Monitor MORE with advanced equipment from Universal Radio!

DRAKE

SW-2

**NASWA MEMBERS:
WE ARE PLEASED
TO FEATURE
TWO NEW
RECEIVERS!**

Dollar for dollar, the new Drake SW-2 has to be the best value in shortwave radio today. Here is a table top receiver with a truly impressive array of features and capabilities, at a price that everyone can afford. Never before have you been able to get so much radio for so little money. Of course the SW-2 covers all longwave, medium wave (AM) and shortwave frequencies. Single sideband is easily tuned with separate LSB and USB positions. Amplitude modulated signals sound great through the front firing speaker. When a shortwave signal does start to fade you can engage sideband selectable synchronous tuning to stabilize and improve the signal. The capable memory system is nonvolatile and stores 100 channels (storing frequency, mode and detection). Memory recall may be accomplished by either keypad entry or by rotating the main tuning knob while in memory mode. Other refinements include: RF Gain, Tuning Bar Graphs, 100 Hz readout and Dimmer. Dual antenna inputs accept either a PL-259 coaxial or wire feedline. A mini earphone and 1/4" external speaker jack are provided. The optional remote lets you operate this radio from across the room. The oversized digital display is large enough so that you can actually see the frequency from across the room. Universal is excited to offer this exceptional radio value. The reliable, American-made Drake SW-2 carries a limited one year warranty.

Order #2222 \$489.95 (+*7)

OPTIONS

- ◆ **Drake MS-8** This external speaker includes a 6 foot cord with plug. #2846 \$48.95 (+*4)
- ◆ **Drake Carry-Tilt Handle** This plastic handle snaps on in a jiffy. #1317 4.95 (+*3)
- ◆ **Drake MMK-1 Mobile Mounting Bracket** Inverted or upright. #3032 14.95 (+*3)
- ◆ **Drake Infrared Remote Keypad** #1589 48.95 (+*3)

Operate your SW-2 from across the room! This stylish remote does it all! Tune the radio up and down, control the volume, enter frequencies, change modes, mute and even dim the display!

SPECIFICATIONS

Frequency Range	100 - 30000 kHz
Power	12 VDC 1.5A 120VAC P.S. included
Antenna Impedance	50 ohm
Selectivity (-6dB)	AM 6.0 kHz SSB/CW 2.3 kHz
Sensitivity	< 5 µV SSB (10 dB S+N/N)
Intermediate Freqs	1st IF = 55.845 MHz 2nd IF = 455 kHz
Audio Output	1 Watts at 8 Ohms
Standard Steps	50Hz via Tuning Knob 5kHz Up/Down Buttons
Circuit Type	Dual Conv. Superhet
Dimensions	10.875" x 4.4" x 7.62"
Weight	275x111x194 mm 5.8 Lbs. net (2.6 kg)

Shortwave Receivers Past & Present

Communications Receivers 1945-1996

- ◆ New 2nd Ed.
- ◆ 80 Chapters
- ◆ 350 Pages
- ◆ 600 Photos
- ◆ Printed Jan. 97
- ◆ Covers 1945 to 1996.
- ◆ 500 Receivers
- ◆ 400 Variants
- ◆ Includes 70 U.S. and Intl. manufacturers
- ◆ \$19.95 (+*2 ship)

This huge 350 page Second Edition includes over 500 shortwave and amateur communications receivers made from 1945 to 1996. Here is everything you need to know as a radio collector or informed receiver buyer. Entry information includes: receiver type, date sold, photograph, size & weight, features, reviews, specifications, new & used values, variants, value rating and availability. Seventy American and worldwide manufacturers are represented. Become an instant receiver expert!

\$19.95 (+*2 bookrate or +*3 UPS)

JRC

Japan Radio Co., Ltd.

NRD-345

Famous for its top-guns receivers, Japan Radio Company once again pioneers with a brand new model at a surprisingly affordable price. This incredibly attractive and compact radio delivers hour-after-hour of listening pleasure with high dynamic range and synchronous AM detection to help tame fading. Dual IF filters (6/2 kHz) are supplied, with a third optional position available. Tuning the radio is smooth as silk via the large indented main tuning knob. The easy-to-read LCD type display shows you the precise frequency to 10 Hz! The variable Noise Blanking is effective against pulse and ignition interference. The sophisticated memory system stores 100 channels with frequency, mode, AGC, attenuator, VFO, bandwidth and NB status parameters all stored. Both memory and frequency scanning are supported. The Clock-Timer function enables the radio to turn on and off at a specific time and the clock can be set for UTC or local time. The Tone Control, AGC and 20 dB Attenuator let you refine the signal to your personal taste. Other refinements include an analog S-Meter Tail-Bar, Up/Down Tuning buttons, Dual VFOs and Dial Lock. Rear panel jacks include: External Speaker, Record Jack, FAX/RTTY Line Out and DB-25 RS-232C port. Switch selectable dual antenna inputs are featured to support both wire-type or coaxial-type lead ins. A built-in RS-232 port facilitates connecting a personal computer (4800 baud, 1 start bit, 8 data bits, no parity, 1 stop bit). Exact price is unknown at press time, but is expected to be under \$1000.

Another Winter SWL Festival is in the history books. About 185 enthusiastic hobbyists traveled to Kulpville for this 10th annual event. The "gang of three" did another excellent job! My retirement as ANARC's Chairman on December 31st enabled me to visit with many more members than I usually get a chance to meet. It's not too early to begin planning your trip to Kulpville next March. Check out the Calendar of Events for the early line.

At the Winter SWL Festival, our own **Marie Lamb** announced the recipients of this year's ANARC Awards. **Mark Connelly** was selected as the DX'er of the Year for his outstanding contributions to the field of international medium wave DX'ing. **Kirk Baxter** of the Association of Clandestine Enthusiasts was given a special Certificate of Recognition in honor of his outstanding work as system operator of the now closed ANARC BBS and for his 11 years of service to the hobby as president of the ACE. Well done gentlemen!

Special thanks to long time member **John Sgrulletta** for sending us a copy of the April 1966 edition of *Frendx*. It was John's sample copy. Unfortunately, he didn't keep any copies starting with his membership in May of that year. Remember, we are looking for back issues prior to the switch to all shortwave broadcast in August 1966. Any help from long time members/collectors is appreciated. Thanks John!

Via PLAYDX we learn that **Grigory Grigoriev** of Slantzy, Russia with 896 points won the 1996 Memorial Bernhard Gruendl contest. Congratulations!!! He was followed by **Vladimir Rozhkov** of Kansk, Russia with 755 points and **Mauno Ritola** of Lappeentanta, Finland with 751 points. Eleven DX'ers participated in the event.

ANARC SWL Ham Net

Tune in Sunday mornings at 10 A. M. Eastern Time on 7240 LSB for the latest in shortwave, medium wave and longwave listening. DX tips, and up to the minute hobby news. Contributors share their DX tips via their own amateur radio stations or by telephoning a "gateway" station who then broadcasts the relayed tips. Contributions are also accepted via the Internet Relay Chat (IRC) channel #swl while the net is in progress. Net Controls Dave Kirby N1DK, ex-N8JQX, Hausie WB4JSP, and Bob Curtis W1EXZ host an always lively gang of DX monitors. (Best heard in the eastern half of NAm) Net info is also available at http://www.trsc.com/swl_net.htm.

The Longwave Club of America announced the winner of the 1996 H. John Clements Memorial Award in February's Lowdown. The recipient is long time member and frequent contributor **Max Carter**.

Fred Vobbe and the DX Audio Service celebrated the 144th edition of their audio magazine in March. It all began in April 1985 with C-60 tapes issued from Westland, MI. In the last 12 years, the operations were moved to Lima, the tapes were standardized to C-90's, and the editing is now done in an all digital mode. Congratulations to Fred and his staff for providing this important service.

Finally, a bunch of new items have been added to the Calendar of Events. I even managed to get some of them on the calendar correctly.

That's it for this month. Enjoy this month's edition of the JOURNAL; it's another good one. 

Our Motto is - "Unity and Friendship"

Calendar Of Events

Apr 18 Meeting. Philadelphia Area NASWA Chapter. Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 215-446-7831.

Apr 18 Meeting. The Miami Valley DX Club (all band orientation) meets at 1:00 PM. For more information plus this months meeting location contact Dave Hammer at 614-471-9973 or write to MVDXC, Box 292132, Columbus, OH 43229-8132.

Apr 19 Meeting. Boston Area NASWA Chapter. The Lexington Club, Rts. 4 & 225, Lexington, MA at 7:30 PM. The location is 1/4 mile west of Rt. 128, Exit 31. For more information contact Paul Graveline at 508-470-1971 or Internet: 74007.3434@compuserve.com. Check the BADX Web Page: <<http://www.grove.net/~badx/>>.

May'97 Convention. ODXA Convention'97 will be held at the CBC Broadcasting Centre in Downtown Toronto on Friday May 2 (Wine and Cheese reception) and Saturday May 3. Advance registration is \$15.00 Cdn. Mail to: Ontario DX Association, P. O. Box 161, Station A, Willowdale, Ontario, M2N 5S8, Canada.

May 10 Meeting. The Tidewater SWL's meet at 6:30 PM. For more information plus meeting location contact Joe Buch at 804-721-2782 or Internet: joseph.buch@dol.net

Jun'97 Convention. The 31st Annual European DX Council ("EDXC") Conference will be held on 6-9 June 1997 at the Hotel Lazne in the eastern part of the Czech Republic. It will be organized by the Czechoslovakian DX Club. Information can be obtained from Jaroslav Bohac, Jizerska 2900/11, 400 11 Usti n. L., Czech Republic; FAX +42 47 5211819, e-mail: khonzik@bbs.infima.cz.

Jul'97 Convention. IRCA Convention will be held in Costa Mesa, CA on July 25-27 at the Holiday Inn Bristol Plaza. Registration is \$35.00 which includes the banquet. Contact Mike Sanburn, P. O. Box 1256, Bellflower, CA 90707.

Aug'97 Convention. WTFDA Convention has been tentatively set for August 1-3. Convention host John Broomhall is exploring two sites: North Georgia mountains (about 75 miles from Atlanta) and in or near Metropolitan Atlanta. Activities include station tours, amateur TV demonstration, FCC Regional Field Office visit, guest speaker(s) and informal Q&A panel discussion. Further details when received.

Aug'97 Convention. NRC Convention will be held Labor Day Weekend (Aug. 29-Sep. 1) in Delaware. Further details and information will appear when received.

Oct'97 Contest. 1997 Adventist World Radio Contest. Further information will be published in the Journal or you can send a self-addressed stamped envelope to 1997 AWR Contest, c/o Dr. Adrian Peterson, Box 29235, Indianapolis, IN 46229.

Feb'98 Convention. New Zealand Radio DX League will hold its 50th anniversary convention sometime in February 1998. Exact dates and venue have not been established. Information from NRZDXL, P.O. Box 2956, Wellington, New Zealand. Further details and information will appear when received.

Mar'98 Contest. 1998 North American DX Championships. Further information will be published in the Journal or you can send a self-addressed stamped envelope to 1998 NADXC, c/o Dr. Harold Cones, 2 Whits Court, Newport News, VA 23606.

Mar'98 Convention. The 11th Annual Winter SWL Festival will be held at the Kulpsville Holiday Inn (Exit 31 on the Northeast Extension of the Pennsylvania Turnpike) on 13-15 March 1997. Organized by the infamous "gang of three" (Messrs. Brown, Cones, and Field) this all wave gathering attracts over 200 hobbyists each year. See January's Journal for the registration form.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: r.dangelo3@genie.com) or Ralph Brandi (Internet: ralph@mcs.com).

Contribute!

Send your loggings and QSL information off to our Distributing Editor, **Fred Kohlbrenner** (2641 South Shields Street, Philadelphia, PA 19142). He will forward them to the appropriate editor. Remember, Fred has now expanded his business to include QSL report information and totals for the **Scoreboard** column. He can also be reached through the Internet at: fkohl@ix.netcom.com.

Musings

This column provides a forum wheras members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are are soley those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email - r.dangelo3@genie.com

John Sgrulletta, New York

In response to your request, I just came across my sample copy of Frenx which is the April 1966 issue. I joined in May of 66 but did not keep any early issues of the monthly bulletin.

I just got a QSL from Radio Integracao in Acre (State #15 QSL'd) and they sent a pix of the station, 3 postcards, a 3 color pennant with 1997 on it, a 3 page typewritten letter and self-prepared QSL card! This was in 11 months and no follow up was sent!

Keep up the great work at the Journal

73's, John

Francis George (WPE2NOD), 7101 Shore Road, Apt 5D, Brooklyn, NY 11209

I am a new member of NASWA having joined in March. I would very much enjoy hearing from a "pen friend" in England. Could you please mention this in your NASWA Notes column? (No, but this Musing should cover it, hi! -RAD) Also, do you know what happened to Bill Eddings? I was a member of NASWA in the 1970's.

Sincerely and 73's

(Bill Eddings past away in the early 1970's -RAD)

FRENDX: Twenty Five Years Ago....

Bill Eddings remained ill so the HQ section was under the direction of Dan Ferguson. The Board of Directors announced a change in the dues structure with first class delivery at \$10.00 a year possible thanks to the new offset printing process. Renewing for a fifth year were Alan Roth and F. Earle Hall. In the Shortwave Center, Ralph Perry writes about "The Sad Saga of Radio Telefis Eireann's Short-Lived Shortwave" while Al Sizer takes "An Honest Look at QSLs" and Ed Shaw explains the "Phenomenon of the Darkness Pattern." Gregg Calkin's QSL Report reflected returns from Burma, and the German Hydrographic Institute Time Signal Station. Jerry Berg submitted his last Log Report column in April. Larry Magne takes over the column in May.

Jim Renfrew <jimrenfrew@delphi.com>, 61 Wilcox Street, Rochester, NY 14607-3832

When I saw in the WRTH that it has an e-mail address, I took a chance and sent a QSL request via e-mail to Radio Christian Voice, Zambia. I have not had much luck getting any response to previous e-mail messages (usually a "bounce" message), and an e-mail QSL just doesn't look as nice as one received through the conventional mail. But the result was interesting enough to share with NASWA Journal readers! Hope you enjoy it too.

