A-indices should decrease to an average daily lvl of below A-7 during the period from Oct. 17-20, then will climb, possibly to the low or mid 20s the following weekend. Keithmill watermarked paper, he claims, primarily DC-distributed brand...a small operation. He continues, noting San Pedro Sula perched near TG border, w/question: why assume if not Swan Island, then Honduran mainland? TG QTH possible. (Unid. source) Previous offered just to stir the pot a bit, hi. (ed.)

AZAD KASHMIR - 3915, AKR finally hrd during 1445-1452 "window" when BEC/Tebrau off air. Weak w/subcontinental vocals. Sometimes BEC leaves on carrier, blocking fq. (Hill)

....So ends another DXH, sports fans. Remember, if the tip you are thinking of send-in appears each month in the LR, we don't want it. Keep it fresh. Items used here are about 30% of what is received here...so if your tips appear, you've hit the big time, hi. Better 3 or 4 very detailed but fresh, fresh, fresh items than a dozen stale cadXavers.
