RADIO PRAHA olr qsl

GRUNDIG

YB-400

The Grundig Yacht Boy 400 is praised in the 1984 *Passport To World Band Radio* as "Best performance for price/size category... right up there with very best among world band radios." Coverage includes long wave (144 - 353 kHz), AM band to 1710 kHz and shortwave from 1711 to 30000 kHz plus FM (with stereo to the headphone jack). A flumby wheel knob on the side of the radio provides smooth single-side band (SSB) tuning. The illuminated digital display provides tuning resolution at 1 or 5 kHz on shortwave. Two bandwidths are featured for maximum selectivity, or for best fidelity. The keypad will quickly get you to any frequency or store up. Store 40 of your favorite stations. The dual digital clock is visible while the radio is on. Other refinements include snooze and sleep buttons, lock, HI/LOW tone switch, and LOCAL/DX switch. External jacks are provided for earphone, antenna and 9 VDC input. The YB-400 comes ready to go with six AA cells, stereo ear plugs, wind-up antenna, *Owners Manual*, *Grundig Shortwave Guide* and vinyl carry case. 8" W x 5 1/2" H x 1 1/2" D. 1Lb 5 oz. One year limited warranty.

Grundig YB-400 Order #0040 \$199.95 (+\$6)

We also have a limited number of Grundig factory reconditioned YB-400s. This units are in excellent, like-new condition with all standard accessories and the regular Grundig one year limited warranty.

Grundig YB-400 Reconditioned Order #1704 \$149.95 (+\$6)

SONY

ICF-M350V

Here is an incredible value from Sony. This four band digital portable receives AM (530 - 1710 kHz), FM (87.5-108 MHz) VHF television audio (channels 2-13) and the NOAA weather band! (No SW reception) You can store up to five frequencies on each band for a total of twenty memories. Sony includes a lock button to freeze the radio's controls. The 12 hour digital clock-alarm continuously displays the time when the radio is off. This is the ultimate emergency radio for when the power fails. It also makes a great gift for that person who has everything! With 3.5 mm mono earphone jack and hand strap. Requires three AA cells (not supplied). 4.5 VDC. 7.75" x 3.75" x 1.35" 16 oz. (3 Lbs. ship). One year limited warranty.

Sony ICF-M350V List \$59.95 Order #1056 \$49.95 (+\$5)

Sony AC E-45 wall adapter for above (Free shipping if purchased with radio)

Sony AC E-45 List \$22.00 Order #0479 \$19.95 (+\$3)

SUPERADIO III

The General Electric model 7-2887 Superadio III was designed specifically for long range AM and FM reception. It features tuned RF on both AM and FM for excellent sensitivity. Optimum selectivity is provided by four IF tuned circuits on AM and three on FM. A wide-normal switch allows you to control selectivity. Exceptional sound quality is achieved through the use of a 6 1/2" woofer and 2" tweeter. Separate bass and treble controls permit you to adjust the sound for maximum fidelity and clarity. Other features include an FM-AFC, earphone jack (3.5 mm mono) and fold-down carrying handle. A built in 7.78" ferrite rod antenna brings in distant AM stations. Screw terminals are provided for external AM & FM antennas. Coverage: 530-1700 kHz and 88-108 MHz with analog tuning. This radio is a real favorite among medium wave DX'ers, out performing multi-band radios costing many times more. Powered from 120 AC 60 Hz 3W or six D cells (not supplied). Attractive black cabinet 12 1/2" W x 10 1/2" H x 4 1/2" D. One year limited factory warranty.

G.E. 7-2887 List \$69.95 Order #0547 \$59.95 (+\$5)

This book on DXing AM, FM and TV is FREE with your purchase of a G.E. Super Radio III. This free book must be requested when ordering.

FREE BOOK FREE BOOK

The Worldwide Aeronautical Communications Frequency Directory

This new 260 page book by Robert Evans has quickly become the definitive reference for aeronautical DXers worldwide. Second Edition.

Only ... \$19.95 (+\$2 shipping)

The uncontested best book in the field. An invaluable source book. MT

Comprehensive and fully informative. Applicable to the novice as well as to the advanced monitor. A book second to none. I could go all night with superlatives. *New Zealand DX Times*

Quite simply the best and most authoritative book on aircraft communications. *Short Wave Magazine*

This has to be the most complete treatise on HF, VHF and UHF voice and digital aircraft communications we have seen. Over 2350 discrete frequencies are given exhaustive attention with in-depth explanations of who, what, where and why various communications take place. A bargain at \$19.95. *Westlink Report*

◆ HUGE CATALOG ◆
Our new 108 page catalog is bigger than ever, with everything that is new for the listener, ham or scanner enthusiast. Available FREE by fourth class mail or for \$1 by first class mail.

NASWA Notes

Richard A. D'Angelo
2216 Burkey Drive
Wyomissing, PA 19610

Harold Cones informs me that the responses to the 1995 NASWA Membership Survey are have been tabulated. If all goes according to plan, Harold hopes to report the results of the survey in June's *Journal*. Thanks to all of our members that participated and a special thank you to Dr. DX for the time and effort he put into the design and compilation of the results. The survey will help the Editor-in-Chief and the Executive Council as it periodically looks into changes in the *Journal*.

The Association of North American Radio Clubs reports another new member of its association. The DX Audio Service (P. O. Box 164, Mannsville, NY 13661-0164) was organized in March, 1985, with the first cassette issued in April, 1985. The club's purpose is to serve sight-impaired persons involved in DX'ing or other hobby listening. DXAS covers BCB - AM and some facets of FM with monthly cassettes of 90 minutes in length. The "After Dark" series, now in its 5th edition, is a randomly-issued collection of items which DXAS is unable to fit into the monthly format. Future plans include a separate bandscan cassette offering for those who follow this area, freeing space in the monthly issues, as members are divided on the value of bandscans. DXAS is also beginning work

ANARC SWL Ham Net

Tune in Sunday mornings at 10 A. M. Eastern Time on 7240 LSB for the latest in shortwave listening, DX tips, and up to the minute hobby news. Contributors share their DX tips via their own amateur radio stations or by telephoning a "gateway" station who then broadcasts the relayed tips. Net Control Bob Brown KW3F, Hausie WB4JSP, and Tom Sundstrom W2XQ, host an always lively gang of DX monitors. (Best heard in the eastern half of NAm)

on items that may be adapted to computer disks for those with voice readers. If you are interested in learning more about the DX Audio Service, contact the club at the above address. Please remember to enclose return postage.

Tom Sundstrom is stepping down from his monthly update column of English Schedules. Tom still remains a valuable member of the NASWA team with his English Language Schedules appearing twice a year in the *Journal*.

Calendar Of Events

- May 19 - Meeting, Philadelphia Area NASWA Chapter. Kulpville Holiday Inn, Kulpville, PA. 7:30 PM Contact Dan Cashin (215)446-7831 (no meeting this month - Fest)
- May 20 - The Miami Valley DX Club (All band orientation) meets on the third Saturday of each month at 1 PM. Locations vary but are announced in advance. For info, call the MVDXC (614) 471-9973 Or, send a SASE to MVDXC, Box 292132, Columbus, OH 43229-8132
- May 22 - Special Meeting, Boston Area NASWA Chapter. Special guest: John H Bryant. The Lexington Club, Rts. 4 & 225, Lexington, Mass., 7:30 p.m. Location is 1/4 mile west of Rt. 128, Exit 31. For more info, contact: Paul Graveline, 508/470-1971, or Internet 74007.3434@compuserve.com. For June, back to our third-Friday-of-the-month schedule: June 16
- Jul 2 - The Tidewater SWLs meet on the first Sunday of each month at 6:30 PM. For info, call Joe Buch, (804) 721-2782.

Members are invited to submit items to be included in this calendar to Bob Brown.

Our Motto is - "Unity and Friendship"

As I mentioned last month, your club needs electronic typing assistance from members to help in the development of an electronic file of reprints. We have already had a number of volunteers and are looking for more. If you have always wanted to help out but didn't know how, this is your opportunity. Most of our reprints were done the old fashion way and we would like to generate an electronic file of reprints for future use. If you have access to word processing equipment and are willing to devote some time to this project, your club needs you. Please contact Bill Oliver electronically through the Internet at NASWA1@AOL.COM or

snail mail at the usual 45 Wildflower Road address. He will forward material to you and co-ordinate the necessary arrangements. Thanks in advance!

As we head into the spring and summer DX season in North America, please remember to report your listening results while travelling on vacation to Sheryl and Wallace. Listening activities generally tail off a little during this time of year and your support during these leaner months is essential.

That's it for this month. Enjoy this month's *JOURNAL*; it's another good one.

Welcome to the following new NASWA members -

Musings

This column provides a forum whereas members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are solely those of the submitters. Please submit all Musings to Bob Brown, 238 Cricklewood Circle, Lansdale, PA 19446 or via email - 74756.1557@compuserve.com

Diane S. Levesque, 6340 North 16th St. #103, Phoenix, AZ 85016

Hi guys....I just rejoined NASWA after a considerable absence (like about a decade and a half) I've definitely got some thoughts to share on the changes that I've run smack into. I've seen Andy Sennitt's comments at EDXC in last month's Journal, and this is right after buying a current WRTVH and "Passport", inside of which I read articles on similar themes...discovered the absence of Luxembourg, and now Bethany....whew. And then there's Harry Helms' comment in this month's Journal. Heavy stuff, all of it.

Now, I'll grant you that I realize that I've only scratched the surface of all the happenings I've missed over recent years, but It Seems To Me that, based on what I've seen so far, Radio Sweden, Andy Sennitt, the "fraternity", and purt near everybody hasn't really looked at a number of basic principles.

First, that comparing shortwave and satellites is a case of apples and oranges, like comparing MW AM and FM, when the death of MW AM was also predicted. Death of shortwave just ain't gonna happen any more for MW AM; Satellite reception is thusfar confined to homeowners and most of us here in the US rent apartments where satellite reception may or may not be available....and where it is available, it's the landlord that decides the limits of what is received...unless a renter has one of those auto receivers that haven't hit the market yet.