"Good day Jim,

"This is Phil Haggar, Station Manager for Christian Voice in Lusaka."

"Well, I can certainly confirm it was us you heard last weekend. And in a strange way, you have helped me!"

"We operate from a computer produced playlist, but, the presenters do like to put in their own music sometimes. According to the playlist, at 22 minutes past the hour, we had a Zambian gospel song playing, but here is your report:

>0422 UTC: Program of music. Although yours is a Christian station I could not readily identify any traditional Christian music. This program seemed to offer a more popular or "contemporary" variety of songs. The first song that I heard, at 0422, seemed to be a song in the Eric Clapton "white blues" style. There were few announcements."

"So I checked with the presenter, and guess what? He does like Eric Clapton style songs, and although our music library only has music by Christian artists, what you heard was a presenter bending the rules and so I have been able to have a brief chat with him about this!"

"But it was us and I will pass the email along to our Technical Department for you to receive a formal QSL."

"Thanks and regards."

"In Christ—Philip Haggar, Radio Christian Voice"

Nick Terrence <nterrene@suffolk.lib.ny.us>

As we witness changes in the world of communication, I had a very basic thought. Even though there are budget constraints taking place with many major shortwave stations, a continent like Africa still heavily depends on this medium. In some situations, Africans need shortwave for survival. I have one analog am/fm/sw portable that I would be willing to donate to someone in Africa. Do you have any suggestions as to how I can do this? In fact, there are probably other NASWA members that may want to do the same. We could call it Radios for Africa. Perhaps they can be sent to a missionary for distribution. I would appreciate any help the membership can offer.

73, Nick

NASWA

Richard A. D'Angelo, 2216 Burkey Drive, Wyomissing, PA 19610
<r.dangelo3@genie.geis.com>

The 10th annual Winter SWL Festival was a big success. About 185 hobbyists ventured to this DX heaven for the 9th time. Messrs. Brown (and Mrs. Brown and family), Cones, and Field, the "gang of three," staged another incredible event that even had Gerry Dexter yelling, "Amazing!"

The program commenced early Friday morning with a long wave forum lead by our own Bob Montgomery. Scanners, pirates, utilities and easy listening were just some of the topics covered this year. The silent auction raised \$400.00 for Father John Eckert's African relief charity. The FEST concluded with the banquet on Saturday evening. A three piece jazz group kept the natives happy during the cocktail hour.

Of course, the real highlight was the annual midnight ride of Pancho Villa. During this year's record long broadcast, this wildly pirate recounted many of the highlights of the last 10 years as only Pancho could. It was a spectacular event which will go down in the annals of pirate broadcasting as "something special" (or something close to that...).

It's time to make plans to attend next year's Winter SWL Festival in Kulpsville. Watch the Calendar of Events.

73 -RAD

Welcome to the following new NASWA members

Setsuro Asai, Nagoya, JAPAN
Charles Furlong, Philadelphia, PA

Lots to report on this month, so let's get right to it!

BBC World Service

As of March 30, the BBCWS has reduced its "streams" from five to three and has (again!) radically revised its program schedules. The former Americas and European streams are now combined. The South Asian and Asia-Pacific streams have also been joined. The African stream remains intact.

Because the program and time changes are so extensive, this month's column includes the new times for all regular programs and notes the series that have been discontinued.

Times listed are for the new Americas/Europe stream, unless otherwise indicated. Frequencies for North America at various times of the day: 5965, 5975, 6175, 9515, 9590, 9895, 11750, 11865, 15220, 17840. In some cases, one of a program's air times may be available via shortwave to only one area. These circumstances are denoted by * for the Americas only and ** for Europe only. European frequencies received well afternoons here in NY are 15485, 12095, 9410. 9740 carries the new Asian stream to western North America 1200-1600. Programs carried on this frequency only are denoted with a #.

Current Affairs

The global phone-in series, **International Question Time**, returns for an eight week run. Panelists change weekly; Sheena McDonald hosts. To participate, contact the BBC after 1200 each Sun. by phone (+44 171 379 7444), or by letter (Bush House, Strand, London WC2B 4PH), fax (+44 171 240 8776) or e-mail (worldservice.letters@

bbc.co.uk). Studio staff will return calls at the BBC's expense. *Listen live on Sun. at 1401.* A three-part series, **Policy and Prejudice**, examines how Western statesmen addressed Balkan questions in the early '90s and what historical assumptions shaped those policies. *Sun. until 13th 1701, repeated Tue. until 15th 0630, 1130.* In **Reports From the Silk Road**, Paul Bergne, a specialist on Central Asia and Britain's former ambassador to Uzbekistan and Tajikistan, takes a comprehensive look at that region and how the effects of Soviet rule and their five-year experience with independence have positioned them for the future. *Airing in 5 parts Sat. 1030, repeated Mon. 0430, 2130.*

New Times: Assignment—Thu. 1430#, 1830*; Fri. 0530** and 1030**. **Britain Today**—Daily 0045, 2115; Mon.—Fri. 1215, 1645. **From Our Own Correspondent**—(I) Sat. 1715, Sun. 0330; (II) Wed. 1515#, 1730, Thu. 0030, 1145. **Letter from America**—Sun. 0030, 0715, 1445 (latter time often pre-empted). **People and Politics**—Fri. 2130, Sat. 0230, 1130. **Seven Days**—Mon. 1230, 1730; Tue. 0130. **The World Today**—Mon.—Fri. 1715, 2230; Tue.—Sat. 0330**, 0615.

Arts

New Times: Meridian—(Books) Thu. 0230, 0630, 2130. Fri. 1530#; (Feature) Sat. 0630, 2130, Mon. 0230, 1530#; (Live) Tue. 2130, Wed. 0230, 0730; (On Screen) Tue. 0230, 1030, Wed. 1530#, 2130. **Spotlight**—Sat. 0155. **Discontinued: Book Choice, Good Books.**

Business and Finance

Global Business is a new 1/2 hour weekly series with interviews, features and discussions focusing on international business. *Sun. 0430, 1030.*

New Times: World Business Report (Review)—Mon.–Fri. (Sat.) 1205, 2105; Tue.–Sat. (Sun.) 0305. Discontinued: World Business Brief.

Classical Music

Composer of the Month features an appreciation of the life and music of Johannes Brahms but is now available only at 0730 Thu. (also 1530#), inconvenient times for all but those in the western time zones. But fortunately for lovers of Brahms' music, **Concert Hall** will present four concerts this month featuring (in succession) his Double Concerto, piano works, one of his Violin Sonatas and, in the fourth week, the Tragic Overture and St. Anthony Variations. The air time of 1515 Sun. (1515 Tue.#) should be more accessible for more listeners. **Performance** is a new weekly series examining the art of performance in all its aspects with portraits of some of the profession's greatest soloists, ensembles, conductors, musicians and venues. This first run is for five weeks and airs Wed. 1515.

New Times: Greenfield Collection—Tue. 1530. Music Review—Fri. 0730; Sun. 0230, 2130. Discontinued: Record News, Who's Who In Music.

Development and Environment

One Planet is a new 30 minute program focusing on these themes. Wed. 0530, 1030.

New Times: The Farming World—Wed. 0030. Discontinued: Development '97, Global Concerns, On the Move.

Drama and Reading

Plays of the Week (Sat. 2230, repeated Sun. 0530, 1830*) this month are:

Ashes to Ashes (60 min. on 5th/6th) offers the British dramatist Harold Pinter's 1996 play which was performed on the London stage last fall. Pinter directs the two actors that appeared in the original production, Steven Rea and Lindsay Duncan in this fascinating and sometimes horrifying two-hander. In honor of American playwright and novelist Thornton Wilder's birth 100

years ago this month, his classic play, Our Town (90 min. on 12th/13th), is presented this month. The Glass Menagerie (In two 60 min. parts on subsequent weeks 19th/20th and 26th/27th), one of Tennessee Williams' best loved plays, describes a mother's struggle to find a "gentleman caller" for her crippled and emotionally vulnerable daughter. Recorded at LA Theatreworks, this production features the same cast that performed the 50th anniversary revival of the play on Broadway. Television actor John Goodman narrates.

As a bonus this month, a one-act play by W. W. Jacobs is also presented. Entitled **Jerry Bundler** and set at the turn of the last century, the plot centers around a practical joke gone awry. Mon. the 7th at 0330.

Off the Shelf (Mon.–Fri. 1230#, 0715; Tue.–Sat. 0345**) features these readings: Cheri by Collette about the relationship between an aging courtesan and her young lover. (Beginning Mon. 7th and read in 8 parts.); In Penelope Lively's The Dream Merchant, he tries out one of his own dreams. (17th); In William Trevor's Widows, Catherine learns that her recently deceased husband wasn't all that he seemed. (18th). The Thirty-Nine Steps by John Buchan is a classic adventure tale of the hunt for a wanted man who is innocent. (Presented in 10 parts beginning Mon. the 21st.).

Short Story

Listeners from Sweden, the USA, Australia and Kenya provide this month's works which now air Sat. at 1245 and Mon. at 0030.

Education

Learning Zone presents The Making of Hamlet (Sun. 2310) and What's That You're Eating?, which examines personal tastes and feelings about food around the world (Fri. 1230). Discontinued: Voicebox.

Entertainment

The musical quiz **Counterpoint** (Sat. 0730, repeated 1230#, Mon. 1830*) returns for a twelve week run with Ned Sherrin conducting contestants through diverse musical topics.

Songs, Sonnets and Sounds of Laughter is an anthology of poetry, prose and song performed before an invited audience. *Its three week run starts on Sat. 12th 1901**, repeated *Mon. 0330***.

Features and Documentaries

A Cry in the Dark (Tue. 0030, 1515) features the sounds of local wildlife as recorded in five places around the world by naturalist Joanna Pinnock. **Everywoman** (Wed. 1530) is a new half-hour series and the first ever regular women's program on World Service. **On Your Behalf** (Sun. 0130, Mon. 1515) is also a new program and begins a 13 week run featuring Malcolm Billings in pursuit of answers to listener questions prompted by other BBC programs. Among this month's topics on **Outlook** (Mon.-Fri. 1405, 1901*, 2305; Tue.-Sat. 0430**) is the legacy of Henry Ford (7th) and the fifth anniversary of EuroDisney (11th). **Pick of the World** (Mon. 0130, repeated Fri. 0630) returns for 13 weeks and offers a second chance to hear a segment of a BBC program you might have missed. For six weeks, Michael Kaye looks at the stories that lie behind the busy commercial facade of **The Streets of London** (Sat. 0130, repeated Mon. 0615 and Fri. 1515).

New Times: **Omnibus**—Mon. 0630, 1030; Thu. 0130. **Write On**—Sun. 1205 and 2105; Mon. 0305. Discontinued: **Network UK**, **Take Five**.

Media

New Times: **From the Weeklies**—Sat. 0030, 0715. **The Insider's Guide**—Fri. 1515#, 1730; Sat. 0145.

Popular Music

Jazz Expo (Sun. 0730, repeated Mon. 1130) seeks answers to the question, "What is this thing called jazz?". Malcolm Laycock guides. This is an eight part series that will be succeeded in June by a new half-hour program called **Jazzmatazz**, which the BBC is billing as a new approach to the presentation of jazz. A new eight week run of the heavy metal **Tommy Vance Rock Show** (Sun#/Mon. 1530) also starts this month. **The Vintage**

Chart Show (Mon. 0730, repeated Thu. 2330) revisits 1987, 1974, 1969 and 1961.

New Times: **A Jolly Good Show**—Sat. 1215; Sun. 0630. **Andy Kershaw's World of Music**—Sat. 2330 (also 1830 via African stream on 15400 kHz.). **Anything Goes**—Sun. 1130; 1930*. **John Peel**—Thu. 1530, 1930*. **Multitrack**—(Alternative) Fri. 1430, 1930*, 2330; (Hit-List) Mon. 1930*, 2330, Tue. 1430; (X-Press) Wed. 1930*, 2330, Thu. 1430. **Pop Short**—Sun. 2325. Discontinued: **Country Style**, **Folk Routes**, **Jazz for the Asking**, **Jazz Now and Then**.

Religion

New Times: **Focus on Faith**—Fri. 0230, 1130, 1930*. **In Praise of God**—Sun. 1215 and 2330. Discontinued: **Words of Faith**.

Science and Technology

Anatomy of Addiction examines why humans appear to be prone to addictions. (A four week series commencing on Sun. the 20th at 1701, repeated Tue. 0630, 1130.)

Science Update (Sun 1501#, repeated Tues. 1730, Wed. 1230, Thu. 1515#) is a new umbrella title encompassing five monthly science-themed programs. First, there's **Seeing Stars**, the monthly astronomy report. The second week features **Soundbyte**, which focuses on the Internet and other computer-related subjects. **Wildtrack**, on the third week, is a new monthly magazine for those interested in the natural world. And **Waveguide** returns with a look at international radio broadcasting on the fourth week of the month. Finally, when a month has a fifth week, **Science Feedback** answers listener queries about World Service science programs. **The Works** (Mon. 0530**, Wed. 1830*, Fri. 0130) is a new 30 min. program that looks at all things technological.

New Times: **Discovery**—Tue. 0530**, 1430#; Wed. 0130, Thu. 1030. **Health Matters**—Sun. 2230; Tue. 1230. **Science in Action**—Fri. 1430#, 1530; Sat. 0530, 1830*. **Science View**—Sun. 2305; Fri. 0455. Discontinued: **New Ideas**.

Sport

Football Extra is a new program designed to address the massive global interest in soccer. The program reviews the week's action, looks forward to the weekend matches, hears from the stars and profiles the key players. (*Fri. 1505*)

New Times: Sports International—Wed. 0630, 1130, 1430#. **Sports Roundup**—Sun. 0145; Daily 0315, 1745; Sun.—Fri. 1245, 2245; Sun.—Thu. 1505. **Sportsworld**—Sat. at 1405 (3 hrs. with news breaks on the hour.)

