Capital Regency of Salaha.
 From the Muna has been famous : "The Eight Horse"
 From the Komfari has been famous : "The Dull Komfari, The Dull Komfari is very beautiful, so some time the name called "The Beautiful Komfari".
 In the Komfari, we have recreation place, namely :
 - Recreation Lake Long Beach
 - Recreation Beachings Beach
 And don't you forget the Capital Komfari usually was called "Kula Sana City".
 From the Buton has been famous "The Wall Kingdom of Buton".
 There has recreation place too, namely "Kiwana Beach".
 It is some information from South East Sulawesi for you.
 I hope you will be come to South East Sulawesi, and I will be guide with you. Finally, to send best regard to your family.

Nous avons le plaisir de confirmer votre rapport d'écoute. Many thanks for your reception report which we are pleased to verify.

Station Radio Libre Bay

Date 16th April 1988

Hours-Time 10.30 to 11.15

Freq. 7365 kHz

Meters: 20 Meters Band

Watts 10.00 W

[Signature]

Signature

PORTUGAL: Radio Free Afghanistan 17730 and 21530 n/d cd. in 25 ds.(Renfrew-NY). **Radio Free Europe/Radio Liberty** 7155 via **Gloria** f/d cd. in 6 ds.(Renfrew-NY).

RIO MINI: Radio Africa 9553 f/d cd. in 6 ds. via CA address.(Stephens-AL).

GREAT CIRCLE SHORTWAVE SOCIETY: Although somewhat belated I must make reference to a letter I received from Harold Cones regarding the demise of the Great Circle Shortwave Society. During the short time this society was in existence, I read with great pleasure the article from several of the old-time DXers. It was a fun organization which dealt with DXing during the 50s and 60s. Very sorry to see it go....Sam.

RIO MINI: Radio Africa 9851.8 p/d yellow cd. in 8 ds. for ms.(Palmerheim-MN). 9553 ltr. in 112 ds.(Darling-PNG). **Radio Bata** 5004 f/d cd. in 7 mo.(Barto-CT).

ROMANIA: Radio Bucharest 11940 f/d "Scinteia Square Central Pavillion in Bucharest" cd. w/ schedule in 53 ds.(Healey-RI). f/d cd. in 80 ds.(Connor-PA).

SAIPAN: KFES 15375 f/d cd. w/ schedule in 1 mo. for 1 IRC.(Teruki). 12025 f/d cd. in 55 ds. for \$1.00. v/s Erma Kapileo, QSL Secretary.(Weber-OH). cd. w/ sticker in 1 mo. for ms.(Wallace-MA). KYOI 11900 f/d prepared cd. in 2 mo.(Field-MI).

QSL Verification Card

Estimado Señor:

Mos es grato contestar su carta del 5 de junio de 1988, en la cual nos informa que sintonizó nuestra emisora Radio Impacto el 19 de diciembre de 1987, en la frecuencia de 5.030 KHz de 11:27 a las 12:00 hora de Costa Rica.

Adjunto encontrará una calcomanía y un banderín de la emisora como muestra de nuestro agradecimiento por su gentil sintonía. Además le enviamos una tarjeta postal de nuestro país para que tenga una idea del lugar de donde les escribo.

Mos gustaría saber si en otra oportunidad a vuelto a sintonizarnos.

A gradecemos su sintonía, cordialmente

HECTOR REQUENA C.
Asesor General

I guess this will end yet another QSL Column. Hope everyone had a great Holiday Season.

Time to shovel snow and all that good stuff.

JERRY A. LINEBACK, Editor
 6361 Shore Dr.
 Douglasville, GA 30135

Welcome to Scoreboard. As you can see, I have moved again. We bought a house, so this address should be good for a while. The Spotlight this month is on Africa. C/H=countries heard and C/V=countries verified. Country counts are to be guided by the NASWA Radio Countries List available from Headquarters. You must update at least once a year to remain on the Scoreboard. We thank all who have participated this month and invite all to share their progress with us. Next deadline will be February 15 for the March FRENDX and the Spotlight then will be on Asia.

*** kap's comments***

First of all, on a personal note, Muriel and I would like to thank all those who sent us Holiday Greetings during the past Season. Also, I would like to say thank you for those who sent Sympathy Cards on the recent passing of my Father.

May this column serve as a Memorial to fellow DXer, William T. "Tom" Farmerie of Grafton, MA who passed away on December 16. Rest in Peace, my friend. To his widow Ermine and son Christian go our deepest sympathies.

Don't look too hard for the "Awards Page" this month. There were only a few Award Applications processed in the past several weeks and we could not justify an entire page. Next month we will be back with the Awards Page and there will be some major and exciting announcements made.