Second, the success of market share on the burgeoning channels of satellite receivership is based on commercial viability, and that too often means entertainment, and shortwave radio continues to fill the need for an educational environment as to global cultures and international relations. In this sense, major broadcasters on shortwave will indeed be missed because they will no longer represent their countries and cultures in the global smooorgasbord, the global sociopolitiical classroom that shortwave radio still is.

Third, shortwave listeners have ever right in the world to feel insulted by the likes of Radio Sweden for getting on the shortwaves and snub their listeners by broadcasting DX stuff that has nada to do with shortwave. Don't You Believe that the bulk of satellite people are going to be tuning to Sweden's shortwave broadcasts for tips. It will be shortwave listeners who do that. As long as the shortwave is turned on, even though the person listening may be also involved in satellites, that person is nonetheless a SHORTWAVE listener, and will remain so until he turns his shortwave receiver off.

These are BASICS, guys. It's not a matter of old technology versus new technology. It's a

DUES INCREASE

Effective April 1, 1995, Executive Council determined that a US\$1.00 increase in membership rates in North America was necessary. The changing membership rates are associated with the recent increase in postage costs and other operating expenses of the club including printing. In North America dues are now US\$26.00. Overseas postage rates may rise later this year which could result in membership rates increasing. Overseas members may renew early to avoid the increase.

matter of ambassadorial-like representation, education...and being wise enough to tell the difference between apples and oranges.

Brian Saude 621 S. Laurel Ave. Brea, CA 92621

I am a new NASWA member and wanted to say hello to all my new fellow members. Yes, I am an ex-SPEEDX'r and have been DXing for approximately 20 years. On behalf of those ex-SPEEDX'rs who received the complimentary copy of the Journal, thanks. The bulletin is very well done and (at least for me) adds very valuable information to my radio database.

I have already contributed to the QSL column and expect to continue my contributions to the bulletin. This leads me to my main point. I believe that one of the key factors in the demise of SPEEDX, was lack of contribution to the various columns and editors. I was as guilty as any of this lack of support to my club. I don't believe this was due to lack of interest, because most of us love to read about the various DX catches, new skeds., rare QSLs, etc. I do believe however, that we forget that these clubs are: 1. For Fun, 2. All Volunteer, 3. Member Supported!!

As I noted previously, The NASWA Journal is very well done. This should be a real source of pride to the members and editors. Keep those contributions and info flowing to your editors. If all of us give just a little each month, our combined effort will keep the club going and growing.

Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610

Another DXpedition to Gifford Pinchot (#14!) took place 30 March through 2 April. Without Fred Kohlbrenner, it just didn't seem like a DXpedition. Nevertheless, we managed to survive without Fred's presence. Fred "owns" the space next to the front window and on more than one occasion, usually after being up for too many hours, I thought I saw his shadow at the window! Dave Valko and I arrived on Thursday. I had enjoyed a nice opening to Africa prior to Dave's arrival. Latin conditions were only average that evening. I managed to sleep through a good latin morning. Dave was nice enough to tell me what I missed!

By noon, we were joined by Don Moore. It must be rough living in Iowa if you have to travel all the way to Pennsylvania for a DXpedition. Later that day the Torch, Hans Johnson, arrived to fill out our group. The Friday evening meal was the usual pasta special. We did our best to keep Hans out of the kitchen. You may recall he earned his nickname by almost burning down our cabin in January 1994.

Generally, DX conditions were pretty good. The noise problem experienced the last trip we DX'ed at Gifford Pinchot was not apparent this time. As we begin preparations later this summer for next season's DXpeditions, we will keep our fingers crossed that things at Gifford Pinchot stay the same.

73 - RAD

FRENDX: Twenty Five Years Ago....

Awards Chairman Warren Nordgren announced a new award, the Missionary Award. Charlie Loudenboomer returned to the pages of Friendx with the sad tale of Max Moxey. In the ANARC Report, Doug Benson and Gerry Dexter report the 1970 ANARC Convention was scheduled to be held in Bellwood, IL. In Gregg Calkin's QSL Report, Radio Trinidad and RTM-Morocco were featured in the QSL Gallery. In the Flash Sheet, edited by Al Niblack, Don Jensen, Al Sizer, Gerry Dexter report a new Dominican on 4,825 kHz, Radio Cultural Nacional.

Easy Listening

Richard D. Cuff
1016 Chestnut Ridge Drive
Timonium, MD 21093-1716
CompuServe: 73651.153
Genie: R.CUFF
Internet: rcuff@memtec.com

We're Moving—Finally!

The address shown above should be the last address change you'll need for me for a while. By the time you receive the *May Journal* we'll be moved into our new Baltimore home. Please begin using the Chestnut Ridge Drive address as soon as possible, as I will be closing out the post office box within the next couple of months.

It will also be a treat not to deal with SWLing in a hotel room. Hotels are not very hospitable to shortwave propagation due to the high concentration of televisions and other RF-emitting equipment, and also due to concrete construction.

BBC World Service

The few reviews I've seen on the new BBC program arrangements have been mixed. One key change in the North American stream is the emphasis on news and news analysis at the expense of music and dramatic features. This shift is not surprising given that most Americans listen to the BBC over a local public radio station. What the BBC uniquely offers public radio broadcasters is news and documentaries; these radio stations don't have to look to the BBC to fill their time with music.

As predicted, at least in eastern Pennsylvania, there are some times of day one can easily listen to three different BBC program feeds. One recent evening at 0300 I could easily hear the European (6195, 9410 kHz) and African (9600 kHz) feeds in addition to the North American release. Unfortunately, column space won't permit including all possible airings of particular programs at all times for all five releases. If you have a particular favorite that you'd like to see the schedule for, please drop me a line.

As before, I do not include program times for North American releases not available on shortwave. Many public radio stations that utilize the satellite feed also record the programs for later broadcast, so the times shown in *BBC Worldwide* would not apply.

Now, on to the highlights.

News and Feature Programs

Daily, 0200 and 0500: *Newsday* is one of the new news programs on the BBC. I'd describe the program as "Newshour Lite" as it covers several news stories in detail and provides a general background summary as well. Unlike *Newshour*, there are no specific segments on sports, British news, financial news, or press review. Other programs cover those topics.

Wednesdays 0230: *Heritage* returns for a six-part 30-minute series. This program visits archaeological sites around the world. Among the countries visited: Yemen, a country closed to foreigners until the 1960s, is only now being studied for its ancient cities, medieval towns, and mosques existing from the dawn of Islam. First airing Also airing Sundays 1715 and Mondays 0530.

Fridays beginning May 12th, 0730: *Letters Home* is a new four-part 30-minute series in which BBC correspondents present letters written by distinguished travelers who have passed through the cities in which the BBC correspondents are now based.

Fridays beginning May 19th, 0345: *Earth, Air, Fire, And Water* is a new nine-part 15-minute series looking at the creation stories of various world religions. Stories from Africa, Egypt, Scandinavia, and elsewhere are explored in a setting of music and atmosphere. First airing Wednesdays 1145; also repeated Fridays 1430.

Monday, May 22nd 1515: **We Fire Electrons Not Bullets** is a single 45-minute program looking at the development of non-lethal weaponry, from subliminal messages and sleep deprivation to electromagnetic and acoustic pulse weapons. Both the scientific and sociological aspects of these programs will be explored. Also airs Monday 0715.

Thursdays, beginning June 1st, 0345: **The Streets Of London** is a six-part 15-minute series exploring the history of some of London's unusual and distinctive street names. If you've visited London this program should be particularly interesting. First airing Wednesdays 1515; also repeated Fridays 0715.

Light Entertainment

Mondays, 1130: **Let's Do The Show Right Here** is an ongoing eight-part panel quiz on musicals. The flops, the hits, the composers, the lyricists, and the stars provide fodder for questions. First airing Sundays 1530.

Mondays, beginning May 29th, 0330: **Brain Of Britain** returns for another 17-week run. History, sports, science, current affairs, literature, art, music, and geography are all fair game for the panelists. Unfortunately, this 0330 airing is the only North American airing on shortwave; other releases that may be audible include Sundays 2130 (Europe, Africa) and Saturdays 1230 (Europe).

Drama and the Arts

Saturdays, 2230: **Play Of The Week** offerings include **Generations** (May 13th), an original play for radio looking at a family's World War II involvement impact a young person's essays on the subject in 1995; **Home At Seven** (May 20th) is a psychological thriller about a businessman's missing 24 hours and his actions over that day. **Dickens' Women** (May 27th) appears to be more of an essay than a play, looking at various female characters in Charles Dickens' works. Dickens' daughter wrote at one point "My father did not understand women", which leads to some interesting characterizations.

Music

Tuesdays, beginning May 16th, 1445: **Pop The Question** returns for a 15-minute eight

part series answering listener questions on current and past popular music. What's the biggest foreign language hit worldwide? Which Beatle was an aspiring chess master? Tune in for details. Send your questions to **Pop The Question** at the usual Bush House address: BBC World Service, Bush House, The Strand, PO Box 76, London WC2B 4PH, United Kingdom. Repeated Wednesdays 0615.

Tuesdays, beginning May 23rd, 0630 (European release): **That's Cool** looks at the character that has been a core requirement for contemporary music heroes since the jazz cats of the 1940s. The development of style and image as an outgrowth of contemporary music is explored. There are no North American releases directly on shortwave.

Science and Technology

Thursdays, until May 25th, 0345: **Do You Know...?** is a 15-minute weekly series concluding this month that answers listeners' questions about science. You'll find out why we have eyebrows and when the Japanese started using Hindu-Arabic numerals. The program uses questions from listeners, but you'll have to hurry to get your question in before the program concludes. Also airs Wednesdays 1515 and Fridays 0715.

Around the Bands

Radio Netherlands

Radio Netherlands and BBC Radio Scotland team up to present *Island Life*, a two-part documentary on living on a remote island off the Dutch or Scottish coast. In the Documentaries slot Thursdays, May 11th and 18th, 0052 and 0452, and Friday 2352.

UFOs in the Lowlands is Howard Shannon's look at Dutch experiences with UFO sightings and close encounters, airing in the Documentaries slot May 25th and 26th.

Weekend is a new joint venture of Radio Netherlands, the BBC, Radio France International, and Deutsche Welle taking a weekly look at issues and themes important around Europe. Maggie Ayre hosts. Sundays 2352.

