## NEW BOOKS WE LIKE!

**ON THE SHORTWAVES  
1923-1945**

By **Jerome S. Berg**. Here for the first time is the complete history of the pioneer days of shortwave broadcast, from the early concepts of Marconi & Armstrong, through the Golden Era of the 1930's and finally through World War II. A beautiful, fully illustrated hardcover reference for every SWL. *McFarland* 272 p. Order #0067 ..... \$39.95 (+\*2)

**A DXER'S  
TECHNICAL GUIDE**

By **N. Hall-Patch**. Here is a unique compilation of technical information primarily for the medium wave DXer. Extensive coverage of receivers, accessories, MW antennas (including loops) and circuit modifications. This book is crammed with info simply not found anywhere else. ©1998 I.R.C.A. Third Edition 155 p. Order #3981 ..... \$11.95 (+\*2)

## DRAKE

### SW1

- Full Coverage
- LW/MW/SW
- Digital Readout
- Keypad Entry
- 32 Memories
- RF Gain

The Drake SW1 sets the stage for worldwide shortwave listening with ease, simplicity and clarity. Coverage from 100 through 30000 kHz provides solid coverage of longwave, medium wave and shortwave in the AM mode (no SSB). This makes it an ideal broadcast receiver for the desk or bed-stand. Tuning is a snap via the keypad, manual tuning knob, Up/Down buttons or 32 memories. The huge LED display features 1 kHz readout. Antenna input is via a 50 ohm terminal or SO-239 jack. A 1/8" mini jack is provided for use with earplug or headphones (not supplied). Operates from 12 VDC or supplied AC adapter. Order #1100 \$249.95 Sale \$199.99 (+\*7 UPS)

### NRD-545 DSP

The new Japan Radio Co. NRD-545 DSP is the most sophisticated receiver ever developed for the hobby market. Please call to receive full technical details and pricing.

## SONY ICF-SW07

Sony changes the shape of worldband radio with the introduction of the ICF-SW07. Don't let the diminutive size and different shape fool you. The ICF-SW07 is packed with features and performance. Frequency coverage is 150 to 29999 kHz to include all longwave, medium wave (AM) and shortwave frequencies. FM stereo is provided to the earphone and line out jacks. The dual conversion shortwave circuit supports 1 kHz readout for precise tuning via the up/down buttons, scanning or 100 user-defined alphanumeric memories. A new feature called *SW Station Call Tuning* (VOA/BBC/DW/Other) automatically chooses frequencies used in your time zone from the removable ROM data module. Other refinements include: synchronous detection, single sideband reception, tone switch, lock, 24 hour clock timer, sleep timer, variable attenuator, external antenna jack and backlit display. Supplied accessories include: carry case, AN-LP2 active loop antenna, Sony Wave Handbook, AC adapter and stereo earphones. Requires two AA cells (not supplied). Silver and gray case. 5.4x1.3x3.6" closed. Order #0007 419.95 (+\*8)

### Shortwave Receivers Past & Present 3rd Edit.

This huge 473 page guide covers over 770 receivers from 99 manufacturers, made from 1942-1997. Entry information includes: receiver type, date sold, photograph, size & weight, features, reviews, specifications, new & used values, variants, value rating & availability. 120 new pages. Become an instant receiver expert! #0003 \$24.95 (+\*2)

● **Passport To World Band Radio 1999 Edition**  
Everything you need to know about when and where to hear the world! The #1 SW guide. #1000 \$19.95 (+\*2)

● **World Radio TV Handbook 1999 Edition**  
All shortwave broadcast stations organized by country with schedules, addresses, power, etc. #2000 \$24.95 (+\*2)

● **Pirate Radio By A. Yoder With audio CD!**  
Here is the incredible saga of America's underground illegal broadcasters (with audio CD). #3000 \$29.95 (+\*2)

● **Worldwide Aeronautical Frequency Dir. By R. Evans**  
The definitive guide to commercial and military, HF and VHF-UHF aeronautical communications including ACARS. Second Edition. 260 Pages. #0002 \$19.95 (+\*2)

● **Joe Carr's Receiving Antenna Handbook**  
Arguably the best book devoted to receiving antennas for longwave through shortwave. In stock. #1111 \$19.95 (+\*2)

● **Shortwave Listening Guidebook, 2nd Ed. By H. Helms**  
This noted author provides understandable information on all aspects of shortwave listening. #2001 \$19.95 (+\*2)

● **Discover DX'ing! By J. Zondio New Second Edition!**  
Hear distant AM, FM and TV stations. #0018 \$5.95 (+\*2)  
\* Please add \$2 per title for surface shipping.

### UNIVERSAL M-450

The Universal M-450v1.5 reader copies: Baudot, SITOR, FEC-A, ASCII, SWED-ARQ and Weather FAX (to printer port) plus the ACARS aviation teletype mode. Features a big two-line, 20 character LCD and bidirectional parallel port. Operates from 12 VDC or supplied AC adapter. U.S.A. #0050 \$399.95 (+\*8)

Universal Radio's 1999 Catalog covers everything for the shortwave, amateur and scanner enthusiasts. With informative photos and full descriptions. To request your free copy please call toll-free:

1 800 431-3939

To help celebrate the 25th anniversary of the Ontario DX Association ("ODXA"), the ODXA announces a special essay contest. Radio listeners around the world; listeners of international shortwave, medium wave, FM, scanning, amateur radio; listeners of all ages and levels of experience; all are invited to participate. The ODXA is looking for essay's on the following topic: "Radio in my life." They want to know about the importance of radio to you, how it has contributed to your life, why you love radio, etc. They want you to share your emotions and passions with other radio listeners around the world. Length: up to 1000 words (approximately 4500 characters in computer word processor file). All essays will be published in a booklet to be available at Radio Fest 99 (see the Calendar of Events for further information), September 24-25 in Oakville, Canada. All entrants will receive a complimentary copy of the booklet. Copies will also be made available to other radio clubs, publications and international radio stations, as chosen by the Ontario DX Association. Prizes: first prize will be a portable shortwave radio; four runner-up prizes will be awarded and will be the winner's choice of the 2000 Passport to World Band Radio or the World Radio TV Handbook 2000 edition. There is no charge or fee to enter. The contest is open to anyone, anywhere in the world. Entries must be submitted by e-mail or by printed copy. Printed copy must be typewritten. All entries become the property of Ontario DX Association. Essays must be received no later than September 1, 1999. E-mail to: dxontario@compuserve.com or mail to: Ontario DX Association, P.O. Box 161, Station A, Willowdale, Ontario M2N 5S8, Canada. Good luck!

### ANARC SWL Ham Net

Dave Kirby and Al Quaglieri, net controls for The ANARC SWL Ham Net, have announced that the net has gone on summer hiatus. Check-ins have been down for some time, and Dave and Al felt that they weren't likely to pick up during the summer. In the mean time, you can find many of the regulars from the net on IRC chat channel #swl. Dave and Al hope to bring the net back in September or October. Watch <<http://www.n1dk.com/>> for more information.

Also from the ODXA is word of a new location for their Internet web site at: <http://www.odxa.on.ca>. You will be able to find the usual features at this new, convenience simple address.

Speaking of new Internet web site locations, Ludo Maes informs us that his Transmitter Documentation Project has a new e-mail address and URL. You can reach him at E-mail [info@transmitter.org](mailto:info@transmitter.org) or on the web at <http://www.transmitter.org>.

Next month is the annual Adventist World Radio DX Contest. This year's topic is the "World's Largest QSL Collections." This annual event is part of the Wavescan DX program. They are also asking the question, "What is your longest wait to receive a QSL?" It is not necessary to own a large QSL collection to enter this contest. If you have one QSL, you may enter. The winner will receive the 1999 Bronze Medallion and a copy of Jerry Berg's new book, *On The Shortwaves*. All entries must be postmarked in Septem-

Our Motto is - "Unity and Friendship"

## Contribute!

Send your loggings and QSL information off to our Distributing Editor, **Fred Kohlbrenner** (2641 South Shields Street, Philadelphia, PA 19142). He will forward them to the appropriate editor. Remember, Fred has now expanded his business to include QSL report information and totals for the **Scoreboard** column. He can also be reached through the Internet at: [fkohl@ix.netcom.com](mailto:fkohl@ix.netcom.com).

ber, 1999. Part A of the contest requires counting your QSL collection and supplying the number of verifications. Part B asks for your longest wait and from what station to receive a particular QSL. Part C asks you to submit 3 radio cards while Part D asks you to submit at least one reception report on an AWR transmission. A full information sheet

is available from AWR International Relations, Box 29235, Indianapolis, IN 46229 for a self-addressed, stamped envelope.

That's it for this month. Enjoy this month's edition of the JOURNAL; it's another good one.

## Musings

*This column provides a forum wheras members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are are soley those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email: [rdangelo3@aol.com](mailto:rdangelo3@aol.com).*

**Maryanne Kehoe** [atlsvo@webtv.net](mailto:atlsvo@webtv.net), Atlanta, Georgia

**ARE WE WELCOME?** After this weekend, I am beginning to wonder.

In the course of my listening activities, I sent an email to a well-known SWL site op, asking some sincere questions regarding some problems I was having logging in to his site. He is someone that knows me as I know him, and I am in the habit of asking questions to clarify something that may be unclear to me at that moment.

The email came back titled "Dear Sir or Madam". At first I thought it was one of the many spams that I get on a daily basis, but upon further examination, it was the site op's response, albeit in a very condescending tone, in response to the questions I had.

This is a topic that comes up from time to time amongst those of us female SWL's that are active and out there. There are not many of us around. In fact, a friend of mine and I tried to name 10 prominent female SWL and DX'ers—with the goal of reaching #10. Both of us couldn't. We got stuck somewhere between 6-8 folks. Then the topic started to drift to some of the attitudes we have encountered in the course of our DX activities—some subtle, some not too subtle, some that you can't mention in a family publication.

Now, I am not talking about a guy that has one too many in the hospitality room at Winterfest and starts mouthing off about something or another. That is to be expected. What I am referring to are some DX'ers, who by their demeanor, body language, or electronic communication, are telling us ladies: "you aren't welcome here."

## Calendar Of Events

**Aug 7 Meeting.** ASWLC. 12 noon to 4 pm, 16182 Ballad Lane, Huntington Beach CA 92649. For further information, contact Stewart MacKenzie WDX6AA at (714) 846-1685 or wdx6aa@aol.com.

**Aug 20 Meeting.** Philadelphia Area NASWA Chapter. Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 610-446-7831.

**Aug 20 Meeting.** Boston Area NASWA Chapter. The Lexington Club, Rts. 4 & 225, Lexington, MA at 7:30 PM. The location is 1/4 mile west of Rt. 128, Exit 31. For more information contact Paul Graveline at 978-470-1971 or Internet: 74007.3434@compuserve.com. The URL for the BADX guys is <<http://www.anarc.org/naswa/badx/>>.

**Sep'99 Convention.** NRC Annual Convention will be held September 3-6, 1999 at the Holiday Inn in Bridgeport, WV (100 Lodgeville Road, Bridgeport, WV); call 304-842-4635 for reservations (\$70.85 per room if made before August 13<sup>th</sup>). Registration fee is \$35.00 prior to August 1<sup>st</sup> and \$40.00 thereafter. Send registration fee to William Swiger, One Casey Lane, Bridgeport, WV 26330 (304-842-4635).