Youth

My Generation (*Sat. 1930**, repeated *Mon. 1430, Tue. 0730*) looks at the aspirations of the second generation of Indians, born in Britain of parents who migrated to the UK looking for work. **Touched With Fire** profiles four child prodigies, including Sonny Pike a 13 year old British soccer player who trains with Ajax Amsterdam. (*Series begins Sat 26th 1930**; repeated *Mon. 1430, Tue. 0730, Thu. 1615***.) **The Good Relationship Guide** is a new four-part series that seeks to steer young listeners through the issues that most young adolescents around the world face. (*Series begins Sat. 26th 1945**, repeated *Mon. 1445, Tue. 0745 and Thu. 1630***.)

New Times: Megamix—Tue. 1930*, 2330; Wed. 1430.

Radio Netherlands Documentaries

(0053 Thu./2353 Fri. on 6020/6165/9845; 0453 Thu. on 6165/9590.)

8th/9th—50th Anniversary Celebrations-Light Music and Jazz. Martha Hawley ruminates through the massive RN music library. 15th/16th—Gypsies in Holland. Helene Michaud's report on their fight for their rightful place in society. 22nd/23rd—Under African Skies. Jaldeep Katwala, RN reporter and Kenyan born, talks with Kenyan Asians about their pasts. 29th/30th—Violent Women.

Mindy Ran looks at the alarming rise in violent crimes committed by women in northern Europe.

Potpourri

BIG CHANGES are coming to CBC Radio in July and that means **RCI** will have big changes then as well. Drastic budget cuts will end programs like *Morningside* and *Sunday Morning*, among others. If you enjoy the current CBC fare on **RCI** and the **North Quebec Service**, you have fair warning: get your fill now...**NO ROOM** this month for the international holiday list, but be aware that **R. Bulgaria** will cover the run-up to crucial national elections being held mid-month and that the **BBC** will cover UK voting to take place in early May...**THE BATTLE** for **R. Australia** continues so far without resolution. If you haven't enlisted, do so now...**BILL BERGADANO** on rec.radio.shortwave reported that **DW** announced on 3/21 that *European Journal* will soon be replaced by a program called *Newslink*...**THE RECIPE** for Tomato and Beancurd Soup is featured on the *Cooking Show* (19th), the training of air stewardesses is the topic on *Listeners' Letterbox* (27th/29th), ancient history books from Wu State during the Three Kingdom Period are detailed in *Cultural Spectrum* (19th), the old Chinese tale about The Cowherd and the Girl Weaver known in the West as the stars Altair and Vega is featured in *Chinese Folktales* (12th), Mongolian folk songs are featured on *Music From China* (26th), and the *Song of the Week* (13th) is "The Love" which celebrates the love between children and parents, all this month on **China Radio International**...**JACQUES D'AVIGNON** reports that he has heard from a very reliable source that **RFI** will end the use of shortwave to North America completely and that this could (have) happen(ed) as soon as March 30.

Squeezed in all I could this month. Our discussion about shortwave service downsizing is deferred to next month. Until then, good listening! 

A Trip to Aparecida

by Pedro M. C. de Castro, Lorena - SP - Brazil

Introduction

Brazil is the largest Roman Catholic country in the world. There are religious celebrations in several cities, and the biggest one is the "Cirio de Nazare" feast, in Belem, State of Para.

Belem, however, is a big city with 1.3 million inhabitants, and the feast itself lasts only one day. What about a city with only 34,000 inhabitants which receives over 5 million visitors per year?

Where are the biggest Brazilian radio stations? In Brasilia, Rio, Sao Paulo, Belo Horizonte and other big cities, of course. But don't forget to include a small city in this list of giants. Take a look below to learn more about the phenomenon of Aparecida.

The Beginning

The first references on colonization of the site comes from 1640 (1). A statement from 1687, in a notebook of the Diocese of Rio de Janeiro, describes the Parish of Guaratingueta as a "village with 250 inhabitants and 61 houses".

Guaratingueta was a stop-over village for the travelers traveling to the gold mines of Ouro Preto, in Minas Gerais Province. In 1717, the Count of Assumar, governor of the Provinces of Sao Paulo and Minas Gerais, took a rest at the village with his retinue. The fishermen were charged to provide food for the

visitors, so they launched their boats on the Paraiba River.

The fishing was poor that day, so the three fishermen tried 3 miles upstream at the port of Itaguassu. At this site, the fisherman Joao Alves hauled in his net and found a little statue of Our Lady without the head. The next time he found the head of the statue, and soon he caught so many fish that the boat almost sank. This was the first miracle credited to the so-called Our Lady Aparecida (the Portuguese word for "Appeared").

Figure 1: The Old Basilica

The clay statue was made by a monk around 1650 in Sao Paulo, representing the Immaculate Conception, a popular devotion in Portugal. No one knows how it was thrown in Paraiba River.

Felipe Pedroso, partner of Joao Alves, took the statue to his house and started the veneration of Our Lady with his family and neighbours. In 1732, he moved to Porto Itaguassu and took the statue to its first shrine, which was built by his son Atanasio.

Travelers spread out the fame of Our Lady Aparecida and the pilgrims started to come. The people decided to build a bigger church in the top of a hill near Porto Itaguassu to shelter the statue. The church was opened in 1745 when the statue was brought in from its former site and the village of Aparecida was born, as a district of Guaratingueta.

Faith and Devotion Grows

Newspaper articles from Guaratingueta, Sao Paulo, Rio de Janeiro reported in the 19th century on the pilgrimage to Aparecida. The Frenchman artist Jean Baptiste Debret depicted the pilgrims in 1827, as well as other European artists, while journalists and scientists wrote references in their personal diaries. Some decades later, a new church became necessary, and a bigger one was opened in 1888, on the same place of the former one. It is known today as the "Old Basilica".

In 1895, the German Redemptorist missionary, Father Lorenz Gahr, wrote to a friend in Bremen, stating that Aparecida had 1,300 inhabitants and received 150,000 visitors per year, according to local newspapers.

The City of Aparecida...

Aparecida was a district of Guaratingueta until 1928, when it became an independent municipality and elected its first mayor. With an area of 60 sq. miles and at an elevation of 1700 feet above sea level, its present population is 34,000. Located on the highway connecting Sao Paulo and Rio de Janeiro, its distance to Sao Paulo is 110 miles and to Rio is 160 miles (2).

Although the Redemptorist missionaries once again noticed they needed a larger shrine as early as 1926, the site of the new church, the Pitas Hill, wasn't prepared until 1946. The first brick was laid eight years later.

Fifteen million bricks and 110 thousand cubic feet of concrete later, the shrine looks like a cross with 70,000 sq. feet of area and a central dome at 200 feet high. At the north side, a tower with 3600 sq. foot (60 x 60 ft), 17 floors and 300 feet high. The church is so large that the whole population of Aparecida can comfortably visit the church at same time. A viaduct, for pedestrians only, connects the old and the new Basilicas.

Figure 2: Radio Aparecida's QSL shows their home

Figure 3: The New Basilica. Radio Aparecida's antennas are on the hill behind the basilica, off to the right.

Pope John Paul II himself blessed the shrine in 1980, and now Aparecida is visited by more than 5 million pilgrims per year (3).

...and Radio Aparecida

The Vicar of Aparecida, Father Oscar Azeredo, was the first to ask for permission to set up a radio station in Aparecida early in 1936 (4). However, the Archbishop of Sao Paulo took 14 years to agree to the idea. The Basilica of Aparecida was allowed to request permission to the Federal Government only in 1950.

Radio Aparecida finally came to the air on Sept. 8th 1951, with 100 watts on 600 kHz. At first, the studios were installed in a building aside the Old Basilica but, four years later, they were moved to a bigger building, with 3 floors, near the old studios.

The first transmissions in the tropical bands began in 1952, and on other shortwave bands in 1954, reaching the whole country. A Club of Associates, now with 800,000 members, was founded in 1955, in order to join the listeners and proclaim the Gospel through the devotion to Our Lady Aparecida. The program "Clube dos Socios", on the air since 1955, is still among the most popular of

Brazilian radio. Another tropical band frequency was added in 1968.

For the second time, R A faced the need for bigger studios, so they moved to a brand new building in 1975. This new building is huge, with 30,000 sq. feet, 6 studios and an auditorium for 1,200 persons, near the New Basilica. Soon, the medium wave

channel was shifted to 820 kHz, and Frequency Modulation began in 1977. Today, the first site of R A is a book shop and the second one is the Police Station of Aparecida.

There are now 79 persons working at the station, and the frequencies and powers are: 820 kHz 10 kW, 5035 kHz 10 kW, 6135 kHz 25 kW, 9630 kHz 10 kW, 11855 kHz 7.5 kW and 90.9 Mhz 50 kW.

The goal of the programs on shortwave, with national coverage, is the catechism and evangelization. The programs on Mediumwave consist more of music and news, and the FM programs are almost essentially musical, aiming at specific listeners. The "Encontro DX", produced by Cassiano Macedo, is the only Brazilian program for DX'ers, and has been on the air since 1986. It is broadcast on Saturdays at 2300 UTC (2200 summer time) on medium and shortwave. Some news of the "Encontro DX" is sent to Radio Miami International and The Voice of Russia.

Radio Aparecida receives over 3,000 letters per month, from all over the country. Letters from abroad number about 15 to 20 per month, several from Germany, but also from Cuba, United States, Netherlands and Italy. Correct reception reports are confirmed with

a QSL card in English. RA is a non-profitable organization (a Foundation). Its goal is the promotion of citizenship, moral, cultural, religious, artistic, literary and scientific education of the Brazilian people.

The address of Radio Aparecida is Avenida Getulio Vargas nr. 185, Aparecida SP Brazil, zip code 12570-000, phone (012) 565-1133, fax (012) 565-1138.

Recent Achievements

Radio Aparecida is now producing a regional news program named "Sao Paulo no Radio", which is relayed by several other stations in Sao Paulo State, linked by satellite, forming the Rede Paulista de Radio (Paulista Radio Network). RA is also one of the headquarters of a national network, the Rede Catolica de Radio, with 120 stations in the whole country. The other headquarters of this network are Radio Difusora in Goiania, America in Belo Horizonte, Clube Paranaense in Curitiba, Maua in Sao Paulo and Cancao Nova in Cachoeira Paulista.

Two new stations were recently purchased by RA: they are Radio Educadora Santa Rita (ex- Radio Educadora Rural) in Fernandopolis, 1490 kHz, and Radio Difusora Monte Aprazivel, 780 kHz, in Monte Aprazivel, both in Sao Paulo State. These stations broadcast their own programs for 12 hours and relay RA for 12 hours per day.

Figure 4: The studios of Radio Aparecida.

Conclusion

Our Lady Aparecida is in the heart of every Brazilian. Many people are named Aparecida or Aparecido, alone or combined with Maria, Jose and other names. The name is also part of the Brazilian colloquial vocabulary, as an exclamation of surprise.

Through constant progress, keeping in close contact with his listeners, providing entertainment, the Gospel and the message of Our Lady Aparecida to the farthest corner of the nation, Radio Aparecida is partially responsible for this devotion. But in this case, not by miracle. Just by work and faith.

For those interested in knowing more about Brazilian radio, there is an excellent article named "Dxing Brazil - A North American Perspective", by John Fisher, published by Fine Tuning's Proceedings in 1989. Except for the name of the President, this is still a valuable article.

The author acknowledges the attention devoted by the personnel of Radio Aparecida during his visit, specially Mr. Eriberto Carvalho, speaker, and Father Joao Batista de Almeida, Administrative Manager.

Listener's Library

T. J. "Skip" Arey N2EI

P. O. Box 644

Waterford Works, NJ 08089

Internet: tjarey@mosquito.com

By the time you all read this the Tenth Annual Kulpsville Convention will be history. No doubt I picked up a few interesting items at the show that I'll share in a future installment of this column. Of course if you beat me out of anything at the silent auction or won any prizes that I would have prized, you should take a few minutes to write a review for your fellow NASWAn and send it in. But first lets see what's in the box under my desk that came courtesy of the American Radio Relay League.

THE ARRL ANTENNA COMPENDIUM VOLUME 5

with 3.5" Diskette

Edited by

R. Dean Straw, N6BV

200 Pages

\$20.00

The American Radio Relay League

225 Main Street

Newington, CT 06111-1494

ISBN 0-87259-562-5

All too many shortwave monitors throw up a piece of longwire and leave it there until the acid rains corrode it into oblivion. Such folks are missing out on half the fun of playing radio. Fiddling around with antennas is a cheap way to improve your chances of hearing that rare DX station you've been hunting for. Now that we are firmly into Spring, it's a good time to try hanging some new antenna designs to get ready for the next sunspot cycle.

Volume Five of the Antenna Compendium is a collection of 41 articles devoted to various aspects of antenna design and construction. While the applications listed are ham radio frequency oriented, most of what you will read is easily adapted to shortwave monitoring and VHF/UHF scanning.

This book shows the resourcefulness and creativity that makes amateur radio the great hobby that it is. In many cases, you will discover excellent antenna designs that, pur-

chased commercially, could cost hundreds of dollars. Instead you will find out how to brew your own with a trip to the hardware store and surprisingly few dollars in your pocket.

If your listening runs toward the tropical bands, you should take a look at adapting some of the designs shown for the 75, 80 and 160 meter ham bands. You can string some serious wire for these regions and create directional arrays that will fill your walls with NASWA award certificates. The book's consideration of "wire-beam" designs has a lot of potential for the serious shortwave monitor. One design that receives two treatments in this book is the "Half-Square" antenna. This unique design allows you to create a vertically polarized antenna for low band listening without the traditional need for great height.

If you have a bit of real estate or if you are planing a DXpedition, you will want to take a look at The N6BV 75/80 Mete Quad. This wire bean antenna can be scaled to any frequency you need and can create an excellent directional pattern. The is also the design of K4ERO's Stacked Double Zepp. This antenna draws heavily on existing shortwave broadcast technology to provide yet another unique antenna to go after those hard signals.

If you are interested in beam construction there are several articles that will point you to new thinking, particularly W5THT's uses of PVC plastic for antenna construction. Or, if you really want to shake up the neighbors, how about W8NWF's designs for HF Discones?