Longtime Newsline voice Ginger da Silva can now be heard on the new program **A Good Life**, which looks at development and foreign aid issues. What's unusual is that richer countries, with development potentially run amok, are also investigated. Mondays 2352.

Deutsche Welle

The end of World War II should find some unique perspective from Germany. **Insight**, in the 0300 North American release May 10th, will specifically cover the end of the war from a German viewpoint.

You may not think of Germany as a haven for tea drinkers, but there's a region known as East Frisia that specializes in tea blending, brewing, and drinking. East Frisia is profiled in **Come To Germany** in the 0100 and 0500 releases May 25th.

Politics on Shortwave

Political broadcasts have come under sudden scrutiny in the wake of the Oklahoma City Federal building bombing. Bob Montgomery sent me a note before the Oklahoma City tragedy reminding me of some of the political programming that airs live and accepts phone calls. **Radio Free America** airs on WWCR daily on 5065 kHz for two hours at 0200 UTC. Tom Valentine, the host, is a consummate muckraker. **Hour of the Time** follows at 0400 with a one hour program also looking at government corruption. William Cooper hosts and doesn't rely on unsubstantiated rumor to make hay—Cooper always relates supporting documentation supporting his claims. **For The People** airs live at 1800 on WHRI at 9495 kHz. Bob says host Chuck Harder has a somewhat lighter touch than many of the political talk shows.

HCJB—The Voice Of The Andes

El Mundo Futuro is a 30-minute weekly adventure into the future world of science and technology. **The Computer Corner** is a regular feature. Some of May's feature topics include Apple's System 7.5 operating system and "Open Doc", IBM's highly publicized OS/2 Warp, and the use of satellites in global communications. Don't forget you can receive a twice-weekly detailed E-mail from HCJB with upcoming program highlights by contacting HCJB on Internet: english@mhs.hejb.com.ec; HCJB also has program information available by anonymous ftp; I'll dig up the address after I unpack the bazillions of boxes surrounding me here.

More Internet Addresses

Add Radio Australia to the growing list of international broadcasters with Internet connectivity. Radio Australia now has the Internet electronic mail address of raust3@ozemail.com.au.

Program Topic Of The Month

Don't forget this new item in Easy Listening beginning in the June *Journal*. This section will focus on a quick rundown of information on a specific program type amongst all easy-to-hear English language broadcasters. Don't forget that your input is key to the value of this section. Upcoming topics:

June: Business and Economic programs

July: Travel and Tourism

August: Sports

Until next month,

73 DE Richard

Hey Mister, Can You Hear the Astronauts on that Thing?

by John Lyon
2346 Dorothy Ave.
White Bear Lake, MN 55110

No, no home videos or slide shows, not even cold beer. Just a vacation tale of my antenna project second childhood. A May article by Ike Kerschner, N3IK, in *Monitoring Times*, touted the 8JK wire antenna. Essentially long parallel dipoles fed out of phase, this beast is electrically easy, but mechanically demanding. But I was not unfamiliar with the 8JK. As a teenage ham decades ago, I put one up in our large yard for the 20 meter (14Mhz) band. My Dad didn't mind the antenna, but he did mind the fluorescent bulb I taped to a voltage node that glowed in the dark at night every time the transmitter was keyed. We won't talk about neighbor comments, or surprised people driving past our house at night. My monster was fed with 300 ohm twinlead, and even without an antenna tuner it took at least some of my transmitter's 50 watt output, because one of my first ham contacts was South Africa. Pretty heady stuff for a smartass teenage ham.

I enjoy playing with wire antennas, so the thought of antenna *deja vu* at the family cabin in Forest County, Wisconsin, was pleasant. Sure, first I had to finish painting the cabin, but then it would be antenna time. The goal was one antenna that could be used for both shirt wave and ham activities. The 15 meter ham band (21Mhz) has always been my favorite, but with the low position in the sun spot cycle, that wasn't practical. One doesn't need a good antenna for a dying band. The space available determined that it would be an antenna for 19/20 meters and run east-west. I consulted the ARRL Antenna Book

and considered both the Lazy-H and Sterba Curtain, but the bottom elements would drag on the ground and be near people at this location. Not good.

So...the 8JK it would be. Only 60 some feet long, and 16 feet wide, that shouldn't be too bad. With 4 to 5 db gain, and fed with 450 ohm ladder line and an antenna tuner for multi-band work, it should burn up both the 20 meter ham and 19 meter shortwave bands. What I didn't really remember—or appreciate—were the mechanical problems. This project was a two tripper to the hardware store, except that the hardware store was a 34 mile round trip into the nearest north woods town. And we won't even count the trip where I left my wallet in my other pants pocket back at the cabin, and had no money—or driver's license—inducing v-e-r-y careful driving on the empty handed return trip.

The 8JK is simply like a horizontal letter H, laying on its side parallel to the ground. See Figure 1 for an overview. The two sets of dipoles have a twisted phasing section connecting them which forms the crossbar of the H. By twisted, I don't mean mentally dysfunctional. The pair of ladder line conductors is rotated 180 degrees so that conductor A is now conductor B, and vice versa. The antenna is fed in the middle of the center crossbar. Each leg of the H is one half-wavelength in length, around 32 feet for 14Mhz. But using the standard formula of $467/\text{Frequency in Mhz}$, one can plug in any band. The problem is the spreaders that keep the legs of the H properly spaced. I surmised that if I used 16 foot quarter wave spreader spacing on 14 Mhz, it would be eighth wave spacing on 7 Mhz. Possibly it would work reasonable well on both frequencies.

I can't remember what I used as spreaders on my 8JK years ago, but influenced by Ed Noll, W3QFJ, of Easy-Up Antenna fame, plastic water pipe seemed worth a try. I found out there is both thin and thick wall plastic pip, and the 3/4 inch diameter pipe will telescope into the 1 inch pipe if thin wall is used. Machine screws with washers, a bunch of eye bolts, and some soldering lugs completed the hardware. The machine screws fasten together the telescoping sections of water pipe, and the eye bolts are anchors for the H legs of wire.

The middle spreader, with its 450 ohm phasing section, needed special attention so that the opposing dipoles are connected. First, I cut the phasing line in half. To prevent screwups, I put red finger nail polish on each end of the phasing section, identifying the same wire. Then I could just see that the red dots were on opposite sides of the spreader when hooked up in place. Of course, I couldn't wait until the polish was dry, so I had red thumbs. The middle of the center spreader is also where the feed line (lead in) to the shack is connected. I used soldering lugs and small machine screws to connect the three wires together on each side of the spreader. It's harder to describe than to do. The final step was to tape the phasing line to the spreader, and also tape a few inches of the feed line plus a hose clamp for stress relief.

The spreaders turned out to be floppier than expected. Trying to distribute the stress a little more evenly, a simple tether was made at each of the four corners where a wire ran to a tree support. Then it was ready to go airborne. One really can't appreciate how bulky this thing is until it starts rising into the sky. Tell your neighbors not to watch. Adjust the tension on each of the four corner supports until it somewhat resembles a rectangle. The 8JK ended up only about 30 feet high for a number of logistical reasons. It may be crude, but it's beautiful—even without the fluorescent bulb.

Routing the ladder line in through the window to the shack, I was ready to try it. These days, the current equipment setup is a Kenwood TS-940S ham transceiver, a Lowe HF-225 short wave receiver, and an MFJ949C antenna tuner. Antennas at this location are a 125' random long wire at about 20 feet, and a 60 meter dipole at 40 feet. Hastily I connected the line to my antenna

tuner and turned on the rig. It was set to the 41 meter band, so I started tuning there. One or two very weak signals on the whole band. Hmmm. Did I mess up the phasing line after all; did I really connect the antenna to the dummy load; is this really the greatest radio blackout in the history of time? Then I noticed the feed line was incorrectly hooked up to the tuner. Feverish fingers, and then—suddenly—there are signals all over the band. LOUD SIGNALS, and LOTS OF THEM.

Radio Moscow is S9+20 in the early afternoon. Radio France International is +30. I switch to 19 meters. Signals aren't very strong; then I remember to tweak the antenna tuner, and there are more strong signals. Radio Damascus is S9+15 and several BBC frequencies are stronger than I've ever heard them. On 25 meters, Radio Marti is S9+50, virgin territory for my tender, innocent S meter. Do they realize they have their antenna pattern reversed, and they're entertaining Fidel Polar Bear, not Fidel Castro? I feel overwhelmed. I band scan slowly, starting with 13 meters continuing down band by band, until finally several hours later I reach the tropical bands. Ghana is S9+20 like a local broadcast station. I've never heard All India Radio on 60 meters in the late afternoon before. Both frequencies of Namibia on 90 meters are S9 and it isn't even dark. Readers on both coasts are smirking about now, but out here in America's Siberia, it's unusual to have these kind of signal strengths at this time of day—and on many days, at any time of day. Wishing I hadn't taken down the 60 meter dipole to make room for the 8JK, I turn on the Lowe 225 with its 125' random long wire, and start doing A-B comparisons between the two radios. Scores of them over the next few hours, including every band. The 940 is consistently 4-S units higher than the Lowe. What an antenna! By this time I've been hunched over the radios for six straight hours, nature is calling, and I'm hungry, exhausted and exhilarated. For 5db gain, this is too good to be true.

It was. The next morning was a real bummer. It was like the 8JK had quit working, the long wire winning out in almost every comparison. Then I realized that yesterday's conditions had been exceptional, and that this morning I am experiencing short skip which favors the long wire. I also did systematic comparisons between the two receivers on WWV frequencies and found

the 940 was consistently 2-S units higher for the same signal strength, so the 'improvement' wasn't as large as first thought, not to mention differing opinions of what constitutes an S-unit. But later in the afternoon, when the skip lengthened out, the 8JK came back into its own. Then it was consistently 2-S units or more stronger. Not just in strength, but also heft and body of the signals, what nerds call signal-to-noise ratio. Particularly signals with low modulation are made more intelligible by the 8JK. And although I thought full wavelength loops and Beverages were supposed to be the quiet antennas of choice, this antenna is easier on the ears than either the long wire or dipole.