**Sep 10 Meeting.** The Tidewater SWL's meet at 6:30 PM. For more information plus meeting location contact Joe Buch at [joseph.buch@dol.net](mailto:joseph.buch@dol.net)

**Sep 10 Meeting.** The Cincinnati/Dayton Monitoring Exchange (MONIX) meet at the Lebanon Citizens National Bank on U.S. Route 42 in Mason at 7:00 PM. For more information contact Mark Meece at 513-743-8089 or e-mail at <[mmeece@siscom.net](mailto:mmeece@siscom.net)>. For additional information about MONIX, check out their web site at <<http://www.siscom.net/~mmeece/monix.html>>

**Sep'99 Convention.** Ontario DX Association will hold Radio Fest 99 from September 24-26, 1999 at 1999 at the Ramada Inn & Convention Center in Oakville, Ontario. Radio Fest 99 will look at "Where we have come from in radio's past", "Where we are today", and "Where are we going in the future". There will be exhibits from equipment suppliers; clubs; technology from yesterday, today and tomorrow; plus tables of used equipment for sale. Hotel reservation can be made direct with the Ramada Inn by telephone (905)849-5950, toll free 1-800-357-0880, Web [www.ramada-oakville.com](http://www.ramada-oakville.com). A special rate of Cdn\$82 per night for Radio Fest 99 is available. Further information on Radio Fest can be found at: <<http://www.durhamradio.com/odxa/>>; or E-mail: [odxa@compuserve.com](mailto:odxa@compuserve.com), or by mail: Ontario DX Association, P.O. Box 161, Station A, Willowdale, Ontario M2N 5S8, Canada.

**Sep'99 Contest.** AWR Contest. Largest QSL collections, long delays in receiving a QSL, and QSL cards from the old AWR unit in Africa. Details available for a SASE from AWR International Relations, Box 29235, Indianapolis, IN 46229.

**Mar 10-12, 2000 Convention.** The 13th Annual Winter SWL Festival will be held at the Kulpsville Holiday Inn (Exit 31 on the Northeast Extension of the Pennsylvania Turnpike) on 10-12 March 2000.

**Mar 19-21 Contest.** 2000 North American DX Championships. For further information you can send a self-addressed stamped envelope to 2000 NADXC, c/o Dr. Harold Cones, 2 Whits Court, Newport News, VA 23606. Rules will also be posted eventually at <<http://www.anarc.org/>>.

**Sep'00 Contest.** AWR Contest. Number of different QSL stamps in the listener's collection. More details to follow.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: [rdangelo3@aol.com](mailto:rdangelo3@aol.com)) or Ralph Brandi (Internet: [ralph@brandi.org](mailto:ralph@brandi.org)).

It's happened to me—and without naming names, I am sure it has happened to some of our prominent female DX population at least once. We acknowledged that there is a "silent majority" that are probably active, but for whatever reason, do not show up in the publications, DX conventions, or are mentioned on the various SW stations or they take a look at the noise level (currently) on rec.radio.shortwave and decide to take a pass.

I have been active since 1971, and I think that there were 3 or 4 of us back then, and we all knew each other from Tom Meyer and "Happy Station". In fact, I still have the tape recording of the 1971 show, where Tom answered the first letter that I ever wrote to a radio program.

Fast forward to 1999 and I am asking, where are we? Granted, 99.9999% of DX'ers I have met have been nice people. But it is the other percentage that I am concerned about.

How are we to grow as a hobby community if we do not embrace all folks? If someone has a problem with the female part of the DX population (albeit however small we are), then I'd say that person or persons have a major problem that they need to work on—for the good of themselves, their families and the DX community in general.

We all need to work together—this hobby is facing some serious challenges in the next several years, and we need to keep ALL the hobbyists that we have, nurture and support them, without regard for their sex.

It's the right thing to do!

**Harlan Seyfer SEYFERBI@PUBLIC.BTA.NET.CN, Beijing, China**

I read with a great deal of interest John Figliozzi's article "A Turning Point for International Broadcasting?" and the sidebar "Who is the Audience?"

As an American who has lived a great deal of time outside the U.S., the past nine years in China, I am typical of a class of audience — the expat wanting to keep in touch with home and needing news without the local political spin.

There is a substantial foreign population in China that does not have access to international televised news services such as CNN. These include students, teachers, researchers, and multi-national company staff in remote locations. Even when routinely available services such as CNN can not be relied upon to be there when needed. All CNN broadcasts in China were shut down "for maintenance" several days before and after the tenth anniversary of the June Fourth Tiananmen crackdown.

When timely news is important only shortwave radio has been there. The Chinese government has only made the effort to jam broadcasts in local languages and dialects. Foreign language broadcasts, so far, have been left alone including the VOA.

So it was with particular interest that other expats and I listened to VOA, BBC, NHK, Radio Australia during the events of early May. As it turned out, things were OK as long as one exercised a small measure of common sense (stay close to home and especially avoid demonstrations in the embassy area). However, at the time that was not clear. There were rumors of foreigners being harassed and attacked. The vast majority of these were false. The international broadcasters kept us up to date and would have advised us to evacuate if the need arose.

German and French friends shared this situational concern and attention to shortwave radio in their languages.

A second shortwave broadcast audience the BBC and VOA obviously recognize is composed of English language learners. I know of one instance of a bachelor farmer from northern China, who learned spoken English through shortwave. He eventually sold his farm and moved to Beijing (illegally, but that's another chapter) where he learned to read and write English. He now works for an international agricultural agency and has traveled outside China. I can also name a university student who upon graduation returned to his isolated village as a teacher. When I met him again five years later, his English had actually improved through listening to a variety of international shortwave broadcasters. Granted his version is a charming mix of accents and idioms.

Who is the audience? It could be the first group, whose safety and possibly their lives may depend on shortwave. It could be the second, whose lives have been altered for the better through shortwave and who, incidentally, are more receptive to, if not in 100% agreement with, Western views.

**John A. Figliozzi <jffigliol@nycap.rr.com>**

I very much appreciate Harlan's thoughtful comments on this subject. His more specific descriptions of the shortwave audience are well taken and most correct. Harlan might be pleased to hear that my discussions with international broadcasters in preparation for the subject article did reveal an overall understanding on their part that the audience segments Harlan describes are (1) important to the station and (2) still largely dependent on shortwave for access. Furthermore, there appears to be an appreciation on the part of the broadcaster of the fact that their broadcasts are often vital to the well being of listeners situated as Harlan describes. It is for this reason that most broadcasters view and will continue to view shortwave as the primary medium of delivery for some time to come.

There is also pressure for broadcasters to expand audiences and use new technologies that may let them do so. The above acknowledgements of the broadcasters notwithstanding, this pressure combined with growing financial pressures means that something has got to give. The fear on the part of some (broadcasters *and* listeners) is that the drive for "new audiences" will cause them to shortchange or forget their old ones.

I did not mean to ignore the importance of this audience either. My intention with the sidebar was to point out to the reader that stations no longer feel the need, or have the financial flexibility, to "tolerate" the hobbyist listener if the latter's only interest is in the hobby aspects of shortwave listening.

Again, Harlan, thanks for the enlightenment and the opportunity to discuss this topic further.

## Membership Questions?

If you have any questions concerning your membership, renewals, change of address, etc please contact Bill Oliver by postal mail (45 Wildflower Road, Levittown, PA 19057) or e-mail (boliver@bboard.com).

## Celebrity Events and World News

Over the weekend of July 17th, news programming in the USA was nearly one hundred percent devoted to the John F. Kennedy Jr. airplane crash. The major TV news networks maintained a steady vigil, even in light of relatively few developments as the weekend ensued. It was difficult to find out about other newsworthy events. By comparison, on Monday's 1100 UTC edition of *Newsdesk* on the BBC World Service, the Kennedy story was the fifth story aired. This difference in emphasis provided a very convenient opportunity to "evangelize" about shortwave to non-listeners, as my informal, nonscientific survey indicated most Americans felt the Kennedy coverage unnecessarily dominated the airwaves. Please don't construe this as a dig on the Kennedy family, as the untimely deaths of so many of its members truly is a tragic story.

## Spirituality and Religion

Religion is a topic that can stir up plenty of debate when considering the current state of affairs for shortwave listeners. While you can find plenty of choices for evangelistic programs from various denominations, ministries, and faiths, finding programs about religion and personal spirituality is much more difficult. Here are a few suggestions from the online *swprograms* discussion group:

*Tapestry*, produced by the Canadian Broadcasting Corporation and broadcast on **Radio Canada International** Mondays UT at 0205 is one of the best offerings. *Tapestry* focuses on major religious and spiritual themes, exploring the spiritual journeys of individuals with an emphasis on the Canadian experience. The hour-long program pre-

sents in-depth documentaries, discussions, interviews and commentaries prepared by CBC producers and freelance radio documentary makers from around Canada. August topics include "Religion and Revival in Russia", on August 8; "To Be A Pilgrim / Temperance", August 15th; "Mindful Parenting", August 22nd, and "Haunted House, Haunted Mind", August 29th. These are repeat broadcasts, as the program is on summer hiatus until September. (CBC website)

*The Spirit of Things* is produced by Australia's **Radio National** and airs on **Radio Australia**. Rachel Kohn, a widely recognized academic expert on comparative religions hosts; *The Spirit of Things* is about the spirit that animates the material world and the world of meaning, focusing on what has conventionally been called "religious" as well as spiritualities which find expressions in indigenous, new age and nature religions. *The Spirit of Things* answers the question: how do we find, locate, express, implement, defend and explain spiritual meaning as we near the end of the millennium. (ABC website)

*New Dimensions* is produced by the New Dimensions organization in California, and was reviewed in this space a few months ago. **Radio for Peace International** airs the program Mondays 2230 and Tuesdays 0630 UTC; **Radio Australia** airs the program Saturdays 1405 and Sundays 1705 UTC.

*The Religion Report* is produced by Australia's **Radio National** and airs on **Radio Australia**, as reviewed a few months ago, Wednesdays 0030, 1030, 1530 and 2130 UTC. The 1530 UT airing is available on demand at the World Radio Network website for 24 hours.

*Focus on Faith* is the BBC World Service's long-running entry in this category, but tends to focus on world religions, more so than the personal spirituality explored by most of the programs listed above. *Focus on Faith* airs Fridays to the Americas at 0430 and 1130 UTC.

## Other Program Tips

Correspondence has generally been quiet over the summer months. Following up on last month's discussion of news programming, I received a post card from NASWAN Rick Sitz of Bradenton, Florida expressing his preference for *Deutsche Welle's Newslink* as an unbiased source for European current affairs.

### Radio Australia

One of the more unusual listener contact programs is Radio Australia's *Feedback* program. While much of the program is the usual reading of listener questions and comments, there are also additional segments on English language usage and the spoken word in general. A recent edition featured a look at differences between boys' and girls' first names—not exactly what you'd expect in a mailbag program. Roger Broadbent hosts.

### Voice of America

The advent of Internet-delivered audio has helped American audiences hear more of *Voice Of America* programming. *Talk to America* is a weekday hour-long program interviewing a single guest and soliciting questions via phone, fax, and the Internet. *Talk to America* addresses the widest possible range of topics: from Capitol Hill to the Grand Ole Opry, from surviving AIDS to harnessing solar energy, from renowned authors to sports stars. Late July topics included "Children in Stressed Communities", "Michael Jordan and the New Global Capitalism", "Global Business and the Internet", "Employing People with Disabilities", and "Hate Crimes." Americans can only be voyeurs, though: questions are only accepted from non-Americans, though I suppose that if one didn't identify their nationality or location in an E-mailed question, there would be no way to screen that question out. The

program airs at 1700 UTC just after the news, and the Africa-directed frequencies of 15410, 15445, and 17895 kHz are probably the best candidates for American shortwave audiences; a 24-hour Internet audio archive is maintained at the VOA website (<http://www.voa.gov>).

### Radio Netherlands

The planned *Documentary* series for August is *Wake of Half Moon*, a three-part series presented by David Swatling on the Dutch colonization efforts in New Amsterdam following the explorer Henry Hudson's voyages on the *Half Moon*. *Documentary* airs to North America Fridays at 2353, and Thursdays at 0053 and 0453 UTC. This series originally aired last fall on the program *Aural Tapes-try*. (*On Target*)

## BBC World Service Highlights

The BBC has chosen a new Director General, Greg Dyke, who comes from the UK's private broadcasting industry. There have been recent concerns that the BBC's emphasis on new technologies have taken resources away from program production, with the loss of the German language service as the most recent example. Mr. Dyke appears to be favorably disposed producing programs, versus technology, in reading between the lines. While those in the BBC's radio services were initially positive on Mr. Dyke's appointment, it appears the BBC's television services will likely consume most of Mr. Dyke's initial attention.