We must remind everyone that the deadline here is the 12th of the month. Our policy is to process all of the material received on the evening of the 12th and to mail it on our way to work on the morning of the 13th. Any Contributions received after the 12th must be held over to the following month, no exceptions can or will be made to this policy.

In case you stray from the SWBC Bands and stumble upon KA1SPD on 10 meter SSB, we'll be pleased to QSL you on receipt of an accurate reception report. And, to the first NASWA member we work on 10 meters, a special something.

Till next month.

Best 12/26/88

Quite a slew of reports this month including more and more in the 21 and 25 mhz bands. Dr. Wood, who speaks a dozen or so languages fluently, has contributed many quality loggings this time. His QTH is on the Big Island near Hilo where he has several super beverage antennas capable of hauling in the toughest DX. As usual, loggings listed in last month's FRENEX have not been repeated this month. Please consult the December issue for a more complete update. Some loggings had to be discarded because they did not include essential information like time of logging. Please double-check to be certain that all details are included in your reports. Best wishes for a happy and prosperous New Year to all!

Mark February 24-26 on your calendar for the 2nd Annual Winter SWL Fest. More info elsewhere in these pages, including a registration form. Come join us for some fun and festivities.

A note from Ken Ottenheimer of Long Beach, NY, reminds me that we have new members who may not know how to interpret these listings. The first two columns are Universal Coordinated Time (UTC), also known as Greenwich Mean Time (GMT), in a 24-hour format. Subtract 5 hours for EST. Days referred to in the notes column are UTC days, e.g., Sat 0220 equates to Fri 9:20 p.m. EST. Frequencies are in kHz. Not all transmissions are directed to NA and some won't be heard except under the best of conditions. Use the target area column: "Am" or "NA" are your best bet. As some broadcasts are directed to multiple target areas, check all frequencies for the best signal.

The solar flux went through the roof, reaching over 250 on the weekend of December 17-18. These numbers were last seen in the fall of 1982. Radio Yerevan, a mere whisper in the ether a week earlier, was heard on the Sony 2010 with the whip antenna, and 10-20 db/s9 on the NRDs, all frequencies: news in English circa 0350 on 15455 (competing with Beijing), 15180 and 13645. The news varies from 2 to 5 minutes in length. Bob Brown, KW3F, and I, using 2m FM as a link, chased around the bands. On the 18th, Turkiye Polis Radyosu, 1 kw on 6340, was heard signing on at 0458 -- absolutely amazing signal at 10 db/9, probably the strongest Bob has ever heard it, new for me. Tahiti-15170.8, R New Zealand-15150, both nights with s7-s9 signals after 03 UT. R Veritas Asia-15325 is heard most evenings. Two pirates were heard on the 18th: Falling Star Radio-6241 was on 0045-0600 UT, excellent, and WENJ-6240 was on from about 22 to 24 UT, also with a good signal, taking telephone calls. WENJ was on the air again Christmas Eve as was Scotland's Weekend Music Radio-6317 kHz.

The solar flux was on a downhill run after peaking at 252. Given the nominal 27-day cycle, look for conditions to peak again in mid-January. Friday, December 30, saw the flux drop to 180 and a flare at 1802 UTC decimated the bands. I was listening at the time, and thought something happened to the receivers.

Other notes: Thanks to John Carson of Norman, OK, for schedules from New Zealand, South Africa regionals and KSDA! On some days there is a resemblance to English in the news from Sudan's National Unity Radio, 1420-30 on 9435. Thanks to Bob Brown for the tip. George Jacobs told me he expects WSHB (Cyprus Creek, SC) station on the air in early 1989; the schedule is now added. The second propagation graph shows monthly solar flux averages and +/- 1 standard deviation for the last three years. Two-thirds of all values fall within +/- 1 S.D.; a wide range indicates widely fluctuating values during the month in question. While listening to R for Peace on 21560.6 kHz at 21 UT December 30, the signal left the air abruptly in mid-transmission at 2123 and did not return, nor were they on 13660-3 later that evening.

Changes entered between 11/25/88 and 12/30/88.

THE 1989 NORTH AMERICAN DX CHAMPIONSHIPS
(NADXC) SPONSORED BY NUMERO UNO

ELIGIBILITY

The 1989 DX Championships is open to all DXers residing in North America [as defined by the country list of the North American Shortwave Association (NASWA)]. Members of the NADXC Administrative Committee and the judges are excluded from participation.