So what's the bottom line, bunky? The 8JK has neither the gain nor the directionality of a yagi, nor does it cost \$300. On distances below 1500 miles, the long wire wins every time. Between 1500 and 3000 miles, it's nip and tuck. Farther out, particularly more than 5000 miles, the 8JK really shines by at least 2 honest S units, and quite often more. Even at a height of only 30 feet, it slurps up low angle signals like a sponge. The directionality and gain are greatest at the design frequency, but there are still very definite characteristics at 7 Mhz. Off the ends of the directional pattern, signals are somewhat weaker since the 'front-to-side' ratio is modest. But in the favored direction, signals are significantly stronger and—most importantly of all—more intelligible. By the time one reaches the tropical bands, the receiving pattern resembles the proverbial bowling ball sitting on a table. It's performance is roughly the same as the long wire, and significantly less than the 60 meter dipole it replaced.

Since the antenna runs east-west, that means it favors South America and Asia. It does a fine job

over the pole to Asiatic Russia, and also the Indian subcontinent. But I feel this is truly a Russian antenna; I've never heard so very many Russian stations, of all different flavors, just waiting to be logged. I call the antenna Vlad, short for Vladimir. Apparently this is as common a name in Russia as John is in America. Don't yell either in a crowd unless you enjoy a good trampling.

This antenna is really a prototype. The spreaders and the hardware only cost \$15, so I really can't complain. But they are bowed like a baby's bottom, particularly the middle spreader. I could use the thick walled tubing without the telescoping for a spacing of 10 feet, but my intuitive feeling is that the wider spacing helps explain the very good performance on 41 meters. Other possibilities are to use larger diameter telescoping tubing with its increased weight, or glue together plastic pipe and hope it would hold up under the routine -20 degree temps here in the dead of winter. Wish I knew of a cheap, light, rigid, non-metal material for spreaders. Any light bulb ideas?

For many, the large size and mechanical problems would outweigh the low price, moderate gain and directivity, and frequency versatility of this antenna. And yes, an antenna tuner is needed even on receive for best results. In many aspects, it has exceeded my expectations, but I haven't yet figured out how to rotate the beast without the help of an earthquake.

Oh...if you don't have red nail polish, Misty Mauve or Porcelain Pink are acceptable, but Fulsome Fuchsia or Peach Flambe are totally tacky.

ECSS for listening to AM stations

by Gordon Bennett

This first appeared in Contact and is courtesy of Richard "Quake" D'Angelo.

The basic aim of the technique is to improve both selectivity and audio response. For the technique to be really effective you need a receiver that has a good specification filter, say 2.2 to 2.7 khz bandwidth at the -6dB point, and about twice that width at the -60dB point. (These

figures should be given in the Rx specifications in the user's manual—don't worry if you don't understand them!) This type of filter is usually brought into use automatically when you switch to "AM Narrow", or "LSB" or "USB" positions on the so-called "mode" switch.

The filter in use at the "AM" or "AM Wide" position is probably at least 6 khz wide at the -6dB point, not too bad for audio response (except in some receivers) but not very clever if

you have strong adjacent channel QRM, say a station only 5 khz (or less) away from the desired signal.

The other pre-requisite for successful use of ECSS is a small 'tuning increment'—in modern receivers, say 15 hz or sometimes less, or a small number of khz per one rotation of the tuning knob in the older receivers, say 25 khz. If you have a digital readout receiver with a 1 khz as the smallest step then you'll have little joy trying to use ECSS, UNLESS there is an independent fine tuning control.

Now on to the actual use of the technique, ON an A.M. SIGNAL! Suppose you DO have an adjacent channel problem affecting the desired signal when you are using the AM WIDE position on your mode switch. Switch to AM NARROW. This may reduce the interference level but you'll probably immediately notice less treble, i.e. a 'bassy' audio response which is a real nuisance when trying for ID's.

Assuming you are fairly well tuned in to the desired signal, now alter the mode switch to 'LSB' say, when you'll probably immediately hear a 'howl' which is the so-called beat-note. Alter the tuning control carefully until the howl note reduces in frequency down to zero. This is the so-called 'zero-beat' position and you'll immediately note distinctly improved audio on your AM signal, although you are using the same filter (probably) as you had in use on AM NARROW.

Whether the interfering signal has reduced in intensity or even disappeared depends on whether its frequency was above or below the frequency of the wanted signal. If it's still there, simply switch to 'USB' and in general it will then disappear without any need to re-tune for zero-beat. DON'T NOW SWITCH BACK TO 'AM' OR 'AM NARROW'; simply listen on !! On some receivers you may find that you have to re-tune slightly to re-obtain exactly zero-beat when you switch between USB and LSB or vice versa. There's usually a way of eliminating this slight problem, but you can't do it from outside the case.

The whole technique is simple and very rapid, once you've practiced it a few times. Personally I always DX using ECSS, i.e. my mode switch is always in the USB or LSB positions, simply because I much prefer the treble-enhanced audio response, QRM or no QRM. By the way, of course, if the QRM frequency is actually ON the frequency of the desired signal, then there is no way ECSS can remove it. If it is very close, then use of ECSS can reduce it quite remarkably, assuming you've got good SSB circuitry.

There are some bonuses to the use of ECSS by the way in addition to the QRM and audio aspects:

(1) In several top class receivers, passband tuning and variable bandwidth controls are inoperative unless the mode switch is at 'LSB' or 'USB'. Therefore you can use them when using ECSS—terrific for Dxing!

(2) Suppose you are checking a frequency to see if an anticipated Dx station is coming through. If you are on 'AM' or 'AM NARROW' then you won't notice anything if only a weak carrier is so far available. On the other hand, if you're scanning around using ECSS then you'll get a weak beat-note (howl) to warn you that a carrier is there, and may improve into a signal as you wait.

If you have a receiver with a BFO pitch control, as well as the pre-requisites already referred to then you can develop ECSS technique even more effectively, but that does mean yet another article!

Finally, if you have managed in the 'AM' mode switch position for years, still give ECSS a try. One of the world's top DX-ers had always done that, regarding ECSS as simply a gimmick. Not long ago, having bought a DRAKE R8, particularly good for ECSS use, he tried ECSS and now thinks highly of the technique!

P.S. Don't confuse the ECSS technique with the very expensive so-called ECSS modules which you can order with certain costly receivers. These modules can cost as much as a complete receiver like the SONY 2010. The TECHNIQUE costs you nothing.

The below first appeared in the Washington Post of January 14, 1995

Over the Net And Around The Law?

by John Schwartz

You can taste forbidden fruit with your computer—and you don't even have to be a hacker.

Official U.S. propaganda that has been carefully withheld from Americans lest it brainwash them is now widely available—possibly in violation of the law—on the Internet.

Almost 100 million people around the world get their news from the Voice of America, the international broadcast service of the U.S. Information Agency—but precious few Americans ever get to hear it. This is by design: The 1948 Smith-Mundt Act specifically forbids the VOA—began as a propaganda service in the weeks after the United States entered World War II—from disseminating its message domestically.

Over the decades, the act has created pretzels of legal logic: Journalists wanting to quote from VOA broadcasts were told by the agency that they had to come to the agency's Washington offices—or have someone overseas listen to the radio, transcribe the shows and send them back stateside. And many Americans thought the restrictions meant that it was illegal to even own transcripts or tapes—though Chris Kern, chief of the VOA's computer services division, explains: "It's a restraint on us—what we can do. It's not a restraint on what American citizens could do."

But in the past year, technology has unlocked the VOA's doors. Anyone with a computer and a modem has been able to sneak a peek at transcripts of VOA stories. And since September, users have even been able to download bits of actual VOA broadcasts and play them on any computer with the proper multimedia hardware and software. The experiment has been strikingly popular, with some 20,000 files being read each day by computer users dialing in.

A recent on-line visit confirmed what many have suspected for years: The rest of the world is getting some pretty dry stuff from us. It's well

written, especially as propaganda goes; the pieces employ a straight journalistic style. And it's not all world events. A recent story on former baseball great Gil McDougald, who regained his hearing decades after deafness forced him out of the game, was sweet and inspirational.

When it comes to world affairs, the stories consistently toe the administration line—but then, the same could be said of many news stories appearing in U.S. newspapers. Little wonder that, in those parts of the world starved for information not channeled through the local ministry of truth, VOA is still a lifeline. One agency official says that in Kuala Lumpur, Malaysia, VOA television broadcasts draw a larger audience than Oprah Winfrey. And on-line availability has proved to be a boon in such nations as China, which attempt to block VOA broadcasts. Text and broadcasts are currently available in at least 15 languages. Almost all of the users worldwide come to the VOA computer only for text; downloading sound files can take a lot of time and take up a great deal of precious disk space. The VOA parses its sound reports into 10-minute chunks of broadcast time. But due to the limits of on-line transmissions, even those 10 minute can take an hour or more to move across the phone line from the VOA's computer to yours.

Does the availability of VOA material on-line violate the law? Carl Malamud, head of the Internet Multicasting Service, thinks that it might. Malamud, whose nonprofit organization puts everything from government documents to broadcasts of NPR on-line, says that the VOA move worries him. "VOA to me appears to be doing 'wink, wink,'" Malamud said, "They're winking at those very fundamental mandates from the U.S. Congress—Ye shall not do news to the American public." Nor is this requirement trivial, as Eastern Europeans who suffered under decades of government-shaped news reports can attest.

Being able to get whole transcripts and broadcasts on demand—and being able to zip copies of

those files anywhere in the world via computer-gives the VOA wider distribution than ever before, Malamud said. "It's important that we understand that cyberspace is part of the real world," Malamud said. "Just because it's on a computer, it doesn't mean that the basic rules don't apply.

Some people have been agitating for broader public access to the VOA for years. Last year former FCC commissioner Newton Minow and Annenberg Fellow Alvin Snyder wrote: "Shouldn't we have the opportunity to know what the United States is saying to people in Bosnia, Russia or South America... Yesterday's fear that such programs will 'brainwash' the American public is senseless. We get a steady stream of government views in speeches, briefings and press releases, and we are capable of reaching our own conclusions."