Meanwhile, August World Service highlights include:

### News and Current Affairs

Saturdays, 0430, beginning August 7th: *Lives and Times* fills the *People and Politics* timeslot with a six-part, 30-minute series of modern day British experiences and attitudes from various regions around the country. Each of the first five editions profiles a single family, with a summary edition wrapping the series up. Hosted by Vera Frankl (haven't heard that name in a while!). Repeated Saturdays 1130.

Weekdays, 1205 and 2305: Talk about plum assignments—Heather Payton takes *Outlook* on the road to Tahiti, looking at modern Tahitian life and the future of French Polynesia.

Sundays, beginning August 22nd, 1405: *Matter For Debate* fills the *Talking Point* timeslot with a six-week series of debates on ethical dilemmas, with two protagonists' views supplemented with listener contributions and interviews with people who have faced the issues under debate. Julia Neuberger hosts; August topics include armed struggle and legalized prostitution. E-mail questions to [matterfordebate@bbc.co.uk](mailto:matterfordebate@bbc.co.uk).

### General Features

Tuesdays through Saturdays, 0055: *My Century* themes for August include *Survivors*, from people who endured the Holocaust and Hiroshima; *Working the Land*, about agricultural developments during this century; *Left for Posterity*, about memorials to the dead and their future legacy; *Things Fall Apart*, about governmental instability and revolution during the century. Thirty-minute weekly compilations are Saturdays 0530 and Mondays 0030.

Wednesdays, 0330, beginning August 4th: *Back From the Edge* is a six-part, 15-minute series with first person accounts of near-death experiences. Each storyteller talks about the way their lives have changed since their experience, and about the inner strengths they discovered along the way. People from India, Iran, South Africa, and the USA are featured.

Tuesdays, 0330, until August 17th: *Do You Believe In...?* completes its look at paranormal phenomena.

Tuesdays, 0430, beginning August 3rd: *Block On Block* is a new, six-part, 30-minute series on architecture and civil engineering projects. Stadiums, bridges, domes, tunnels, and the Shanghai World Financial Centre—soon to be the world's tallest building—are featured.

Wednesdays, 0430, August 4th through 18th: *Spinning Yarns* is a three-part, 30-minute series on the history of natural fibers. Sting, wool, cotton, and silk are all detailed.

Wednesdays, 0430, beginning August 25th: *Car Stories* is a new four-part, 30-minute series of documentaries on the ways automobiles reflect society, from Nigeria to Moscow. The first two editions feature the status of the Peugeot in Nigeria, and how a minicar fares in the UK. Repeated Mondays 1730.

Tuesdays, 0330, beginning August 24th: *Dreamtime Dreams* is a new, ten-part, 15-minute series looking at dreams and visions and their interpretation. These visionary stories are taken from various cultures; the first two are from Australia ("Aboriginal Land") and Egypt ("The Visions of Isis").

Saturdays, 0330, beginning August 28th: *From Where I Stand* is a six-part 15-minute series featuring audio diaries from British people. People from all walks give a mix of personal views and life experiences during a typical day. Repeated Mondays 1730.

Thursdays, 1130, beginning August 12th: *Future Perfect* is a six-part 30-minute program profiling "think tank" organizations engaged in futurist thinking. Alvin Toffler, Nobel Prize winner Merry Gell-Mann, and the Institute for the Future in California's Silicon Valley are program subjects. *Assignment*, on summer break, normally fills this timeslot.

### Classical Music

The *BBC Proms '99* season is in full swing, with the following concerts likely to be audible in North America:

Sunday, August 8th, 0315: Bartok, *Concerto for Orchestra*

Tuesday, August 10th, 0305: Poulenc, *Les Biches*; Bizet, selections from *The Pearl Fishers*

Wednesday, August 11th, 0305: Bernstein, *Wonderful Town*

Saturday, August 14th, 0315: Nielsen, *Symphony No. 4*

Friday, August 20th, 0305: Duke Ellington, *A Centenary Celebration*

Sunday, August 22nd, 0305: Mozart, *The Marriage of Figaro* — Overture; Ravel, *Le Tombeau De Couperin*; Matthews, *Symphony No. 5*

Saturday, August 28th, 0301: Durante, *Concerto No. 4, e minor*; Vivaldi, *Filiae Maestae Jerusalem*; Wassenaer, *Concerto No. 4, f minor*; Pergolesi, *Stabat Mater*

#### Drama and the Arts

Saturdays, 2230: *Play of the Week* offerings: August 7, *The Lady Vanishes*: A new adaptation of Alfred Hitchcock's comedy thriller. August 14 and 21 (two parts), *Broken Glass*: Arthur Miller's play about neurosis set in prewar Nazi Germany.

August 28, *The Sorrows of Young Werther*: Goethe's classic story about unrequited love.

Thursdays, 0130: *Meridian Live* will be emphasizing the Edinburgh Festival in August, celebrating Scottish history and culture in one of my favorite travel destinations. Also airs Wednesdays 1430.

Tuesdays-Saturdays, 0345: *Off The Shelf* will be hit-and-miss this month, due to the Proms concerts. From August 12th through September 9th, Brian Cox will be reading *Memed My Hawk* by Yasher Kamal of Turkey.

#### Light Entertainment

Sundays, beginning August 29th, 2230: *Brain of Britain 1999* begins a new 17-part series.

#### Science, the Environment, Technology

Tuesday, August 10th, 1405: *Discovery*, the regular weekly science documentary, will be extensively covering the August 11th solar eclipse. The southwest corner of England will be in the path of the eclipse. Repeated Wednesday 0030.

Sundays, 0030, beginning August 15th: *Science Extra: Green Champions* is a six-part 15-minute series exploring the largest, oldest, and tallest plant species. Repeated Mondays 1515. *Science Feedback* airs on August 8th; *Seeing Stars* will air on September 5th.

Friday, August 20th, 0030: *The Works* sees how Brazil is faring in its Y2K preparations.

Sunday, 0045, August 22nd: *Waveguide* looks specifically at radio programming for children; are they listening to radio in this age of television, video, and computer? Richard Lambley investigates developments in the UK, the USA, and elsewhere.

#### Popular Music

Thursdays, 0530 and 2230: *Hot New Country* is a new series on the latest and greatest country music imported from Nashville to Bush House by Nick Barraclough.

#### Internet Note: Domestic Radio 4 News Programs

It's more difficult nowadays to get much domestic UK news from the World Service, but there are several BBC Radio 4 daily news programs now available for on-demand download via the Web. Obviously, many of the current events stories will be quite similar to World Service content, but the domestic angles may prove to be an interesting perspective. *Today*, *The World At One*, *PM*, and *The World Tonight* are daily Radio 4 features; weekend programs include *The World This Weekend* and *Broadcasting House*. You can find these all at the URL [http://news.bbc.co.uk/hi/english/on\\_air/default.htm](http://news.bbc.co.uk/hi/english/on_air/default.htm)

#### Internet Mailing List on Short-wave Programming

As a reminder, if you are interested in advance program information that comes in too close to air dates to be used here, or are interested in two-way discussion on programming content, check out the *swprograms* E-mail reflector. You can subscribe in one of two ways: 1) Visit the website <http://www.topica.com> and search for *swprograms*; or, 2) Send a blank E-mail to [swprograms-subscribe@topica.com](mailto:swprograms-subscribe@topica.com).

Until next month,

73 DE Richard

# Shortwave Center

## Material Needed for Shortwave Center

Thanks to our contributors we have had a goodly supply of material for Shortwave Center over the past few months. However, material on hand is getting a little thin and I have not received anything new in a while. Therefore, ye editor is putting out the call.

Now is the time for all good DXers to come to the aid of the Journal. If you have material appropriate for SWC or have been putting off writing that article, do it now and forward to me. The Journal is only as good as the contributions you send in. Thanks.

## Murman Follow-up

Jim Young sent the following note to follow-up the printing of the GTRK Murman QSL article in the July Journal. "Since I sent the article to you, Mr. D. Perederiy, the Chairman of GTRK, wrote me an e-mail message requesting I provide the station with some 'blank' QSL cards like I made for my own

verification. I am in the process of negotiating exactly what he wants, how many, and the exact wording. I will do a reasonable number for him, if he agrees to verify future acceptable reception reports from SWLs worldwide."

## 35 Years Ago—The Beginnings: A Retrospective on ANARC's Early Years

By Richard A. D'Angelo

It's been thirty-five years since the founding of the Association of North American Radio Clubs-ANARC. While rummaging through ANARC's archives during my tenure as Chairman of the Executive Board, I came across some early letters written by one of ANARC's founding fathers, Don Jensen. I found that the early, formative days of the association made fascinating reading which, I hope, others might enjoy reading too. Many of the problems that plagued ANARC in the past have their roots in the 1960's. History repeats itself and provides an interesting opportunity to learn. So, to help celebrate ANARC's thirty-five years of continuous

service to the hobby community, I have written this retrospective based on Don's writings. With that in mind, I hope you will enjoy reading about this slice of hobby history.

On February 10, 1964, Don Jensen (acting Executive Secretary) wrote a letter to various club officers concerning the formation of an association of DX clubs. Quoting from the opening portion of Don's Letter:

"The time has come for the long discussed alliance of the North American DX clubs to begin to actually take shape. Many club officials and individual DXers have discussed the advantages of such a group on this continent patterned after the successful

"DXAlliasen" of the Swedish clubs. The advantages of such a federation of DXing clubs in the area if interchange of information, setting of standards, and speaking to the world with one voice seem obvious if the clubs get behind this effort and contribute their full cooperation."

"First, to still any initial fears, I must point out that the alliance is not an attempt to replace any of the existing clubs with a sort of "Super-Club." This proposal to form the alliance is a move toward strengthening of each individual club, large or small, through mutual co-operation."

"I have volunteered my services as acting Executive Secretary of the alliance to help get it "off the ground." I emphasize the "acting" designation since in due course an elected leader will be chosen to replace me in accord with normal democratic procedures. However, someone must take the first steps. Several persons in the DX hobby have already pledged their support in the initial phases, including Hank Bennett, editor of the Popular Electronics short wave sections, one of the proponents of the alliance of North American clubs. I would like to point out that though we hope to receive assistance in the way of publicity from Popular Electronics, we are in no sense a "child" of this magazine. This federation will be an autonomous group co-operating with all magazines and news media."

The letter went on to summarize some of the possible provisions the new alliance's constitution should include and solicited comments from the clubs. It was envisioned that Don would remain acting secretary for about six months after approval of a constitution, at which time the representatives would elect an Executive Secretary to a two-year term. Some of the early examples of action the alliance might undertake included a survey of various problems besetting the DX hobby, a program to interest new DXers, setting of verification standards, country lists, etc. Individual DXers may submit a matter for consideration through a club representative. In closing, acting Executive Secretary Jensen

suggested that clubs (1) determine if they would be joining the alliance, (2) appoint a representative, and (3) submit any suggestions in connection with the proposed constitution or any other aspect of the alliance. The alliance was filled with great promise as can be gathered from Don's closing remarks:

"I have great faith that the alliance can help to correct many of the problems a number of clubs and the hobby in general are facing today. I hope that all clubs in North America will participate. The idea of this federation is to work for this in the most democratic way possible. Thanks."