As a sideline, if you also monitor in the VHF/UHF spectrum, you will find a series of antenna designs worth considering to improve your ability as a scannist.

The book includes an entire section on antenna modeling and analysis that can be applied to many applications beyond the

designs within this book. Included with the text is an IBM-PC-compatible 3.5 inch disk containing a series of popular antenna development programs.

The latest volume in the ARRL Antenna Compendium series is a winner worth reading by any radio hobbyist who want to move beyond that simple longwire. Better yet, why not join the amateur radio ranks and see how some of these puppies work in transmit mode?

Speaking of which, the ARRL has also come out with a new training manual for folks who want to get the highest class of amateur radio license.

THE ARRL EXTRA CLASS LICENSE MANUAL FOR THE RADIO AMATEUR
Edited by Larry D. Wolfgang, WR1B
359 Pages
\$12.00

The American Radio Relay League
225 Main Street
Newington, CT 06111-1494
ISBN 0-87259-539-0

I sort of hung out at the Advanced Class level for almost fifteen years before I got up the nerve to take a crack at the Extra Class. What had always thwarted my efforts up to that point in time was that I tried to get by just memorizing the question pool. Finally I sat down and actually read the ARRL License Manual and LEARNED the theory that the question pool was based on. I walked out of the test site with a perfect score on Element 4B, but I also had internalized a great deal of radio knowledge that would serve to make me better in all my radio hobby pursuits. Sure, the League's manual has the latest question pool, it's in the back. But much more importantly it has page after page of study material and information that will allow you to breeze through the questions just as I did. Included are great studies of radio wave propagation, Digital mode operation, satellites, advanced electrical principles, practical circuits and antennas. Everything is presented in a friendly, easy to understand manner so you get a sound understanding of the ideas behind the questions. Even the dreaded math needed to get through the test is taught in a manner that will teach you

without making you break out in a cold sweat. If you're ready to go all the way in the amateur radio world, this book is the tool you will need. Oh yeah, there is that little matter of the IC code requirement. This book also gives you a few hints on breaking through the barriers that stand in the way of 20 wpm copy.

Okay, so you've got your ham license now its time to try one of its greatest challenges. QRP (low power) operation. To get there you will want a little help for a fellow NASWA member and a few of his friends.

QRP POWER

Compiled by Joel Klienman NIBKE
and Zack Lau KH6CP/1
\$12.00
The American Radio Relay League
225 Main Street
Newington, CT 06111-1494
ISBN 0-87259-561-7

As shortwave broadcast monitors, we are used to listening in on stations that throw a few megawatts around the world. Well how about sending out a signal that is just 5 watts? Or maybe a signal that is even lower power such as 200 milliwatts. We're not talking B.B.C. here folks, we are talking the greatest challenge in the radio hobby. QRP operation has grown by leaps and bounds in the past few years largely due to the fact that many very inexpensive transceiver kits have come on the market. QRP Power is a compilation of many recent articles from the pages of QST that trace this resurgence of interest in low power operation. AS you open the book you will find several article by NASWA's own Rich Arland K7YHA. Rich give the reader a clear understanding of the philosophy and practice of QRP. This is followed by a series of articles on how to get into constructing your own radio equipment. You see another aspect of QRP is that half the fun is building your own gear. From there, its right into a whole series of excellent QRP construction projects. If you never thought you could construct a working transmitter, take a look at WA3ULH's design. You will be able to construct a one watt transmitter right from the article. And remember, one watt is pretty respectable QRP power. There is a lot of fun wrapped up in the pages of this book. 

The Rotary Beverage Antenna

We interrupt our series on mobile SW listening this month to bring you some hot news from the NASWA Research Lab (NRL). The NRL always can be counted on to come up with some new innovation to enhance your radio listening. It does puzzle me, however, that they always seem to announce their most amazing developments at this time of year. Maybe it has something to do with those cold winter nights at their facility on the banks of the Potomac. The mobile SW listening series will continue next time with a description of several antenna options available to the mobile SWL.

The Beverage antenna has long been recognized as the best for Dxing the tropical bands. The Beverage provides directionality, reducing noise and interference arriving from undesired directions. Yes, the Beverage does require a good bit of real estate. A decent Beverage for the 90 meter SW band (3.2-3.4 MHz) should be at least 450 meters (or about 1500 feet) long.

The problem the NRL addressed in their research is a simple one. "How do you receive signals from different areas of the world without putting up a separate Beverage for each direction?". Listeners on the USA East Coast might need a separate antenna for each of Europe and the Middle East, Africa, Central Asia, South America, South Pacific and Eastern Australia, and the Far East. That's six different antennas adding up to more than a mile of antenna wire. The NRL's new invention allows reception

from any direction with only one length of antenna.

Our NRL engineers developed a Beverage antenna that can be rotated to point in any desired direction. A prototype is shown in the picture. The antenna is actually a large-diameter pipe that rotates around a central coupling device. This coupling contains a magnetically coupled matching transformer to which the feedline and a water supply connects. The feedline is direct burial coax similar to the RG-6 used for satellite receivers. The antenna is supported on triangular frames that in turn ride on rubber-tired wheels to provide insulation.

Rotation is accomplished by water-driven hydraulic motors. The antenna is actually a large diameter pipe through which water flows at high pressure. The water sprays out along the length of the antenna through small turbines to provide the basic motive force for each of the wheels. The water spray falls harmlessly to the ground where the moisture increases the soil conductivity and thus the efficiency of the antenna.

Moving water was chosen as the power source to eliminate a source of noise that would be present if electric or gasoline motors had been chosen. Water consumption only occurs while the antenna is moving. The antenna should only need to rotate once per day as the sunrise/sunset line moves around the earth. Cost of water will vary depending on your location.

NASWA's engineers found that spraying salt water considerably enhances the ground conductivity compared to fresh water, but good sources of salt water are hard to find in many areas. The Environmental Protection Agency has also raised objections to salt water runoff from the NRL antenna farm. The equipment has been designed to withstand the corrosive effects of salt water for ten years of normal use. There is also no reason liquid fertilizers could not be injected into the water supply to permit crops to be grown under the antenna.

Any Beverage antenna should be terminated at the far end in a 500 ohm resistor connected to ground. The termination absorbs energy arriving from the back of the antenna. Maximum front-to-back gain ratio can be achieved by careful adjustment of the terminating resistor value. The rotary Beverage uses a wire dragging along the ground at the far end. The contact with the ground is not very good but the resistance is in series with the terminating resistor so a few more ohms won't hurt much. The terminating resistance can be reduced to compensate for ground contact resistance. The purist could drive several stakes into the ground to permit a better connection at each favored direction but connection to the stakes would require a hike to the antenna each time the direction is changed.

This antenna is now being field tested at many rural locations. You might just happen upon one of our test sites the next time you are out driving in the country. If you do, stop the car and go over and take a close look. On second thought that might not be advisable. I have received word that due to budget cuts at NRL, they have been doing some of this research under contract to the government. Many of the receiving sites you will see are in fact government receiving sites disguised to look like working farms. We all know how nervous those feds get when you go snooping around their facilities. In fact tests are in process at many locations to phase together multiple rotary Beverage antennas into large phased arrays with correspondingly higher gain and directivity. Keep a lookout for these sites in your travels.

The design plans for building your own rotary Beverage antenna should be available from the NASWA store. Contact Kris Field at the address on the back cover of this magazine for pricing and delivery information. The store also sells a critical parts kit including pre-assembled hydraulic turbines, matching transformers, gear trains, rubber-tired wheels, irrigation pipe and direct burial coax. Sorry, this offer is only available to NASWA members. If you are reading this article on the ANARC web site, why not consider joining NASWA so you can help fund its many activities designed to enhance your enjoyment of SW radio. 

The Target HF-3 Communications Receiver

For some reason, the last few receivers that I've had the opportunity to review have followed the dictum that "less is more", some in terms of controls (the AOR AR7030) or in features (the Drake SW-1). This month's review receiver is a minimalist on both counts.

The Target HF3 is the model designation used by the UK firm of AKD for the receiver they distribute. Lowe Electronics designates the model they sell as the SRX 100. The price for the AKD version is 160 pounds, or about \$240 at current exchange rates. The Lowe Web page gives a price of \$240 for their radio. The review unit was loaned to me by NASWAN John Wagner.

Small And Simple

The HF3 is housed in a gray plastic case that measures 2 1/2 x 7 1/4 x 7 inches (HxWxD). No weight figure is given in the specifications, but my guess would be around a pound. There is a top-mounted 3 1/2" speaker. The front panel contains a non-illuminated LCD which displays the tuned frequency (to one kilohertz) and a bargraph S-meter. The front panel controls consist of knobs for Power/Volume, Clarify (fine-tuning for SSB reception) and Tuning. There are four pushbuttons for mode and memory function. That's it! On the back are a "barrel" jack for 12V DC power input, a 1/8" headphone jack, a RCA jack for antenna input (nominal impedance 70 ohms) and a attenuator switch. An AC adapter is included, although the one with the review radio was labeled as 230 volt input and was fitted with a UK-style three prong plug with an adapter for US outlets. I used my bench supply to power the review unit.

Current consumption is rated at 300 milliamps. A thirty foot wire with attached RCA plug is provided for use as an antenna.

The Specs

The HF3 covers 30 kHz to 30 MHz, without gaps. It uses the now standard dual conversion design with the first IF at 45 MHz and the second at 455 kHz. The main tuning is synthesized in one kHz steps, but the clarifier control allows adjustment of ± 800 Hz. The main tuning rate is dependent on the speed at which the tuning knob is turned—either 10 kHz, 100 kHz, 1 MHz or 10 MHz per revolution. This is pretty handy for scooting around the bands, since there is no keypad tuning. Sensitivity is rated at one microvolt (but the test parameters are not specified) and selectivity is given as 3.8 kHz for SSB and 6.0 kHz for AM (no skirt measurements are given and I could only find a single ceramic filter on inspection of the circuit board). The spec sheet states that AM detection is via a quasi-synchronous detector but no explanation of this is given in the manual. Audio output is rated at 2 watts.

Operation

On power-up, the HF3 tunes to the frequency that is stored in the single memory channel. The receiving mode (USB, LSB or AM) is chosen by the Up/Down Mode pushbuttons. The desired frequency is selected via the tuning knob and the volume is adjusted as desired. Pretty basic, eh? If signals are too strong, or if there is interference from local broadcast stations, the attenuator can be switched in. I found the audio quality to be

quite satisfying, probably due to the relatively wide bandwidth filter used in the radio. When I first used the radio, I thought that the sensitivity was poor, but I discovered that the adapter I was using for the antenna connection was not making proper contact. Repositioning the adapter cured the problem. The variable rate tuning is somewhat "twitchy"—sometimes I would shift the frequency by several hundred kilohertz when I only wanted to move it just a few kilohertz. The memory scheme used is somewhat annoying as well. Pressing the "RCL" button tunes the radio to the frequency stored in memory, but there is no way to return to the VFO frequency short of retuning the receiver.

Although AM reception was acceptable (although being able to select a narrower bandwidth filter when needed would be nice), SSB reception was less satisfying. When trying to use the ECSS technique to reduce adjacent channel interference, the receiver has to be retuned due to the way the SSB offsets are setup. This means that the operator cannot instantly switch between upper and lower sidebands to see which offers the best reception. More importantly, I was unable to easily adjust the clarifier control to get exact zero-beat—there seemed to be a residual "grumble" to the signal no matter how slowly I adjusted the Clarifier control. For actual SSB signals (such as hams), the clarifier worked much better, although the IF filter is too wide for more than casual listening on the ham bands. The audio quality on SSB did not seem as good as that on AM signals—I'm not sure whether this is due to distortion in the product detector or because of the time constants of the AGC system.

Portable Operation

John Wagner sent me the items he uses for SWL'ing from his car, namely a Palomar

Super Snooper whip antenna and a Radio Shack window antenna mount (Catalog No. 20-023). The antenna mount has a BNC jack and the Palomar antenna has a SO-239 connector, so UHF male to male and UHF to BNC adapters are also required to make this setup work. I powered the radio from a 12 volt lantern battery to avoid noise from the car's electrical system and did not make a ground connection to the car's body or chassis. I was quite surprised to find that this "lash-up" actually worked quite well for listening to the major international broadcasters. There was plenty of signal strength and no noticeable ignition noise. It was definitely a temporary setup as I just threw the radio and battery on the passenger seat. Tuning the HF3 while driving is definitely not advised, due to the variable rate tuning, which means the display, rather than the road, must be watched. I also did not test the antenna arrangement at highway speeds, but John tells me that he has had no problems. Where a similar setup might really shine is as a quick and dirty DXpedition—drive out in the country where the noise levels are low, pop the antenna on a window of the car and DX away!

Summary

It's hard for me to know what to say about the Target HF3. It certainly works well within its limits and it is certainly compact. However, it does have its limits, such as the lack of more than one memory, no keypad tuning, a single (and wide-skirted) IF bandwidth in AM mode and poor ECSS reception. There are several similarly-priced portables on the market today that offer more tuning flexibility and equal performance in a smaller package. The distributor's address is AKD, Unit 5, Parsons Green Estate, Boulton Road, Stevenage, Hertsfordshire, SG1 4QG, UK. The phone numbers are (1438) 351710 or (1438) 357591. 

FOR SALE: Kenwood R-5000 with superior YK88A1 AM Filter. In "like new" condition with manual. Only selling to buy a new receiver! Price is \$595 including shipping in the 48 states. Call Rick Bowers at (908) 654-1580 (evenings or weekends) or email to <rickbowers@worldnet.att.net>.