One VOA official said that the computer broadcast has passed the agency's legal scrutiny. "We have gone through channels and checked at every step along the way." The VOA's on-line introductions to using the wire service states, with the digital equivalent of a straight face, "In accordance with U.S. law, the materials in this directory hierarchy are provided exclusively for recipients outside the United States."

As a practical matter, access to the VOA has been getting easier for decades despite the legal restrictions. Anyone with a shortwave radio can pick out the broadcasts through the static. And the VOA's television network, WorldNet Television, is available to anyone with a satellite dish.

"Our view of putting the material on the Internet is, it's merely an extension of our broadcasts," says VOA spokesman Joe O'Connell.

But the move to computer transmissions is a quantum leap. Not only is it essentially impossible for any regime-including that of the United States-to block reception of information put out on the Internet, but now the VOA's information can be put out anywhere, anytime—no one has to wait for a specific broadcast at a specific time.

The pretzel logic, meanwhile, isn't completely vanquished. The agency still can't legally tell you the location of its broadcasts on the short-wave band, satellite or on the Internet.

"Whether we personally agree or disagree with it, it is a statutory requirement and we are officers of the federal government. We don't have discretion," said Kern.

The VOA puts out its text and audio files on what's known as a "gopher," an easy-to-use (by Internet standards) on-line repository. Most people with Internet access can reach it by typing `gopher gopher.voa.gov`. For higher-tech types who love the multimedia World Wide Web, the address is `gopher://gopher.voa.gov`. You can even get VOA information if the closest you ever get to the Internet is electronic mail: Send e-mail to `info@voa.gov` with the message `send help`. The computer will automatically respond with instructions telling you how to receive, say, the list of upcoming Mandarin and Cantonese programming on radio and television. 

FOR SALE: Drake R-8 with box and Minimus-7 speaker. One year old. Two outdoor Datong active antennas, used, but like new. Sixty foot Sloper antenna still in package. Palomar longwire balun and kit still in package. \$500.00 takes it all. I'm moving. Cashiers check or money order only. Geoff Brown, 5 Washington Ave., Hopewell, NJ 08525. Phone (609) 466-9760 from 7:30 to 9:30 AM EST or after 6:30 PM or leave message. No collect calls.

MAY FLOWERS bring April, er, showers, or something like that. No, wait, May comes in like a lamb and goes out...Hmmm. Oh yeah, now I remember: May is your last chance until September to DX without QRN-induced migraine headaches. That's it.

A fine assortment of May flowers this time around, with the usual thanks to our usual co-conspirators.

ALBANIA Until 23 September, two of *Radio Tirana's* 100 kW shortwave transmitters are relaying multi-lingual broadcasts of *TWR* to Central Europe. The first daily transmission (May 15-July 31 only) is German at 0345-0415 on 6230 & 7160. There is Kurdish daily at 0500-0515 on 11635, Polish at 0515-0530 on 7385 & 9470, and Russian at 1730-1830 (1815 on Sun) using 9490 & 11635. (AWR Waveguide #13 text via Harold Sellers/SW Echo/Martin in OZDX-April 95/DX Ontario World Radio Report)

ARGENTINA *Radio Nacional*, Mendoza, was reactivated in late-1993 and is currently heard (in Venezuela) at 0856+ on 6180v with fair signals. The national anthem and ID also mentioning FM-96.7 was heard. Adjacent QRM from *WYFR* will make this rather more difficult in North America. (TLC on HCJB/DX Ontario World Radio Report)

LRA1 *Radio Nacional*, Buenos Aires, noted on new SSB relay of 5650 kHz on 11Mar at 1040, // 6180. (Anker Petersen—DSWCI)

Radio Rivardavia, Buenos Aires, is using a new SSB relay on 5081 for Antarctica. Noted at 1930 in Argentina. (A. Peterson, PlayDX#834).

ASCENSION ISLAND *Radio Japan's* new schedule includes these relays via the BBC Atlantic Relay Station on Ascension Island:

(BBCM)

BOLIVIA *Radio Galaxia*, Guayaramerin, had been inactive for some while but it is now being heard again on 5123.7 with usual gospel programs around 0000. (Henrik Klemetz on DXPL/DX Ontario World Radio Report)

BRAZIL *Radio Educadora 6 de Agosto*, Xapuri, is a 2 kW experimental station that was formerly operating on an irregular basis on 3401 (as listed in 1995 WRTH) at 1000-0200. Recently it has been heard mornings and evenings on a new frequency of 3255 kHz. (Henrik Klemetz on DXPL/DX Ontario World Radio Report)

Radio Juratel is a station which is planning to test using the facilities of *Radio Bandeirantes* on 11925 kHz. Programming will be downlinked to the transmitter via satellite. No hours of operation were given. Reception reports can be sent to: Sr. Ielton Nascimento; R. Lourenco de Azevedo, 241 (Vl. Mor-se); Sao Paulo-SP 05624-060, Brazil (DX Clube Paulista via PlayDX #834).

BULGARIA *Radio Bulgaria* sked thru September:

(South Korea); S=Sines (Portugal); U=Skelton (UK); M=Moosbrunn (Austria); W=Wertachtal (Germany); X=Xian (China); Y=Yamata (Japan). Unmarked frequencies originate from Sackville. (BBCM)

CHILE The proposed sale of the former *Radio Nacional de Chile* transmitting site to a new owner (the former program director of *KGEI*) has run into a snag—further details are pending. (DXPL/DX Ontario World Radio Report)

CHINA (TIBET) Based on monitoring in early March, it has been determined that the *Xizang PBS* (Lhasa) Chinese program is regular at +1100-1450 s/off on 4750, 5240, 5935 and (at 1200+) on 9580, whereas 7170 is irregular and 9490 is inactive. Correspondingly, the Tibetan program of Xizang PBS was found to be regular at +1100-1550 s/off on 4035, 4820, (at 1200+) on 5950, 5995, 6110, 6200 and 7110, whereas 5020, 11765 and 11950v are inactive. (Kito Asian DXer's Forum via DMC's WRR Jihad)

CIS As of 5th April, *Voice of Russia* ceased broadcasting in Indonesian, Khmer, Nepalese, Sinhalese, Swahili, Tamil, Hausa and Swedish. Furthermore, French broadcasts were reduced by six hours, Spanish by four hours, and Portuguese by 3.5 hours. All cuts due to budget restrictions. Last September, VOR also eliminated broadcasts in Afrikaans, Amharic, Burmese, Danish, Dutch, Slovene, Somali and Thai.

Nonetheless, a separate North American service has been reintroduced. At present the service has only been heard at 0600-0700 on 12040 kHz (which is announced as being for the west coast of North America), although it is possible that it is also carried at other times and on other frequencies. Whilst this North American service is on the air the mainstream *Voice of Russia World Service* in English continues to be heard on other frequencies. (BBCM)

Radio Two (R. Yunost) has published the following schedule. Their address is: ul. Pyatnitskaya, 25, 113326 Moscow. All programs in Russian:

0000-0100	4395YA 4740D 5925V 5955N/E 7290N

Radio Netherlands is now being relayed by a Dushanbe transmitter on 4965 as noted at 2226-2306 on April 1st in Indonesian. The site was confirmed by David Martin in Australia and the schedule

is 2130-2330. Listen for 2+1 time pips and then news at 2230. (Rich D'Angelo in NU / Hans Johnson in Jihad DX #27/DX Ontario World Radio Report)

Abkhaz Radio (broadcasting from Sukhumi, capital of the Abkhaz region of Georgia) was noted on 18th March with a broadcast on 9504.74 kHz that was intercepted in progress at 0512, closing at 0550. The broadcast, which was in Abkhaz, Russian and Georgian, announced a schedule as Tuesdays and Fridays at 1500 UTC, and Wednesdays and Saturdays at 0430 UTC on 222 meters mediumwave [1350 kHz] and 31 meters shortwave [9505 kHz]. Despite the announced sked, Abkhaz Radio was also heard on Sunday 19th, Monday 20th and Tuesday 21st March with broadcasts beginning at around 0430. Sign-on and sign-off times are subject to variation. (BBCM)

CLANDESTINE—AFRICA *Voice of the Tigray Revolution*, which broadcasts from Mekele, the capital of Tigray region in northern Ethiopia, is currently heard on 7515 kHz for its morning broadcast starting at 0400. It has also been heard on this frequency at around 1600. *Voice of the Tigray Revolution* is operated by the Tigray People's Liberation Front (a member of the ruling Ethiopian People's Revolutionary Democratic Front). (BBCM) The station has been heard in ECNA with IS on wind instrument at 0356, opening at 0400 with ID by a man. (BBCM via DXPL/DX Ontario World Radio Report)

CLANDESTINE—MIDEAST *Radio Message of Freedom* (Dari: Pyam-e Azadi) supports the Islamic Party (Hezb-e Eslami) of Afghanistan led by Golboddin Hekmatyar. Radio Message of Freedom was heard again on 28th March 1995 after an absence of six weeks. It had appeared to suspend transmissions following the capture of Hekmatyar's headquarters at Charasiab, near Kabul, on 13th February 1995.
0230-0330 Pashto/Dari 7090v 6145

(BBCM)

Voice of Independent Kurdistan, the radio station of the Kurdistan Workers' Party (PKK), has continued to be heard during the recent military operations against the PKK by Turkish forces in northern Iraq. Station observed at around 0900-1000 and 1400-1500 on a variable frequency around 7020-7030 kHz. Most programming is in Kurdish, although some material in Turkish is also carried. (BBCM)

Voice of Iranian Kurdistan in Kurdish on 4282 kHz at 1550. (03-Apr/Stanislav Mekhonoshin—Russia/Jihad DX)

Voice of Iraqi Kurdistan in Kurdish at 1615 on 4020 and 4183 kHz. (03Apr/Stanislav Mekhonoshin—Russia/Jihad DX). *Voice of Iraqi Kurdistan* has been confirmed as using new 5945 kHz.