And so ended the first official effort at forming a North American alliance of radio clubs. By early March 1964, acting Executive Secretary Don Jensen had a pretty good idea that the proposed alliance of North American Radio clubs would get off the ground. A number of clubs had already indicated they were willing to participate and had appointed representatives. A reminder was sent out to those clubs that had not responded in the first 30 days and additional clubs were contacted. On April 1, 1964, the association's first constitution was ready for discussion. Quoting from acting Executive Secretary Jensen: "We are now ready to take the second big step in the formation of a continent-wide league of radio clubs." Up to this point, at least 10 clubs, including all the important ones of the day, indicated an interest in participating. A number of favorable comments and offers of assistance were received from European clubs. The first constitution tried to be sufficiently specific to provide definite guidance toward common goals, but not too restrictive that it would penalize either the large or small clubs. The goal of the constitution was to create a federation of sovereign clubs, not a "super club." On April 20, 1964, the results of the balloting were announced. The constitution, which was voted on article by article and section by section within each article, was overwhelmingly approved. Twelve sections were approved unanimously while the other four sections were approved by either 10-1 or 9-2 votes. Acting Executive Secretary Jensen proudly proclaimed: "... I'm

pleased to announce that a majority vote was received for each article and section, hence the Association of North American Radio Clubs, (A.N.A.R.C.) is now formally organized." In accordance with previous decisions, Jensen's acting Executive Secretary term began on April 20th and continued for six months. The following eleven clubs were the charter members of the new association:

- ▷ American Shortwave Listeners Club
- ▷ Canadian DX Club
- ▷ Canadian International DX Club
- ▷ Folcroft Radio Club
- ▷ Great Lakes Shortwave DX Club
- ▷ Kentucky DXers Association
- ▷ National Radio Club, Inc.
- ▷ Newark News Radio Club
- ▷ North American Shortwave Assoc.
- ▷ Shortwave Listener's—Certificate Hunters Club
- ▷ Worldwide Monitors Radio Club

Four of the charter member clubs still belong to the association in one form or another. Among the charter members that still operate under their original names are: Canadian International DX Club and the North American Shortwave Association. The Worldwide Monitors Radio Club became the Worldwide TV-FM DX Association in the late 1960's. Finally, the National Radio Club, Inc., changed its name to the current International Radio Club of America. The American Shortwave Listeners Club recently closed its doors. The Newark News Radio Club passed on in the early 1980's with many of its former members founding the Association of DX Reporters, which subsequently passed away in the 1990's.

The first two proposals requiring a vote of the club representatives to ANARC were

"Proposal 1—That the fee for each member club of ANARC will be \$2 (US) per representative, to be paid by the club. This fee for the first year of operation will be used to cover postal, stationary, etc. costs. Any surplus at the end of a year's time will be carried over to the following year. According to this schedule, clubs with one representative will pay \$2, clubs with two representatives will pay \$4, clubs with three representatives will pay \$6. The number of club representatives depended on the number of members in the club. Proposal 2—that ANARC sponsor a permanent hall of fame to which outstanding persons in the radio listening field could be named, in a similar manner to the well-known baseball hall of fame. The proposal suggests a committee of 8-10 be chosen to receive nominations, from these committee members a decision will be made to select those individuals to the Hall of Fame, with announcement of recipients once a year on January 1. The suggestion continues, 4 or 5 selections the first year, thereafter, 2 per year. Members so honored could be listeners, broadcasting personalities, editors, writers in the radio field, etc. Further details to be worked out by the committee." With a constitution approved and some business proposals on the table, the new association was off and running.

In May, 1964, some bad news surfaced. The Shortwave Listeners—Certificate Hunters Club withdrew from ANARC. Club representative Gary Hammond apologized for the decision, but it was necessary in light of communications from its parent group in California that it should not "subordinate" itself to another group. The proposal concerning the establishment of fees passed without opposition. The proposal concerning the Hall of Fame, was a mixed bag with six yes votes, three no votes and two club representatives being completely indifferent to the plan. Most of the negative votes felt it was premature and there were other more pressing problems to tackle first. It was determined that the narrow vote did not indicate enough general support for the project so a committee was not appointed at this time.

In late April, the Benelux DX Club sent a communication to all major clubs and organizations in the world about establishing a program designed to move shortwave stations which were not currently issuing QSL cards, to verify reports from listeners. It was hoped a survey of station's that are not verifying would help DXers in selecting stations to send reports to. ANARC's third proposal was to send a communication to the Benelux DX Club in support of their plan to survey non-verifying stations. The next proposal concerned the establishment of a central clearinghouse for information about Courtesy Programs. It was hoped a coordinating committee, appointed by the Executive Secretary, would enable information about such courtesy programs to be spread to all ANARC member clubs. It was also hoped that the "special ANARC committee would arrange occasional courtesy programs for the benefit of all listeners featuring both BCB and SWBC stations.

The next area of focus was the subject of country lists. Many of the club representatives addressed this touchy subject in correspondence with acting Executive Secretary Jensen. Don thought more discussion was called for prior to taking a vote on the subject. He hoped the club representatives, "...won't become discouraged because we don't solve all the hobby's problems in a couple of months. As I see it, the big problem now is for ANARC to gain stature in the eyes of the members of the DXing fraternity. We can try to gain stature by concentrating now on mainly service projects, such as proposals 3 and 4, those ideas are within immediate practicality, or we can plow right into the major controversies that have plagued the hobby for years. I hope we can prove we have something real and worthwhile to offer and grow in strength before we tackle all the major problems at once."

By late June, the National Radio Club was welcomed to the association. Their club representative was Ray Edge. Apparently the American Shortwave Listeners Club (ASWLC) Board of Directors never autho-

rized the spokesman that said the club would join ANARC. One member of the club accused ANARC of "skullduggery" to coerce the ASWLC to join. The club was undergoing a reorganization and more news was expected to arrive in the coming months. The National Radio Club, Inc., of Denver, Colorado, changed its name to the International Radio Club of America. Its growing membership was now above the 100 mark.

The Folcroft Radio Club of Folcroft, Pennsylvania, merged with a group known as DX Inter-Nationale, of Newton, Massachusetts. Proposals three and four each passed with 12 yes votes and no nay votes. As a result, a letter was sent to the Benelux DX Club in support of the plan to survey the non-verifying stations as outlined in the proposal. The club representatives were encouraged to have their bulletins publish information about this activity so members of the various clubs could participate. Acting Executive Secretary Don Jensen was busy looking for an individual to serve as chairman of a committee to handle the details of compiling data on courtesy programs during the coming year. One of the club representatives suggested that the ANARC clubs exchange bulletins, which would promote goodwill, friendship and closer ties between member clubs. It was further proposed that ANARC headquarters be furnished a copy of each club's bulletin. Instead of putting this to a vote, Don suggested voluntary compliance was the best course of action.

The issue of adopting an ANARC country list was put into proposal form: "Proposal 5—(a) ANARC should adopt a country list. Yes or No. If you vote yes, vote for either (b) or (c). (b) ANARC should adopt the following list as its standard, NNRC, ARRL, Other. (c) ANARC should adopt a list, however, the Exec. Sec. is empowered to select a committee of three persons. This committee would determine the list to be used by either adopting some existing list, creating a new list, or a combination of both. this committee would be delegated to maintain a current list and interpret it in good conscience."

In closing June's business, it was suggested that the club representatives may want to consider drafting some sort of code of ethics or set of precepts, which would be printed by the clubs. The summer of 1964 saw a decrease in activity by club representatives. August's letter saw a divided vote on establishing an ANARC country list. There were 4 votes for adopting no list at all, 4 votes for adopting the NNRC list, 3 votes for establishing a committee to develop an independent list, and 1 vote for accepting the ARRL country list. As provided for in the association's constitution, acting Executive Secretary Jensen cast the tie-breaking vote for not adopting a country list. He felt the great differences of opinion made the project not worthy of consideration at this time.

Two more clubs decided to affiliate with ANARC. A change in policy at the American Shortwave Listeners Club II (ASWLCII), newly reorganized by Gerry Klinck, brought ASWLCII into the association. The American Central Radio Club, under the direction of Richard Wood, also affiliated itself with ANARC. The International Radio Club of America (IRCA) sent word that membership was now 127. Letters from individuals seeking information about clubs were coming into headquarters as a result of an article in Radio-TV Experimenter. This steady flow of such requests eventually resulted in the development of the first club list. Bill Wilson of San Mateo, California, was appointed to set up a system to coordinate information on scheduled courtesy programs. Bill was the courtesy program chairman for the IRCA. ANARC fees were slowly coming in with NASA, DCXC, CIDXC, NNRC, Great Lakes Shortwave Club, NRC, and Worldwide Radio Monitors recently paying. The club representatives were informed about a possible courtesy program from Radio Gambia on 4820 kHz. It was too early to be certain of the details, but it looked promising. Some of the smaller clubs were interested in ANARC printing their bulletins as a service. Unfortunately, the association was not in a position to offer this service.

Acting Executive Secretary Jensen informed club representatives that his term would end on October 15, 1964, and an election was

necessary for the two-year post of Executive Secretary. He hoped that the association could be turned over to some new blood to keep the organization moving forward. The NNRC proposed allowing more time to consider proposals. The current policy was just 30 days. The NNRC proposed a 90-day period. Don suggested that the club representatives may want to consider a 60-day period also. A supplemental letter issued only six days later told the representatives that they could keep the 30-day period if they so desired. In September, 1994, the results of balloting showed 5 votes to lengthen the period for club representatives to consider proposals to 90 days, 2 votes to lengthen the period to 60 days, and 8 votes to keep it at 30 days. Basically, most felt keeping things moving was in the best interest of ANARC.

Fred Woodley, the Canadian DX Club representative proposed an ANARC sponsored annual award to go to the person who is outstanding in the hobby of DXing. The project was viewed as simpler and more workable than the Hall of Fame project proposed earlier in the year. CDXC offered to donate a plaque, which would be engraved with each winner's name. One of the proposed names was "Outstanding North American DXer of the Year."

The topic of an Executive Secretary election was heating up. Only Gerry Klinck, the new executive editor of ASWLCII had been proposed to run for the position. As a result of a number of representatives asking the acting Executive Secretary to reconsider his prior position, Don Jensen agreed to stand for election to provide the clubs with a choice during the first Executive Secretary election. Dick England, of the Worldwide Monitors Radio Club, was appointed ballot clerk for the election. C.M. Stanbury II, writing in the ASWLCII bulletin, was very positive about the potential of ANARC, but expressed some concerns about the club representatives not actually representing their memberships unless they canvass their memberships prior to each vote. According to Stan, too many DX clubs are the creatures of one man or a small group, which did not provide members with an opportunity to be heard. He feared the formation of a "super dictatorship."

The Denver based International Radio Club of America continued its growth by reporting 159 members. Under the association's voting structure, they were now entitled to an additional representative. All clubs except DX InterNationale had paid their dues. A few of the representatives suggested getting together for a face to face meeting to discuss ANARC business. Closing out the month's business, Don Jensen noted a number of subtle changes taking place in the hobby. Clubs that have had little contact previously are now running features and news items about other clubs. There has been greater interest in exchanging bulletins among the clubs. There seems to be less interest in petty, jealous arguments that previously dominated the hobby scene. While not claiming ANARC was responsible for all the progress, Don felt the association deserved some credit for the positive changes unfolding.

In October, 1964, ballot clerk Dick England reported the results of the first Executive Secretary election. With 12 votes, Don Jensen became the first elected Executive Secretary of ANARC. Gerry Klinck received two votes and was immediately asked by Don to furnish his thoughts and concerns about the problems of the hobby as the association moves along. The "Man of the Year" award was approved by a 7-5 tally. It was pointed out that three of the nay votes didn't like the idea of a traveling trophy. Therefore, a certificate was proposed to be added which the winner would keep. Each club was asked to begin the nomination process within their respective clubs for this award. A committee of experts would determine the winners based on the documentation submitted. The club representatives were asked not to exceed three pages in support of each candidate. A special transmission over Radio Gambia was scheduled for December 15, 1964, at 2015 GMT. Wide publicity was being received for this event which was giving ANARC considerable recognition in the hobby community. The exchange of information about courtesy programs fell through for this season. The smaller clubs appeared uninterested in participating even though they would have been the big winners in this exchange! One club

refused to participate because of the individual selected as the committee chairman!!

Each month more and more people were writing to ANARC headquarters to receive information about the association and its member clubs. As a result, Don Jensen developed a listing of the clubs, which resulted in many new members for the clubs. Because it did not pay its annual fee and for not communicating with headquarters, DX InterNationale was dropped from the association membership list in November, 1964. In December, a letter was received from Bill Wilson, president of DX InterNationale, which stated that the club had officially voted not to affiliate with ANARC. Apparently a referendum of the membership ended in a tie vote which was broken by the executive body of that club.