ANTARCTICA 15475.9 LRA36 Radio Nacional Arcangel San Gabriel, 20052048* with LAM music and ballads w/anmts by woman, talk by man in Spanish 2025-2035, canned ID by woman seemingly in English at 2043 and seemingly off mid-song during vocal by man at 2048. Mostly weak/fadey signal. Feb 15 * Vastly better signal next day from 2024 tune-in with clear ID anmt by woman in English in progress, then repeated in French at 2025. Travel talk in English at 2043, same in French at 2048. Full closing ID's at 2055 in Spanish, followed by English and French with fanfares mixed in. Upbeat closing signature song played in full to 2103, whereupon carrier was promptly cut. Fair to good signal all the way! Announces AM mode but this was actually USB+suppressed carrier. (16-Feb/ClarkCAN/Cumbre 127)

ARGENTINA No trace of LV19 Radio Malargue, 6160v or LRA6 Radio Nacional Mendoza, 6180, both checked during the second half of February, both stations are inactive due to transmitter problems, per to phonecalls to the technical departments. (Barrera-ARG)

AUSTRALIA Australia's communications minister, Richard Alston, has indicated that Radio Australia may survive in a reduced form despite a recommendation that it be closed to save money. Senator Alston said the government is keen to keep a radio presence in the Asia-Pacific region if a low-cost way can be found. However, he said a Senate inquiry ex-

aming Radio Australia will report back to parliament too late to be acted upon, just a week before the federal budget. (16-Mar/RA/BBCM)

Three world broadcasters have indicated they are keen to lease shortwave transmission capacity into Asia if Radio Australia is forced to cut its broadcasts.

Radio Australia's transmission manager, Nigel Holmes, says the Voice of America, the BBC World Service and Deutsche Welle have written to Radio Australia expressing interest in any spare shortwave transmission capacity. Mr. Holmes says this is despite claims by the minister for communications, Senator Richard Alston, that shortwave is becoming much less significant.

Mr Holmes says at a time when Australia is considering closing its international radio service, other countries are spending hundreds of millions of dollars to boost their coverage and signal strength in the Asia-Pacific region. (17-Mar/RA/BBCM)

1730-1830 Arabic 7695 3905-3955v

(BBCM)

CLANDESTINE - USA The RFA Mandarin service during its transmission from 2300-0000 has added 11970, this is from the VOA transmitting station in Delano, California. It's RFA's first use of a US based facility. VOA has not used California transmitters for broadcasts to China for many years, as better signals can be heard from the VOA relays in the Philippines and Thailand. RFA does not have permission of those two countries for access to those VOA relay facilities. (1Mar/Communications World/Ogrizek + Francis - AUS/EDXP 44/Padula-AUS)

The US government funded Radio Free Asia began broadcasting in Korean on 4 March. This is the fifth of seven planned RFA language services. RFA Korean is transmitted 2200-2300 on 7530, 9455, and 9650; 1530-1630 on 7520, 9955 and 11600. For the RFA Mandarin service, the Delano frequency at 2300-0000 has changed frequency, 11870 replaces 11970, and RFA Mandarin is using a Delano frequency from 1500-1700, it's 9805. RFA Mandarin has added its

third hour, 1600-1700, which time has recently vacated by VOA Mandarin in an agreement between the two stations. (8Mar/Communications World/Ogrizek-AUS/EDXP 44/Padula-AUS)

The RFA schedule is very dynamic! I have attempted to compile this composite schedule, integrating the recent changes made on 4 March, using data sourced to Nagoya DXers Circle, BC-DX, HFCC W96, and intuition!

HFCC skeds show freqs and languages, but omit all reference to sites and powers! Somewhere in there are Armenian relays! (Padula-AUS/EDXP 44)

COLOMBIA

H3100 HJZI, MCI Radio, Bogota, is gone. Not the slightest spur noted when checking. (24-Feb/Klemetz-COL)

H4449.3 Third harmonic of Radio Cocorna', 2330 with Catholic mass. Hetting Bolivia's Radio Estacion Frontera, 4449.9, which at this time carries a gospel prgr in Portuguese. (7-Mar/Klemetz-COL)

CONGO 5985 R.Diff.TV.Congolaise,Brazzaville 0500-0530 M in French reading news & comments; weak WYFR audible, growing stronger & almost swamping Congo in the end. Fair to weak. (Pijpers, March 14).

COTE D'IVOIRE "ELWA" has been applying for license to use SW from Abidjan as part of a consortium of Protestant groups, and the govt has virtually confirmed that the consortium will get the license. Though they have been applying for four years, and the govt has been slow to respond, the license has been "an inch away for some time" and could be in hand by March or April. "Everything is ready to roll" except the tower, which won't go up until the license is rcvd. However, it could be up in a few days, permitting test xmsns very quickly. Programming and staff are in the works. Again, not solely an SIM project, but they have been spearheading it. Part of setting up one stn for Protes-

tants, one for Catholics (already on the air), one for Muslims, in the Ivory Coast [not necessarily all on SW, I presume--JB]. (Interview with John Shay [sp?], Sudan Interior Mission/DXPL/NU/DSWCI DX Window)

CYPRUS

From: mustafa tosun, btt@cc.emu.edu.tr

To: Christoph Ratzer, ratzer@ping.at

Dear Mr. Ratzer,

You are saying in your message that you should be one of the first to detect Bayrak Radio II (Bayrak International) on SW. In fact, you are the very first person to report a reception after 14 January 1997, when test transmissions were started.

The transmissions lasted until 14 February. The HF Transmission equipment is being renewed lately. Therefore, it will take a few more months before regular transmissions begin.

Meanwhile, the utilization of a new frequency is being evaluated. May I ask you to supply me with any information you might have, on the spectrum of 49 m. band in your area? I would like to know the real situation in terms of available frequencies. Thanking you, (Ratzer/DSWCI DX Window)

(direct)

Deutsche Welle noted being reported as saying their Ext sces have now returned to the planned normal as transmitters in Kigali, Rwanda, and Trincomalee. Sri Lanka are fully operational after being targets in local civil strife. The need to press ahead with automation at these relay sts will mean fewer staff being sent from Germany. This move will figure well with management plans to cut costs which are needed due to reduced funding from the German govt. (Fitzsimons-UK/WDXC Contact/WWDXC/Bueschel-FRG)

Programs of private shortwaver West Coast Radio Ireland originate in the studios of Mid West Radio in Co Mayo (Ireland) and are broadcast via a 100-kW Deutsche Telecom transmitter at Juelich, Germany.

GREECE VOA relays cut, MW boosted. In response to the Albanian government's cut-off yesterday of the VoA's Albanian-language broadcasts on local stations, VOA today stepped up its MW broadcasts to the crisis-ridden Balkan nation. In addition to its two hours of daily Albanian-language broadcasts on SW, VOA may now be heard in Albania at 792 MW [via VOA's Kavala-GRC relay transmitter], from 0600-0630, and 17001730. (3-Mar/BBCM/AGDX/BCDX/EDXP 44/Padula-AUS)

GUAM Until the end of W96, KSDA has added 11895 2200-2300, replacing 9495. (George Jacobs and Associates/EDXP #45/Padula-AUS)

HONDURAS 4910 LV de la Mosquitia - Cumbre reported that this one was about to go back on the air a few weeks ago. I haven't heard anything, so I called the to see what had gone wrong. To my surprise, I was told that they had tested all 3 of the station's transmitters on the air and that they hadn't had any problems. I replied that I hadn't heard it in Colorado nor had I seen any logs of it. I was told that they had heard it in Mississippi (I am not sure if he meant recently or not). Is anybody hearing this station? The schedule I was told is the same as before, 2300v-0300v. (21Feb/DIRECT/Johnson/Cumbre 127)

INDIA AIR noted with two additional channels - 1330-1500 in EE to South Asia on 9545 // 11620 13710. Also 11715 added at 0130-0229 in Nepali // 3945 6045 7250 9550. (Alok das Gupn reactivated. First noted 26/2, sign-off time is now 1515. (6-Mar/Yamada-JPN/EDXP 44/Padula-AUS)

3290 Definitely AIR Gangtok in Sikkim is having problems. Not heard on many checks in February but heard on 18/2 at 1325 with Tibetan type music, again on 20/2 at 1520. However 22/2 not at all. This transmitter has been somewhat erratic thruout. This must be quite frustrating to DXers who go on DXspedition hoping to catch this out of many such. 22/2 Following Indian s.on with Interval signal and the usual procedures. (Goonetilleke/UADX/DSWCI DX Window)

Italian Radio Relay Service, Milano, summer transmission schedule: 050005307125 Sa-Su (Russian)

0500-0830 3955 Mo-Fr
0530-0730 3955
0730-1330 7125 Russian
1330-2000 3955
2000-2200 3955

Transmissions are in upper sideband mode, with reduced carrier, using 10 kiloWatts. (direct/EDXP #45/Padula-AUS)

According to the January issue of Adventist World Radio's listener newsletter "Current", the Italian Government has granted approval for a private shortwave station in Italy to Adventist World Radio. The bulletin, received March 10, via AWR-Asia, states approval was granted January 23, 1997. The station will be built on a farm 40 kilometers north east of Forli. Ground breaking is anticipated for late 1997, and completion is expected by the year 2000. (24-Mar/Ziolkowski/EDXP #45/Padula-AUS)

JAPAN NHK Radio Japan Z97 in English: Newly introduced services:

0600-0700 5975UK 7230UK 9835 12030 15230
1700-1800 7110UK
2100-2200 13630

English GS schedule changes: Usual Sackville-CAN 5960 kHz time shift to 0100-0200 (from April 7th). UK Skelton change 0500-0600 7230 (x6150). 0500-0530 13630 & 15230 (x9835&12000) kHz. Moyabi-GAB relay 07000800 15230 (x15165) kHz. GS deleted at 0300-0400, 1400-1500, and 2300-2400. (16-Mar/NHK RJ Media RoundUp/WWDXC/Bueschel-FRG)

KIRIBATI 9810U Radio Kiribati NEW FREQUENCY After several days of not understanding why we couldn't hear them on 9825, I rang them. According to station personnel, they moved here because listeners on Christmas Island complained of poor reception. Operating here with 1 kW, but only from 0530-0930 (not at other times Kiribati is on). Per monitoring, the English hour is at 0600 starting with R. Australia news. The constant cutting off of the transmitter, according to Valko, is probably a VOX feature on the transmitter that causes it to cut

off if no audio is detected. (Valko + Johnson-HI/Cumbre)

KOREA - NORTH 2349.5 KCBS Sariwon // 2850 at 1208. 4404.9 Radio Pyongyang Unlisted for this service, but heard in English at 1114. // 6575. Uses this channel for several hours. 5700 KCBS New Frequency? I dont recall this one listed anywhere. // 2850 as early as 0900. (Valko + Johnson-HI/Cumbre) [probably a harmonic - AQ]

KOREA - SOUTH RKI Seoul changes in English sce periode Z97 from March 30th, relay site changes only. Schedule of direct bcs fr Seoul transmitter remaining same. RKI via Skelton will be retimed from 1930 to 2100-2130, still on 3970 kHz. Sackville 1130 to be retimed at 1030-1100 on 11715 (x9650) kHz then. (16-Mar/RKI Feedback/WWDXC/Bueschel-FRG)

LAOS 6973v Luang Prabang The listed Nei Menggu that is suppose to operate around here was untraced, so if you here a station around here, you probably got this guy. Sked is *1030v-1400* and they run // to 6130 from 1200 (including the gongs) until about 1230. (Valko + Johnson-HI/Cumbre)

LIBERIA Liberian Communications Network was heard Feb 1 at 0715 in English with traditional music, ID and frequency anmt, citing 5100 and 6100 kHz. While the announced sked says they switch to 6100 at 0300, obviously this is not the case. (Sellers/World Radio Report - DXO/SerraIT)

MALAWI 5993.3 MBC heard at 0410 as well as 1805 when they had English news. Nothing heard on 3380. (Valko + Johnson-HI/Cumbre)

MEXICO 15120 XERTA (p) 1630-1730 Continuous salsa/tap crap music with no announcements of any kind. Signal is quite good, audio good, music selections do not compare to the great stuff on XERMX. This station could quickly undo the positive cultural image projected by R. Educacion, XERMX, and the old Radio Universidad from the University of Sonora, Hermosillo that provided the only source of off-air classical music to the southwestern USA for at least two decades. (25-Feb/Buch/Cumbre 127)

MOLDOVA Radio Moldova International in Romanian to N. America scheduled Mon-Fri 1230-1300 on 9400. (8-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

1500-1530	English	9720 12085
1900-1930	Russian	9720 12015

The Voice of Mongolia provides QSLs for every qualifying reception report, and 9 different QSLs are available. Reception reports and letters should be sent to the language sections (i.e. English section), Voice of Mongolia, C.P.O.Box 365, Ulaanbaatar 13, Mongolia. Two IRC's or 1\$ to cover postage expenses would be appreciated. I am the Mail Editor at the English section and would be very happy to assist you further. Thank you for your cooperation. (20-Mar/Batbayar-VOMongolia/DXW/EDXP #45/Padula-AUS)

A new Mongolian independent station has commenced operations on shortwave. It announces itself as "Radio Blue Sky" and has been heard from 1300 until sign-off at 1500, on 4850. Transmissions have included halfhour news segments in En produced by Radio Mongolia, and En language lessons. (NDXC/Padula-AUS/EDXP/Cumbre 127)

MOZAMBIQUE Radio Maputo, the external service of Radio Mozambique has this nominal schedule:

1100-1130	English	11835-anncd 11820-anncd
1800-1900	English	4855-anncd 3265-anncd

(BBCM)

As for Radio Mozambique's domestic services: The National Program is only observed irregularly on shortwave: Frequencies used in the past include (all variable) 11818, 7242, 6112, 5110, 4867 and 3210 kHz. Radio Mozambique also operates regional and provincial stations throughout Mozambique. Beira A prog. is heard on 3370v/6025v and Beira B on 3280v/9637v.