Observed sked as follows (sign off times are variable):
0245-0430 4180 5945
0930-1100 4180
1445-1700 4180

(BBCM)

Voice of Mojahed in Farsi on 4250 kHz at 1620, /5860, 4460. (03-Apr/Stanislav Mekhonoshin—Russia/Jihad DX). Another address for Vo Mojahed is: M.I.S.S., P.O. Box 572-45, Washington, DC 20037, USA. (Hans Johnson/Jihad DX)

Voice of the Communist Party of Iran in Farsi on 3888 kHz at 1700, //6420. (03Apr/Stanislav Mekhonoshin—Russia/Jihad DX)

Voice of the People of Kurdistan in Arabic at 1610 on 4015 and 4097 kHz. (03Apr/Stanislav Mekhonoshin—Russia/Jihad DX)

Voice of the Struggle of Iranian Kurdistan in Kurdish on 4170 kHz at 1600. (03-Apr/Stanislav Mekhonoshin—Russia/Jihad DX)

Voice of the Worker (Persian: Seda-ye Kargar) is a left-wing radio station which broadcasts in opposition to the Iranian government and in support of the Iranian Revolutionary Workers' Organization. It was heard again in March 1995 after a lengthy absence.

1430-1515 Persian 4190v
1630-1715 Persian 4190v

(BBCM)

CLANDESTINE—OCEANIA *Radio Free Bougainville* is still on the air some days on 3850, albeit with very weak signals, even in Australia. It was noted 09 Mar in Pidgin at 0950 and still going with an impassioned speech at 1030. *Radio United Bougainville*, the government's counter-clandestine outlet, continues active on 3880 with relatively better signals. Usually only one station or the other seems to be on-air in a given local evening, although both signals were noted on Mar 23rd. (David Martin in OZDX-April/95/DX Ontario World Radio Report)

COLOMBIA Harmonic of *LV de Colina* on 3202.6v noted 06-April 1021-1034 with 2 IDs and mentions of onda media and "banda internacional de 90 metros"!! The signal was in LSB with carrier. (06-April/Dave Valko)

Radio Catolica Nacional in San Carlos [not listed in '95 WRTH] had been inactive for about a month but was being heard again as from early April on 3579.7 with primarily Ecuadorian music until 0400v signoff. (Henrik Klemetz on DXPL/DX Ontario World Radio Report)

CZECH REPUBLIC *Radio Metropolis* operates [or, operated—AQ] in studios located in a tunnel. They were originally used by R. Prague during the 1968 Soviet invasion of that country. (A Cushen, DX Aus-

tralia 2-95) Station has been silent since mid-March, leading to speculation that it may vanish from the market. Marie Vojcikova, a representative of the Czech owner of Radio Metropolis denies reports about the station's imminent end, saying that negotiations are under way on a financial settlement. (BBCM)

DJIBOUTI The reportedly abandoned *Radio France International* relay proposal is not necessarily dead yet. RFI does not own the transmitters and antenna they utilize—the facilities are actually owned by TDF which is the "common carrier" for RFI and others. The word from TDF is that East Africa (Djibouti specifically) is still being looked at as a possible relay site. This source also confirms that the proposed RFI relay in Thailand will definitely proceed. (d'Avignon/WRR/Jihad)

ECUADOR *Radio Alianza*—somewhere in Imbabura province, we think—on new 5848.35v kHz (ex-5453.9) 1204 UTC Apr.9; IDs as "Radio Alianza, la estacion de America Latina." (Rich McVicar—HCJB/Jihad)

Status of Ecuadorian stations not now on the air:

- 3240 *Radio Antena Libre* in Esmeraldas is off for good.
- 3250 *La Voz del Triunfo*, Santo Domingo, is inactive, with future status uncertain.
- 3270 *Radio Ecos del Oriente*, Lago Agrio is inactive, awaiting parts.
- 3285 *La Voz del Rio Tarqui*, Cuenca, currently inactive.
- 3300 new *Radio Sucandios*, Lago Agrio, supposedly active but unheard.
- 3325 *Ondas Quevedenas*, Quevedo, claims to operate daily from 1000-1300 and 2200-0300, but in Quito, only Radio Maya in Guatemala is heard.
- 3350 *Radio Cumanda* hopes to back on by the end of May.
- 3380 *Radio Iris*, still listed, but off for years and no plans to return.
- 3395v *Radio Catolica*, Santo Domingo, hopes to return in May pending arrival of parts.
- 4750 *Radio Municipal*, Quito, awaits license approval for activation.
- 4780 *Radio Oriental*, Tena is off awaiting parts.
- 4800 *Radio Popular Independiente*, Cuenca, off due to electricity shortage, to return when situation improves
- 4830 new *Radio Buen Pastor* ("Good Shepherd Radio"), Saraguro, hoped to begin testing end of April 95.
- 4840 *Radio Interoceanica*, Santa Rosa de Quijos is off with transmitter problems.
- 4910 *Emissoras Gran Colombia*, Quito, reactivation imminent after relocation.
- 4970 *Radio Tarqui*, Quito, off with no plans to return to shortwave.
- 5030 *Radio Catolica Nacional*, Quito, has targeted repairs/return for April 95.

(01 and 08-April/Rich and Lisa McVicar/HCJB DX Partyline/Jerry Berg)

A verification letter from *Radio Stereo Carrizal* says this station on 3260 was formerly named *La Voz del Rio Carrizal*, although the text of the letter implies the station continues to be owned and operated by the same family. (Henry Lazarus in NU)

HCJB will run another AM DX test on 690 kHz, this time on 13 May from 0600-0630 UTC. The program will be bilingual (Spanish/English), have unique music and plenty of piercing code.

This time, they'll be using their 25 kW standby transmitter at Pifo. The address for reports is: 690 DX Test, c/o Frequency Management, HCJB, Casilla 17-17-691, Quito, Ecuador (direct)

HCJB is involved in establishing "suitcase radio stations" in Cali, Columbia and Malawi. A letter from Ron Cline, President of HCJB, doesn't state whether the stations will be shortwave or BCB, or when they'll begin broadcasting. (Marlin A. Field)

ERITREA *Voice of The Broad Masses of Eritrea* heard fair circa 0330 on 7020, //4000 being poor as on April 1st. (Don Moore in Jihad DX #27/) Presumably the alternate language program is still on 7380 and 5000 (David Clark/DX Ontario World Radio Report)

ETHIOPIA *Radio Ethiopia* sked:

1100-1200	Somali*	11800	9560
1200-1300	Somali	9560	7165
1300-1400	Afar	9560	7165
1400-1500	Arabic	9560	7165
1600-1700	English	9560	7165
1700-1800	French	9560	7165

* UNICEF-funded "Voice of Peace" program

The separate *Radio Ethiopia National Service* carries a broadcast in English on Mondays to Fridays at 1030-1100 on 9705, 7110 and 5990 kHz shortwave and on mediumwave. (BBCM)

Voice of Peace has a broadcast called "*Radio Amaharo*" at 0400-0459 on 9560. This is carried on an external service transmitter of the *Voice of Ethiopia*. The language is Kinyarwanda (national language of Rwanda) but there is an ID in English & French with an address in Brussels given at the opening and close of the transmission. (RVI DX pgm/DX Ontario World Radio Report)

UN-sponsored *Radio Fana* can be heard opening at 0327 on 9335 with IS, multiple ID's and news in a local language, followed by domestic music. It has been audible with good signals in ECNA beyond 0500. The listed //6210 is blocked by co-channel QRM. (Hans Johnson et al on TLC on HCJB/DX Ontario World Radio Report)

FINLAND *YLE's* ambitious planned expansion of satellite broadcasting will have a negative impact on its shortwave activities. According to the station, "It is likely that we would go from our present 900 transmitter hours per week to something like 600 or 550 hours a week. This is not a decisive cut-back and we will continue broadcasting to all areas, but some of the extra programming will be cut back; that we will mainly concentrate on news and current affairs and sports on shortwave, and religious programming—and general feature programming and music will not be available on shortwave any longer." (BBCM)

FRANCE *Radio France Internationale* sked from 7 May to 3 September:

* relay of domestic national news (BBCM)

In the past, AIR has also broadcast an additional Urdu service during the hajj (pilgrimage) season at 0530-0600 on 17785 and 15135 kHz.

Radio Kashmir, Srinagar, was first observed Mar 7th on 4950 (ex 3277) at 1530-1740 s/off. (Tsutomu Kito in ADXF, Ed. 162/DX Ontario World Radio Report)...we could use some further clarification on this one. I understood Radio Kashmir was to have swapped frequencies with **AIR Kohima**, thus using 3268 and 3277 respectively, and that it was **AIR**

Shimla that was intended to use 4950, either in addition to or in replacement of present 3223 kHz. (David Clark/DXO)

AIR Thirup'aram-5010 is no longer operating during the 1100-1735 period. (Jose Jacob via AWR Wavescan #14 text via Harold Sellers/DX Ontario World Radio Report)

INDONESIA RRI Manado on 3214.8 was observed in late March closing at 1120v (ex-1215v). (Tsutomu Kito in ADXF, Ed. 167/DX Ontario World Radio Report)

RRI Bukittinggi was found to be inactive on 3231.9 since Mar 12 but then on reactivated 4910 from Mar 14 as noted 1500-1710 s/off. (Tsutomu Kito in ADXF, Ed. 165/DX Ontario World Radio Report)

3449v **RKPDT2 Bima** 1100 (Foster OZDX Jihad) Had seen reports of **RRI Bali** here. (HJ Jihad)

RRI Yogyakarta is again being observed on 5046.26 (//7098.5) but while the output power on 60 meters is nominally 20 kW, the signal is so weak that I presume they reduced its power output. (TIN in IDXR No.85, March/95/DX Ontario World Radio Report)

RRI Jakarta-9525 has been reactivated (//9680) since Feb 5th but this frequency is seemingly utilized only during local evenings; noted circa 1040 on Mar 8. (Tsutomu Kito in IDXR No. 85, March/95/DX Ontario World Radio Report)

IRAQ Shortwave broadcasts from official **Iraqi Radio** continue to be erratic. Frequency usage is highly changeable and the reliability of transmitters appears to be poor. Reception of shortwave broadcasts is further impaired by the persistent jamming that generally accompanies transmissions from Baghdad on both shortwave and mediumwave. The main domestic service in Arabic of Republic of Iraq in Baghdad has been heard recently during the daytime on the frequency of 17740 kHz. Recent reception [in Europe] has been surprisingly good at around 0600-0900, although it deteriorates later because of the jamming. Station closes around 1600. Iraqi Radio also noted on 13652 kHz at around 0900-1100 on 11th April, and also on 4615 kHz, which for some time has been its most regularly-heard shortwave frequency. (BBCM)

MAURITANIA *Mauritanian Radio and Television* (ORTM), schedule has been compiled entirely from monitoring observations. Broadcasts are in Poular, Soninke and Wolof, as well as Arabic and French. Shortwave frequency usage is subject to variation. The following alternative shortwave frequencies have been used in the past: 7245 instead of 9610 kHz, and 4920 or 4820 instead of 4845 kHz.