Each month, the club representatives were being asked to begin working on their DXer of the Year award nominations, which were due on February 1, 1965. The American Shortwave Listeners Club II passed the 150 member mark, which gave them an additional club representative. The newly appointed representative was Bill Sparks of San Francisco. December saw a flurry of business activity. First, C.M. Stanbury proposed an amendment to the ANARC Constitution which would require each club to hold a referendum putting the question of standards or ethics before their membership before any proposal to be addressed by ANARC could be voted upon. Stan felt it was inappropriate for a handful of people who control the clubs and publish the bulletins to establish the standards for the hobby as a whole. As an amendment, it would require a two-thirds vote for passage.

Closely connected with Stan's proposal was a counter proposal, in the form of a resolution, by John Callarman. John's resolution would enable each individual club to decide if it wanted to adopt any standard of ethics ultimately developed by ANARC. As a resolution, it would only require a majority vote to pass.

(To be continued)

Here we are in the heat of summer and I've shifted into lazy mode. Leave it Rich D'Angelo to come to my rescue with some important words about a new service from the DSWCI.

*Domestic Broadcasting Survey*  
Edited by Anker Petersen  
Published by the Danish Shortwave  
Club International  
ISSN 0106-1968  
Reviewed by Richard A. D'Angelo

For 26 years, the Danish Shortwave Club International ("DSWCI") published the very popular and well-respected Tropical Band Survey ("TBS"). Periodically, the club published a survey of home service stations broadcasting above the tropical band frequencies. After many years, the club has combined the two concepts for 1999. As a result, we now have the 1st edition of the new Domestic Broadcasting Survey ("DBS"). This marks twenty-seven years in a row that the DSWCI has published its annual survey of tropical band broadcasting stations. The DBS expands that prior effort by logically incorporating all domestic shortwave broadcasting operations. The project was headed by Anker Petersen, one of Europe's premier DX'ers and Chairman of the club, who has spearheaded this effort in recent years. The logical combination of the old TBS with the other domestic high frequency stations and the DSWCI's extensive monitoring activities make the new Domestic Broadcasting Survey essential material in every radio monitors listening post.

The club is one of the leading DX organizations in Europe. It has about 400 members in more than 40 countries all over the world. Since most of the club's members were devoting their DX'ing to domestic broadcasting stations, not only those on the tropical

bands (120, 90, and 60 meter bands) but the higher shortwave bands as well, the club decided to expand its excellent TBS to the full spectrum of 2200 to 22000 kHz. The new DBS focuses on stations broadcasting to a domestic audience or relaying such broadcasts to expatriates abroad. Consequently, external services, clandestine stations, pirates, and harmonics were generally not included in the DBS. Nevertheless, you will find the DBS an important addition to the DX shack.

As in the past, the DSWCI bases the survey upon many official sources and DX bulletins. Each station frequency has been confirmed on the air at the time of publication by the club's extensive array of worldwide monitors. Frequency usage is marked with an A, B, C or D to indicate "regular" or "sporadic" or "likely inactive" or "seasonal changes," respectively. Many frequencies that have not been heard in the last year have been deleted to keep the survey as current as possible.

The DBS is very easy to use. Historically, publications from the club have been extremely reliable and I would suspect that to be the case once again. The first column provides the reception code, A, B, C, or D as previously described. The second column lists the frequency. The third column provides the station transmitter output. The fourth column designates the broadcasting country utilizing the International Telecommunications Union ("ITU") country code abbreviations. For those not familiar with these abbreviations, a complete list of ITU country codes is given on page 43 of the DBS. The fifth column provides the station name and/or call letters and location. The final column provides transmission times and other useful information about the station such as operating schedules during Ramadan for Middle East and Indonesian stations. Also, the survey includes a listing of Indonesian prov-

inces and special districts, which is extremely useful for DX'ers with an interest in that part of shortwave broadcasting world. See the sample extracts from the DBS at the end of this review.

No shortwave listener should be without this excellent survey. Combining all tropical band station listings with domestic high frequency operations make the new DBS extremely useful. I can highly recommend it. Short-

wave listeners need resources such as the DBS in their shacks. The 44pages in A-4 size format DBS is sold by the clubs treasurer: DSWCI, c/o Bent Nielsen <bentndx@post.tele.dk>, Egekrogen 14, DK 3500 Vaerloese, Denmark for EUR 10, US\$12, DKK 75 or 14 International Reply Coupons ("IRC") per issue with airmail delivery. Cash notes are accepted.

## Digital Short-wave Broadcasting

### The Quest Continues

Between August 1987 and March 1998 this column presented some basic theory associated with digital transmission via HF radio. The folks at Thomcast in France have an approach that differs somewhat from that used in recent VoA/JPL tests. This multi-part article is based upon Thomcast's description of their Skywave 2000 system and the design tradeoffs considered.

### Requirements Definition

Here are some of the characteristics Thomcast engineers are addressing as they try to optimize the design of a digital modulation scheme:

- ▶ Ionospheric propagation with multiple reflections, Doppler effect and Doppler spreading in MW during night time and SW day and night time.
- ▶ Presence of interference and jamming, especially in the SW frequency bands, due to congestion in the frequency spectrum (multiple re-use of channels, receiver non linearity's and/or poor filtering characteristics, etc.).
- ▶ Improved reception quality (immunity to fading, to interference, constant quality, bandwidth utilization, optional stereo reception).
- ▶ Compatibility with existing AM services (channel-spacing, co-channel and adjacent channel interference),
- ▶ Necessity during a long transition time to continue to use already installed transmitters and antennas with minimal modifications.
- ▶ No significant increase in power consumption or peak transmission power.

- ▶ Compatibility with low cost and low power consumption AM receivers and available technology,
- ▶ No increase, and if possible a decrease, in receiver operating complexity. The new digital receiver should include automatic program searching, and, especially for short waves, automatic frequency changing to follow the program as frequencies are added and dropped.
- ▶ Improvement of reception quality (immunity to fading, bandwidth occupancy, optional stereo reception),
- ▶ Introduction of new data services Program Associated Data (PAD), or accessibility to radically new independent services such as document transmission, fixed images, personal data transmission,

### Modulation Types and Selection Criteria

The first consideration in the design of a digital audio broadcasting system is the minimum bit rate which has to be transmitted in order to achieve a perceived quality at least as good as—and if possible better than—the present quality.

Many existing coders already provide a good quality at bit rates between typically 12 and 48 kilobits/second. The difference between the bit rates lies essentially in the transmitted audio bandwidth and the capability for stereo transmission.

Due to the poor quality and the instability of the transmission link, especially in the presence of fading and interference, some form of channel coding is mandatory to ensure integrity of the received binary stream. Details of the theory behind each coding tech-

nique are beyond this article, but it is sufficient to know that all coding schemes add extra bits to the data stream. The extra bits permit a properly equipped receiver to recognize a transmission error and then figure out what the correct transmission and automatically correct the error.

The best known channel coding systems use high diversity convolutional encoding (also called Trellis Coded Modulation, TCM) along with interleaving, to increase robustness to short term reductions of Signal to Noise Ratio (SNR). Interleaving is a process where the signal is broken up into discrete segments and the order rearranged. This technique is useful in minimizing the impact of burst interference like lightning discharges.

Reed-Solomon convolutional coding has been successfully employed on digital space circuits to minimize the amount of power devoted to the transmitter. Power is normally rationed aboard spacecraft and such techniques permit designers to reduce transmitter power levels by about 5dB. In other words they can get by with a 10 watt transmitter on a link that would otherwise require about 32 watts. Put into terms a short-wave transmitter engineer would relate to, coding permits a 32 kW transmitter to do the same job as a 100 kW transmitter without coding. Engineers may use this technique for SW broadcasting.

## Modulation Schemes

There are two different modulation schemes, known as serial modulation and parallel modulation. Both have to convey a high bit rate in a very narrow channel. A very efficient modulation system in terms of the ratio of bits per symbol per Hertz of bandwidth is needed.

According to the Thomcast engineers, this requirement eliminates simple modulation schemes like QPSK (Quadrature Phase Shift Keying), which have poor efficiency. (Note that the VoA/JPL tests have used PSK techniques. Resolution of these differences in approach is the job of the Digital Radio Mundial group which is attempting to arrive at the optimum transmission standard for all broadcasters to use.)

To comply with this constraint, multi-amplitude/multiphase systems have to be used, and more generally multi-level complex modulation known as QAM (Quadrature Amplitude Modulation), APSK (Amplitude/Phase Shift keying), etc... which can provide a much higher efficiency. I described the theory behind QAM in the Technical Topics column in the January 1998 issue of the NASWA Journal. You may want to review it before pressing on.

The first modulation scheme is serial using a single carrier modem. A complex symbol, represented by the amplitude of an in-phase carrier and a carrier shifted 90, is transmitted at each signaling interval. In the presence of multipath effects, the received signal is distorted as the individual states undergo unpredictable delay which can confuse the receiver demodulator. The receiver has to separate the smeared bits before demodulation by means of an equalizer. The complexity of the equalizer is proportional to the square of the delay spreading. When the channel is unstable (especially in the SW band), this complexity is increased because the equalizer must accurately estimate a rapidly changing multipath signal. In addition, the implementation of the equalizer (Decision Feedback Equalizer, DFE) suffers from the problem known as error propagation which arises when the binary output stream is not perfectly decoded and/or during deep fading.

The second modulation scheme uses parallel transmission. In this system the bit stream is separated into several streams that are routed on to adjacent subcarriers. For example, bits one through four are each routed to one of four different subcarriers. Then bit five goes to the same subcarrier that bit one went to, bit six goes to the same subcarrier as bit two and so forth. The receiver reassembles the original bit stream. This process is similar to DAB Eureka 147/COFDM which has been adopted for local broadcasting in Europe and Canada. We'll pick up on this theme and examine the advantages of this second approach next month.

Until then, stay tuned.

On the annual meeting 1999 of Austrian SW Club ADXBOE in April 99, ORF Vienna freq planner Mr. Ernst Vranka announced ceasing of RadioBras' German sce. (8-Jul/Ratzer-AUT/BC-DX/Bueschel-GER) Radio Nacional do Brasil's external service (English 1800-1920, German 1930-2050) has been missing from 15265 for at least 6 weeks now. Extensive search for a new frequency has brought no success, so I guess that either their transmitter is once again out of order or the service has been canceled at all. Does anybody know more? (16-Jul/Gatzke-GER/World of Radio/Hauser) In the wake of reports that RNB's European service is closing down, I have been checking for the North American service, and not hearing it, either—English at 1200-1320 supposed to be on 15445. July 20 at 1227 check I heard nothing but FEBA on 15445 with IS, and into Nepali(?). After 1300 FEBA clashes with something else, presumably Romania. (Hauser-OK/World of Radio) The problem is that the president has extinguished RadioBras, which was responsible for the transmitters. Until it is decided which government agency becomes legally responsible for them, the transmissions, even if they continue, will be precarious. (19-Jul/Cruz-BRZ/Radioescutas/World of Radio/Hauser)

Some changes in domestic broadcasting:

2440 R. *Sao Carlos*, Sao Paulo is temporarily off the air

2490 R. *8 de Setembro*, Descalvado, SP is active 0900-2300

3235 R. *Clube Marilia*, Sao Paulo is definitively off the air

3255 R. *Educadora Cariri*, Crato, Ceara is definitively off the air.

4765 R. *Rural Santarem*, PA 0700-0000. New addr: Rua Sao Sebastiao 622, Santarem, PA 68005-090

4935 R. *Capixaba*, Vitoria, ES is operating 24h. Addr: Av. Santo Antonio 366, Vitoria, ES, 29025-000. Reports to Sr. Sardinha (tecnico). (1-Jul/Bertoldi/DX Clube Paulista/PlayDX/Nigro-URU)

**BURKINA FASO** As part of a joint project with HCJB, TWR is also seeking permission to set up a new SW transmission facility in Burkina Faso which would improve reception in WeAF. An HCJB supporter has already donated funds for a 100 kW transmitter. (30-Jun/TWR/BBCM/BC-DX/Bueschel-GER)

**CLANDESTINE—LATIN AMERICA 6168V Julio 19 al 23, Vox de la Resistencia-Bloque Oriental**

(FARC) \*1130-1230\*, la primera emision sigue lle-gando con buena senal, al igual que la segunda emision entre las \*2130-2230\*. Nota: las emisiones del Comando de Occidente no le he podido hacer el seguimiento, pero cualquier novedad la estare reportando. (Gaviria-COL/Rev. of Int'l. Broadcasting/Hauser-OK) [Translation: 6168V July 19-23 Voice of Resistance, Eastern Sector; their 1130-1230 first transmission continues to be heard with a good signal, as is the second transmission, from 2130-2230. I have not had any success hearing the Western Command, although I continue to try. New developments will be reported.]