*English on Sundays (Grimdalen-NRK)

PAKISTAN 4790.5 Azad Kashmir Radio 1428 Koran, then talk by man. 1430 Chorus singing mentioning Pakistan and Kashmir again and again. Talk by man followed but didnt catch an id. 1459 type-writer theme music. 3 time pips and id "Yeh Radio Pakistan Hai". // 5027 at this time, but not after 1530. 1600 same type-writer music and pips, but English news now. // 5027 again but not // by 1639. 1643 id as "Program (Rubatan) Azad Kashmir Radio", 1700 just like 1500, carrying Urdu news from Radio Pakistan. (Valco + Johnson-HI/Cumbre)

R.Pakistan noted on the new 7235v(7231 7237 etc) // 9516 at 0030-0130 Hindi. (15-Mar/Dasgupta-IND/DSWCI DX Window). Radio Pakistan in English 1600-1630 replaced 9903 by v9513.6 kHz. Urdu 1700-1800 new 9485 (x11570.1). Turkish 1700-1800 new 9510.6 varies up to 9513.6 kHz. Indonesian 0900-1000 new v15026.3 (x15566.2) kHz. (1-Mar/PanlviewBUL/WWDXC/Bueschel-FRG)

PAPUA NEW GUINEA The NBC has struggled for funds and has been forced to commercialize their two national services, the Karai and Kalang services. For those that don't know the Karai service is now 24hours. Between the hours of 1200 & 1940 the Karai Service carries the Kalang Service. It appears that the provincial (Kundu) stations will in time carry commercials (Baxter/OZDX/Martin/Cumbre) Karai national service has extended its use of 9675 to 0900, formerly 0700. First noted on 8-March. ID's reference "Voice of Papua New Guinea." (18-Mar/Francis/EDXP #45/Padula-AUS)

3205 Radio Sandaun 1142-1202* Chit-chat-ty M's Pidgin w/ mx; ID at close and "Good Night Now" @ 1159; children's choir @1200 and then band anthem; off @1202 (8-Mar/Frodge/Cumbre)

3315 Radio Manus 1120 M preaching in Pidgin EE asking listeners to contact him. Pidgin ID at 1130, followed by more preaching. (11Mar/Cumbre)

3335 Radio East Sepik 1120 M & W w/ public svc annnments in Pidgin, then ID & pop mx. (11-Mar/Rausch/Cumbre)

3385 R. East New Britain 1100-1115 IS at 1100 followed by news in E until 1115, then back to island music which was DJed by female. (12-Mar/Hester/Cumbre)

PARAGUAY 5975 R. Guaira, regular every day. Sign on varies a bit, between 1000 to 1200. Often off on Mondays or at least s/on quiet late. Now also asking for report for the SW outlet: "Villarica como protagonista en el iter mundial, atraves de R. Guaira y sus ondas cortas, en 5975 kilociclos banda de 49m. Escribanos informando la calidad de recepcin. Nuestra direccin, Alejo Garcia y Presidente Franco, telefonos 2385 y 2130, Villarica Paraguay". I call the station, where they said that the transmitter used now is a new one, and power used at the moment is 1kW. The station said the SW outlet usually are un until 00:00. But I have often heard it until arnd. 01UTC. On: <http://swl.sds.se/hotnews.html> there are one audio file in WAV format of R. Guaira, recorded 6 of March at 1420 of the SW outlet. Paraguay changed to normal time (UTC -4) on March 2nd. (Iversen-PAR/DSWCI DX Window)

5976 R. Guaira 1159 Finally could get this one. Man asking for rpts, "...5975 Kcs, banda de 49 metros. escribanos reportandonos la calidad de nuestras emisiones." Low modulation and het, also R. Guaruja. Florianopolis on 5980 makes reception difficult. (19-Mar/NigroURG/DSWCI DX Window)

PERU

3234.8 Radio Luz y Sonido, Huanuco, 0026 with "La hora huanuquena", which is aired from 7-8 pm, speaker said. Ads for Comercial San Miguelito, wholesale agents for Cusquena brand of beer. (13-Feb/Klemetz-COL)

3283.3 Estacion Wari is audible most mornings from approx. 1000, rarely at night. First noted on this fq Feb 5, 2335 to past midnight, as reported in the Spanish language version of Dateline Bogota, Fechado en Bogota, Feb 12/97. Reactivated in June of last year, on 3280.6, the stn moved to 3281.6 on Oct 29 and is now to be found on 3283.3, probably at sufficient distance from Ecuadorian La V del Rio Napo, 3279.9, which would otherwise produce a nasty het in the stn's coverage area. (Klemetz-COL)

3339.95 R. Altura, Cerro de Pasco, Pasco Traditional-sounding music with multiple plucked string instruments and melodic vocal. Interrupted in mid-song by M 0152 with ID: "...frecuencia...Una sola...Radio Altura, un emisora al servicio del pais". (24Frb/Novello/Cumbre 127)

4004.9 Radio La Voz del Campesino, a new pirate station first noticed by FA, is located in San Miguel de El Faique, in the Province of Huancabamba, Department of Piura. The town is located at an altitude of 1060 meters. With a population of about 9000, it is a quiet and pleasant town, conserving the aspect of an old Spanish village with houses

roofed with tiles and straws. It is not a particularly interesting place for foreign travellers. The station uses a "FRANVEL" brand transmitter of an output of 250 Watts, which was formerly used by Radio Grau in Huancabamba. (TIN/EDXP 44/Padula-AUS) R La V del Campesino, a new station first noticed by Arrunategui, noticed in Bogota, 2355 until 0100*. No comms, only music, TC's and ID's (carefully avoiding info regarding the station QTH) plus two personal messages, one of which (inadvertently) revealed the probable station QTH, "en esta localidad de El Faique". Sked given at s/off as 2200-0100. Name of owner appeared to be Alberto Soto Santos. Not too bad a signal into Bogota; is on most nights, and DJ seems friendly with the people at Radio San Miguel de El Faique, the new one that took over last month after Radio Sensacion, on 6895.3. ("Alto Piura", mentioned by PFA as the QTH, is the general coverage area of the station. El Faique is in the mountainous area of Huancabamba province, which in turn belongs to the "departamento de Piura"). (18Feb/Klemetz-COL)

4420.3 Radio San Juan, unheard for a fortnight, now back Mar 2 with selection of tropical dance music, canned ID's and live TC's. S/off 0003* (Mar 3) with a long canned ID. (2Mar/Klemetz/Cumbre)

4567v Radio Gotas de Oro, Chiclayo, has certified my reception from last year (on 4524) by means of a letter. Letterhead shows "drops of gold" (liquid, not solid...) and signature is illegible. Secretary Celia Purizaca Suxe knows what DXing is about, so letters can be addressed to the station, in care of her, Calle Primero de Mayo 278, Urb. Urrunaga, Distrito Jos Leonardo Ortiz, Chiclayo. Return postage would be appreciated. A pennant is in the making, says Celia in a separate message. (Klemetz-COL)

5498.1 Radio Las Lajas 0048 Messages and comunicados. "Atencion en esta localidad de Lajas..." mentioning their usual slogan: "Radio Las Lajas la pionera del dial" (18-Feb/Rodriguez/Cumbre 127)

5575.3 R. San Juan, (Ten. Bagua Grande); 0205-0305 mx ID "Radio San Juan que transmite desde Bagua Grande (Creo entender Bagua..) mx ID "Radio San Juan, llegando a sus receptores ntidamente" px Boleros del Recuerdo. s/off 0300* (26-Feb/ArrunateguiPRU/Chasqui DX 94)

5645.9 La Voz de San Antonio, Bambamarca 0320 Andean mx w male in Spanish. "San Antonio" noted, still presumed. Unstable & weak signal, just above noise level. Still on at 0410. (26Feb/Pijpers/Cumbre 127)

5775.2 A new one is Radio San Juan, Lonya Grande, Provincia de Utcubamba, departamento de Amazonas, until s/off 0319 with NA. Studio address sounded like 28 de Julio 420. - Seems to s/on fairly late, around midnight. Speakers seems fairly confident, do not play hide-and-peek, and they do give their own names on the air. Lonya Grande is "la capital del cafe", it was said. They say they are on 1150 kHz during the day. (1Mar/Klemetz-COL)

6045.3 R. Santa Rosa, Lima; 1229-1300 ID "7 de la maana con 30 en Radio Santa Rosa.." nx sobre el proyecto de titulacin de los campesinos ID "En Radio Santa Rosa le presentamos el comentario de la semana" (26-Feb/Arrunategui-PRU/Chasqui DX 94)

6261.1 UNID Peruvian, Mar 16, from 0055 to past 0200 when weakening considerably. Annoying ORM from the Greek on 6260. Seems to ID as "JL / or: "JR" / Radio". Varied music and almost no ads, although I noted one for "Bar bodega Cucharon, Jr. Tupac Amaru sin numero". No clear indication of QTH. I haven't had anything on this channel for ages, and this stn does not seem to ID as Radio Juanjui'. (15-Mar/Klemetz/DSWCI DX Window)

6479.8 Radio Altura, finally taped good ID at 0112. Good s7 signal. Rapid fire speech, difficult to pick out IDs. Had been trying for more than a week on this one. At this time of the year the grayline is perfectly placed, and the signal peaks s9+ at sunset, drops in level about an hour later, then picks up again early evening. (10-Mar/Sundstrom)

6725.6 R. Satellite, Santa Cruz, Cajamarca 2355 Long lists of comunicados by M announcer, ID's interspersed along with telephone number. Occasional musical selections. Loud signal on all antennas, hard to believe this is 300w, per WRTH 97, tonight. (23-Feb/Novello/Cumbre 127)

6895.3 Radio San Miguel, San Miguel de El Faique also uses a "FRANVEL" brand transmitter of 250 Watts, which was formerly used by Radio Sensacion in Huancabamba. Until now, the station has not replied to my reports.(2-Mar/NozakiJPN/EDXP 44/Padula-AUS)

RUSSIA According to an E-mail from Khabarovsk, the Komsomolsk-naAmure station is active on the following frequencies: 5920, 6020, 6065, 9565, 9670 and 9675. No times mentioned and no information on whether they broadcast home or foreign service programs. (1-Mar/Ritola/EDXP 44/Padula-AUS)

4040 Evenkiyskaya GTRK Kheglen (Kheglen stands for Milky Way), Tura has local programs at 0100-0200, according to both listening and verification received today. V/S is B. Yuryev, Company Engineer. (14-Mar/Ritola/EDXP #45/Padula-AUS)

According to a verification from TRK Kabbalktelera-dio, Nalchik transmits in Kabardin on Wednesdays and Sundays and in Balkarian for fellow countrymen in the Near East on Thursdays at 1830-1900 on 1170, 5905 and 7130 Shortwave frequencies were said to be seasonal, these may already be summer frequencies. Listening observations in February gave MW frequencies 1089 and 1170 and a shortwave frequency of 6005 kHz. The V/s was Kamal Makitov,

vice chairman. (22-Mar/Ritola/EDXP #45/Padula-AUS)

Voice of Mediterranean frequency change: 7390 now replaced by new 12060 // unchanged 7440; 12060 signs on at 1930 with Voice of Russia German service, at 2000 into Voice of Mediterranean. Site: HFCC lists Almaty, but in fact these outlets may be from the Samara site. (28Feb/Lieberwirth-FRG/Ludwig/EDXP 44/Padula-AUS) 2000-2100 English, 2100-2130 French, 2130-2200 German (16-Mar/Sundstrom)

Voice of Russia is reducing its Russian language broadcast output, from 18 to 10 hours daily. Operational span now: 2100-0100, 0300-0400, 0500-0700, 1600-1800, 1900-2000. (8-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

Joe Adamov recently answered a listener's question on 'Moscow Mailbag' about the reduction in short-wave broadcasting by the Voice of Russia. Adamov said that VoR now had three times less transmission capacity to the United States. The Russian Ministry of Communications owned the transmitters, not VoR. (6-Mar/Matt Francis/EDXP 44/Padula-AUS)

News in English at the top of most hours, plus relays of RA/RNZ/BBCWS news. (BBCM)

SOMALIA has a pipe into Maui. The numbers at the end represent how I would rate reception of these compared to the other Somalis. All of these (including Hargeisa) are USB, plus carrier.

6543.8 Holy Koran Radio *1500 (1600 Fri)-1800* Varies widely, also heard on 6534.8 and 6570, but usually here. Closing announcements and Koran before close. transmitter Fming on at least one day. 6732 Radio Mogadishu Voice of the Somali Pacification*1500 (1530? Fri)-? Always faded out before foreign language segments started. Steady here.

6822 Radio Mogadishu Voice of the Somali Republic Weakest of the lot *1600?-1800*? seeming-

ly. Steady here. 6890 Voice of the Masses of the Somali Republic*1500 (1600 Fri)-? Co-channel PRC at first, but clear by 1700 when they seem to have news in Somali.

7537.7v Radio Hargeisa, a station I have dreamed about since 1976. Heard as early as 1640 fade in and usually till 1800* Ided by Valko one morning as Radyo Hargeisa and about a million mentions of Somaliland (the only time I slept during the whole Dxpediton) This one is constantly drifting and was as high as 7539 by sign off. There is also a steady het on 7535.4 so watch out. This guy is USB and carrier and is drifting rapidly, one had to constantly retune. (Valko + Johnson-HI/Cumbre)

SOUTH AFRICA The Stocks and Funds network was still not on the air in March. In Febr the company has not registered with the Atlanta Business Licencing Dept. Jerry Hoffman, station owner, was given a two year prison sentence in 1971 for a \$1 million fraud involving mortgage payments and barred from security actions in New York. He was declared bankrupt four years later. The company was evicted Jan 15th from studios at the Protestant Media Centre by court order for non payment of rent. Hoffman claimed Febr 20th they would be on the air in "a couple of weeks". (RNMN/WDXC Contact/WDXC/Bueschel-FRG)

TANZANIA 5985 Radio Tanzania in Swahili noted here at 0350 and 1800. News at 1800. Reactivated or just not many reports on this one? (Valko + Johnson-HI/Cumbre) S/off 2100* (12-Mar/Clemmitson/DSWCI DX Window)

THAILAND Radio Thailand now on new 9535, ex 7295, to Scandinavia EE 1900-2000, GG 2000, 2015 Fr, 2030 En, 2045 Thai. (2-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

6149.4 Royal Palace Station PRESUMED 1048 instrumental music, almost classical. Only fair, but clear. 3 minute long songs continued without a break. 1059 Very weak talk by woman, time pips but not sure if they were theirs. Blocked by *1100 KNLS on 6150. Improved by 1134 with light vocals, Carpenters tune, "A bridge over troubled waters", etc. 1157 brief talk by man (Thai) and then sax music (perhaps the King himself, I understand he is a sax player) and off at 1158. (Valko + JohnsonHI/Cumbre)

TURKEY Since 17/2, two transmitters at TRT's Cakirlar site are out of service, and TRT has temporarily stopped the SSB transmissions from Emirler (except English 6135 during 2300-0000), as well the Turkish program on 9460 to Europe during 2200-0800. Also, some programs have been transferred from Cakirlar to the Emirler site. Turkish on 15385 at 1700-1000 seemingly off. Night services in foreign languages are shortened to use a single transmitter only. German EMR 6035 LSB, English EMR 5965 LSB, French EMR 7240 LSB, are all OFF the air.