0000-0100	Arabic	4845
0630-0800	Arabic/French	4845
1200-1600	Arabic/French	9610 (unconfirmed)
1800-2400	Arabic/French	4845

(BBCM)

MEXICO *Radio Huayacocotla*, 2390 kHz, was closed down on 29 March by inspectors from Mexico's Secretariat for Communications and Transport. In their report, SCT technicians attributed exaggerated faults in the antenna and transmitter (for example, that the antenna was not properly painted, that it had one restraining cable too many, that there was a spare backup transmitter on the premises) and warned that these failures represented a danger to life and limb of the operators. They also reported that there was no evidence of some measuring instruments like an oscilloscope, audio frequency generator, a multimeter, and a wattmeter. On the 27th of March, the Provincial of the Jesuits, Jose Morales, asked for an interview with the Department of the Interior to discuss the closure of the Radio. He has yet to receive an answer. Although R. Huayacocotla applied for an AM frequency back in 1978 (tentatively 1350 kHz, call-sign XEHAY), the license still awaits approval from the Department of the Interior. (DEV MEDIA list/18-April/Don Moore) [The reality is more likely that the station was closed by Mexico's one-party government as part of a broader effort to silence indigenous (i.e. potentially dissident) voices.—AQ]

MOZAMBIQUE According to a broadcast by *Radio Mozambique*, "A total of 11 of the 20 Radio Mozambique transmitters at the Matola transmitting station have broken down. Only nine transmitters are functioning now with a total output of 222 kW. The broken transmitters represent a total output of 575 kW, more than double the output of operational transmitters. The transmitters have been experiencing constant breakdowns of valves and other components. Radio Mozambique has had financial difficulties in repairing them." (BBCM)

MYANMAR A Japanese DXer reports a verification from the *Defense Forces Broadcasting Station* at Taunggyi, confirming 10 kW into an inverted cone antenna on 6570 kHz. Although listed as 1 kW since 1985, the fact that the station has been widely heard at good strength made it apparent that the transmitter must have been more powerful than a mere 1 kW. (DSWCI Mar/95 via TLC on HCJB/DX Ontario World Radio Report)

NAMIBIA *NBC* is heard opening at 0600 s/on on 4965 with choral anthem, IS/ID and African radio news. Weekdays the pgme is in English while on the weekends a local African language is used. The channel is subject to RTTY interference. (TLC on HCJB/DX Ontario World Radio Report)

NEPAL To mark the 45th anniversary [of the station], *Radio Nepal* has added an English news bulletin at 0720 UTC. Similarly, a new English language program, "*Destination Nepal*", is scheduled to be broadcast three times a week on Sunday, Monday and Friday at (?8.50) in the morning, aimed at promoting tourism development in Nepal. There have also been some changes in the timings of regular programs and some news bulletins. (BBCM) [No further details provided—AQ]

(Direct via Adrian Sainsbury, Frequency Manager)

NORTHERN MARIANA ISLANDS Ed Evans, senior station manager at *WSHB*, states on the Internet that there is a 6-transmitter shortwave broadcast station facility under construction on the island of Tinian which is meant to be for the U.S.-sponsored *Radio Free Asia*. (TLC on HCJB/DX Ontario World Radio Report)...see also U.S.A.

PAPUA NEW GUINEA *R. West Sepik* has been reactivated. It was heard on its usual frequency of

3205 at around 1105 with a relay of the national *NBC* news from Port Moresby. (D'Angelo 3-31, NU #1318)

Status of the PNG's: 3205 (inactive during March, or at least to Mar 31) was noted on April 1st at 1030 with good signals, but 3275, 3290, 3325 and 3335 have been off-air for a little while now. 3245 has been slightly irregular, while 3305 was noted back for two weeks earlier in March but is currently off. 3365, however, is in fact active. Rabaul on 3385 is not listed in the '95 WRTH, even though it was reactivated after only a couple of weeks off-air due to the volcanic eruptions last fall. (David Martin in OZDX-April/95/DX Ontario World Radio Report)

PERU After a lengthy absence, *Radio Jerusalem* in the Cajamarca region is active again on 3194.6 with gospel programs in Spanish but signals are weak, even in Colombia. (Henrik Klemetz on DXPL/DX Ontario World Radio Report)

LV de Oxapampa, 3260, has been reactivated, don't confuse with the Ecuadorian *LV del Rio Carrizal* which operates on the same frequency. (TIN-Waves-can via Jihad DX #26) Try before 1100 when Carrizal signs on. (H. Johnson, Jihad DX #26)

Radio Soledad in Parcoy had been on 4632 kHz since early January but recently the signal has shifted to 4613v as noted since April 5. S/on with the national anthem is at 1020. (Henrik Klemetz on DXPL/DX Ontario World Radio Report)

Radio Ondas del Sur Oriente, Quillabamba (5068.5) heard beyond its schedule, until 0230 on 12-March. (Anker Petersen—DSWCI)

Radio Imperial, 6544.5, is the name of the new OA station reported by Hans Johnson. The address is: Calle De Ayabaca 339-341, Huancabamba, Peru. (H. Klemetz, Play DX #830). Heard here around 2345 with fair signals on 3-27. (Lobdell).

R. Nor Peruana, 9660, is still on the air. Noted on 18th February around 1500 with a poor signal. (Klemetz, PlayDX #834).

PHILIPPINES The 0200 English broadcast from *Radio Philipinas* is now on a new frequency of 13760. (RNMN/DX Ontario World Radio Report)

(BBCM)

Channel Africa was heard April 2nd on the apparently new frequency of 3220, mixing with HCJB; noted from 0257 with IS, then ID in English. (Hans Johnson in Jihad DX #27/DX Ontario World Radio Report)

The **BBC Myertown** relay has moved from 3395 to 3390 kHz and is now operating at times which make it audible in North America. It was heard April 1st at 2230-2315 with World Service pgme in English (possibly first day for this service) and later at 0415-0435 (April 2-UT) in Portuguese. Site confirmed by Dave Kenny of BBCM. (Rich D'Angelo in NU/DX Ontario World Radio Report)

SWAZILAND TWR, Manzini, has an English Bible course at 0400-0425 Mon-Fri on 9500. Could it be that the transmitter for this program is from SABC, Meyerton, South Africa? (Arthur Cushen's Shortwave Review/DX Ontario World Radio Report)

(BBCM)

URUGUAY 6045 *Radio Libertad Sport* carrier at 0950, by 0958 faded up to all rapid fire talk with plenty of jingles and ads for Coke, etc. Maybe listed Intergracion is just carrying their news. (HJ 4/8+ Jihad)

VATICAN CITY Contrary to previous indications that all *Vatican Radio* transmissions were originating from the main transmitter site at Santa Maria de Geleria which is on Italian territory, the summer '95 engineering schedule indicates that some transmissions are actually from the facilities within Vatican City, including 4010 (10 kW) and 6245 (80 kW). (Andy Sennitt on RNMN/DX Ontario World Radio Report)

VIETNAM The *Voice of Vietnam's* recently inaugurated service to North America is now on new 7360 at 0400-0600 in English and on 9520 kHz at 0600-0700 in Spanish. The transmissions reportedly originate from a hi-power relay transmitter near Krasnodar, European Russia. (Andy Sennitt on RNMN/DX Ontario World Radio Report)

More changes for the elusive Vietnamese Regionals (per Tsutomu Kito in ADXF, Ed. 162 & 167/David Vitek in OZDZ-April/95/DX Ontario World Radio Report):

Son La B.S. now on 5078 (first noted Mar 19) and on regular channel of 6329, both heard to 1400 s/off

Lai Chau B.S. reactivated on 5597 since Mar 10; also on 6705 (drifted from 6702) since early March.

Yen Bai B.S. presumed the one now on 6398v (drifted from 6390v); heard from 1150 to 1200 s/off, just slightly below the North Korean which has also drifted below nominal 6400

Cao Bang B.S. noted on 6545.3 on Mar 6 with mix of ethnic musical styles to s/off at 1355 after short anmt

Unidentified outlet [low power regional?] is being heard on 4661v with local program to 1100, then relaying Hanoi as above at 1100-1600 close. (Kito Asian DXer's Forum via DMC's WRR Jihad)

ZAMBIA Letter from *Christian Voice* gives sked as 1300-1500 on 6065, 1500-2030 on 4965. 7250 may be activated later this year. (Jerry Berg/12-Apr/Fine Tuning)

UNIDENTIFIED 6109.2v 0925+ Someone in Spanish here just below 6110 stations (HCJB). All talk with multiple announcers, no music, good modulation but a bit close to get much out of it. (HJ all this week Jihad)

6306.04 Spanish station ID @1107 on 12-March as "*Radio Ariete, La Vez del Tigre*," mentioning Dept. de Antioquia (Columbia). Slogan: "*Libre y democratica*." Possibly a clandestine. (Anker Petersen—DSW-CI)

VENEZUELAN QSLs ANYONE? DXer Antonio J. Contín says he can help obtain QSLs from the following stations: *R. Frontera, R. Mara, R. Maracaibo, R. Turismo* and *R. Valera*. He requests in return US\$2.00 and would like any extra Latin American pennants and stickers you might have. His address is: Calle Los Lirios #1219, Urbanización Miraflores 4013, Cabimas, Estado Zulia, Venezuela. (PlayDX #830)

PIRATES—EUROPE The Irish religious "station" *Reflections Europe* was active on Sunday, March 26th. They use the Radio Fax transmitter and operate on 3910, 6295 and 12255 kHz. North American DXers should check the later frequency on weekends for possible reception. (SRS News-Sweden #13-95)

Dublin Community Radio (formerly Radio Dublin Int'l on 6910v) is currently heard on 6915.34 at 0200+ with pop music and definite ID's but the signal is weak in ECNA. (Nick Grace via TLC on HCJB/DX Ontario World Radio Report)

Wreckin' Radio International, 12285, noted at 0950 to 1010* sign off with a brief test. Keep an ear on both this frequency and the nominal 12265 during the 0800-1200 Sunday Europirate Period. Their address is: WRI, 51 Eastwood Blvd., Westcliff-on-Sea, Essex SS0 0BY, England. (Campbell 4-2; NU #1318).