**COSTA RICA RFPI's** goals include increasing the ease of reception around the globe with the addition of 6 separate 100 kW transmitters, expanding the languages of broadcast, providing live interactive audio streaming on the internet, and expanding the tape distribution of programs produced by RFPI. The addition of a dedicated, continuous UN broadcast presence on shortwave, or UN channel, is seen as another key area for development (RFPI Vista// Rev. of Int'l. Broadcasting/Hauser-OK) [And I've asked Santa for a pony—AQ]

**CUBA** A most interesting feature appeared in the Jun-24 "El Nuevo Herald" (the Miami Herald's Spanish edition), titled "China instala dos bases de comunicacion en Cuba." The lengthy feature, written by staffer Pablo Alfonso, reveals some significant items.

1. The Chinese have installed two Lourdes-like (RS evesdropping site) monitoring facilities in Cuba. Translating and paraphrasing the article, the bases were disguised under the pretext of a joint Cuba-China communications venture in February, during a visit to Havana by China's Defense Minister, Chi Haotian. The principal listening facilities are northeast of Santiago de Cuba, and in the Bejucal zone of La Habana province. The Santiago site is dedicated to monitoring NAM military satellite communications, while the La Habana site primarily monitors US telephone communications.

2. Secondly, the feature confirms that the 9570 kHz *China Radio International* broadcasts (even the frequency is referenced) are via a presumed new site. The FCC believes the site to be 2256.00N, 8223.00W, approximately 15 km south of Havana on my maps. These bearings do not coincide with the Radio Havana Bauta site. I must wonder if this may also be the location of the 9600/6140/6120 Rebelde broadcasts (4-Jul/Krueger-FL/NU/EDXP/Padula-AUS)

**DENMARK** A minor frequency change for *Radio Denmark/Radio Norway International* was made Jul-14 for the broadcast 0300-0455, 9475 was changed to 9470. (14-Jul/Koie-DEN/EDXP/Padula-AUS)

**FRANCE** *Radio France International* noted 11600 at 1200-1300 in Cambodian instead of English via Xian in China. The parallel 15155 continues with English programming. Wrong feed to the transmitter? (11-Jul/das Gupta-IND)

**GEORGIA** *Georgian Radio:*

0100-1500 Georgian 5040  
 0430-0500 Radio Abkhazia (Mo/We/Th/Fr)  
 1430-1500 Relay of VOA in Georgian  
 (BBCM)

*Abkhaz Radio* broadcasts from the breakaway region of Abkhazia in northwest Georgia. When not carrying its own programs, Abkhaz Radio relays Radio Russia from Moscow, Radio Kuban from Krasnodar or Radio Sochi. The timing of these relays, as with all programming on Abkhaz Radio, is subject to change.

0325-0800 Abkhaz/RR 9489.75  
 0445-0500 Relay of Radio Sochi  
 0600-0700 Relay of Radio Kuban (Sa)  
 1030-1130 Abkhaz/RR 9489.75 Sa  
 1400-1700 Abkhaz/RR 9489.75 Mo-Sa  
 1445-1500 Relay of Radio Sochi (Tu-Sa)  
 (BBCM)

Since the merger of the German public broadcasters SWF and SDR their SW freqs Muehlacker 6030 and Rohrdorf 7265 have been broadcasting the popular musical program SWR 3. The only exception is SWR-International, a program about the problems and achievements of second and third generation immigrants in Germany. It is on Sats and Suns 1600-1700 on 6030 while 7265 continues with SWR-3-programming. Beside this program there are only short splits when 6030 and 7265 carry different announcements of regional concern. (19-Jun/Biener-GER/BCDX/EDXP/Padula-AUS)

**Bayerischer Rundfunk** has upgraded its shortwave service on 6085 under the headline "Neue Kurzwelle" (new shortwave). The programming now consists on a selection of popular segments from their "Bayern2Radio" and news from the "B 5 aktuell" network. "Bayern 1," which was until now carried on shortwave most of the day, is now taken just Mon-Fri 1400-1600 with its current-affairs magazine, otherwise it's musical programming was assessed as not so suitable for shortwave. Of special interest is, that as overnight service 6085 between 2200 and 0400 takes (like the "B 5 aktuell" network) the "MDR info" all-news program of **Mitteldeutscher Rundfunk** at Leipzig. Herewith the MDR is present on shortwave for the very first time. "MDR info" is otherwise carried on MW, but here in Brandenburg the BR transmitter clear provides better night-time listening, also thanks to the sound-processing at Ismaning, resulting in a better audible voice modulation than on the MDR mediumwave. Of course it will be a completely new experience for them to receive reception reports from overseas...for e-mail it's certainly the best idea to address it directly to their technical department: techhot@mdr.de (5-Jul/Ludwig-GER/EDXP/Padula-AUS)

**GHANA Ghana Broadcasting Corporation (GBC)**  
 GBC Radio 1 carries programming in Akan, Dagbani, Ewe, Ga, Hausa, Nzema and English. Radio 2 broadcasts in English. When a program common to GBC Radio 1, GBC Radio 2 and/or Radio G.A.R is being broadcast, it is identified as "Radio Ghana." Radio G.A.R is FM only. An archived recording of the 2000 news in English (carried on GBC Radios 1 and 2) is available at: <http://www.ghanaclassifieds.com/>

#### GBC Radio 2

0525-0000 English 6130

**GUAM TWR** Agana introduced a revised schedule on Jul-3, to reflect the additional (5th) transmitter coming on line. Main changes include new services in Hakka 1230-1300 (daily) 9870, and Tok Pisin 0930-1000 (Mon-Fri) 15330. (Padula-AUS/EDXP)

Freq change of **KSDA** Agat: 2300-2330 Cantonese daily, 2330-2400 in Shanghainese, Mon-Fri & in Uighur Sat/Sun NF 17870 (x17865). (3-Jul/OB-SERVER-BUL/Ivanov/BC-DX/Bueschel-GER)

**INDIA All India Radio's** Panaji transmitter is now using its operation beyond 1730 hrs. Although scheduled in A99 period but only in the first week of July they are using this transmitter site beyond 1730 hrs.

9635 1745-1945 GOS-IV  
 9705 2245-0045 GOS-I  
 11715 2045-2230 GOS-V  
 11740 0000-0045 Tamil, 2300-2400 Hindi

Still slight problem is there with modulation. (27-Jul/das Gupta-IND)

Union Minister of Information & Broadcasting Pramod Mahajan has said that **Radio Kashmir Srinagar** will be "further strengthened to counter Pakistani propaganda." (4-Jul/DH News Service, India/Vaghjee-MAU/NU/BC-DX/Bueschel-GER)

**INDONESIA** 3232.1 **RRI Bukittinggi**, local pops at 1540, talk by M at 1555, Love Ambon at 1600 and s/off 1602\*. Up from usual 3231.8kHz. (24-Jun/Yamada-JPN/Jembatan DX)

3905.7v **RRI Merauke**, 1050 local pops, then IS, tp's, ID and local news ("Warta Berita"). Frequency returned to usual 3905.0kHz around 1100. Fair to poor. (11-Jul/Yamada-JPN/Jembatan DX)

4777.1 **RRI Jakarta**, Kebayoran is now heard from local morning to local early morning regularly. (Jul/Yamada-JPN/Jembatan DX)

4855 **RRI Sorong** (spur of 4875), don't confuse with **RRI Palembang**. (Ishii-JPN/Call Sign/Jembatan DX/Yamada-JPN)

6069.8 **RRI Jayapura**, Jakarta news relay at 2001. M ID at 2005 then local pops. Local evening program is hard to hear in Japan due to heavy interference. (3-Jul/Yamada-JPN/Jembatan DX)

6153.5 **RRI Biak**, local news at 1231 w/ending music "Bagimu Negri." ID at 1233 then kroncong music. ID with announcement of Programa Satu at 1258, SCL, and followed to Jakarta news relay. (11-Jul/Yamada-JPN/Jembatan DX)

Many RRI stations belonged to Nusantara Satu network now sign off at 1600. Here's a list of sign-off times of RRI Nusantara Satu network per monitoring:

3224.8	<b>RRI Tanjung Pinang</b>	-1215*
3232	<b>RRI Bukittinggi</b>	-1600*
3265	<b>RRI Bengkulu</b>	-1600*
3395.1	<b>RRI Bandar Lampung</b>	-1700*
4003.2	<b>RRI Padang</b>	-1600*
4766	<b>RRI Medan</b>	-1450*
4925.0	<b>RRI Jambi</b>	-1400*
4927.0	<b>RRI Jambi</b>	-1700*
5040.0	<b>RRI Pekanbaru</b>	-1600*

(Yamada-JPN/Jembatan DX)

**IRAN Voice of the Islamic Republic of Iran (VOIRI)** noted on new 9725 with Persian 2100-2130\*\* // 7130 (25-Jun/EDXP/Padula-AUS)

According to IRIB web page, **VOIRI** began Japanese programming Jul 21, 1300-1330 on 15200 & 17630. Program will be on Mo/We/Sa, and repeated on Su/Tu/Th. (6-Jul/Ohtake-JPN/EDXP/Padula-AUS)

**Islamic Republic of Iran Broadcasting**, regional station at Mashhad:

0100-0230	Tajik	11680
0230-0300	Uzbek	11680
0300-0400	Dari	11680
1330-1530	Dari	7180
1530-1600	Uzbek	7180
1600-1730	Tajik	7180
1730-1800	Uzbek	7180

(BBCM + Ohtake-JPN/TIN-JPN/EDXP/Padula-AUS)

**IRELAND Radio Telefis Eireann (RTE)** via various sites:

0130-0200	English	6155-Rampisham, UK
1000-1030	English	11740-Singapore
1830-1900	English	21630-Ascension
1830-1900	English	12160-WWCR Mo-Fr
1900-1930	English	12160-WWCR Sa-Su

(BBCM + O'Driscoll/Hauser/EDXP/Padula-AUS + J. Hayde, RTE/WORLD OF RADIO/Hauser/BC-DX/Bueschel-GER)

**ISRAEL Kol Israel** changes: English 0400-0415 now on 9435 15655 (ex-15650, 11605) 17535; English 1400-1430 on 15650 and 17615 (ex-17535). (18-Jul/RVI/van Oudheusden/EDXP/Padula-AUS) Reshet Bet add on 17535 from 1900(-2115?). (26-Jun/HCBJ DXPL/BC-DX/Bueschel-GER)

**KAZAKHSTAN Radio Almaty** new German program noted Jul 5 at 1742 on 12115. (5-Jul/KoiedEN/BC-DX/Bueschel-GER)

**KENYA** 4914.95 **KBC** Nairobi, 1857 African horn style of music with vernacular M songs, at 1902 M speaker in vernacular with salaam an aleikum announcement, no news at 1900, heard earlier at 1759 with military band and timepips and news in vernacular; at 1900 GBC Accra heard underneath. Gone by recheck at 1907, leaving Ghana in the clear. (2-Jul/Veldhuis-HOL/HCDX) Seemingly reactivated. Noted in Italy on 4-July at 1806 w/news in Swahili and a clear "KBC Nairobi" ID. (Napolitano-ITL/HCDX)

**KIRIBATI** Heard that **Radio Kiribati** is back on the air on 9810. I wish I could hear it. All that I can receive at 0530 is loud bubble jamming, especially on USB, and absolutely no carrier at all despite trying various antennae combinations. Cuba again? (13-Jul/Salmaniw-BC/Rev. of Int'l. Broadcasting/Hauser-OK)

**LAOS** After returning for less than two weeks, **Lao National Radio** National Service on 6130 has been off the air again since Jul-01. **Luang Prabang** has recently moved up slightly to around 6972 (sked approx 2200-0700 and 1025-1400). Ominously, it has been off air on a number of occasions in the past few days (e.g. evenings of Jul-03 and 05 and around 0500 on Jul-06. The audio, while still fairly good by SE Asian domestic shortwave standards, has deteriorated noticeably recently—catch it while you can. Noted 0015 on Jul-08 with strong signal, local music program replacing relay of news from inactive Vientiane 6130 (Davies-THA/EDXP/Padula-AUS)

**Sam Neua**, Houa Phan Province, has moved to 4641v (x-4653v), first noted May-24. Usual hours are approx 2300-0130, 1015-1230.