LISTENING PERIOD, FREQUENCIES, AND TIMES

Each participant must provide a LSASE to the address below no later than 1 February 1989. The contest will occur in late February or early March--specific time and frequency details will be sent approximately two weeks before the actual contest period. The 1989 NADXC will be a true DX contest. Rules will be changed annually to offer new challenges and provide contest variety.

PRIZES

Trophies will be awarded by NU to the top three finishers; they will also receive a current shortwave - related book from Fred Osterman of Universal Shortwave. All entrants will receive a certificate of participation in the 1989 North American DX Championships and the top 20 will have their place of finish indicated on the certificate.

SCORING

Contestants are to log as many stations as possible from as many countries as possible within the prescribed listening parameters. The first station logged from each country = 5 points. The second station from each country = 3 points; each additional station from that country = 1 point. For contest purposes, all clandestine stations and hobby pirate transmissions will be considered one "country." A station is a shortwave broadcaster whose transmissions are intended for reception by the general public. Each transmitter site of a broadcasting organization will count as a separate station. Different services of the same broadcast organization do not count as separate stations. Transmissions of a single broadcast organization on various frequencies may only be counted once. The use of multiple frequencies does not create as many new stations as frequencies used. For country counting and station counting purposes, the country list of the North American Shortwave Association (45 Wildflower Road, Levittown, PA 19057) will be the sole criterion.

Participants are required to submit a running log to include country, station, frequency, time, date, SINPO, and the basis of station identification (i.e., spoken ID, interval signal, language, program, known//frequency checked, etc.).

Each contestant is required to total his own entry and provide a summary of the number of countries and stations claimed to support the point totals. Logs will be judged on accuracy, completeness and neatness. If the judges cannot read a log, that log will not be counted for scoring purposes. The decision of the judges is final.

FEES

An administrative fee of \$3.00 plus a business-size SASE must be provided for each contest entry. All entries must be postmarked by Wednesday, 15 March 1989 and sent to:

Dr. Harold Cones
2 Whits Court
Newport News, VA 23606 USA

Results of the contest should be available in June and will be sent to each participant and all ANARC member clubs for publication.

Good luck from the 1989 NADXC Administrative Committee - Harold Cones, John Fisher, and Dan Sheedy.

***** The 1989 NADXC is part of the celebration of the 1,000th consecutive weekly issue of NU and its 20th year of operation *****

FOR SALE: SONY ICF-7600A, \$65.00 and SONY ICF-2002, \$140.00. Both in good condition and with little use. Come with original packing and accessories. I pay shipping. Malcolm Kaufman, 18 Dudley St, Cambridge, MA 02140. Phone (617) 868-5136. Weekend mornings best.

NOTICE: Anyone in the SE Ohio and neighboring areas of West Virginia and Kentucky interested in a DX Get-together please contact either Don Moore, 2 1/2 Columbia Ave, Athens, OH (614) 592-5532 or Bob Carlsen, Rt. #1, Box 292, Northlake Drive, Vincent, OH 45784.

NOTICE: Kevin Atkin, John Tow, and Jerry Lineback are planning to get together at Cheaha State Park campground (about halfway between Birmingham and Atlanta) on January 20-22 to freeze their silly tails off and hopefully do some DXing. Anyone who'd like to join them for all or part of the weekend is welcome. Call Kevin evenings at (205) 681-2214 for more information. In the event of bad weather, they will probably postpone for two weeks, so call the preceding Wednesday or Thursday to make sure it's still on.

2nd ANNUAL WINTER SWL FESTIVAL

When: February 25-26 1989. Hospitality room will be open Friday evening.

Where: Holiday Inn
Sumneytown Pike
Kulpsville, Penna 19443
215-368-3800

Exit 31 of the PA turnpike NE Extension - Lansdale interchange.

There is limo service from Phila. International Airport directly to the Holiday Inn.

What: The Winter SWL Festival is an educational as well as social event. We hope you can join us for a weekend of roundtable and panel discussions, lectures, and SWL chatter with fellow hobbyists. All areas of SWL interest including LW, MW, SW, Utilities, RTTY, etc. will be on the agenda. Last years Fest was a great success with 60 SWL's gathering for an enjoyable weekend. There will be door prizes as well as a freebie table. If you can participate as a speaker, panel discussion member, door prize contributor or whatever - please let us know.

Registration is \$30. This registration includes lunch and a dinner banquet (informal) on Saturday. Should you desire to omit the meals the registration is \$15. Please register by February 10, 1989. Checks should be payable to WINTER SWL FEST. Registration for hotel room should be made directly to the Holiday Inn - As soon as possible! Special rates \$55 single, \$59 double. Our function code with the hotel is WINTER SWL FEST. Please refer to this to get the special room rates. Listen to the ANARC SWL Net on 7.240 LSB at 1500 UTC Sundays for up to the minute info.