Radio Pirana International will test to North America before the operator, Jorge Garcia, moves to South America. Listen on 7 May, 2000-2200 on 13950 kHz. The first hour is beamed to North America, the second hour to South America. (SRS News, Sweden)

Popular Europirate frequencies of late include 3897-3945, 6199-6400, 6915-6970, 7125, 7294L, 7445U and 12255 kHz. (SRS News)

ERRATA Last months *LN* had a couple of errors: **COLOMBIA:** The address for *R. Católica Nacional* is listed after *R. Cocorna*. This is incorrect. **PERU:** Three Ecuadorians made the OA listing by mistake: *LV de Triunfo, Estereo Carrizal*, and *LV del Napo*. [So sue me.—AQ]

OH BOY Five radio ministries joined forces and obtained 58 radio towers and antennas from a decommissioned U.S. Naval transmitting site in Virginia. A local company volunteered their expertise at dismantling the towers, and manpower was provided by 75 volunteers from across the country. Other organizations provided food, finances and transportation. Because of the volunteer effort, the cost of the equipment was 90 percent less than if purchased new. The towers will be used by Christian broadcasters in a variety of locations such as Alaska, Puerto Rico and Africa. (Marlin A. Field/Church Around The World, April 1995) 

The 1995 Edition of
**The
Shortwave
RadioGuide**
Compiled and Edited by
John A. Figliozzi

With **completely updated** and comprehensive listings for thousands of programs broadcast in English to North America and the World on shortwave radio.

The 1995 edition again has been improved through the addition of columns classifying programs by type and now including frequencies for each program!

These improvements come to you, once again, at **no increase in price** over the 1994 edition.

Watch later this year for the new '95 SWRG Supplement with amended English language program and frequency listings, as well as listings for non-English language "world" services!

Electronic version now in ASCII format on IBM-compatible 3-1/2 or 5-1/4-inch diskette.

The SWRG is available worldwide only through its co-publishers and exclusive sales agents in the USA and Canada:

NASWA Company Store
705 Gregory Drive, Horsham, PA 19044 USA

Hi everybody. Hey, hold on to those Radio Aum Shinrikyo QSLs, you know, the ones with the full color likeness of "His Holiness Shoko Asahara". I predict that in a few years they will be worth as much as OJ's rookie card on the trading card circuit. Some of my other favorite radio "collectables" include a 1970s Radio Uganda schedule featuring greetings from "His Excellency Field Marshal Dr (?) Idi Amin Dada", and the ever popular "Death to America the Great Satan" brochure from our friend Ayatollah Khomeini and the folks at Radio Voice of the Islamic Rep. of Iran. Getting this kind of stuff in the mail makes this hobby all that much more interesting!. See you next month!

MIKE RYAN says Jaipur is still on 4910 to 1415* then to 3345 *1430.
 3295 has been discontinued.

RICH MCVICAR of HCJB says there'll be a test on 690 kHz May 13 0600-
 0630. That's late Friday night in some parts of America. This coincides
 with sev DXpeditions that weekend. If you hear something, please write
 to 690 DX Test c/o Frequency Management, HCJB, Box 17-17-691, Quito,
 ECUADOR. IRC is kindly requested. Rich will be at the station during
 the test, so you may call him then at 593-2-466-612. Wait for the tone,
 then punch Ext. 441. He will try to record your call for DXPL.

Apologies to VINCE PINTO for messing up his name last month. A couple
 discrepancies noted in these pages recently. The new US station is WVHA
 not KVHA. Also it is reported that Radio Oriente 6190 and Radio Oriental
 4780 are not on the air so whatever was logged here must've been
 something else.

CAROL SIEGEL is a tropical band DXer interested in DXing via cassette.
 She is interested in law, politics, non-fiction reading & writing,
 science, sports, culture of peoples, arts & crafts w/exception of cooking
 and sewing. If you would like to correspond with Carol, write her at
 6839 Parsons Ave, Baltimore, MD 21207-6423.

A great response this month. Thank you to all who took the time to
 contribute. This month contributors from 14 states and 3 countries.
 Next deadline May 19. Special greetings to Oklahoma DXers KIRK
 ALLEN & JOHN BRYANT. I hope you were safe and sound during the terrible
 terrorist action in Oklahoma City.

International Band Loggings

Wallace C. Treibel

CLANDESTINE STATIONS

- 7515 ETHIOPIA V of the Tigre Revolution in lang *0356, wind instrum IS, ID w/heavy echo, tlk, M East influenced African mx, f/o by 0415 (Rausch NJ 33/21)
- 11610 ALGERIA Nat R of Saharan Arab Dem in AR *1800-2100, NA, ID, Koran prayer, kids chanting, interviews, mx, f (Ducharme MA 3/17)

ERRATA: In my haste to meet the deadline for the March issue, I made an inadvertent error on the entry for 11785. The entry for Gabon was reported as the relay for R France Int when actually the program was the relay for R Japan. Giovanni Serra points out to me that RFI does not have a program in Italian. My apologies for the mixup.

Welcome to the first-time contributors who formerly sent their loggings to SPEEDX. This may be a good time to remind members to include sufficient details about program content, including ID or // frequencies, in their loggings. It is not necessary to go into great detail but something more than "news & music" should be included in order to make the information worthwhile to the other members. Also it is much appreciated if the loggings are cut into individual slips of sufficient size to be handled. This is not an essential requirement if you are hung up on clipping things with scissors.

English Schedules

Tom Sundstrom

Vincentown, NJ 08088-2275

Fax 609-859-3226

Internet: T.SUNDSTROM@genie.geis.com

Prepared 4/27/95.

Thanks to C. Ed Evans (MRI), Dave Kenny (BBCM), Adam Lock (WVCR), Jonathan Marks (RN), Dale Park (III), Andy Sennitt (WRTH), and Jeff White (WRMI).

Bangladesh: Dale Park sent along an RNZI and R Norway schedule, and mentioned that he's been hearing R Bangladesh on 7185 at 1230. I've lost track of them since the March 26 — very difficult to hear in these low solar cycle conditions — but Dave Kenny sent along an April 18 update.

Bulgaria: New times are being announced for the *DX Program for Radio Amateurs and SWLs*. The show airs in the last quarter hour of Fridays 1900 and 2300, Sundays 0400, 1130, 2100 and 2300.

Ecuador: There will be another MW HCJB test on May 13 0600-0630 UT. Bilingual announcements, music, and Morse code IDs. This one will use the 690 kHz 25kw transmitter at Pifo, the home of the SW transmitters.

Ukraine: The NAM service of R Ukraine Int'l has been very difficult to hear. I can only occasionally hear 9750 at 00 and 9835 at 03.

USA: Transmitter problems at WINB, Red Lion, PA, took the station off the air for more than two weeks in late March into April. WEWN has now

changed to 7425 for 24-hour service to NAM.

Media Shows: AWR's *WaveScan* via WRMI and IIRJA are no longer part of *Viva Miami*, but now have their own time slots. WRMI: Sa 2200, 2345, Su 1130, 1245. HRJA: Sa 2200 and 2345. And the first of the two *World of Radio* Friday afternoon airings on WVCR was dropped when the time period was sold. And via cyberspace: Al Weiner will be producing a new weekly media show — not *Radio Newyork International* as first reported — airing UT Mondays 0400 on WVCR on 7435.

Yugoslavia: The NAM service from Belgrade is very difficult to hear, but mid-month I finally found it at 00 UT on 9580.

Have access to the World-Wide Web?

Check out our new Web pages posted at <http://www.pics.com/trs>. It includes a

News You Can Use page that includes information on the new Drake R8A and Lowe HF250 receivers, plus a link to our list of RTTY press frequencies. We'll be updating the news page and the graph below on a regular basis.

There's a new format for the schedules this time around. Transmission start times are divided by a horizontal rule. Within each grouping, read the columns from right to left. An expanded four-part report is now available in print form (see below).

SOLAR FLUX & A-INDEX: FEB-APR '95

New! English Language SWBC Schedules now available in print form. Updated at least four times a year, here are four reports: Schedules by Country and Station; Schedules by Transmission Time; DX/Media Shows by Country and Station; and DX/Media Shows by Day of the Week. Approximately 60 pages of information. Call or write Gilfer Shortwave for ordering information and availability.

NEW PRODUCTS FROM GILFER SHORTWAVE!

RF systems

High Performance Antenna Products from The Netherlands

Magnetic Longwire Balun (shown at right) — Effectively isolates the antenna element from the coaxial feedline to reduce electrical noise. MLB available separately, or with 12.5 or 20 meter longwire antenna.

DX-7 Active Antenna (shown at left) — Compact helical HF receiving antenna covers 50 kHz — 35 MHz. Elliptical polarization helps minimize selective fading distortion. Mount indoors or outdoors. Optional power supply/control unit adjusts gain.

Magnetic Transfer Antenna — A unique passive vertical antenna for outdoor use. Low noise and immune to the overloading problems that can plague active antennas. Only 7 feet tall, but covers 500 kHz — 30 MHz; special GMDSS version covers 100 kHz — 25 MHz.

T2FD & DX Listener Antennas — T2FD is a broadband, low noise tilted, terminated folded dipole covering 3 — 35 MHz. DX Listener is a deluxe T2FD with indoor control unit which allows antenna to receive down to 100 kHz. Antenna length just 45 ft.

Call us for prices! Also available and in stock: DX-1PRO and DX-10 active antennas, AA-1 and AA-2 antenna couplers, SP-1, SP-2 and SP-3 splitters for HF & VHF/UHF, and many other products from RF Systems!

TRS Consultants Software