Turkish noted at 1800-2100 on 5980 6120 7110 9460 9560. Russian 1800-1900, Serbo-Croatian 1900-2000, both on 6135. German at 1830 on 5950 only, English follows at 1930 on 6000, French on 7255 and 7270 at 2030-2125. (25-Feb/Klink-FRG/BCDX/EDXP 44/Padula-AUS)

6900.09 Turkish Metrological Station (t) @ 0506 with Middle Eastern type chants. Into W anncr. Could copy this on Carolina 80M beam when my 40M dipole wouldn't hear it. The 80M Carolina Beam works better in most situations than anything I now have in the air. (18-Mar/Rippel/DSWCI DX Window)

7370 Turkish Police Radio 0745 Turkish songs, only one short announcement in Turkish at 0757 (9-Mar/Koutamanis/Cumbre)

UGANDA 4976 and 5026 are both on, but 5026 doesn't have English news at 0400 as listed. (Valko + Johnson-HI/Cumbre)

UNITED KINGDOM The BBC recently announced the successful completion of sale of its Home Service Transmission business to Castle Transmission Services for 244 million pounds. The proceeds of the sale will be invested in the BBC's transition to the digital age. Included in the deal are 500 staff and some 738 HST sites including equipment. The BBC is also proposing to privatise its World Service transmission business. Last November, Merlin Communications International, a management and employee buy-out team, was named as the preferred bidder for the WS business. The sale includes the WS program delivery service (67 staff plus access to the Bush House control room), WS transmission operations (270 staff) and operation and maintenance of seven overseas sites (but not the sites themselves which will be retained by the BBC and Foreign & Commonwealth Office), as well as four UK sites. The deal also includes commercial contracts for hiring out transmission capacity in the UK and/or overseas. (6-Mar/Matt Francis/EDXP 44/Padula-AUS)

The BBC Albanian FM relay has been discontinued, in favor of SW. BBC World Service is extending its SW broadcasts in Albanian following the closure of its FM relay yesterday (Sun 2nd March). The transmitter on Mount Dajti in central Albania was switched off after the declaration of the state of emergency throughout the country at 1630. From today there will be three daily SW transmissions to Albania from the UK and Cyprus. In addition to the usual transmissions at 0630 & 1800, the 1415 program, normally on FM only, is being switched to SW. Last month, the BBC extended the 1800 transmission from 30 to 45 mins on weekdays. BBC Albanian broadcast resumed in 1992 after 25 years off the air. The BBC Albanian Service can be heard at 0630 on 7210, 9915 & 11780; at 1415 15215 & 11680, at 1800 6050, 7210 and [cut off -AQ] (3Mar/AGDX/BCDX/EDXP 44/Padula-AUS)

BBC new frequency for GG to Europe 1630-1700 6010, parallel: 3955 1296 648. (2-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

URUGUAY

4620H CV154, R. Centro, Cardona, Dpto. de Colonia, (3x1540) 1147 Ads, promo, Gloria Estefan mix and anncr: "Seguimoscompartiendo la manana

en radio" Good/Fair. (8Mar/Nigro-Uru/DSWCI DX Window)

4641H CW116, R.Agraria, Cerro Chato, Dpto. de Treinta y Tres, (4x1160) 1037 w/ ID in progress: "...R.Agraria, desde Cerro Chato, Uruguay". Ancmt y male: "A partir de este momento cuando son exactamente las 7 - 37 minutos, ahora en R. Agraria, para todo el territorio nacional estamos dando comienzo a nuestro encuentro con la musica tipica y folklorica, juntos para compartirla aqui en el punto 1160 de su dial". Folk mx. (7-Mar/Nigro-Uru/DSWCI DX Window)

9595.1 R. Monte Carlo 0037 Thought to be this one with romantic folksounding vocals and announcements in Spanish by man and woman; seemingly an ad in there, too. Weak to fair level at first, though pounded by slop from BBC/9590 and (especially) Lisbon on 9600. Around 0050, suddenly dropped sharply in strength; still there after 0100 but completely unreadable. (16-Mar/Hill)

9650.2 CXA42, Em Cd de Montevideo, "la radio del carnaval", most nights between 2300 and 0030 when buried by carrier. Tough to read, mainly due to "low key" speaking habits, especially when reading ads ("frases"). Totally devoted to the coverage of carnival "murgas" and their performances; not even international football /soccer/ matches will make them change their minds. (Klemetz-COL)

USA VOA Hindi 0030-0100 is now using 6170 7295(ex 9650) 9650-THA (ex 11835). The new 7295 is co-channel with Radio Malaysia and also often by Pakistan 7290. (15-Mar/Alok Dasgupta-IND/Padula-AUS/EDXP #45)

(BBCM)

Shortwave station WRMI in Miami, Florida has received a construction permit for a new antenna beamed to North America. The new antenna -- a rotatable log/yagi -- has two beam positions authorized by the U.S. Federal Communications Commission. The first position is an azimuth of two degrees, which is centered on Toronto, Canada, and will cover eastern North America. The second position is an azimuth of 284 degrees, which is centered on the city of Hermosillo in northern Mexico. This position will cover western North America, roughly from Vancouver to Mexico City.

Jeff White, WRMI general manager, says that work has already begun on the new antenna, and he's hopeful that it can be on the air within the next few months or so if all goes according to schedule.

The FCC construction permit also allows WRMI to add a second 50,000-watt shortwave transmitter in the future. The first priority, however, according to White, is getting the new antenna up and operating. WRMI is currently operating a 50,000-watt shortwave transmitter on the frequency of 9,955 kHz with a corner reflector antenna beaming 160 degrees from Miami towards the Caribbean and Latin America. With the addition of the new antenna, WRMI will be able to provide virtually complete primary coverage of the entire Western Hemisphere.

The station is owned by Radio Miami International, a privately-owned company which is not affiliated with any government, political or religious organization. It sells airtime to a wide variety of clients who produce information, entertainment, political, religious, and cultural programming. (21-Mar/White/DSWCI DX Window)

VIETNAM Voice of Vietnam now on 9840 and 15010 (ex 12020), 27 minutes, EE to Far East 1330; Africa 1600; Europe 1800 1900 2030; FF to Asia 1300; FF to Europe 1830 1930 2100. (2-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

I was able to monitor the following Vietnamese regional stations and I recorded most of the sign-on/offers for them. The ids are my best guess, but if someone knows Vietnamese, I would be happy to share my tapes. 4677v *1000-1500* Lao Cau Poor modulation and just cuts the feed at sign off. // Hanoi 5924v from 1400-1500. 4739v *1200-1400* Son La, poor modulation. 5030 No chance to hear the reported Hmong service here, China dominates the freq with a weak Malaysia underneath. 5597v *10001500* Lao Cai // 6702 at times.// Hanoi 5924v from 1400-1500. Weak modulation. 6531 *1200-1400* Cao Bang Anthem type music at sign on. Modulation ok. 6548v *1030-1200* Yen Bai Anthem type music and alternating man and woman talking. Modulation ok. 6702v See 5597v. (Valko + Johnson-HI/Cumbre)

ZAIRE Radio Star has been renamed 'Voice of the People', noted on 5066 with news (also in French) 0430-0500 and 1500-1530. (8-Mar/Radio World/Van Oudheusden/EDXP 44/Padula-AUS)

5066 A radio station identifying itself as "Voice of the People" has been heard broadcasting from Bunia, in northeastern Zaire, using the same short-wave frequency (5066 kHz) used by the Bunia-based educational station Radio Candip (see below).

The following station identification in French was heard at 0430 on 18th Feb on 5066 kHz:

"Hello, dear listeners. Following is the local news from the Voice of the People broadcasting from Bunia, Ituri [northeastern Zaire] sub-region in the Democratic Republic of Congo. Bulletins will henceforth be broadcast from 1500 to 1530, resuming the following morning from 0430 to 0500".

The town of Bunia is in territory controlled by the Zairean rebel alliance led by Laurent Kabila.

The radio's use of the name "Democratic Republic of Congo" further suggests that it is rebel-controlled or affiliated.

"Voice of the People" is the same name used by a radio which has been heard broadcasting on FM from

Goma, and is also similar to the pro-rebel "Radio of the People" station which has been heard broadcasting on FM from Bukavu in eastern Zaire.

Following the station identification in French cited above, "Voice of the People" from Bunia broadcast a five-minute news bulletin in French, followed by repeats of the same bulletin in Swahili, Lingala and vernacular languages.

The radio then broadcast music interspersed with local public service announcements. At 0528 the radio broadcast the following station identification for Radio Candip, Bunia, followed by detailed schedules of educational programming for Radio Candip:

"Following is the schedule for Radio Candip broadcasts from 16th February 1997, Monday to Saturday."

(Radio Candip is an educational station operated by the Centre d'Animation et de Diffusion Pedagogique - Candip - in Bunia. For a report that Radio Candip had come under Zairean rebel control in December 1996.) (BBCM monitoring research 18 Feb)

ZAMBIA Roger Stubbe of HCJB shed some light on plans for an expansion of the station's broadcasting activities in Africa in an interview with Ken Macharg of the 'DX-Partyline' on 1/3. He said that an application was 'pending' for a 'middle-sized' station in Zambia. Possible languages for the station included Portuguese, English, French and possibly some Spanish as well as vernaculars. However, we shouldn't hold our breath - Stubbe indicated that things are moving very slowly, probably because of local sensitivities about basing an international SW station in the country. Although the privately-run 'Christian Voice' is already operating, its primary audience is domestic with programs in English only. Stubbe made reference to an application by another organisation in another country which had been in the works for some five years, and was still unresolved. (6-Mar/Francis-AUS/EDXP 44/Padula-AUS)

UNIDENTIFIED 2340 1137-1144 w/ CenAm ranchera ballads, Brief M/W drama type feature, then into marimba song. Faded quickly and did not come back in several checks. Probably 2x1170 harmonic. Maya de Barillas on 2360 was in very well at the same time, so good conditions into CenAm. (21-Feb/Moore) (21-Feb/Moore)

Pirate Radio Report

Chris Lobdell

P.O. Box 146
Stonington, MA 02180-0146
Internet: piradio@usaf.com

Hello and welcome to the April edition of THE PIRATE RADIO REPORT. I hope all of those of you who made it to the 10TH WINTERFEST in Kulpsville had a great time. I understand there were several FM and shortwave pirate signals to be heard throughout the festivities. Your editor hopes to be in attendance next year.

In this edition, we'll be presenting a book review on a new publication hot off the press co-authored by pirate veteran Andy Yoder.

Electra Radioship Project Is On Hold

As you may recall from earlier articles written in the subject that Allan Weiner in conjunction with Scott Becker was working on a radioship which was to be launched last winter. This project is currently on hold.

Anita McCormick, who is a friend of Weiner's, has told us that one of the major backers of the project was a preacher [no, not Brother Stair] that has been backing away from the deal. At the present moment they need about \$20,000 to \$30,000 US \$ to get the ship ready and on the air.

Your editor hopes to speak with Allan in the next few weeks, so hopefully I'll have some more information for the May issue of THE PIRATE RADIO REPORT.

Access To The Airwaves Due Out In April

The biography of Allan Weiner as told to Anita Louise McCormick should be out by the time you read this. We have to have a review for you no later than the June edition of this column.

Book Review

Pirate Radio Operations by Andrew Yoder and Earl T. Gray. [Loompanics Unlimited, soft cover, 1997, 364 pages].

Veteran author Andrew Yoder is no stranger to pirate radio. In 1990 he wrote *PIRATE RADIO STATIONS, Tuning In To Underground Broadcasts*. This book was the first to give a comprehensive history of shortwave pirate activity in North America. In 1996, Yoder's *PIRATE RADIO, The Incredible Saga Of America's Underground Illegal Broadcasters*, was published.

This book was basically an updated version of his first book and included information on pirate activity in other areas of the world. A CD was included which contained short audio clips from various pirates.

In Andrew Yoder's latest book, which is co-authored with the help of Earl T. Gray, the authors go beyond the history of pirate radio and take us into the mind of the pirate, into his studio and transmitter room and on location into the woods. If anyone out there was interested in setting up their own pirate station, this would be the book to help. The information is not technical, in that there are no detailed plans or schematics for construction of your own shortwave transmitter. That type of information will have to be found elsewhere.

There are chapters on outfitting a studio in which Yoder goes through the basics of telling us what a pirate studio should have for tape decks, mixers, turntables, microphones and how they should be located for ease of use.

Then there is a chapter for production. How do pirates put programs together? Yoder and Gray comment on various formats that range from a couple of guys playing music and BSing to the slick original comedy formats used by stations such as The Voice Of Laryngitis and K2000.

There is an excellent chapter on antennas. The techniques and formulas for building your own dipoles, verticals and the like are covered in detail, as is a chapter devoted to broadcasting on location in the woods, at a state park or behind your local K-Mart!

Yoder and Gray also give us a rather detailed behind the scenes look at the FCC, the equipment they use and DFing techniques employed in the past to track down pirates.

The book closes with a chapter on safety issues to make sure you don't electrocute yourself while tinkering with a transmitter. There are several reference lists in the back of the book to enable the reader to locate radio parts, tubes, etc as well as a complete list of North American and European maildrop addresses.

If you have more than just a casual interest in pirate radio, *PIRATE RADIO OPERATIONS*, is a book you should add to your radio collection. It can be ordered through Cabinet Communications, Box 642, Mont Alto, PA 17237. The price is \$18.00 plus \$2.00 shipping, PA residents please add \$1.20 sales tax. Be sure to tell them your read about the book here in THE PIRATE RADIO REPORT.