Please submit the following with your registration to:

Winter SWL Festival
PO BOX 591
Colmar, PA 18915

NO COLLECT CALLS ON THESE ADS, PLEASE

FOR SALE: ICOM R-70. Mint condition and has audio, BCB pre-amp, and filter modifications. Owner's and service manual included. Reason for selling is newly purchased R-5000. Asking \$300.00 including UPS. Tom McElvey, P.O. Box 9645, Norfolk, VA 23505. Phone (804) 497-5151 before 0230 UTC.

FOR SALE: "Passport to Worldband Radio," special 1988 Grundig edition, by Larry Magne. This edition published especially for sale by Grundig dealers; thus it lacks ads for other receivers and Magne's test reports. Near-mint condition, \$11.00. 1988 WRTH, hardly used, \$14.00. Both for \$23.00. I pay postage. Dale Park, 2253 Kanealii Ave, Honolulu, HI 96813.

FOR SALE: FRENDX 1978-1987 complete set \$80.00 or split in half. DXLD issues 7-21, \$10.00. WRTH 1976, 1980, 1982, \$8.00 each. RDI 1987, \$8.00. LA-DXing (1982) by Nuevo Mundo, \$8.00. SW Voices (1969) by Dr. Wood, \$6.00. How To Listen (1971) by WRTH, \$6.00. SDDX Equipment Review (1981), \$3.00. All prices include shipping. Will accept Canadian or U.S. cash at par. Also have about 20 station pennants, some rare, for sale or swap. Ernie Behr, P.O. Box 1991, Winnipeg, Man, Canada R3C 3R3.

FOR SALE: ICOM R-71A with 4 kHz AM filter, FL44A SSB filter, EEB audio and AVC mods. Superb near-mint condition. A terrific rig for serious DXing! \$600.00 plus UPS to your QTH. Harry Helms, 7445 Andasol St, San Diego, CA 92126. Phone (619) 699-6840 from 1600 to 0000 UTC.

FOR SALE: SONY 2010 in good condition, original boxes, etc., \$250.00 plus postage. Also transmitter tube collection, SASA for list. Fritz Mellberg, 1505 Central, Hawarden, IA 51023. Phone (712) 552-2458 evenings except Tuesday.

FOR SALE: Yaesu FRG-7000 with Gilfer modified filters, manual, original cartons, \$225.00. American Bosch LW/MW/SW (1936) receiver. Restored except for decals. Cherry cabinet, \$85.00. C. Vernon Hyson, 9835 Lone Eagle Lane, Charlotte, NC 28215. Phone (704) 568-7577.

FOR SALE OR TRADE: SPEEDX January, 1976 to May, 1986. Missing Nov. 83, July 84, and Sept. 85. Best offer or will trade for pre-1972 FRENDX's. Tom Laskowski, 1334 East Miner St, South Bend, IN 46617.

FOR SALE: Yaesu FRG-8800 receiver in brand new condition and in original carton. Only 4 months old. Cost \$649.00 new, but will sell mine for only \$540.00. This price includes free UPS Blue insured shipping anywhere in the U.S. Contact Chris Lobell, Box 146, Stoneham, MA 02180. Call (617) 438-3022 days; (508) 658-3306 after 6:00 pm.

FOR SALE: ICOM IC-R71A. Always handled with kid gloves, not a scratch anywhere. Everything works perfectly. Strictly stock; narrow AM filter installed at factory. An extraordinary receiver, \$700.00 firm. First certified check for that amount gets it. I pay shipping. Sent with original packing and carton. Jon Greenberg, 124 Meridan Ave. #5, Louisville, KY 40207. Phone (502) 895-5680.

FOR SALE: Customized beam headings (from/to) and distances (MI/KM) to over 435 WRTH-88 transmitter sites. Useful in selecting alternate transmission and choosing listening times based on distances. ITU Country Codes included. Send your location/coordinates, \$5.95. WRTH-87, \$9.25, FRENDX-87 complete, \$7.25. Gilfer Confidential Frequency List and Guide to RTTY Frequencies #6, \$5.25. All items include shipping. Cashiers check or money order, please. Al Drehmann, Rt 2, Box 3-B, Tryon, NC 28782. Phone (704) 894-3398.

FOR SALE: ICOM R-71A communications receiver with service manual. Factory stock, barely used. Asking \$1050.00 Canadian. Michael Bolitho, 106 Eastbourne Ave, Toronto, Ontario, Canada M5P 2G3.