**Pakse** 1370 kHz (WRTH lists 1350) noted daily 24 May-14 June at 2200-1400. The transmitter site still appears to have a couple of HF arrays identical to those at Luang Prabang, but nothing to be heard from Pakse on shortwave of course. This station often inadvertently relays Radio Singapore International in English on 6150 at 1200-1225—obviously using an insufficiently selective receiver to pick up Vientiane 6130 so that the two stations are heard with roughly equal volume. (Davies-THA/EDXP/Padula-AUS)

**LEBANON** 11514.8 **Voice of Hope** noted in English at 1740 w/religious programming, testing here. Distorted modulation, varying from slight to severe. (28-Jun/Schaay-HOL)

**LIBYA** English news from **Voice of Africa** appears to have settled on 15435 from 0125-0130v. (4-Jul/das Gupta-IND)

**MADAGASCAR Radio Madagasikara** noted 5009.6 at 2256 on extended sked with bouncy, Caribbean-flavor pop songs and high-energy DJ in Malagasy; no break observed across the hour and no spoken ID caught. (26-Jun/Hill-MA)

**MALAYSIA R. Malaysia** Channel 6 in Tamil noted with usual hum on 4845 around 1945-2045 on Jun-06. I have seen this freq listed as 2200-1600, but it still seems to be on 24 hrs and is regularly noted staying on past 1600. In the small hours of the local morning it is a very prominent signal, as it's the only broadcasting transmitter in S/SE/E Asia on 60 meters at that time, as far as I know. (Davies-THA/EDXP/Padula-AUS)

**MONACO TWR** uses now 9515 (x9490) for its bc in Romanian 1600-1645. Heard on June 26 at 1630 with progr from NOREA Radio. Via Monte Carlo (re-x9445). (26-Jun/Bergmann-GER/BC-DX/Bueschel-GER)

**NETHERLANDS/KOSOVO-METOHIBA Radio 21** *Pristina* in Albanian now is on the air via R Nederland's Flevo site, 1828-2025 9495. Studio located in Skopje capital of Macedonia. News in English (6-7 min) at 2015. (3-Jul/OBSERVER-BUL/Ivanov/BC-DX/Bueschel-GER) As Radio 21 *Pristina* continues to be unable to feed audio to Radio Netherlands (communications links there remain unreliable) the daily SW broadcast has been cut back to 10 minutes at 1830-1840 UTC on 9495kHz, which will be a taped announcement explaining why the Radio 21 programme is missing. As soon as Radio 21 sorts out its technical problems and can feed us the programme, the transmission time will revert to 1830-2025. English news remains available intermittently on their Website at [www.radio21.net](http://www.radio21.net). (22-Jul/Sennitt, RN/swprograms)

**PAKISTAN** The Islamabad program to Gulf & Iran 1800-1900 found on new 15174.98 with no trace of signal on former 11600. (14-Jul/Green-UK/BC-DX/Bueschel-GER)

**PERU 4606.6 Radio Ayaviri**, Ayaviri, 2358-0045, program Informativo La Voz de Melgar w/local nx and commentary, ID "...las 7 de la noche con 7 minutos en el informativo La Voz de Melgar de Radio Ayaviri...", many ments of Ayaviri and la Provincia de Puno, ID @0030 "Esta usted en sintonia de Radio Ayaviri La Voz de Melgar que transmite desde Ayaviri, Puno, Peru... rumbo hacia el nuevo milenio..." (2-Jul/Rodriguez-COL/Conexion Digital/Rev. of Int'l. Broadcasting/Hauser-OK)

**4790 Radio Atlantida**, Iquitos (t), 0107, M talk in Spanish. At 0113 music and announcements with strong echo-effect. Nice Andean flute music, tentative ID's. Fade-out after 0130. (27-Jun/Veldhuis-HOL)

**4824.42 Radio La Voz de la Selva**, Iquitos, 1005-1107 morning music program "El Madrugador" (airs 0500-0600 local, Monday to Saturday). At 1107 newscast "Panorama." Fair. (17-Jul/TIN-JPN/Relampago DX)

**4890.16 Radio Chota**, Chota, Cajamarca, 0130 extreme high Andean guitars and M vocals; fast-

paced, professional sounding newscast starting around 0156 with numerous "R Chota de Peru" IDs. (24-Jul/Novello-NC)

**4914.43 Radio CORA del Peru**, Lima, 1028-1031 News flash "Servicio Informativo de CORA." (26-Jul/TIN-JPN/Relampago DX)

**4995.58 Radio Andina**, Huancayo, at 1025 w/r nice huaynos. (26-Jul/TIN-JPN/Relampago DX)

**5025.00 Radio Quillabamba**, Quillabamba, 1007-1020 OA folklore and several comunicados in Quechua and Spanish. ID as "Radio Quillabamba, el Centro de los Medios de Comunicacion Social, transmitiendo desde Quillabamba, Provincia de La Convencion, Peru." (17-Jul/TIN-JPN/Relampago DX)

**5523.05 Radio Sudamerica**, Cutervo (p), 0043-0104, Instrumental music and M talk in Spanish. Regular silences in announcements, like the announcer was thinking about what he was going to say. Music bridges with movie-theme. At 0054 Peruvian music with W vocals. Time checks, M announcements at 0101, followed by W announcements. (27-Jun/Veldhuis-HOL)

**5859.39 Radio Nueva Cajamarca**, finally heard in Tokyo per tip from Rafael Rodriguez. Noted at 1055-1115 w/OA folklore and greetings; frequent ID as "Radio Nueva Cajamarca." Heavy ute QRM. (10-Jul/TIN-JPN/Relampago DX)

**6173.83 Radio Tawantinsuyo**, Cusco, 1115 poor w/newscast by W. (10-Jul/TIN-JPN/Relampago DX)

**6520.3 Radio Paucartambo** (t), 0025 M w/TC, 0029 poss. advertisement and ID, but too much QRM. Andean flute tunes and M talks. (1-Jul/Schaay-HOL)

**6674.02 Radio Super Sensacion**, Huancabamba, \*0958-1005 poor at sign-on w/Peruvian National Anthem, then an OA folklore show. (17-Jul/TIN-JPN/Relampago DX)

**6797.68 Radio Ondas del Rio Mayo**, Nueva Cajamarca, 1051-1055 fair w/rustic OA folklore and comunicados. (10-Jul/TIN-JPN/Relampago DX)

**6955.0 Radiodif. Paraton de Huamarca** 0028 Andes folk songs, M announcer in Spanish, ID heard at 0101. (28-Jun/Schaay-HOL) [Finally, someone on 6955 with real programming!-AQ]

**9721.6 Radio Victoria**, Lima, 0717-0725. Romantic music, M speaker in Spanish, promo/advertising, fading out. (27-Jun/Veldhuis-HOL)

0100-0200	English	7115
0200-0300	Chinese	11695 15115 15460
0200-0300	English	7115

(Ferguson, IBB Spectrum Management Division)  
[Tests were widely reported and strong; this removes Sri Lanka from the "DX" category worldwide-AQ]

**SUDAN** 8000 *Voice of Sudan*, \*1559-1800, open military tune, ID, and news. At the same time (1601) an UNID station signed on [I presume on the same frequency?—AQ] with continuous Somali Songs and went off just after V. of Sudan. The same UNID is also on 6990. (25-Jul/Vaghjee-MAU/Rev. of Int'l Broadcasting/Hauser-OK)

**SWAZILAND** Malagasy program from *TWR* noted new 9585 (ex 7175) 1510-1525 from and 1525-1555 from FEBA (from the same transmitter). Signature tune of *TWR* noted just before 1510 and signature tune of FEBA Radio noted at 1525 hours. (11-Jul/das Gupta-IND) Freq change of *TWR* Manzini in Swahili: 1702-1747 (Sat/Sun till 1802) NF9790, (x9620, re-x9585). (16-Jun/Panlview-BUL/BC-DX/Bueschel-GER)

**THAILAND** *Radio Thailand* sked, transmissions marked with an asterisk are from the US Interna-

tional Broadcasting Bureau (IBB) relay station at Udorn Thani in Thailand. The schedule for these channels was supplied by the IBB in June 1999. All other frequencies are from Radio Thailand's own transmitters.

(BBC + Timofeyev-RUS/Mujunen/EDXP/Padula-AUS)

*Radio Thailand* domestic service on 6070 noted Jul-07 at various times around 0200-0500 // 891, 7115, with separate programming at times on 4830 only. Previously for many months, 4830 and 6070 were always noted in parallel, separating at times from 891 and 7115. 891 and all three HF freqs often carry the same program for extended periods, such as in local early morning and late afternoon/early evening. Domestic service on 7115 now reverted to signing-on early in the morning, presumably 2200, after several months of coming on air around 0200v. Possibly due to the disappearance of strong signal in Slav lang previously on 7115 around this time, probably R. Yugoslavia to NAm, Jun-28. (Davies-THA/EDXP/Padula-AUS)

**TURKEY** Freq change of *Voice of Turkey* in English: 1230-1325 NF 15225 strong, but low audio, (x17830). Transmission in Hungarian back the air: 0930-1025 15405 (55555). First noted June 15. (3-Jul/OBSERVER-BUL/Ivanov/BC-DX/Bueschel-GER)

**UKRAINE** According to the official transliteration scheme, adopted by the Ukrainian Legal Terminology Commission, the capital should be spelt Kyiv in English. The name of the country is Ukraine, not The Ukraine. (14-Jul/Trutenau/Arctic News Desk/BCDX/EDXP/Padula-AUS)

**UNITED KINGDOM** *BBC* WS English to SAs on 17790 now noted daily at 0530-0600, thus filling a long-standing gap. This segment appears to be via Thailand. (28-Jun/Davies-THA/EDXP/Padula-AUS)

Freq changes of **BBC** in Albanian: 1000-1030 Mon-Fri (Sat/Sun til 1015) NF 15190 (x15555). Also deleted 13745. 1315-1345 Mon-Fri (Sat/Sun til 1330) deleted 13670. (3-Jul/OBSERVER-BUL/Ivanov/BC-DX/Bueschel-GER)

**Merlin Network One** again using shortwave, noted Jul-09 2340 powerhouse 6015 and somewhat less strong 7325 and 9720. Shortwave sked now Fri/Sat 2100-0100 and Sat 1300-1700. (9-Jul/Ludwig-GER/EDXP/Padula-AUS)

**Virgin Radio** began on shortwave on Jul-02, with this sked via 250 kW at Skelton, UK:

1300-1700 7130 9750 12035 Sa  
2100-0100 7325 9720 Fr  
2100-2300 6140 Fr  
2300-0100 6015 Fr

(Merlin Communications/Mujunen/EDXP/Padula-AUS) Noted 1300-1700 on 9750 and 12035, 1300-1430 on 15235. (18-Jul/RVI/van Oudheusden/EDXP/Padula-AUS)

(BBCM)

**VIETNAM** *Voice of Vietnam* noted 13740 at \*0000, coming on with opening announcement that included mention of Vietnam; continued with man and woman swapping the mike in Vietnamese, occasionally pausing for short bridges of Oriental orchestral music. Into interview or discussion at 0015. Lousy signal at s/on, then gradually improved a bit. This channel recently reported as new by Timofeyev, who says it's the Domestic Service // 9730, (28-Jun/Hill-MA)

*Lai Chau* recently moved from long-standing 6397v to 6382.5v, and has also changed its hours—now heard at approx? 2200-0000, 0400-0530, 1155v-1355v. This could be a deliberate change of freq to allow a later evening broadcast while avoiding the strong N Korean station on 6398v.