Radio Free Speech Calls It Quits!

Well, it was just a few months ago that Dick Pistek of The North American Pirate Relay Service [NAPRS] closed down after 4 years of operation, now we hear from Bill O. Rights that he will be leaving the air shortly. We'll have to say good-bye to the likes of Earl Pitts [not the accused CIA spy!] and the Reverend Holy Moley.

RADIO FREE SPEECH has been one of the most active stations over the past couple of years and has managed to make it to Europe, even though they only use 10 watts of power in the AM mode. Bill is currently airing his "Farewell Broadcast". If you hear it, the station will send you a special QSL in return. You can address your reception reports to either Box 109, Blue Ridge Summit, PA 17214 or Box 1, Belfast, NY 14711. This is one station that will be missed.

George Zeller To Speak In Toronto

Pirate DXpert, Monitoring Times editor and co-author of the annual PIRATE RADIO DIRECTORY will be a speaker at the ONTARIO DX ASSOCIATION'S convention in Toronto, Ontario. This will take place on May 3rd at the CBC Broadcasting Center, located across the street from the SkyDome and the CN Tower. For more information about this event, please contact Ken Alexander by email at: kena@interlog.com. [Info from Free Radio Weekly]

Loggings....

Gee, we only got one logging this month, from our friend down in Argentina, Gabriel Ivan Barrera, known affectionately as GIB to his DX friends. He heard New Zealand's KIWI RADIO on 7475 kHz USB on 9 March 1997 at 0701 UTC s/on. Programming consisted of relays of ROCK-IT-RADIO and RADIO MARABU.

Reception was poor in Argentina until 0831 s/off.

Pirate Poll!

Don't forget to either drop me a post card or email me with a list of your top three pirates. Also, if you have a particular show by a pirate which stands out as a favorite of all time, mention that as well. The deadline for entries is June 1st, so write today!

Until next month, Happy Pirate DX! 

English Schedules

Tom Sundstrom

PO Box 2275

Vincentown, NJ 08088-2275

Fax 609-859-3226

trs@trsc.com

Prepared March 28.

Albania: Albania has been in the news this past month. The country has been torn apart by riots caused by citizens affected badly by a failed pyramid scheme.

Radio Tirana was off the air for a few days in March due to the troubles in the country. Radio Tirana announced the following summer schedule for English broadcasts effective on March 30:

0145-0200 6115, 7160
0230-0300 6140, 7160
1845-1900 1458, 7270, 9570
2100-2130 1395, 7110, 9515

Further, we found the Web site of the Albanian Telegraphic Agency at <http://www.telpress.it/ata>. There are news stories by date, in English. If you have a decoder, ATA "prints" on 9133 kHz during the European morning and mid-day hours. The decoder settings are 50 baud and 500 Hz shift.

Australia: The Sydney Morning Herald of March 28 reports:

"The Government has agreed to a plan by the Minister for Communications, Senator Alston, to scale back Radio Australia to an English-language service delivered via the Palapa satellite and costing only \$5 million.

But while the decision will help the ABC meet the \$55 million funding cut imposed on it in last year's Budget and due to take effect on July 1, the national broadcaster still faces having to make substantial cuts to its domestic programming to meet the total savings."

Bulgaria: We have conflicting info for the NA service this summer as indicated by the "f" below. I would think the higher 11720 frequency would be used, but check it out for yourself.

North America:
0400-0500 11720/7480 9485
2300-2400 9435 11720/7480

East Asia:
1200-1300 13790

Europe:
1900-2000 9700 11720
2100-2200 9700 11720

(Bill Bergadano & Jim Frimmel)

Israel: Israel shifted to summer time in mid-March, and changed its frequencies March 30. Via Daniel Rosenzweig, the Kol

Israel English language broadcasts:

0400-0415 7465, 9435
1400-1430 15650, 12080
1900-1925 7465, 9435, 11605

Japan: Radio Japan's fiscal year ended March 31. Staff and program budget cuts are being implemented. The cause of all of this is the financing necessary for an international television service in Japanese and English.

Though the permanent RJ staffers will not be laid off, some or all freelancers will go. This includes Mari Kishi, the host of "Media Roundup". Another is a non-Japanese co-host of the weekday "Magazine Hour" shows.

The "Media Roundup" show ended March 25. "Magazine Hour" and the Saturday "This Week" shows will probably be affected as well. (tx Ian McFarland)

Lithuania: Radio Vilnius' new sked eff 3/30 is 0030-0100 UT on 5910 (Jim Frimmel).

USA: Glenn Hauser's "WORLD OF RADIO" has new air times on WWCR. The entire schedule is: Thu 2030 15685, Sat 0530 5070, Sat 1130 7435, Sat 1300 15685, Sun 0730 5070, Sun 0900 3210, Sun 2330 5070, Tue 1230 15685. These air times are effective April 6. (direct)

WHRI cancelled the UT Fri 2330 Cumbre DX show as it moves some programs around for the summer season.

After more than a decade of collecting English language schedule data and writing receiver control software, in March we closed this component of our business. Other obligations and time constraints made this decision necessary. Mark Fine (mfine@crosslink.net) of Fineware is continuing to provide schedules data via the Internet. No print version is available.

As we will not have the schedules data to continue this column nor the time to collect same, this is our last "schedules" column. Watch for an announcement from Dr. Harold Cones, NASWA's Managing Editor.

We continue to design Web pages for WWCR and other customers, and write for Australia's "Radio and Communications" magazine, Radio Netherlands and the WRTII.

Thank you for all your support these past years. I appreciate it.

QSL Report

Sam Barto
47 Prospect Place
Bristol, CT 06010

RADIO ABC/DENMARK - QSL

Dear Ed Rausch

Thank you very much for your reception report concerning reception of the International service of Radio ABC which we are pleased to confirm.

Date of reception: Oct. 13 1990
 Time of reception: 23:00 UTC
 Frequency: 7570 kHz
 Transmitter site: Bolshakovo, Kalingrad
 Power: 120 kW

Remarks: Very good reception for the time. The QSL card was picked up.

Radio ABC, P.O. Box 174, DK-8900 Randers, Denmark.
 Tel: +45 86401222 - Fax: +45 86405522 - E-mail: mail@radioabc.dk

SPECIAL OFFER: Your QSL Editor is offering foreign postage stamps to use as enclosures with your reception reports. We are offering 600 stamps for \$5.00; 1300 stamps for \$10.00 or 2000 stamps for \$15.00. With each \$5.00 order we will include absolutely free at least 300 US stamps, most of them will be commemoratives. That's a total of 900 stamps for \$5.00; 1900 for \$10.00 or 2900 for only \$15.00. Please try to include two or three dollars extra for shipping costs. Thank you....Sam.

ARMENIA: Radio Miternachtsgruss 15400 via Radio Intercontin-

Comunicando el Evangelio Completo!

via Edward Rausch

15 de enero 1997
comunicación p c
gonduras c a

que gatinado y piel oyente, Edward Rausch recibas las mas plicas peticiones de nuestro grupo pavorista. Estoy muy agradecido y al mismo tiempo emocionado, por sus reportes tan positivos, que confirman nuestra Señal en la onda corta. YO SOY WAYNE DOWNS pastor de la Iglesia y director de radio p c. Aquí en reguicalpa gonduras.

Te contare algo de gonduras de nuestro ministerio Famben. MISIONES INTERNACIONALES. Es una organización para el establecimiento de iglesias del Evangelio Trabajamos en Mexico, Cuba, Guy Guayana, Bolivia, parte de Africa, centro a merica y los estados unidos, nuestra oficina esta en "San Bernardino California. El misionero y presidente es el "ermano James Hlanck estamos "aciendo un esfuerzo para entrar en pluvielde costa Atlantica de pizaragua, con una "alhora del Evangelio completo este año 1997 robovia no hemos terminado de construir la Radio aquí en gonduras Tenemos una torre de 160 pies de altura por. la m por falta de fondos no lo hemos terminado gobernar. Tambien estamos autorizado para transmitir en 5000 gilo de potencia en la onda corta solo "estamos calliendo con 200 watto por ciertas limitaciones que esperamos superar muy pronto. Espero que estas informaciones le motivan a integrarse en el Grupo de piques que oran por nosotros y nos apoyan "concalmente con con lo que plice pueda pensársite.

gonduras es un pais de mas de cinco millones de ghitantes, mas del 65 por ciento desucha la Radio. los problemas son tipicos y similares a otros paises, familias divididas, mujeres solteras y abandonadas por falta de gobiernos fieles y responsables. niños en la Calle, y en los barrios. Problemas reconocidos muy serias, bastante bosque y tierra que todavía no ha sido Trabajada.

Estoy enviando al "alendario de "escritorio que espero que sirve para usted se guerdo de nosotros, en sus paciones y podemos mantener lasos de pialista directos de las cartas.

Sinceramente,
Wayne Downs

Scoreboard

Jerry Lineback
220 West Third
Garnett, KS 66032

Greetings and welcome to the SCOREBOARD. The SCOREBOARD is a quarterly feature of the NASWA JOURNAL. In it, DXers, from beginners to seasoned pros get to share their progress in the hobby. C/H = countries heard and C/V = countries verified. Country counts should be made according to the NASWA Radio Country List. You must update at least once a year to remain on the SCOREBOARD. When updating, please update all totals. The SPOTLIGHT this quarter is on Europe. Welcome to new contributors and thanks to all who support the SCOREBOARD by listing your totals. Next deadline is May 15 for the June issue. The Spotlight then will be on North America.

For those interested, I can be reached by E-Mail using
jalinebk@kanza.net 73 JL

The 10th Winter SWL Fest has come and gone. More than 150 folks attended, and the usual great time was had. I enjoyed meeting many of you as you visited the NASWA table, and am already looking forward to next years gathering.

The deadline for next months contributions will be May 1st. Please remember to mail your contributions early. Items received after the deadline will be held over for the following month. The normal 10th of the month deadline schedule will resume in June.

73's till next month.

Thanks to all including first time contributor GIGI LYTLE. This
 column should give you plenty of target stations to go after. Next
 deadline in Manitowoc will be April 18. Hope everyone had a Happy
 Easter.

This month we had contributions from 11 states, 1 Canadian province
 & 4 countries. I'm surprised at some of the LA stations that are
 being hrd in the evening.

FOR SALE: 1962 National Radio NC-190 general coverage receiver (with
 manual), has both Ham and International Broadcast bandspread fine tuning
 feature. I'm the second owner, and this classic tube set is in very good
 working condition. I hate to part with it, but I'll sell it for \$175 including
 shipping in the 48 states. Call Rick Bowers at (908) 654-1580 (evenings or
 weekends) or email to <rickbowers@worldnet.att.net>.

TRANSMITTER DOCUMENTATION PROJECT

For the 4th year now, detailed information is available about transmitters used by shortwave radio stations around the world.

TDP SW-97 -- the "Transmitter Documentation Project" -- has just come off the press in its fourth edition. TDP is the result of more than 10 years of research by Belgian DXer Ludo Maes, with the cooperation of well-known radio personalities, international organizations, publications, DX clubs and programmes, transmitter manufacturers and the radio stations themselves.

TDP has been expanded by another 12 pages to an 80-page booklet listing shortwave broadcast transmitters worldwide, arranged by country. Each listing indicates the name of the station, transmitter site, geographical coordinates and call-sign. It also shows the number of transmitters at the site, their power, manufacturer, type number and year of installation and year out of service.

This year, a lot of information on shortwave transmitters from Central and South America has been added, thanks to the collaboration of Takayuki Inoue Nozaki, a real expert in the field. Certainly an improvement over last year's edition is the addition of a column with the transmitter's call-signs and the spill of the "year of installation" column into a column "year in" and another "year out". Furthermore, a number of new shortwave transmitters have been added and the historical data updated.

This informative publication also contains a list of shortwave transmitter manufacturers and their headquarters, plus statistical breakdowns of the number of shortwave transmitters in use around the world, grouped by power level, country and manufacturer. An article about the history of a transmitter manufacturer (Omniltronix) and an article about Skywave 2000 by Thorncast concludes the booklet.

TDP is read year after year by radio stations, transmitter manufacturers, radio consultants and engineers, as well as by the dedicated radio hobbyist.

TDP, the "Transmitter Documentation Project" has recently begun a web-site as well. Please have a look at <http://www.ping.be/tdp>. This service has just been started but it will be expanded soon.

To order a copy of the TDP SW-97 -- the "Transmitter Documentation Project" -- send the appropriate amount to one of the following distributors:

Attention Radio Collectors!

RADIOS BY HALLICRAFTERS

by Chuck Dachis

Covers every known Hallicrafters model and accessory. A comprehensive history of the company is provided, repair methods are discussed, and all the units are pictured and listed in almost 700 photographs. Technical specifications are provided in detail for each model, along with dates of production, customer options, color and design variations, tube types and more. Absolutely indispensable for the Hallicrafters collector. A current price guide is included. 224 pp. Order # S14401 GILFER PRICE: \$29.95

THE ZENITH TRANSOCEANIC

by John H. Bryant and Harold N. Cones

With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, "The Radio Professors" Bryant and Cone present the fascinating stories of the development and use of the Trans-Oceanic throughout its forty year life. A wealth of never before published photographs, documents, and information concerning these fascinating radios, their collection, preservation, and restoration. 160 pp.

Order # S14400 GILFER PRICE: \$24.95

RADIO RECEIVER:
Chance or Choice

By Rainer Lichte

RADIO RECEIVER: CHANCE OR CHOICE

MORE RADIO RECEIVER: CHANCE OR CHOICE

by Rainer Lichte

A two-book set covering all of the great receivers from the 1970s and 1980s. Book one reviews 75 receivers from the past 20 years, including the classics: Yaesu FRG-7, JRC NRD-505 and NRD-515, Drake SW4 and R7, and more. Book two covers later receivers like the Kenwood R-5000 and JRC NRD-525.

Order # G01402 GILFER PRICE: \$12.95/pair

Special offer for NASWA members: Order the Hallicrafters and Zenith books together and receive both Chance or Choice books FREE!