*Yen Bai* now on 6393v at approx 2325-0000, 0400-0600, 0955v-1030, 1200-1330v. Modulation varies between poor and awful. I have been unable to trace *Thai Nguyen* (last heard in early April on 6451v) for several months—presumably it's now inactive, although at the best of times it was far weaker than the other Vietnamese regionals. (15-Jul/Davies-THA/EDXP/Padula-AUS)

A check of Vietnamese regionals noted just after 1200 on Jul-15:

4796 *Son La*, varies around 4795-4796.

5596 *Lao Cai*, //6689, varies around 5595-5598.

6382 *Lai Chau*, recently varying around 6382-6383. Clear ID at 1200 sign-on—this and *Yen Bai* are easy to confuse as they have more or less swapped frequencies over the last few months. Audio from *Lai Chau* is usually much better, and the station opens with a long piece of gentle, repetitive music played on strings and woodwind starting around five minutes before the hour. 6393 *Yen Bai*, usual very poor modulation.

6689 *Lao Cai*, //5596. Appeared to be off air for a few days this week, back with poor audio on Jul-14 but clear as a bell on Jul-15. 7155 Ha Giang, apparently relaying Hanoi 1 but as usual hard to hear much due to the very shallow modulation. Varies 7154-7156. (Davies-THA/EDXP/Padula-AUS)

**YUGOSLAVIA** Since 8th July 1999, *Radio Yugoslavia* has been observed to have reverted to a transmission schedule similar to that broadcast prior to a NATO attack on the Radio-Television Serbia HQ in Belgrade on 23rd April 1999. A reduced schedule had been introduced on 2nd May.

This schedule is based on information from the broadcaster. Broadcasts times may vary and transmissions are often shorter than listed. Radio Yugoslavia's main transmitting site is at Bijeljina in the Bosnian Serb part of Bosnia-Herzegovina.

# Pirate Radio Report

Chris Lobdell  
P.O. Box 146  
Stoneham, MA 02180-0146  
Internet: clobdell@mediaone.net

Hello and welcome to the August edition of the edition of the **PIRATE RADIO REPORT**. I've just returned from a two week vacation at Walt Disney World in Florida. Too hot for me down there this time of year!

Things are a little slow this month, so I think I'll review my tips on proper reporting to pirate stations.

Sending a reception report to a pirate station is similar to reporting to a "legal" shortwave broadcaster, but there are differences as well.

The usual data of time, date and frequency, SINPO or reception quality are required. Since pirates are small time operators, they tend to value your reports more than the average shortwave broadcaster. In my own experience, I've had a better QSL return rate from pirates than standard broadcasters.

Return postage. Since pirates use maildrops to receive and send mail, it is imperative that you either send three 33 cent stamps or \$1.00 US. If you enclose a cassette tape recording with your report, it would be best to double those amounts.

Reception quality. Did the transmission have problems? Was the modulation garbled? Did the frequency drift. Your comments are appreciated

Program comments. Be sure to tell the op what you liked and disliked about his show. What pirates hate most is the listener who tries to suck up to them praising the program. Be honest and constructive in your comments.

Personal stuff. Tell the station about yourself, your equipment, hobbies, etc. Most pirates don't receive more than 10 or so reports per month, so each letter is an encour-

agement to continue his operations. Mail is positive feedback to pirates.

Anyway, I think you'll be happy with your results.

## Loggings...

Many thanks to the following who contributed logs this month: Bill Wilkins-CO, Dave Theriault-Nova Scotia, and George Zeller-OH

**BLIND FAITH RADIO**, was heard in Ohio on July 25<sup>th</sup> at 2115 UTC on 6955 kHz USB. Dr. Napalm was playing classic rock from the Woodstock album. This station uses the Merlin, Ontario maildrop. [Zeller-OH]

**CHU CANADA**, the pirate time station was heard on 6950 kHz USB on June 19<sup>th</sup> at 0020 to 0031 sign off. A good selection of Elvis Costello tunes were heard. [Wilkins-MO]

**KERW**, was heard at 2157 UTC on July 25<sup>th</sup> on 6955 kHz USB. They were playing a collage of audio clips from various pirates, such as WRX, WHYP and Radio Bingo. [Zeller-OH]

**WMPR** managed to make it through the QRM from Peru and was heard on July 17<sup>th</sup> at 2345 UTC on 6955 kHz in the AM mode with the usual techno stuff including "Wonderwall". It signed off after 0013 UTC. [Theriault-NS]

**WWRB**, a new one was noted on June 19<sup>th</sup> from 0112 to 0144 UTC sign off with a broadcast of R&B/Soul music on 6955 kHz in the LSB mode. [Wilkins-MO]

Anyway, that's it for this month. Be sure to send in logs for next month's column!

Happy Pirate DX!

Mr. John Sgrulletta,

This letter serves as confirmation of your Jan 21, 1999 reception of Armed Forces Radio and Television. The signal originates from Naval Computer and Telecommunications Area Master Station, Key West, Florida at 12689.5 khz and Naval Computer and Telecommunications Station, Puerto Rico at 6458.5 khz.

Naval Computer and Telecommunications Area Master Station, Key West, Florida broadcasts with a 48 foot inverted cone antenna from Boca Chica, Florida with 8 kilowatts of power. Naval Computer and Telecommunications Station, Puerto Rico broadcasts with a ground-based, omnidirectional wire antenna with a 30 foot diameter. The signal is broadcast at 10 kilowatts from Isabela, Puerto Rico.

a reception in Vietnam. This may of been for the clandestine "Voz da Timor" station whos-ID was heard the previous day. (Craighead-KS). Deutsche Welle 15470 via Sines f/d "Transmission Tower" cd. in 36 ds v/s Horst Scholz. (Humenyk-ONT).

idental Palace" cd. in 52 ds. (Borokowski-NY). Adventist World Radio Europe 11600 via Rimavska Sobota f/d "Newbold College of Bracknell, UK" cd. in 36 ds. w/ stamp, rpt. form, personal ltr. and a pocket calendar. (Humenyk-ONT).  
**SOUTH AFRICA:** Channel Africa 11720 via SENTECH f/d "Johannesburg Tower" cd. w/ stickers and schedule in 32 ds. v/s Kathy Otto. (Borokowski-NY).  
**SWAZILAND:** Trans World Radio 4775 f/d folder cd. in 60 ds. for 3 IRCs. Also rcvd. religious literature and schedule. (Wilkins-MO).  
**SWEDEN:** Radio Sweden International 9495 and 12060 f/d "Sundsvall" cd. in 11 ds. for an E-mail rpt

**NOTES:** Eric Bueneman says that the expanded medium wave QSLs (1610-1700 kHz) that we occasionally list here in the QSL Column should be eliminated. They are not considered to be shortwave broadcast by NASWA's own definition. More rightly they belong in the IRCA bulletin. Eric is correct; however, if I have space available I saw no harm in it...Sam. Does anyone else have an opinion?.....Sam. Gene Borokowski says the month of June has been kind to him. QSLs have arrived from Ascension, Swaziland, Uzbek and France. Good QSLing.....Sam.

Taylor McNeil in Wakefield, MA is a regular reader of the bulletin and says hello to everyone...Sam.  
Jim Moats in Ravenna, OH sent along another very detailed listing of the Radio Free Asia schedule. Thank you.....Sam.

to the station's web site. (Palmerheim-WA). TERACOM 13580, 13625 and 13635 f/d "Horby Control Room" cd. in 25 ds. v/s Mr. Hakan Widerstedt. (Craighead-KS).  
**SYRIA:** Radio Damascus 12085 after trying for nearly 3 years with many f/up rpts., I sent a new report and 10 weeks later I received via registered mail, 2 f/d cds. w/ a sticker and a copy of the Syria Times. (Maroti-NY). f/d "Logo" cd. in 54 ds. w/ sticker, schedule & newspaper. (Borokowski-NY). 12085 and 13605 f/d "Globe w/ Tower" cd. w/ sticker, schedule and newspaper in 123 ds. (Humenyk-ONT).  
**TADZHIK REPUBLIC:** Radio Free Asia 15695 via Dushanbe p/d ltr. w/o site in 3 mo. (Barto-CT).

**TAIWAN:** Radio Taipei International 15695 f/d "Taiwanese Theatre Performance in Costume" cd. in 100 ds. (Humenyk).

Sorry to miss providing the column last month, but in the latter part of June, on no notice, we wound up in the hospital for an 8-day stay — and we were in no shape to inform the NASWA publisher.

The Voice of Asia has changed from <http://www.cbs.org.tw/english/engb.html> to <http://www.voiceofasia.actis.kz/eng/about/index.html>. We don't get a live page there, but <http://www.cbs.org.tw/english/engprogram/engb.html> seems to be active. From this page you can pick either Radio Taipei International or the Voice of Asia. RAI (Italy) had a page at <http://www.mix.it/raiinternational/> but this has changed to <http://www.rai.it/>; the English language page is at <http://www.rai.it/eng.htm>. Note that this is not the page the button on the home page takes one to. And the Radio Jamaica URL of <http://www.jol.com.jm/thelwelr/RJRFriend.html> has changed to the easier URL of <http://www.radiojamaica.com/>.

Andy Sennitt of Radio Netherlands sent word of two updates.

New to the Web is Albanian Radio Television, additionally known as Radio Televizioni Shqiptar. The site is hosted in Austria. The current broadcast schedule — for Europe and North America — is posted. There is no audio on the site. In fact, the server seems to be a bit slow even on a T1 or ISDN connection, so be patient. The URL is <http://rtsh.sil>.

at/. Watch for further developments.

There is a vastly improved Web site for the Voice of Vietnam. Lots of information, news stories, weather, audio on-demand, and links to other Vietnam Web sites all can be found here. Unfortunately there is a silly arrangement to access the English language page. The English language page URL changes with the date, e.g. [http://www.vov.org.vn/1999\\_07\\_21/Defaultv.htm](http://www.vov.org.vn/1999_07_21/Defaultv.htm). But we note the English language page is not updated every day. The only realistic option is to go to the main URL of <http://www.vov.org.vn/> and then click on the English language button-link atop the page.

Then we looked further. The unofficial pages of the Voice of Vietnam prepared by Mrs. Nguyen Thi Thu Hang (TNVN) and Australian Ian Collard have not been updated since 1996, so I think it is time to drop these Web sites off the radar screen. The page is hosted on a Vietnamese server and mirrored in Australia. The URLs are [http://www.ioit.ac.vn/tieng\\_noi\\_vn/tnvn.html](http://www.ioit.ac.vn/tieng_noi_vn/tnvn.html) and [http://coombs.anu.edu.au/~vnm/tieng\\_noi\\_vn/tnvn.html](http://coombs.anu.edu.au/~vnm/tieng_noi_vn/tnvn.html), respectively. Frankly I think the authors should remove these pages. It is a disservice to leave old information on the Web, as it just confuses those new to the Internet or those who do not pay attention to dates. But we have no control over such matters. Poof!

Changes have come to our own Web site. Read the "Musings" page for details.

Thank you all you regular dedicated contributors and also a big thank you to the newcomers. My noise problem on the tropical bands seems to have cleared up, hence some loggings from me. The Cameroon log was the first evening tropical band DX I've had in ages.

This month loggings from 10 states and 2 foreign countries. Feel free to contribute any loggings despite what experience level you're at. I picked up an NRD-345 recently. It does not have a notch filter or passband tuning, which can be essential for tropical band Dxing. However, it has almost no background noise. I am quite pleased with it. You may email loggings to spasz@dataplusnet.com or snail mail to 314 Riverview Drive, Apt. 16, Manitowoc, WI 54220 or PO Box 716, Manitowoc, WI 54221. Next deadline for me is August 19. Keep listening! 

# International Band Loggings
